Christchurch City Council/751.113	Anne Dingwall/ #FS2037.935	Seek Amendment	Remove cross out from Residential Hills and Residential Suburban Density Transition Zone on the map A legend. Update planning maps legend to be consistent with District Plan zones deleted and added by PC 14.	Support
Christchurch City Council/ #751.121		Seek Amendment	Remove the Residential Hills Precinct from areas [on McVicar Drive, Map 50) marked "A" and "C". Apply the Residential Hills Precinct over the entirety of the areas developed, marked as "B" and "D".	

				
Christchurch City Council/751.121	Anne Dingwall/ #FS2037.943	Seek Amendment	<p>Remove the Residential Hills Precinct from areas [on McVicar Drive, Map 50) marked "A" and "C". Apply the Residential Hills Precinct over the entirety of the areas developed, marked as "B" and "D".</p>	Support

These areas are shown as FUZ that include the Residential Hills Precinct, which is not applicable to this zone. The Precinct extent should be updated accordingly to only where MRZ is proposed. This includes areas marked as "B" and "D" below, with areas marked "A" and "C" undeveloped.

Christchurch City Council/ #751.130		Seek Amendment	Apply all zoning changes, as relevant, that Plan Change 5F has made operative to Plan Change 14 planning maps.	
Christchurch City Council/751.130	Waipuna Halswell Hornby Riccarton Community Board/ #FS2027.14	Seek Amendment	Apply all zoning changes, as relevant, that Plan Change 5F has made operative to Plan Change 14 planning maps. Plan Change 5F made numerous changes to operative zones and is now fully operative, but has not been applied within PC14 Planning Maps.	Not Stated
Christchurch City Council/751.130	Anne Dingwall/ #FS2037.952	Seek Amendment	Apply all zoning changes, as relevant, that Plan Change 5F has made operative to Plan Change 14 planning maps. Plan Change 5F made numerous changes to operative zones and is now fully operative, but has not been applied within PC14 Planning Maps.	Support
Christchurch City Council/751.130	Karyn Spencer/ #FS2061.1	Seek Amendment	Apply all zoning changes, as relevant, that Plan Change 5F has made operative to Plan Change 14 planning maps. Plan Change 5F made numerous changes to operative zones and is now fully operative, but has not been applied within PC14 Planning Maps.	Oppose
Christchurch City Council/ #751.143		Seek Amendment	Remove spot zoning as MRZ of heritage items sites, where these would otherwise be HRZ zoned in line with their surroundings. This is mostly in Merivale and Papanui HRZ, a few elsewhere eg Church Corner area [Map series A & interactive map].	
Christchurch City Council/751.143	Anne Dingwall/ #FS2037.965	Seek Amendment	Remove spot zoning as MRZ of heritage items sites, where these would otherwise be HRZ zoned in line with their surroundings. This is mostly in Merivale and Papanui HRZ, a few elsewhere eg Church Corner area [Map series A & interactive map]. There is a mapping issue where some but not all operative and proposed heritage items and settings have been downzoned from HRZ to MRZ on a spot zone basis. This is not consistent across heritage sites, nor is it necessary as heritage rules already control development on these sites.	Support

Christchurch City Council/ #751.144		Seek Amendment	<p>Amend the Series D planning maps as follows:</p> <ol style="list-style-type: none"> 1. move all Historic Heritage layers to Series C; 2. improve the legibility of the LPTAA symbology; 3. move all coastal hazard layers to Series B (including Tsunami Management Area); 4. remove all Designations from Series D (already captured in Series A); 5. rename the Series D maps to "Qualifying Matter Overlays" or similar. 6. Where required, conduct any required consequential changes to sub-chapter 6.1A. 	
Christchurch City Council/751.144	Anne Dingwall/ #FS2037.966	Seek Amendment	<p>Amend the Series D planning maps as follows:</p> <ol style="list-style-type: none"> 1. move all Historic Heritage layers to Series C; 2. improve the legibility of the LPTAA symbology; 3. move all coastal hazard layers to Series B (including Tsunami Management Area); 4. remove all Designations from Series D (already captured in Series A); 5. rename the Series D maps to "Qualifying Matter Overlays" or similar. 6. Where required, conduct any required consequential changes to sub-chapter 6.1A. <p>The introduction of the Series D planning maps has resulted in a large amount of overlays being displayed on one map. This can cause confusion for plan users who could easily miss other qualifying matters that pertain to their area of interest. The introduction of Series D was a response to the requirement of the Act to illustrate how they apply to any spatial layers (s77J(4)(b)). Council have also sought to introduce a new sub-chapter (Ch 6.1A) to be clear on which plan change elements are qualifying matters and which parts of the Plan are affected accordingly. This 'directory approach' means Plan users are able to more easily see how restrictions apply. The approach also means that it is technically not necessary for a single map series to display all qualifying matters and an opportunity exists for certain layers to be displayed in accordance with the categories of other already established map series.</p>	Support
Greg Partridge/ #794.7		Seek Amendment	South Richmond should be exempt from the Housing Intensification [Plan Change].	
Greg Partridge/794.7	Anne Dingwall/ #FS2037.730	Seek Amendment	<p>South Richmond should be exempt from the Housing Intensification [Plan Change].</p> <p>The submitter is concerned that natural hazard risks have not been adequately considered in implementing central government's requirements for housing intensification and development of qualifying matters. The submitter has provided extensive commentary on hazards in their submission. The submitter's analysis of earthquake and flood hazard risks to South Richmond and Christchurch in general can be summarised as follows:</p> <p>Earthquake Risk</p> <ul style="list-style-type: none"> - The Christchurch Fault is an active seismic fault that runs under the city from close to Riccarton through to the eastern suburbs and off the coast of New Brighton. It is believed to have been responsible for the series of earthquakes that rocked the city on Boxing Day 2010 and may have caused the damaging earthquake of 1869. - The Christchurch Fault runs parallel to the more destructive Port Hills Fault which lies 5km to the south. - Christchurch sits within relatively close proximity to the Alpine Fault, one of the most active fault lines in the world, and one that has a history of sudden movement. The fault has ruptured four times in the past 900 years, each time producing an earthquake of about magnitude 8. - Seismic activity caused a lot of land in Christchurch to subside during the destructive Canterbury earthquakes of 2011 and 2012. - Computer modelling indicates that when the Alpine fault ruptures it will cause significant levels of peak ground velocity – the trampolining effect – meaning major structural damage to houses, commercial buildings and land here in Christchurch is almost certain, and will be widespread. It will produce one of the biggest earthquakes since European settlement of New Zealand, and it will have a major impact on the lives of many people. 	Support

			<p>- Christchurch will be impacted by widespread liquefaction, the land will further subside, roading and bridges will be left damaged or impassable and the underground infrastructure will not be left intact.</p> <p>Flood Hazard Risk</p> <p>- Currently as little as 30mm of rainfall is all that is necessary before surface flooding builds up in Christchurch.</p> <p>- Niwa meteorologists have indicated that climate change is making rain more intense and more frequent in Christchurch because of a warming atmosphere holds more moisture.</p> <p>- What climate change has done is beef up the weather making bad flooding more likely, and more frequent due to the effects of</p> <ul style="list-style-type: none"> • Fluvial, or river floods – which occur when rivers burst their banks and flood the nearby lands. • Pluvial, or surface flooding - when the rain is just so heavy that it overwhelms local drainage • Coastal flooding, or storm surges – an occurrence when strong winds fling water onshore <p>- Current projections show that in less than 80 years about 35% of Christchurch will be inundated and vulnerable to regular flooding. Low-lying areas of the city – areas that used to be wetlands prior to European settlement – are most at risk, and they are not just coastal areas. Suburbs in central Christchurch that are earmarked for accelerated intensification, such as Edgware and St Albans are prone to flooding.</p> <p>- It would be reckless and irresponsible for Council allowing development to occur in flood prone areas and those that will flood in the future. Increasing the height of foundations and floor levels will not protect residents from having to be rescued from flood-stricken properties nor the massive costs of repairing flood damaged properties.</p> <p>- Controversial plans to increase housing density across Auckland have been delayed by a year, so that Auckland Council can assess the impact of the recent floods and decide where homes should be built. The government has given the council the extra time, but also wants Auckland to consider how more intensification might be possible in “resilient” parts of the city.</p> <p>- With Christchurch being flood prone and highly susceptible to significant seismic activity, surly the Christchurch City Council should be pointing that out to Central Government and asking them to quantify how resilient any part of the city actually is.</p>	
Greg Partridge/794.7	David Mountfort/ #FS2070.3	Seek Amendment	<p>South Richmond should be exempt from the Housing Intensification [Plan Change].</p> <p>The submitter is concerned that natural hazard risks have not been adequately considered in implementing central government's requirements for housing intensification and development of qualifying matters. As set out in this submission, Kāinga Ora oppose the Public Transport Accessibility Qualifying Matter (QM) and the Airport Noise Influence Area QM and therefore seek as a consequence of deleting these QMs that the RS and RSDT zoned areas within these QMs be rezoned to MRZ. Kāinga Ora note some ambiguity in the provisions as to whether the land that is subject to the Tsunami Risk QM is intended to be zoned MRZ or RS/ RSDT. Whilst agreeing that a high risk of natural hazards is a legitimate QM, our submission raises concerns with whether the costs and benefits of this QM strike an appropriate balance, and question the appropriateness of using a threshold of a 1:500 year event plus a 1m rise in sea levels as the mapping base. Use of a lower density RS/RSDT zoning should only be used where the risk of hazards is proven to be high and with a high return period. The areas subject to the 'Local Centre Intensification Precinct' are sought to be rezoned from MRZ to HRZ and the precinct overlay deleted. These areas are ideally located adjacent to medium-sized commercial centres that provide residential activities with easy access to a wide range of services and are also generally well serviced by public transport. As such, a HRZ is considered to be more appropriate and better aligned with NPS-UD and National Planning Standard outcomes. Kāinga Ora submits that Metropolitan Centres be employed within the centre hierarchy. Kāinga Ora seek that this covers the existing key activity areas for Riccarton, Papanui, and Hornby. Kāinga Ora support the inclusion of a HRZ in appropriate locations close to the City Centre, Metropolitan and larger suburban commercial centres. The zone boundaries for the HRZ is supported, with the only exception being in</p>	Oppose

			<p>the Riccarton area where an extension of the HRZ boundaries are sought to better recognise the proximity of this area to a wide range of commercial services, university activity node, high frequency public transport, cycle ways, and the relief sought in the submission opposing the Riccarton Bush, Industrial Interface, Airport Influence Density Precinct, and Piko/Shands heritage area and character area QMs. Noting also the recommendation that Kāinga Ora has suggested in relation to amendments to the Industrial General Zoning at 247 Riccarton Road and 37 Euston Street. Kāinga Ora seeks to rationalise and simplify the height limits applicable to the HRZ, depending on the size of the adjacent commercial centre. Consequential amendments are therefore required to the various height/ intensification precincts to reflect the outcomes sought in the submission.</p> <ol style="list-style-type: none"> 1. Extend the boundary of HRZ in the Riccarton area as shown in the maps attached to this submission in Appendix 3. 9. Delete the various height/intensification precincts and replace with a single 'Height Variation Control' precinct to reflect the 36m height limit sought in the submission for the HRZ adjacent to the City Centre, Hornby, Riccarton, and Papanui centres as shown in the maps attached to this submission within Appendix 3. Generally these are: <ul style="list-style-type: none"> - 22m HDZ 1.20km from the edge of the new MCZ and the CCZ. - 36m Height Variation Overlay 400m from the edge of the new MCZ and CCZ. <p>See original submission for appendix 3 maps</p> <p>Kāinga Ora support the implementation of a Medium Density Residential Zone (MRZ) over all relevant residential zones. As set out in this submission, Kāinga Ora oppose the Public Transport Accessibility Qualifying Matter (QM) and the Airport Noise Influence Area QM and therefore seek as a consequence of deleting these QMs that the RS and RSDT zoned areas within these QMs be rezoned to MRZ. Kāinga Ora note some ambiguity in the provisions as to whether the land that is subject to the Tsunami Risk QM is intended to be zoned MRZ or RS/ RSDT. Whilst agreeing that a high risk of natural hazards is a legitimate QM, our submission raises concerns with whether the costs and benefits of this QM strike an appropriate balance, and question the appropriateness of using a threshold of a 1:500 year event plus a 1m rise in sea levels as the mapping base. Use of a lower density RS/RSDT zoning should only be used where the risk of hazards is proven to be high and with a high return period. The areas subject to the 'Local Centre Intensification Precinct' are sought to be rezoned from MRZ to HRZ and the precinct overlay deleted. These areas are ideally located adjacent to medium-sized commercial centres that provide residential activities with easy access to a wide range of services and are also generally well serviced by public transport. As such, a HRZ is considered to be more appropriate and better aligned with NPS-UD and National Planning Standard outcomes. Kāinga Ora submits that Metropolitan Centres be employed within the centre hierarchy. Kāinga Ora seek that this covers the existing key activity areas for Riccarton, Papanui, and Hornby. Kāinga Ora support the inclusion of a HRZ in appropriate locations close to the City Centre, Metropolitan and larger suburban commercial centres. The zone boundaries for the HRZ is supported, with the only exception being in the Riccarton area where an extension of the HRZ boundaries are sought to better recognise the proximity of this area to a wide range of commercial services, university activity node, high frequency public transport, cycle ways, and the relief sought in the submission opposing the Riccarton Bush, Industrial Interface, Airport Influence Density Precinct, and Piko/Shands heritage area and character area QMs. Noting also the recommendation that Kāinga Ora has suggested in relation to amendments to the Industrial General Zoning at 247 Riccarton Road and 37 Euston Street. Kāinga Ora seeks to rationalise and simplify the height limits applicable to the HRZ, depending on the size of the adjacent commercial centre. Consequential amendments are therefore required to the various height/ intensification precincts to reflect the outcomes sought in the submission.</p> <ol style="list-style-type: none"> 1. Retain MRZ over areas where MRZ is proposed in PC14 as notified unless otherwise changed by this submission. 2. Rezone to MRZ areas that are proposed as RS/ RSDT zones under the Public Transport Accessibility and Airport Noise Influence Area QMs. 3. Rezone Lyttelton to MRZ.

Delete the various height/intensification precincts and replace with a single 'Height Variation Control' precinct to reflect the 36m height limit sought in the submission for the HRZ adjacent to the City Centre, Hornby, Riccarton, and Papanui centres as shown in the maps attached to this submission within Appendix 3. Generally these are:</p> <ul style="list-style-type: none"> - 22m HDZ 1.20km from the edge of the new MCZ and the CCZ. - 36m Height Variation Overlay 400m from the edge of the new MCZ and CCZ. <p>See original submission for appendix 3 maps</p> <p>Kāinga Ora support the implementation of a Medium Density Residential Zone (MRZ) over all relevant residential zones. As set out in this submission, Kāinga Ora oppose the Public Transport Accessibility Qualifying Matter (QM) and the Airport Noise Influence Area QM and therefore seek as a consequence of deleting these QMs that the RS and RSDT zoned areas within these QMs be rezoned to MRZ. Kāinga Ora note some ambiguity in the provisions as to whether the land that is subject to the Tsunami Risk QM is intended to be zoned MRZ or RS/ RSDT. Whilst agreeing that a high risk of natural hazards is a legitimate QM, our submission raises concerns with whether the costs and benefits of this QM strike an appropriate balance, and question the appropriateness of using a threshold of a 1:500 year event plus a 1m rise in sea levels as the mapping base. Use of a lower density RS/RSDT zoning should only be used where the risk of hazards is proven to be high and with a high return period. The areas subject to the 'Local Centre Intensification Precinct' are sought to be rezoned from MRZ to HRZ and the precinct overlay deleted. These areas are ideally located adjacent to medium-sized commercial centres that provide residential activities with easy access to a wide range of services and are also generally well serviced by public transport. As such, a HRZ is considered to be more appropriate and better aligned with NPS-UD and National Planning Standard outcomes. Kāinga Ora submits that Metropolitan Centres be employed within the centre hierarchy. Kāinga Ora seek that this covers the existing key activity areas for Riccarton, Papanui, and Hornby. Kāinga Ora support the inclusion of a HRZ in appropriate locations close to the City Centre, Metropolitan and larger suburban commercial centres. The zone boundaries for the HRZ is supported, with the only exception being in the Riccarton area where an extension of the HRZ boundaries are sought to better recognise the proximity of this area to a wide range of commercial services, university activity node, high frequency public transport, cycle ways, and the relief sought in the submission opposing the Riccarton Bush, Industrial Interface, Airport Influence Density Precinct, and Piko/Shands heritage area and character area QMs. Noting also the recommendation that Kāinga Ora has suggested in relation to amendments to the Industrial General Zoning at 247 Riccarton Road and 37 Euston Street. Kāinga Ora seeks to rationalise and simplify the height limits applicable to the HRZ, depending on the size of the adjacent commercial centre. Consequential amendments are therefore required to the various height/ intensification precincts to reflect the outcomes sought in the submission.</p> <p>1. Retain MRZ over areas where MRZ is proposed in PC14 as notified unless otherwise changed by this submission.</p>	Oppose

Greg Olive/ #2.14		Seek Amendment	Rezone site at 419 Halswell Junction Road to Mixed Use rather than MDZ	
Ngāi Tahu Property/ #4.4		Oppose	Rezone the site at 35 Steadman Road, Karamu (Lot 2 Deposited Plan 541604) from Medium Residential Zone to be Future Urban Zone.	
Graham Thompson/ #8.1		Seek Amendment	Amend proposed Medium Residential zone across the city to exempt cul-de-sacs and narrow accessways from zone.	
Graham Thompson/8.1	Anne Dingwall/ #FS2037.38	Seek Amendment	<p>Amend proposed Medium Residential zone across the city to exempt cul-de-sacs and narrow accessways from zone.</p> <p>I live on a narrow extension of a cul-de-sac. Five homes face onto this access. Your map indicates that my area is medium density residential zone. There are at present no unused building sites but in the present circumstances there is always a possibility of a developer entering the area and activating the provisions of the medium density zone.</p> <p>The potential outcome of this would be 15 houses of three storeys. That could potentially mean the presence of 30 motor vehicles. On my narrow accessway parking for those would be inadequate so spill over onto the more open part of the street. Traffic and access and manoeuvrability would be at the least difficult and the likelihood of friction between residents is likely to be high. Furthermore, access for emergency vehicles could be impossible with the potential for loss of property or lives.</p>	Support
Martin Jones/ #15.2		Seek Amendment	Do not zone Cashmere View Street or surrounds as High Density Residential Zone.	
Rex Drummond/ #18.2		Seek Amendment	Faiview Street (Cashmere) should be within a Residential Character Area.

Alastair Grigg/ #28.5		Seek Amendment	[At the eastern end of Rugby Street, west of Papanui Road] change zone to Medium Density Residential Zone instead of High Density Residential Zone.	
Malcolm Leigh/ #29.1		Seek Amendment	That Blair Avenue in Papanui will be rezoned from High Density Residential Zoning to Medium Density Residential Zoning through the application of a Qualifying Matter.	
Malcolm Leigh/29.1	Anne Dingwall/ #FS2037.57	Seek Amendment	<p>That Blair Avenue in Papanui will be rezoned from High Density Residential Zoning to Medium Density Residential Zoning through the application of a Qualifying Matter.</p> <p>The High Density Residential Zone should not be applied blanketly either to a single street or to properties sharing a back fence. Restricting such developments would avoid the imposition of 20 metre or higher structures right alongside and surrounding the boundaries of a single storey residence as depicted on page 10b.</p> <p>Consideration also needs to be given to limiting the number of 20metre structures in a single street, or adjacent streets in the High Density Residential Zone to ensure and provide for a well-mixed variety of different styles and outlooks to retain existing long standing visual, social well-being and neighbourhood aspects of a locality.</p> <ul style="list-style-type: none"> Assumptions made about walkability are unfounded, with most not choosing to walk. Assumptions about local employment are unfounded. Mass Rapid Transport does not yet exist. Suburban areas lack local commerce; infill housing recommendations gives no recognition of such negative societal changes on existing suburbia. <p>High density is inappropriate for the street, because:</p> <ul style="list-style-type: none"> HRZ will increase traffic demands 3-4 times, with the street unable to accommodate such demand. Examples of this inadequacy can be seen with traffic generated by other businesses, such as: Harcourts, KFC, BP Petrol Station, Animates, Art Metro, etc. Papanui Road in the Papanui area has already become a very congested, difficult to access, slow moving local thoroughfare during much of the day. With the proposed increase of commercial building height allowance, to 22 metres within the suburban commercial centres, there appears to be no requirement for sufficient additional onsite parking within such developments. High density housing typologies will force older persons out of the area. Considerable changes to the current mixed demography of the street will be an irreversible deleterious consequence to the social interaction between and within different age groups within the local populations, if the high density zone housing proposal proceeds without modification. HRZ will lead to the loss of trees. From technical documentation used to support the "Have your say" document, a figure of 20 years is used as the time required for a replacement tree sapling to mature into a size similar to that which was removed. For most of this "growing" time the allotments will be deprived of the mature tree coverage. Hence a 20% onsite tree canopy will take years to develop (a generational loss). Since this is likely to occur over a large area of the street, the area realistically becomes denuded of trees for extended periods of time. During this extended time the social and visual environmental benefits of the original tree coverage is non-existent. The introduction of Financial Contributions does not necessarily mean that tree coverage in the local area is not 	Support

			<p>completely and permanently removed. In the case of Blair Avenue this is starkly evident already, where tree removal from development sites has almost been par for the course without any apparent requirement for any tree replacement on the site itself. Such tree removal, even if site-replaced, also results in a growing long-term disruption / dislocation of the tree canopy corridor potentially available for the movement of native birds in the district. Gardens, including trees, are considered to be an important holistic requirement for social wellbeing. By the removal and non-local replacement of trees of equivalent size such action contributes, as a direct consequence, to permanent changes to the characterisation of the locale. Unlike any new green-field housing development, infill housing changes to existing suburban streets will take place over a considerable number of years and thus intensifies and prolongs or permantises these negative consequences raised in this submission. An average tree, planted to soften the visual impact, may be a conciliatory solution for existing neighbours towards a new 2 storey structure but would be a wasted gesture for structures exceeding that height.</p> <ul style="list-style-type: none"> • The proposal has not considered the increase demand on recreational facilities. Overseas experience would emphatically suggest that lack of such nearby resources and facilities rapidly leads to a decline in social wellbeing and the increase in many aspects of unacceptable antisocial behaviour (as occurred in, and is still affecting, many earlier New Zealand social housing developments, including those in Christchurch, where lack of open spaces was and is found to be a major contributor to such behaviour). Therefore increased housing density, in conjunction with the corresponding decreasing available allotment size, should not be considered on its own before AND ONLY AFTER such issues are satisfactorily addressed and co-jointly implemented. Without such facilities family orientated activities (including the recognised well-being needs of children, their guardians and their pets) are inadequately supported and are detrimentally influenced permanently. • Greater intensification will lead to greater stormwater run-off and localised flooding. The Dudley Creek walled waterway channel currently DOES NOT provide adequate capacity to prevent street flooding in Blair Avenue in current excessive storm events, even with repeated current Council attempts to alleviate the problem. The number of such events will be exacerbated by climate change. • Removing notification rights at a neighbourhood level negatively impacts the neighbourhood social well-being and degrades of local visual character. In the artist impression page 22 for a Medium Density Residential Zone, the effects of multitude box-like structures, very close together, with very little relief, and lack of variety in style, all have a negative effect on the visual appearance throughout the street. The omission of buildings from the adjacent rear street, i.e the blank grey area in the middle of the picture, provides a more optimistic impression than if that area (as is more than likely) were filled with multi-storey residences. These negative effects are further amplified when considering 6 storey buildings in high density residential locations. As a result there is a propensity for the area to eventually become a middle class slum/ghetto, particularly if in all probability the housing ends up becoming rental accommodation, where there is generally a priority present for concerns with \$ outlay or \$ return by both tenant and landlord rather than with social well-being or house pride. Similarly long-time residents who have spent many decades enhancing their dwellings could suddenly find themselves effectively boxed in on all sides and being overlooked by multiple 4-6 storey units, with no ability to raise concerns such as loss of privacy, lack of sunshine, diminished view. An average tree, planted to soften the visual impact, may be a conciliatory solution for existing neighbours towards a new 2 storey structure but would be a wasted gesture for structures exceeding that height. Most residents who have toiled creating their own pocket of sanctuary wish to be able to enjoy the fruits of their labour without having their every movement visible from a 5 storey window next door. Most street frontages, if the High Density Zone ideas are enshrined without considerable modification, will remove large trees in these areas as portrayed by the scant, non-concealing shrubbery and absence of any substantial trees illustrated in the High Density Residential Zone illustration page 10b. The suggestion that “such degradation of existing social values would be filtered out at the resource consenting stage” does not appear to provide sufficient safeguard to prevent such situations arising. • High density housing in New Zealand is only a recent concept being introduced from overseas where long historical periods of social adjustment have evolved. Therefore the translocation of such architectural societal practices is not always from a most appropriate source of compatibility. • Local utilities may not have capacity to service high density housing. 	
Guy Mortlock/ #32.1		Seek Amendment	Rezone the block bounded by Creyke Road, Ilam Road, Wilfrid Street and Barlow Street from Residential Suburban Zone to either Medium Density Residential Zone or Residential Suburban Density Transition Zone	
Guy Mortlock/32.1	Christchurch International Airport Limited/ #FS2052.122	Seek Amendment	Rezone the block bounded by Creyke Road, Ilam Road, Wilfrid Street and Barlow Street from Residential Suburban Zone to either Medium Density Residential Zone or Residential Suburban Density Transition Zone The Airport Noise qualifying matter is being given too much emphasis with the result that areas of Christchurch that should be available for higher density housing are inappropriately being excluded from such development. In particular the block bounded by Creyke Road, Ilam Road, Wilfrid Street and Barlow Street should be zoned either MRZ or RSDT. I work in an office on the corner of Ilam Road and Creyke Road and hardly ever hear airplanes. I also live in a property closer to the airport (on the boundary of the noise qualifying matter) and hardly ever hear airplanes - which suggests that the boundary is unnecessarily conservative. There is steady demand for all the rentals in this area (not only from University students but also University employees and visitors) and re-development with higher density would help fill that demand. I note that Ilam Road is going to have its speed limit reduced and cycle lanes installed making it a more pleasant residential area - so it makes sense to have as many people living in this area as possible (rather than living further away and having to commute to the University). Airplanes are getting quieter over time - but the airport noise zones are not getting smaller.	Oppose
Alana Harper/ #36.1		Oppose	Cashmere Hills should all stay as Residential Hills Zone or change to Future Urban Zone.	
Steven & Diana Marshall/ #40.1		Seek Amendment	Change zoning of Helmores Lane/ Desmond Street/ Rhodes St (from Helmores to Rossall) from High Density Residential to Medium Density Residential	
Sharina Van Landuyt/ #41.3		Oppose	Oppose[s] Ryan Street being designated as a medium density residential zone.

Laura Cary/ #47.3		Oppose	Oppose the introduction of the Medium Density Residential Zone.	
Gavin Keats/ #52.5		Seek Amendment	Opposes the extent of the High and Medium Density Residential Zones around commercial centres.	
Tobias Meyer/ #55.18		Seek Amendment	Seek to have intensification around centres increased. Medium Density Residential zone to be applied 3km to 5km from Central City, and 500m from core bus routes.	
Tobias Meyer/55.18	Waipuna Halswell Hornby Riccarton Community Board/ #FS2027.16	Seek Amendment	Seek to have intensification around centres increased. Medium Density Residential zone to be applied 3km to 5km from Central City, and 500m from core bus routes. I think it is vitally important to incentivise development in the 5km closest to the city centre. This is the best place for people to live and the easiest place to live without a car. The current boundaries around city and local centres are quite small and could easily be extended a few blocks. Living near stanmore road I have easy access to the city. I call on you to increase the boundaries of HRZ and areas around local centres and either improve Mrz standards everywhere for more density or give extra incentive to MRZ in favourable places: Maybe even just within 3km of centre (at least within orbitor circle) and 500m of high frequency public transit routes. This is the area best suited to extra density. While our bus routes may change the current frequent routes will almost definitely be the same and be getting better. Even living 5km out from the centre has easy access to the city and other local centres. Possible incentives for MRZ in the inner 5km ring from the middle of the city: smaller setbacks in front half of property with a larger allowable built envelope, or allowing small businesses in the zone, or lower council contributions, or even with enough setback can go above height limits on large sites if the housing is accessible Reiterate this is the place we want the most development.	Oppose

Stephen Walsh/ #58.3		Seek Amendment	Reduce the extent of the medium density [residential zone]	
Thomas Calder/ #62.2		Seek Amendment	Amend zoning of Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) from High Density Residential to Medium Density Residential.	
Rachel Davies/ #67.3		Seek Amendment	[Seeks to] reduce the zones for High and Medium Density to closer to the city centre - so that it is not encroaching on existing neighbourhoods in Spreydon and Hoon Hay.	
Rachel Davies/ #67.5		Seek Amendment	Three storey housing should only be found in and close to the city centre, not in existing older suburban areas.	
Rachel Davies/67.5	Anne Dingwall/ #FS2037.136	Seek Amendment	<p>Three storey housing should only be found in and close to the city centre, not in existing older suburban areas.</p> <p>It concerns me that the government seems to treat all cities the same with regards to housing development and density rules. I understand that a submission can not change the government's National Policy Statement on Urban Development and the implementation of Medium Density Residential Standards. I however, want my voice to be heard with other like minded people to plead with our Council to ensure protective measures can be put in place to limit the negative impacts that these new standards pose. I applaud the council in their attempt to try and temper this dramatic change and extend the enforcement timeframe by adding Qualifying Matters such as the 'Sunlight Access'. I however feel this is not enough. The people of Christchurch need to be listened to, especially those who will be directly affected by future development;</p> <p>Hoon Hay, Christchurch is my home, the place where we chose to buy and bring up our family in a home that was in a safe neighbourhood with a backyard, where our children can play, we can grow a garden and have space, peace and privacy. I feel this is typical of many residents who chose to live in the suburban areas that fringe the city center. I am now constantly shocked each time I travel down a local street to see so many properties demolished and replaced with two storey townhouses; many that are terraced, offering no space or privacy. They go nowhere to enhance the character of the neighbourhoods they now dominate. The original homes now seem squashed and overshadowed by these towering monstrosities. Gone is their light, privacy and peace; replaced by multiple dwellers, their cars, noise and pressure on existing infrastructure. It frightens me to say the least that this seems to be the future of Christchurch;</p> <p>I speak from a more protected position, as when I found our property on the Christchurch District Plan Map, we are in the Residential Suburban Zone and have another protective layer of being identified as having low public transport accessibility - again thanks needs to go to the Council for acknowledging this and using it to our advantage to prevent more sprawl of the MDRS. I am however aware that this level of protection is vulnerable as there is never any guarantee that zones don't change. The only thing that makes me different from a poor family who finds themselves in the Residential Medium Density or Transition Zones are a couple of streets. It is frightening to think that their little slice of paradise could be dramatically threatened if a developer buys a property next to them and fills it to capacity with two or three storey units!</p> <p>I therefore totally oppose the proposed changes for the following reasons;</p> <ul style="list-style-type: none"> • Increased building heights in suburban areas will dramatically reduce sunlight for existing properties. • Multiple storey dwellings negatively impact on the privacy of existing single storey residences. • Developing properties which once housed four to five people to house 12 plus people puts pressure on existing services - predominantly water, stormwater and sewerage. 	Support

			<ul style="list-style-type: none"> • More people living on a property with no access to a garage or off street parking means more vehicles are parked on the street, thus impacting on existing parking spaces for original residents. andnbsp; andnbsp; • Existing gardens, trees and green space are destroyed and replaced with concrete or other impervious surfaces - this alters our so called 'Garden City' identity. andnbsp; What quality of life do these new residents have with an outdoor area, the size of a small patio? andnbsp; Is that the type of home we want the future children of Christchurch to be brought up in? andnbsp; How will they have a love of nature, fun and play outside - if their own outdoor space is a piece of exposed aggregate or a wooden deck the size of a carpark, if that? andnbsp; Sure the developers may argue that children can be taken to a local park to play - but really? andnbsp; Children should be able to play outside whenever they want, at their own home! andnbsp; Also, what happens to the rain that falls? andnbsp; It can no longer be absorbed by a lawn or garden - instead it becomes runoff increasing the risk of flooding. • We are not Auckland or Wellington! andnbsp; We have space to expand in a range of areas. andnbsp; Many of the new subdivisions that keep popping up seem to have zones enabling high density multi storey housing - we often don't see this in reality though - instead we see single story dwellings on teeny tiny plots of land. • The only ones who seem to be benefiting from this change are the developers who are lining their pockets with the profits from destroying existing neighbourhoods. andnbsp; They don't care what happens next once they've destroyed homes and built multiple dwellings at high speed with cost cutting measures. andnbsp; They just want the payout at the end and the move on to find the next plot of land. andnbsp; They squeeze people out and create a domino effect. andnbsp; Those strong enough or brave enough to say no to their buying power, get punished later when their land is worth nothing as it's been surrounded. andnbsp; andnbsp; <p>I can't complain without offering some solutions or possible options that I feel would be a better alternative to the proposed changes. andnbsp; If new development is to continue with no need for resource consent the following should be considered:</p> <ul style="list-style-type: none"> • Continue to add and push for Quality Matters to ensure new development meets more stringent controls over sunlight, safety, privacy, environmental factors and aesthetics. andnbsp; • Get more legal advice as to residents not being able to appeal decisions which go to hearings - this does not seem right that appeals are not allowed. andnbsp; We need to try to beat the Government at their own game by finding more loopholes or laws to protect the residents of Christchurch from these changes. • Prioritize or incentivise high density residential development starting from the city center then working outward, once land there has first been developed. • Develop more multistorey or terraced styled housing in new subdivisions where infrastructure can be put in place to best service these new dwellings. andnbsp; • Rezone and develop underutilized areas of land closer to the city into new trendy housing development - the development near the railway in the Addington Court Theatre district is a good example of this type of land. • Potentially redevelop existing large buildings into apartments e.g. Princess Margaret hospital (potentially moving the services offered there now to new premises to free up space not being used). • Develop existing crown owned land into higher density housing e.g. the old Spreydon School site. <p>Thank you for considering my submission and recommendations. andnbsp; This seems like a minefield of issues, laws, rules, policies and regulations. andnbsp; Please try to keep at the forefront that Christchurch is the 'Garden City'. andnbsp; We are lucky - we have space, we think in smart ways and there are solutions to these issues which don't require us ruining the wonderful neighbourhoods we have that make Christchurch so special.</p>	
Rachel Davies/ #67.16		Seek Amendment	Develop more multistorey or terraced styled housing in new subdivisions where infrastructure can be put in place to best service these new dwellings.	
Rachel Davies/67.16	Anne Dingwall/ #FS2037.137	Seek Amendment		Support

Develop more multistorey or terraced styled housing in new subdivisions where infrastructure can be put in place to best service these new dwellings.

Hoon Hay, Christchurch is my home, the place where we chose to buy and bring up our family in a home that was in a safe neighbourhood with a backyard, where our children can play, we can grow a garden and have space, peace and privacy. I feel this is typical of many residents who chose to live in the suburban areas that fringe the city center. I am now constantly shocked each time I travel down a local street to see so many properties demolished and replaced with two storey townhouses; many that are terraced, offering no space or privacy. They go nowhere to enhance the character of the neighbourhoods they now dominate. The original homes now seem squashed and overshadowed by these towering monstrosities. Gone is their light, privacy and peace; replaced by multiple dwellers, their cars, noise and pressure on existing infrastructure. It frightens me to say the least that this seems to be the future of Christchurch.

I speak from a more protected position, as when I found our property on the Christchurch District Plan Map, we are in the Residential Suburban Zone and have another protective layer of being identified as having low public transport accessibility - again thanks needs to go to the Council for acknowledging this and using it to our advantage to prevent more sprawl of the MDRS. I am however aware that this level of protection is vulnerable as there is never any guarantee that zones don't change. The only thing that makes me different from a poor family who finds themselves in the Residential Medium Density or Transition Zones are a couple of streets! It is frightening to think that their little slice of paradise could be dramatically threatened if a developer buys a property next to them and fills it to capacity with two or three storey units!

Increased building heights in suburban areas will dramatically reduce sunlight for existing properties.

Multiple storey dwellings negatively impact on the privacy of existing single storey residences.

Developing properties which once housed four to five people to house 12 plus people puts pressure on existing services - predominantly water, stormwater and sewerage.

More people living on a property with no access to a garage or off street parking means more vehicles are parked on the street, thus impacting on existing parking spaces for original residents.

Existing gardens, trees and green space are destroyed and replaced with concrete or other impervious surfaces - this alters our so called 'Garden City' identity. What quality of life do these new residents have with an outdoor area, the size of a small patio? Is that the type of home we want the future children of Christchurch to be brought up in? How will they have a love of nature, fun and play outside - if their own outdoor space is a piece of exposed aggregate or a wooden deck the size of a carpark, if that? Sure the developers may argue that children can be taken to a local park to play - but really? Children should be able to play outside whenever they want, at their own home! Also, what happens to the rain that falls? It can no longer be absorbed by a lawn or garden - instead it becomes runoff increasing the risk of flooding.

We are not Auckland or Wellington! We have space to expand in a range of areas. Many of the new subdivisions that keep popping up seem to have zones enabling high density multi storey housing - we often don't see this in reality though - instead we see single story dwellings on teeny tiny plots of land.

The only ones who seem to be benefiting from this change are the developers who are lining their pockets with the profits from destroying existing neighbourhoods. They don't care what happens next once they've destroyed homes and built multiple dwellings at high speed with cost cutting measures. They just want the payout at the end and the move on to find the next plot of land. They squeeze people out and create a domino effect. Those strong enough or brave enough to say no to their buying power, get punished later when their land is worth nothing as it's been surrounded.

Develop more multistorey or terraced styled housing in new subdivisions where infrastructure can be put in place to best service these new dwellings.

Melissa and Scott Alman/ #86.2		Seek Amendment	Amend the zoning of Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) from High Density Residential to Medium Density Residential	
Peter Evans/ #88.1		Oppose	Harlech Mews and Avonhead rezoned to Residential Suburban Zone	
Blair McCarthy/ #90.3		Seek Amendment	Limit the High Density Residential Zone along Papanui Road north from the Merivale commercial centre to Heaton Street/Innes Road and south from the Papanui commercial centre to Blighs Road. That the area of proposed HRZ in between, particularly around St Andrews College and east of Watford Street, be zoned Medium Density Residential instead of HRZ.	
Zhijian Wang/ #102.3		Not Stated	Adding medium-density and high-density housing to established neighborhoods is not an ideal solution. Infrastructure will not be able to cope with demand, infrastructure improvements will be costly and impact on rates, and there will be further interruption with excavations and road closures. There will be increased concrete and asphalt footprints and reduced garden areas, affecting the natural infiltration of rainwater, increasing the burden on infrastructure and that may cause flooding. There will be an associated impact on Christchurch's brand as a Garden City. which has taken time to develop. Instead, the urban-rural fringe area should be developed with medium and high density residential areas within 20-30 minutes of the City Centre. This is the ideal living and working environment where infrastructure can be planned and constructed according to the needs of the next 30 years. Funding would be from investors and developers, reducing financial pressure on the City Council and maintaining the stability of rates. Construction will not affect the traffic in the city.	
Karyn Butler/ #106.1		Seek Amendment	That the Council amends the Housing and Business Choice Plan Change 14 (PC14) from the proposed High Density Residential Zone (HRZ) in a continuous strip parallel to Papanui Road through Strowan (stretching from Papanui Road to Watford Street) to a Medium Density Residential Zone (MRZ). In particular, the residential area of Watford Street, Christchurch.	

Karyn Butler/106.1	Anne Dingwall/ #FS2037.175	Seek Amendment	<p>That the Council amends the Housing and Business Choice Plan Change 14 (PC14) from the proposed High Density Residential Zone (HRZ) in a continuous strip parallel to Papanui Road through Strowan (stretching from Papanui Road to Watford Street) to a Medium Density Residential Zone (MRZ). In particular, the residential area of Watford Street, Christchurch.</p> <p>The proposed change for High Density Residential Zone (HRZ) in a continuous strip parallel to Papanui Road through Strowan (stretching from Papanui Road to Watford Street), without any requirement for new developments to provide any on-site parking, will place significant additional pressure on basic transport infrastructure such as on-street carparking and traffic congestion all of which are not coping currently.</p> <p>1. INFRASTRUCTURE</p> <p>Relevant PC14 clause references and extracts are given in italics:</p> <p><i>Section 14.2.8.5 Policy – Infrastructure servicing for developments</i></p> <p><i>a. Ensure that developments are serviced with all required infrastructure in an effective and efficient manner</i></p> <p><i>Section 14.2.8.6 Policy – Integration and connectivity</i></p> <p><i>c. Avoid significant adverse effects and remedy or mitigate other adverse effects on existing businesses, rural activities or infrastructure.</i></p> <p>Adequate ‘infrastructure’ includes adequate carparking and a safe and effective transport network which does not contribute to traffic congestion.</p> <p>The submitter's specific concerns in relation to the impact of the proposed changes on this infrastructure in particular in my community of Strowan are as follows:</p> <ul style="list-style-type: none"> • The supply of on-street carparking spaces currently cannot keep-up with the demand for carparking, resulting in time-based (two hour maximum) parking restrictions on most surrounding streets. A major contributor to the on-street carparking issue is St Andrews’ College, which defines the southeast limit of Strowan in this area. The school has a total population of around 2000 and is growing with a large waiting list for entry. The proposed change to HRZ in the Strowan community will magnify this existing, significant on-street carparking problem; • The existing traffic management issues associated with St Andrews’ College also pose a significant health and safety issue – from morning and afternoon congestion in Normans Road and surrounding streets at school drop-off and pick-up times, causing delays and congestion at intersections linking with surrounding primary roads including Papanui Road and Strowan Road. All of these issues will be exacerbated by the proposed intensification of residential development in the community but especially by the proposed HRZ over many blocks. <p>2. LACK OF CARPARKING PROVISION FOR VULNERABLE MEMBERS OF OUR COMMUNITY</p> <p>Relevant PC14 clause references and extracts are:</p> <p><i>Section 7.2.1.2 Policy – High trip generating activities</i></p> <p><i>ix provide for the transport needs of people whose mobility is restricted</i></p> <p><i>Section 7.2.1.5 Policy – Design of Carparking areas and loading areas</i></p> <p><i>iii be accessible for people whose mobility is restricted</i></p> <p>At a general level, the removal of the requirements for new residential housing developments to provide for any on-site parking, will have a significant and disproportionate impact on a number of vulnerable groups in our community. These groups include:</p> <ul style="list-style-type: none"> • people with disabilities; • elderly residents; and • families with children. 	Support
--------------------	-------------------------------	-------------------	---	---------

This impact will be significant on both:

- existing residents and
- residents living in new developments

As increasingly they and their visitors will not be able to expect and/or rely on their ability to park close to their place of residence. This will be exacerbated significantly in the Strowan area where the current on-street carparking supply does not meet demand and this is a further reason why the proposed HRZ must not be implemented.

3. AMENITY/CHARACTER

Relevant PC14 clause references and extracts are given in italics:

Section 14.2.4.2 Policy – High quality, medium density residential development

a Encourage innovative approaches to comprehensively designed, high quality, medium density residential development, which is attractive to residents, responsive to housing demands and reflects the planned urban built character of an area.

The proposed HRZ which is shown to be almost continuous down Papanui Road and for at least one block either side of Papanui Road is not consistent with the stated intent of this Section/Policy above and it certainly does not support ‘...medium density residential development, which is attractive to residents, responsive to housing demands and reflects the planned urban built character of an area’.

The submitter's specific concerns in relation to the impact of the proposed changes on the amenity/character in particular in my community of Strowan are as follows:

- The Strowan neighbourhood has an amenity character and fabric and a sense of community which is very attractive to residents, which is highly valued and worthy of retention. This is comprised of a number of elements including:

- there is still a significant proportion of older, quality homes;

- the homes are typically on larger than average sections so a sense of open space is still present;

- there are a number of prominent trees and landscaping on properties which reinforces both the perception and reality of quality open space ‘around’ buildings (and which clearly supports the Council’s Urban Forest Plan 2023 initiative);

- new homes which have been built are typically two storey, with the scale, density and quality largely in keeping with the existing character and built form elsewhere in the Strowan community.

Submitter urges Council to identify the area of Strowan, particularly those blocks in the vicinity of St Andrews College, as worthy of definition as an area which warrants zoning as MRZ not HRZ as proposed in PC14, as the impact on infrastructure demand and amenity values under HRZ is significantly greater than under MRZ.

- the sense of community which is present would be undermined by the scale of intensification which is proposed under HRZ;

• there are a number of prominent trees remaining in the neighbourhood which reinforces the quality of open space amenity and character of our community, and which clearly supports the Council’s Urban Forest Plan 2023 initiative; but which would inevitably be threatened with the high level of intensification under HRZ as proposed in Plan Change 14.

CHANGE FROM HRZ TO MRZ IN STROWAN – SO AS TO BE CONSISTENT WITH STATED INTENTION

Relevant PC14 clause references and extracts are:

Section 14.2.7 Objective – High Density Residential Zone

a. High density residential development near larger commercial centres, commensurate with the expected demand for housing in these areas and the nature and scale of commercial activities, community facilities, and multimodal transport networks planned or provided in the commercial centres.

			<p>Section 14.2.7.2 Policy – High density location</p> <p><i>a. Enable high density residential development within walking catchments of the:</i></p> <p><i>i. City centre zone;</i></p> <p><i>ii. Town Centre zones of Riccarton, Papanui, and Hornby; and</i></p> <p><i>iii. Other larger commercial centres zoned as Town Centres and Local Centres; to a degree that responds to the planned scale and nature of each centre group and the range of activities planned or provided there.</i></p> <p>Clearly the part of Strowan proposed as HRZ does not meet these criteria as it is not located near or adjacent to a commercial centre.</p> <p>Submitter is keen to support others in their community who they know are highlighting similar concerns in their submissions.</p>	
Heather Woods/ #107.2		Seek Amendment	Enable tiny houses in all zones	
Heather Woods/ #107.30		Seek Amendment	Amend zoning of this area from ~100 to ~300 Wainoni Road (and further afield), to “Medium Density Residential Zone” because it is close to all required amenities - closer than many other areas that are already “Medium Density Residential Zone”.

Cameron Matthews/ #121.28		Seek Amendment	Re-zone areas to at least 4-storeys within walkable catchments of Major Cycle Routes.	
Cameron Matthews/121.28	Ivan Thomson/ #FS2047.8	Seek Amendment	<p>Re-zone areas to at least 4-storeys within walkable catchments of Major Cycle Routes.</p> <p>This system is high-capacity, high-reliability, infinitely frequent, on-demand, zero-emission, and ultra-low-congestion. Many, who both live and work near the network can live car-lite (with for example, only one infrequently-used car between two people) could – without the spatial requirements of large amounts of car-storage – feasibly live in higher density housing topologies without compromising the local transport infrastructure. This makes developments of this kind (mid-rise, car-lite) much more feasible in areas served by the MCR network. Considering the private benefits and overwhelmingly positive externalities that cycling and other micro-mobility produces – such as reduced emissions, improved fitness, reduced congestion, travel resilience, independence for those unable to drive (including children), among many others, we should be maximally utilising our already-built safe cycling infrastructure by increasing the residential, commercial, and employment density in the sites and blocks adjacent to it. If these areas are zoned for any residential use, they should be zoned for HRZ (4 storeys or more) or equivalent density, such that they are above the baseline MRZ density limits.</p> <p>To pre-empt counter-arguments based along the lines of ‘not everyone can cycle’, New Zealand ranks among the highest in the world for ability to cycle in the adult population at 82% (https://www.greatauckland.org.nz/2022/08/25/bikes-vs-cars-per-capita/). That’s not much below the proportion who hold a full or restricted driver’s license (~96% of over 15yo - https://opendata-nzta.opendata.arcgis.com/documents/driver-licence-holders/about), but for cycling the proportion may extrapolate well to children too. Data suggests (https://www.transport.govt.nz/assets/Uploads/Report/Cycling-2015-y1012.pdf) higher rates of cycling activity in children compared to adults. So, with roughly 82% of the total population being able to cycle, but only ~77% of the total population being able to drive, we see it’s likely that more people can cycle than drive.</p> <p>In addition, cycling isn’t required of everyone living in medium and high-density housing near cycleways. The fact that many people in these areas will cycle for many of their trips creates the positive externalities (such reduced congestion, storage requirements etc) which make higher density living more feasible for all residents, regardless of their personal travel-mode choice.</p>	Support
Cameron Matthews/121.28	Christchurch International Airport Limited/ #FS2052.218	Seek Amendment	<p>Re-zone areas to at least 4-storeys within walkable catchments of Major Cycle Routes.</p> <p>This system is high-capacity, high-reliability, infinitely frequent, on-demand, zero-emission, and ultra-low-congestion. Cameron Matthews/ #121.30		Seek Amendment	The area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, be zoned for at least HRZ, MUZ or equivalent density, such that they are at least above baseline MRZ density limits.	
Cameron Matthews/121.30	Christchurch International Airport Limited/ #FS2052.220	Seek Amendment	<p>The area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, be zoned for at least HRZ, MUZ or equivalent density, such that they are at least above baseline MRZ density limits. Because of the latent potential of the rail corridor and feasible station locations for passenger services, and the existing lack of urban density proximal to those locations, I suggest that the area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, be zoned for at least HRZ, MUZ or equivalent density, such that they are at least above baseline MRZ density limits.</p> <p>Christchurch plays host to a passenger rail station for inter-regional trips. At present this station largely serves tourist markets, though the extant rail network within Greater Christchurch has been investigated for future suburban rail services, and further growth of especially the inter-regional services is entirely plausible. The road link to Dunedin for example is increasingly congested, low resilience, and Air New Zealand manage to make a profit on the CHC-DUN route flying about 7 return trips daily – a trip which, unlike rail, doesn’t also service interstitial centres like Ashburton, Timaru, or Oamaru. Considering the rail corridors are already publicly owned, cover large parts of the city, and with much of the fixed infrastructure costs already paid for, they represent an attractive scaffold around which the city and wider region could grow in future without excessive cost burdens for new congestion-free transport infrastructure. Emerging metropolitan centres within Christchurch such as Hornby, Riccarton, and Papanui and Sydenham all lie on this corridor, as do the Rolleston and Rangiora slightly further afield.</p> <p>Unfortunately, past spatial planning has limited the growth around the rest of the rail corridor such that suburban rail services would likely see low utilisation and limited economic viability if run on the existing rail alignments, at least without lots of new growth in suburbs feasibly served by it – suburbs like Hornby, Addington, Riccarton, Papanui, Sydenham/Moorhouse, and even Heathcote Valley, Lyttelton, Rolleston and Rangiora. This is despite the huge advantages that such congestion-free, safe, rapid travel would provide to those using it, and those benefiting from that many fewer cars on the road, such as drivers, cyclists, pedestrians, and council finances in road maintenance.</p> <p>This mismatch in location between high urban density and latent high-capacity transport infrastructure will continue to be the case at least until spatial planning allows for higher urban densities within a walkable catchment of these feasible station locations, and/or such time as the rail corridor and services garner new investment – with both requirements currently locked in a chicken and egg scenario preventing progress. Though the immediate priority in public transport investment in Christchurch is rightly on improving the bus network and upgrading the City Spine route for tramway operation, cost-free allowances might be made now for the long-term evolution of the city’s urban form and transport network by increasing the density limits in centres proximal to the existing heavy railways.</p> <p>Even if a dedicated suburban rail system was not built, or new track into the city centre laid, many of these station locations could be feasibly served even by commuter-</p>	Oppose

			oriented services serving a dual purpose of inter-regional travel between Dunedin and Christchurch, and commuter services across Greater Christchurch and other Canterbury urban centres like Timaru and Ashburton. Such inter-regional services seem increasingly likely to form part of a future low-emission, resilient passenger transport system, accommodating future population growth spread throughout the South Island, replacing, or complimenting the many trips currently made by car and plane, and this would help to create a more integrated, resilient, and prosperous South Island economy.	
Cameron Matthews/121.30	Kauri Lodge Rest Home 2008 Limited/ #FS2059.5	Seek Amendment	<p>The area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, be zoned for at least HRZ, MUZ or equivalent density, such that they are at least above baseline MRZ density limits. Because of the latent potential of the rail corridor and feasible station locations for passenger services, and the existing lack of urban density proximal to those locations, I suggest that the area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, be zoned for at least HRZ, MUZ or equivalent density, such that they are at least above baseline MRZ density limits.</p> <p>Christchurch plays host to a passenger rail station for inter-regional trips. At present this station largely serves tourist markets, though the extant rail network within Greater Christchurch has been investigated for future suburban rail services, and further growth of especially the inter-regional services is entirely plausible. The road link to Dunedin for example is increasingly congested, low resilience, and Air New Zealand manage to make a profit on the CHC-DUN route flying about 7 return trips daily – a trip which, unlike rail, doesn't also service interstitial centres like Ashburton, Timaru, or Oamaru. Considering the rail corridors are already publicly owned, cover large parts of the city, and with much of the fixed infrastructure costs already paid for, they represent an attractive scaffold around which the city and wider region could grow in future without excessive cost burdens for new congestion-free transport infrastructure. Emerging metropolitan centres within Christchurch such as Hornby, Riccarton, and Papanui and Sydenham all lie on this corridor, as do the Rolleston and Rangiora slightly further afield.</p> <p>Unfortunately, past spatial planning has limited the growth around the rest of the rail corridor such that suburban rail services would likely see low utilisation and limited economic viability if run on the existing rail alignments, at least without lots of new growth in suburbs feasibly served by it – suburbs like Hornby, Addington, Riccarton, Papanui, Sydenham/Moorhouse, and even Heathcote Valley, Lyttelton, Rolleston and Rangiora. Cameron Matthews/ #121.31		Seek Amendment	Lyttelton should qualify as a Local Centre (Medium) [and] gain commensurate permitted density within the centre and in the surrounding neighbourhood.	
Cameron Matthews/121.31	Christchurch International Airport Limited/ #FS2052.221	Seek Amendment	<p>Lyttelton should qualify as a Local Centre (Medium) [and] gain commensurate permitted density within the centre and in the surrounding neighbourhood.</p> <p>In Lyttelton's case, essentially the entire urban area is excluded from intensification via application of various Qualifying Matters (regardless of their sometimes-dubious merits – see section: LOW PUBLIC TRANSPORT ACCESSIBILITY AREA).</p> <p>This is despite being well connected to public transport (with multiple bus routes and a ferry connection) and offering a broad range of amenities – including hospitality, entertainment, retail, schooling, etc. However, the proposed zoning extent for the Local Centre in this area is limited to only the CBP zone, which is poised to retain existing District Plan rules – i.e., there is no intensification in Lyttelton enabled by this proposed plan. No buffer zone is planned around this Local Centre zone for adjacent residential intensification “commensurate with the level of commercial activity” as required by NPS-UD Policy 3d, despite there being no natural hazard QM or infrastructure QM constraints. Lyttelton should qualify as a Local Centre (Medium) gain commensurate permitted density within the centre and in the surrounding neighbourhood.</p>	Oppose
Cameron Matthews/ #121.32		Seek Amendment	Sumner should qualify as a Local Centre (Medium) [and] gain commensurate permitted density within the centre and in the surrounding neighbourhood.	
Cameron Matthews/121.32	Christchurch International Airport Limited/ #FS2052.222	Seek Amendment	<p>Sumner should qualify as a Local Centre (Medium) [and] gain commensurate permitted density within the centre and in the surrounding neighbourhood.</p> <p>For Sumner, we have a very similar situation as Lyttelton, with good (if not excellent) Public Transport (#3, Christchurch's most-frequent Core bus service), a high degree of local amenities including retail, bars, cafés, a supermarket, and excellent recreation opportunities. However, this high-demand suburb (see Figure 12) is also severely</p>	Oppose

			<p>limited in permitted intensification. Adjacent to the LCZ zone is only Residential Suburban Density Transition Zone (RSDT), which retains existing District Plan rules. Along the beachfront blocks we have MRZ zones, nearly compliant with MDRS, but further from the coast the zoning reverts to low-density Residential Suburban Zone (RS).</p> <p>This is curious as the sites further from the coast are at reduced risk from coastal hazards (reflecting in the reduction in Coastal Hazard Risk Management Area priority) yet are zoned at lower densities. The only other difference which could be accounting for the reduced density zoning in the more-inland blocks is the application of the Low PT Accessibility QM to those blocks, despite them having identical PT provision as the rest of Sumner and being well-within an 800m walkable catchment of the LCZ zone. Though I don't think we should necessarily intensify areas at high risk of increasingly severe coastal hazards, the zoning in this area is clearly not in line with the level of risk from natural hazards, nor commensurate with the level of commercial activity as required by NPS-UD.</p>	
Cameron Matthews/ #121.35		Seek Amendment	Wigram should qualify as a Local Centre (Medium) [and] gain commensurate permitted density within the centre and in the surrounding neighbourhood.	
Cameron Matthews/121.35	Christchurch International Airport Limited/ #FS2052.225	Seek Amendment	Wigram should qualify as a Local Centre (Medium) [and] gain commensurate permitted density within the centre and in the surrounding neighbourhood. In Wigram, the Local Centre Zone (LCZ, 14m permitted) has no surrounding buffer zone of intensification "commensurate with the level of commercial activity and community services". The adjacent sites (and walkable catchment) to this LCZ zone are only MRZ, with its permitted building height of only 11m. Suggested change is to up-zone sites adjacent to this commercial zone to match the building height and density limits of the zone. The Wigram area Local Centre should also certainly qualify as a Medium Local Centre, considering its high number of local amenities including a supermarket, mall, hospitality, cinema, etc, and the surrounding residential area should be up-zoned for commensurate building heights, i.e. 4 or more storeys.	Oppose

Cameron Matthews/ #121.42		Seek Amendment	Change the zoning of the area around Addington Centre and the Addington Mixed Use Zone to a High Density Residential Zone.	
Cameron Matthews/121.42	Christchurch International Airport Limited/ #FS2052.232	Seek Amendment	<p>Change the zoning of the area around Addington Centre and the Addington Mixed Use Zone to a High Density Residential Zone.</p> <p>The area around both it, and around Addington MUZ is changed to HRZ (or at least LCIP), consistent with both NPS-UD and the proposed District Plan Objective 15.2.3 (b) i.e., “Mixed use zones located close to the City Centre Zone transition into high density residential neighbourhoods that contribute to an improved diversity of housing type, tenure and affordability and support a reduction in greenhouse gas emissions.”</p> <p>While the extent of this zone extends from Riccarton Rd to Blenheim Rd – the latter of which has no core Public Transport routes – the nearby suburb of Addington – particularly at the intersection of Whiteleigh and Lincoln Roads – is served by two core PT routes, and is proximal to housing, employment, and local retail/commercial/hospitality venues, but has no up-zoning planned – at least none exceeding baseline density requirements of the MDRS.</p> <p>Addington should be up-zoned to a Local Centre (Medium) and increased density in the surrounding neighbourhood permitted, by implementation of HRZ, or a Local Centre Intensification Precinct, or an equivalent mechanism.</p> <p>According to NPS-UD 2020 Policy 3d; our district plan must enable “within and adjacent to neighbourhood centre zones, local centre zones, and town centre zones (or equivalent), building heights and densities of urban form commensurate with the level of commercial activity and community services”. Given this graduated approach to density around neighbourhood cores is an expected outcome of NPS-UD, we apply this to Mixed Use Zone’s also, and should permit increased densities of development adjacent to the proposed Mixed Use Zone, which is served by two Core frequent PT lines.</p> <p>As proposed, the MUZ zone terminates abruptly in the middle of Addington, most sharply illustrated (see Figure 29) across Clarence Street South, where there is also no buffer around the LCZ zone of building heights “commensurate with the level of commercial activity”.</p>	Oppose

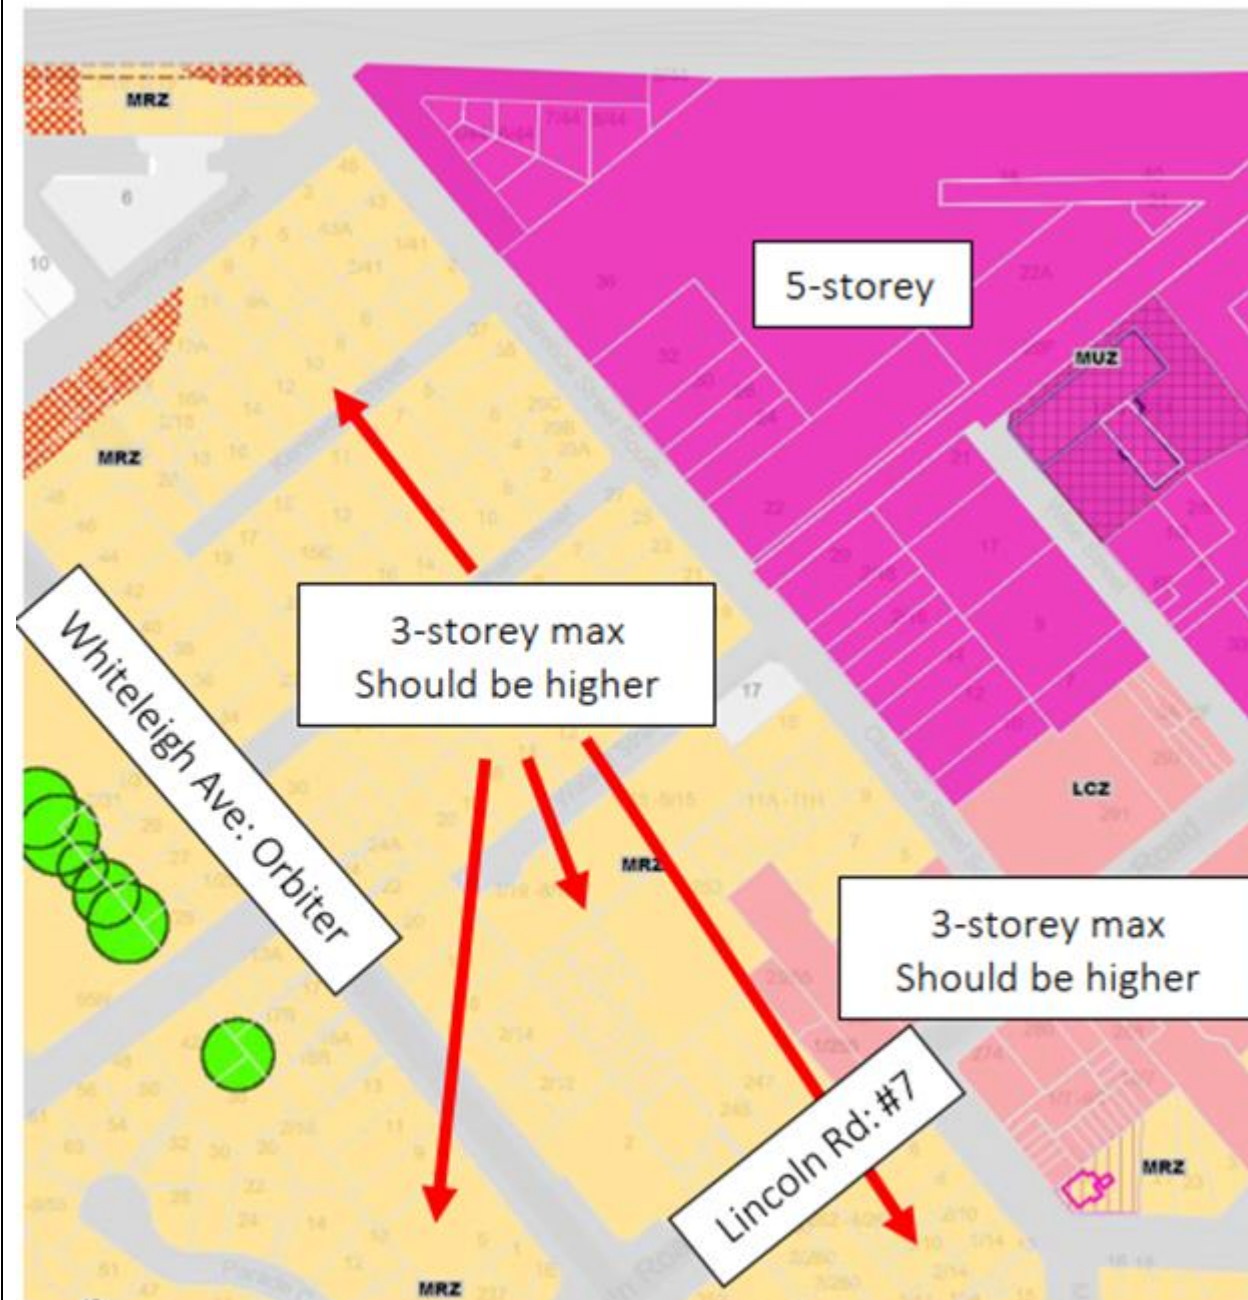

Figure 29 Addington proposed zoning exhibits only 3-storey densities in parts of commercial zone fronting Lincoln Road. Not only should this be higher, but a walkable catchment of housing should be too. The sharp difference in building densities in the adjacent MUZ is anomalous.

The anomaly here may be due in part to a misapplication of the proposed mixed-use policy (Policy 15.2.3.2 (a)), which seeks of MUZ areas: "...limiting their future growth and development to ensure commercial activity... is focussed within the network of commercial centres". As Addington (and New Brighton for that matter) is such a centre, it is clearly inappropriate. This policy (15.2.3.2) should be revised with respect to MUZ areas adjacent to or forming part of commercial centres, as in Addington's case. The current wording incorrectly implies that all MUZ areas are not within the strategic network of commercial centres, as Addington's is.

Regarding wider impact, since the plan does not currently permit higher densities here than in other parts of the city (not subject to QM's) which are far less-well connected to employment, retail, and entertainment opportunities, it incentivises growth in those more peripheral areas rather than preferentially in better connected and more central suburbs. This in-effect undermines the goals of NPS-UD and the (good) motivation behind CCC's (flawed) Low PT Accessibility QM – i.e., that of concentrating growth in central and well-connected areas more economically served with reticulated utilities and transport infrastructure.

This effect is evident looking further down Lincoln Road to Aidanfield, where a new Town Centre Zone (TCZ) surrounded by HRZ is proposed on what's now largely farmland. While I'm not opposed to this Aidanfield development (since it is infilling a strange rural exclave rather than sprawling the periphery of the city), it is nonsensical to provide for such intensive development farther away from the city centre before allowing higher levels of development in the existing urban footprint, along the same transit corridor, in the more centrally located suburb of Addington. Both locations share the same Core radial transit route of the #7, but in Addington's

			case it also has the Orbiter service to connect it frequently with adjacent Key Activity Centres of Riccarton and Barrington. Aidanfield has the #60 to serve a similar function to connect it to Wigram, but that is a lower-frequency line connecting with lower-activity centres. Addington is also a walkable distance to the city centre, a feature lacking in Aidanfield.	
Cameron Matthews/ #121.46		Seek Amendment	Around the Sydenham south commercial area, up-zone sites within blocks containing parts of Local Centre Zones from Medium Density Residential Zone to High Density Residential Zone to match the building height and density limits of the zone (i.e. to 14m).	
Cameron Matthews/121.46	Christchurch International Airport Limited/ #FS2052.236	Seek Amendment	Around the Sydenham south commercial area, up-zone sites within blocks containing parts of Local Centre Zones from Medium Density Residential Zone to High Density Residential Zone to match the building height and density limits of the zone (i.e. to 14m). Philip Rance/ #122.1		Oppose	Opposes the increased level of housing intensification in areas indicated by the Council.	
Tiffany Boyle/ #132.1		Oppose	Revoke the idea of high rise housing buildings in Hornby and work to rebuild existing infrastructure to handle the current demand in the area.	
Tiffany Boyle/132.1	Waipuna Halswell Hornby Riccarton Community Board/ #FS2027.22	Oppose	Revoke the idea of high rise housing buildings in Hornby and work to rebuild existing infrastructure to handle the current demand in the area. I strongly object to high rise housing being developed in the Hornby suburb. The infrastructure in Hornby cannot cope with increased housing. As a home owner in the area, no money is spent on fixing current infrastructure problems which I believe is more of a priority than adding in additional housing.	Support
Mathias Roehring/ #138.1		Seek Amendment	That the boundary of Residential Suburban Zoning and Medium Density Residential zoning within the block between Taiwi Crescent and Ranui Street be moved to either Taiwi Crescent and Ranui Street..	
Curtis Bush/ #149.2		Oppose	Reconsider the rezoning of Therese Street, Spreydon which is proposed to go to Residential Medium Density.	
Papanui Heritage Group/ #151.6		Oppose	Opposed to the imposition of the Medium Density Residential Zone as it is not considered necessary. The gradual building of infill housing, or blocks of single or double storey flats on empty sections, as is happening now, is considered to meet Papanui's future housing needs.	
Papanui Heritage Group/ #152.6		Oppose	Opposed to the imposition of the Medium Density Residential Zone as it is not considered necessary. The gradual building of infill housing, or blocks of single or double storey flats on empty sections, as is happening now, is considered to meet Papanui's future housing needs.	
Susan Peake/ #153.1		Oppose	That the proposed zoning for the eight Papanui Living Streets (including Grants Road, Gambia, Mary, Proctor, Frank, Wyndham, Loftus and Horner Streets) be changed from being classified as residential high density and revert to residential medium density housing [See submission attachments for reference photo]..	
Trudi Bishop/ #155.4		Oppose	Beckenham should be removed from the medium residential zone	
Trudi Bishop/155.4	Megan Power/ #FS2039.1	Oppose	Beckenham should be removed from the medium residential zone Beckenham should be removed from the medium residential zone due to flooding risks and heritage significance. An increase in high density housing within the Beckenham loop will increase the risk of flooding due to less vegetation cover, more concrete. Water will have less places to go. With an increase in housing in this area it also increases the run off from roads from increased traffic due to an increase in population and an increase in the number of houses. There is a risk to an increase sediment in the surrounding rivers and therefore aquatic life especially of native species, flora and fauna.	Support
Susan Thomas/ #158.1		Seek Amendment	[Remove MRZ in Dallington]	
Jenny Crooks/ #159.1		Seek Amendment	That 25a Greenhaven Drive, Burwood, be rezoned from Rural Urban Fringe Zone to residential (Medium Density Residential Zoning preferred).	
Jill Edwards/ #162.1		Oppose	That the area surrounding and including Rose st should require a resource consent for development and that the area be zoned as a suburban character area	
James and Adriana Baddeley/ #164.2		Seek Amendment	That Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) be identified in the Christchurch District Plan as a Medium Density Residential zone and a Residential Character Overlay Area.	
Catherine & Peter Baddeley/ #165.3		Seek Amendment	[That] he area consisting of Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) [be zoned MRZ instead of HRZ]	
Lindsay Sandford/ #166.2		Seek Amendment	Zoning should be introduced in a staged manner. Using Leicester Crescent in Halswell as an example, my request would be to only classify the streets immediately surrounding the nearby "Town centre zone" (which currently doesn't have a single commercial building), and the major surrounding roads as HRZ, then notify a "pathway" for streets further away (such as Leicester Crescent) to be reclassified as HRZ when a certain percentage (e.g. 50%) of housing closer to the "Town centre zone" has already been developed as higher density housing.	
Traci Mendiola/ #172.1		Seek Amendment	That the property located at 8 Gilders Grove, Heathcote, Christchurch to be rezoned [from Rural Urban Fringe zone to] Medium Density Residential Zone.	
David Gibbons/ #176.2		Seek Amendment	Remove the High Density Residential Zoning on Allister Avenue and within 500m of Elmwood School on Leinster Road.	

Jorge Rodriguez/ #178.1		Seek Amendment	I S trongly oppose the proposed zoning of 5B Frome Place as a Residential Suburban Zone and urge the Christchurch City Council to rezone the property and the St Albans area in general as a Residential Medium Density Zone.	
Sean Walsh/ #179.2		Oppose	Request that Cashmere View Street (including #13 Cashmere View Street) Somerfield be a suburban charter area/street. Request that resource consent be required before any development can proceed.	
Jill Young/ #181.1		Oppose	Oppose MDRZ for Brodie Street, Ilam (Planning Map 30). Retain current RS zone in District Plan.	
Jill Young/181.1	Chapman Tripp/ #FS2063.23	Oppose	<p>Oppose MDRZ for Brodie Street, Ilam (Planning Map 30). Figure 6 - Kauri Cluster areas appropriate to retain suburban density

In parts of the RBIA city council planners propose retaining the underlying RMDS zoning, with its more liberal site coverage, recession plane and setback rules, effectively creating hybrid 2-storey medium density zones. These zones will still enable:

- Three dwelling on any site with more liberal recession planes
- A 1.5 metre setback from the footpath and only 1 metre on all other boundaries
- 50% site coverage
- Just 20% of the site as outdoor living space
- Just 20% glazing on street facing facades
- A mere 20% plant or tree coverage on the site

This side-steps WSP's recommendations. It stitches together different rules. It has not been assessed for environmental or social impacts and should not be applied. Mistakes and confusion related to these somewhat arbitrary and hastily cobbled-together zones, has implications in terms of the IHP hearings process which relies on unambiguous, accurate information being provided by the council in plenty of time.

The Kauri Cluster is an area of special importance to the community. The streets fall within what was part of the Deans Farm in the late 19th century.

The entire area around Riccarton Bush including the Kauri Cluster [Fig 10] forms part of a larger precinct that, during the Christchurch Replacement District Plan Review, the city council recommended should not be re-zoned for medium density. The 2015 IHP, chaired by Hon. Sir John Hansen, supported that view [quotes decision]. Unlike PC14, the 2015 review was wide-ranging, intensively researched and widely consulted on. We submit that panel's decision should be considered relevant in this context. It was well-founded and should be respected.

[In 2007] the council undertook extensive works to renew and enhance the area's local and residential character. This community eschews association with the Riccarton commercial area and identifies strongly with the history and residential character influence of Pūtarīngamotu Riccarton Bush and its surroundings. The proposed zoning for parts of this area, limiting heights while maintaining higher density, was a hasty desktop review intended as a compromise and its effects have not been adequately assessed.

Trevor Wilson/ #202.1		Seek Amendment	Request the proposed Medium Density Residential Zone be extended to incorporate parts of Hollis & Bowenvale Aves. and Lansdowne Tce. including Roseneath Place that are within walking distance, or 1km, of Centaurus Rd. and access to the Orbiter bus route.	
Trevor Wilson/202.1	Kāinga Ora/ #FS2082.119	Seek Amendment	Request the proposed Medium Density Residential Zone be extended to incorporate parts of Hollis & Bowenvale Aves. and Lansdowne Tce. including Roseneath Place that are within walking distance, or 1km, of Centaurus Rd. and access to the Orbiter bus route. The writers of PC14 have been inconsistent with their proposed change to Medium Residential Zone (MRZ) and in particular to the lower slopes of Cashmere Hills. The proposed planning map shows areas around Hollis & Bowenvale Aves and Lansdowne Tce remain zoned Residential Hills (RH) because of apparent limited availability to public transport, when areas around Dyers Pass Rd. have the same, if not greater, public transport limits but are being re-zoned MRZ.	Support
Emma Wheeler/ #206.2		Seek Amendment	Removing St James Avenue and Windermere Road from the intensification plan.	
Amie Cocking/ #208.2		Oppose	Reject the rule changes that allow for higher intensity residential development outside of the inner city (Four Avenues).	
Victor Ong/ #210.3		Seek Amendment	Rezone Rural Urban Fringe (RuUF) around 565 Yaldhurt Road to Medium Density Residential (MRZ)	
Victor Ong/210.3	Christchurch International Airport Limited/ #FS2052.116	Seek Amendment	Rezone Rural Urban Fringe (RuUF) around 565 Yaldhurt Road to Medium Density Residential (MRZ) By converting more land to residential use, we can help alleviate the density in Christchurch City Centre, leading to a potential reduction in traffic congestion. Releasing land for residential development can contribute to slowing down and stabilizing property prices. Increasing the housing supply can potentially meet the growing demand, reducing the risk of housing price fluctuations and making homeownership more accessible to a broader range of residents. The construction of new housing in this area would enhance the quality of living for residents. New builds often feature improved insulation for better heat and sound insulation, as well as enhanced structural bracing, ensuring increased comfort and safety for occupants	Oppose
Pauline McEwen/ #211.1		Seek Amendment	That the area at the eastern end of Rugby Street be zoned Medium Density Residential instead of the proposed High Density Residential	
Graham Thomas Blckett/ #215.1		Seek Amendment	That all of the area of St Albans north of Bealey Avenue and south of Edgeware Road be zoned Medium Density Residential [instead of High Density Residential].	
Graham Thomas Blckett/215.1	Anne Dingwall/ #FS2037.299	Seek Amendment	That all of the area of St Albans north of Bealey Avenue and south of Edgeware Road be zoned Medium Density Residential [instead of High Density Residential]. <i>Since the earthquakes this area has been very much redeveloped and rebuilt with many new townhouses. It seems hardly fair to now change the rules and allow much taller developments. Many residents have spent considerable amounts of money on new townhouses in the belief they would never have excessively tall builds next door. This is one of the main reasons they brought in St Albans rather than inside the Four Avenues. The Four Avenues is better suited with better public transport and the expectation of large buildings. St Albans already has a car congestion problem without higher density developments</i>	Support
Russell Wills/ #216.2		Seek Amendment	[No Medium Density Residential zone in Hornby]	

Martin Snelson/ #220.1		Seek Amendment	Amend the Medium Density Residential Zone [surrounding] the proposed North Halswell town centre, to [apply] to the areas being developed and not to those newly built areas

Cynthia Snelson/ #221.10		Seek Amendment	[Retain current zoning in those parts of north Halswell that have already been developed]	
Graeme McNicholl/ #226.1		Seek Amendment	Rezone inner-city large blocks of land, such as Princess Margaret Hospital site, the old Christchurch Women's Hospital site on Colombo Street, current empty tracts of land such as along Moorhouse Avenue, for mixed use retail with apartment living above. Rezone older commercial/industrial areas of Christchurch such as Addington, Sydenham and Phillipstown to mixed use commercial with apartment living above. Future large green field developments should cater for the medium-density housing as proposed.	
Graeme McNicholl/226.1	Christchurch International Airport Limited/ #FS2052.140	Seek Amendment	Rezone inner-city large blocks of land, such as Princess Margaret Hospital site, the old Christchurch Women's Hospital site on Colombo Street, current empty tracts of land such as along Moorhouse Avenue, for mixed use retail with apartment living above. Rezone older commercial/industrial areas of Christchurch such as Addington, Sydenham and Phillipstown to mixed use commercial with apartment living above. Future large green field developments should cater for the medium-density housing as proposed. Christchurch city, following the earthquakes, has recently had major residential plan changes under the earthquake legislation which has already allowed a lot of residential medium density housing to take place in Christchurch's older suburbs. The city should now be given a chance to bed-in these current changes and allow the city's new character to organically settle in place. Having a further upgrade imposed on the city will drastically alter it's current organic growth and therefore lose the city's character and charm. It is totally unfair that the government has forced the Christchurch City Council to make further changes so soon after major changes following the earthquake. While I support high-density housing as is currently designated throughout the city, I disagree with intensifying this further throughout the rest of the city. I believe that allowing a medium density environment throughout much of the city and imposing three and four story buildings, will have a negative impact on the value of surrounding properties, and will potentially alter the rate-payer base of the city, by way of driving some families to the outer lying districts to avoid this imposition. This will create gaps in society where particular home owners will feel not considered or catered for in this proposed housing environment.	Oppose
Graeme McNicholl/ #226.4		Seek Amendment	Rezone Addington, Sydenham and Phillipstown to mixed use commercial with apartment living above.	
Graeme McNicholl/226.4	Christchurch International Airport Limited/ #FS2052.143	Seek Amendment	Rezone Addington, Sydenham and Phillipstown to mixed use commercial with apartment living above. This would allow for this old industrial area of town to be upgraded and change to allow high rise apartment living in an organic way over time. This helps to keep the city compact by not driving some home owners to the outerlying districts and keeps people closer to the city centre, utilising the new amenities such as the Metro Sports Centre, theatres, restaurants, bars and retail that are still under development. We need to give the city a chance to realise the vision that was set in the blue-print for the city following the earthquakes. Rezone Addington, Sydenham and Phillipstown to mixed use commercial with apartment living above. This would allow for this old industrial area of town to be upgraded and change to allow high rise apartment living in an organic way over time. This helps to keep the city compact by not driving some home owners to the outerlying districts and keeps people closer to the city centre, utilising the new amenities such as the Metro Sports Centre, theatres, restaurants, bars and retail that are still under development. We need to give the city a chance to realise the vision that was set in the blue-print for the city following the earthquakes.	Oppose

Mary Crowe/ #281.3		Seek Amendment	1. Amend the zoning of Hurley Street from High to Medium density.	
Mary Crowe/281.3	Clare Dale/ #FS2029.34	Seek Amendment	1. Amend the zoning of Hurley Street from High to Medium density. Re: Hurley Street Christchurch Central. The zoning for this street should be amended to Medium, not High density zone. There are a number of reasons for this. Firstly, it is on the edge of the red zone and suffers significant flooding in heavy rain events as does its only vehicular access on Oxford Tce. For this reason, it is inappropriate that buildings up to 10 storeys could be built here. The character of the parkland area surrounding the street would also be negatively affected. Additionally, in regard to public transport, this area is very poorly provided for, with no bus route on Barbadoes, Madras or Kilmore Streets, and only very infrequent buses on Fitzgerald ave. Therefore, this area does not come under the "close to public transport" description required for a High density zone.	Oppose
Millie Silvester/ #286.2		Seek Amendment	Seek to rezone west side of Paparoa Street to Medium Density Residential instead, like the east side. We propose that the demarcation of High Density Residential zone be redrawn much closer to Northlands Mall. This will still allow for more housing without impacting the residents in the area, as stated above, and ruining what makes Paparoa Street a prime example of the Garden City.	
Mark Nichols/ #287.2		Seek Amendment	Seek densification in a planned and staged way by staging the effective date of the zoning changes in for example rings coming out from the city centre and/or major shopping areas, so that the densification occurs in a structured way over time, rather than in a haphazard way across most of the city. This will allow for a more staged build out of the infrastructure required to support the densification.	
Mark Nichols/287.2	Ivan Thomson/ #FS2047.10	Seek Amendment	Seek densification in a planned and staged way by staging the effective date of the zoning changes in for example rings coming out from the city centre and/or major shopping areas, so that the densification occurs in a structured way over time, rather than in a haphazard way across most of the city. This will allow for a more staged build out of the infrastructure required to support the densification. I appreciate the need to add 40,000 houses over the next 30 years, but I am concerned that the approach proposed and being driven is both in-efficient and bad planning. In-efficient because allowing the densification randomly across the city will require additional services across the whole city instead of progressively in concentrated areas.	Oppose
Chessa Crow/ #294.6		Seek Amendment	Seek to reduce extent / Remove Medium Residential zoning from New Brighton area and amend to be Residential Suburban Transition Zone	
Mason Plato/ #298.4		Oppose	Seek to remove Medium Density Residential Zone.	
Sam Holdaway/ #300.1		Seek Amendment	Include Kenwyn Ave in Medium Density [or]...introduce a medium zone between the [Residential Suburban Density] and Medium Density.	
Sam Holdaway/300.1	Kāinga Ora/ #FS2082.236	Seek Amendment	Include Kenwyn Ave in Medium Density [or]...introduce a medium zone between the [Residential Suburban Density] and Medium Density. We live in Kenwyn Ave, St Albans. We want the plan amended to include our street as Medium Residential Zone or introduce a medium zone between the RSD and Medium Density. Our street is currently shown as Suburban Density due to a Qualifying Matter "Areas with little or no public transport allow reduced housing density for new developments." To put this into perspective we live 600m away from a main arterial route bus stop. 100m away from a cycle way which leads directly into the City. 4km away from the CBD, 1km away from Northlands mall and 20m away from a reserve. We have a 780m2 section with a perfect opportunity to provide a 2nd and possibly 3rd dwelling. The opportunity to provide a zone between suburban density and medium density seems to have been overlooked. A zone that gives the opportunity to build a 2nd or 3rd 2 story dwelling on a large section under 900m2. Somewhere between 3x 3 story dwellings and no option to develop (Residential Suburban Zone).	Support

Bron Durdin / #303.2		Seek Amendment	Reduce extent of the application of the Medium Density Residential Zone to central city, inner city residential suburbs, or within a radius of 2km (example) of the central city.	
Jo Jeffery/ #316.5		Oppose	[Remove MRZ] Keep the height change proposal within the four avenues until such a time that further housing is required outside of that.	
Nicholas Latham/ #318.3		Seek Amendment	[Seeks] [l]ess restrictions on increasing housing, especially mixed zone areas Support[s] more housing, with an especially in the city centre	
George Hooft/ #321.1		Seek Amendment	[Reduce extent of MRZ] The sort of medium level intensification that is predicated should be reserved for areas inside or around the four aves or other new designated areas where they are known in advance.

Janice Lavelle/ #352.1		Not Stated	Seriously rethink the Medium Density Residential zones across Christchurch.	
Elisabeth Stevens/ #355.1		Seek Amendment	Zone [all of Hawthorne Street Papanui Medium Density Residential].	

Julia Tokumaru/ #372.14		Support	Support high-density housing near the city and commercial centres. Seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Julia Tokumaru/372.14	Kauri Lodge Rest Home 2008 Limited/ #FS2059.6	Support	Support high-density housing near the city and commercial centres. Seek that the council enable 6 to 10 storeys for residential buildings near commercial centres. The council is required by law to allow residential buildings of at least 6 storeys within a 1.2km radius of commercial centres such as malls and the city centre. The council plan to enable this, while also allowing up to 10 storeys for residential buildings closer to the city centre. This would enable a wider range of dense housing development options. It would also allow more people to live close to services and amenities.	Support
Colin Gregg/ #376.3		Seek Amendment	That Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) be be zoned Medium Density Residential [instead of HRZ]	
Colin Gregg/376.3	Patricia Harte/ #FS2069.4	Seek Amendment	That Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) be be zoned Medium Density Residential [instead of HRZ] [The area] has retained a sense of character and coherence that, we consider, is somewhat unique. It has a relationship to the Avon River and to the parklands beyond, which are part of, and provide a link to the rest of, Hagley Park. It has remained an enclave of relatively spacious residential dwellings that has also enabled the retention of many trees (including significant specimen trees) both within the streetscape and within private properties. Heritage items, including some of the surviving older residences, are an important part of the overall character of the Area. Changing the area around these items would remove their context and impact on their heritage setting. The inclusion of this area as a High-Density Residential zone threatens to destroy this character and the coherence it provides. In addition, we note that there may also be further constraints to High (or even Medium) Density development in the area, which is identified as TC3 land and much of which is also in the Council's own Flood Plain overlay. That is not to mention potential parking issues that would likely be created if there was a proliferation of High Density accommodation.	Support
Toka Tū Ake EQC/ #377.8		Seek Amendment	Consider restricting density of development in the High and Medium Density residential areas which intersect with the Flood Management overlay.	
Toka Tū Ake EQC/377.8	Kāinga Ora/ #FS2082.289	Seek Amendment	Consider restricting density of development in the High and Medium Density residential areas which intersect with the Flood Management overlay. Flood hazard risk is predicted to increase in the near future due to rising sea-levels, associated rising ground-water levels, and more frequent and intense rain events. Flooding does not pose high risk to life or to the structural integrity of buildings, but frequent, repeated flood events can have a severe effect on the wellbeing of residents and incur a high financial cost to businesses and residents due to loss of business, loss of access to buildings, damage to property and furnishings, and clean-up costs (including removing contaminated silt from under houses which can become a health hazard). We support the extent of the modelled Flood Management Areas and note that the threshold for this mapped extent is a greater intensity and lower likelihood flood than the lowest flood level modelled by other territorial authorities. We do not suggest that intensification should not be allowed in this area, but there should be some restriction on density in Medium and High Density Residential Areas which intersect with this overlay, in addition to the required floor level provision.	Oppose
Kate Gregg/ #381.1		Seek Amendment	Seeks that Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) be identified in the Christchurch District Plan as a Medium Density Residential zone and a Residential Character Overlay Area and be made subject to the rules that apply to Residential Character areas.	
Kate Gregg/ #381.4		Seek Amendment	If Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) are not included as a Residential Character Area, that the Area be zoned Medium Density Residential: and, that sunlight access be better protected by further amending the medium/high density southern boundary recession plane to 45° from 3m at the boundary: and that neighbours along the southern boundaries of any proposed developments that involve non-compliance with height or access to sunlight rules can be notified of the required resource consents and to make submissions.	
Gina McKenzie/ #382.1		Oppose	[Seeks that] Hornby [be removed] from the list of suburbs for high density development.

Luke Gane/ #412.3		Oppose	Oppose the Local Centre Intensification Precinct provisions at 8 Bletsoe Avenue. Retain as Medium Density Residential Zone only.	
Caroline May/ #413.1		Seek Amendment	Opposes zoning that enables 3 storey buildings.	

Zoe McLaren/ #418.4		Support	[S]upport[s] the changes to replace zones with medium/high density zones.	
Zoe McLaren/418.4	Kāinga Ora/ #FS2082.303	Support	[S]upport[s] the changes to replace zones with medium/high density zones.	Support
James Thomas/ #419.1		Seek Amendment	Allow further intensification on the Port Hills	
James Thomas/419.1	Kāinga Ora/ #FS2082.304	Seek Amendment	Allow further intensification on the Port Hills Further intensification should be allowed on the current housing areas on the Port hills	Support
Tom King/ #425.2		Support	[S]upport[s] changes to manage and set controls/requirements around increasing housing density, particularly in suburban area's.	
Tracey Berry/ #430.4		Seek Amendment	[That Avonhead, including Westall Lane, is zoned Medium Density Residential] [Relates to request to remove Airport Noise QM and RuUF zoning on Westall Lane]	
Tracey Berry/430.4	Kāinga Ora/ #FS2082.312	Seek Amendment	[That Avonhead, including Westall Lane, is zoned Medium Density Residential] [Relates to request to remove Airport Noise QM and RuUF zoning on Westall Lane] The submitter opposes the noise contour provisions imposed by the Christchurch Airport, which unnecessarily restrict development and use of land in otherwise high-quality build areas of Burnside and Avonhead. The submitter lives on Westall Lane, has 3 acres (on town water and sewage systems) and are surrounded by residential housing but are unable to develop, build units for renting out and otherwise utilize their land. At a little under 3kms from the airport and in an otherwise highly populated suburb, the submitter feels it very unjust for the airport to have such significant control over the use of land in the area, which is entirely inconsistent with other locations in New Zealand. This stance is entirely contrary to the government objectives for housing intensification.	Support
Sonia Bell/ #431.2		Seek Amendment	To re-access the existing council flats such as at the beginning of Main South Road and better utilize the land for low-cost housing here and on other Council rental properties.	
John Dunford/ #433.1		Seek Amendment	That the whole zoning is restricted to the CBD areas within the four avenues.	
John Dunford/ #433.4		Seek Amendment	Oppose MRZ as it applies to 81 Fendalton Road	
David Allan/ #437.1		Seek Amendment	[Reduce extent of MRZ] Medium density housing should only be permitted in the central city and in large tracts of land that were designed for that purpose.	
Jeff Vesey/ #439.2		Seek Amendment	That the area proposed to be Residential Suburban Zone under the Airport Noise Influence Area in Avonhead/Ilam be zoned Medium Density Residential Zone in line with the surrounding area and the National Policy Statement for Urban Development.	
Jeff Vesey/439.2	Christchurch International Airport Limited/ #FS2052.126	Seek Amendment	That the area proposed to be Residential Suburban Zone under the Airport Noise Influence Area in Avonhead/Ilam be zoned Medium Density Residential Zone in line with the surrounding area and the National Policy Statement for Urban Development. The Airport Noise Influence Area is intended the mitigate any noise effects on residents and effects on the airport. To leave the zoning for this area as Residential Suburban is in conflict with the National Policy Statement and does not take into account the large amount of sought after amenity that would support intensification in Ilam/Avonhead. The Airport Noise influence area is seldom an issue as the aircraft use this area for approaches to the airport only on very few days, likely less than 2 per month. The benefits of zoning Avonhead/Ilam Medium Density Residential are summarised below: - Avonhead/Ilam amenities which make it ideal for intensification include parks, sports clubs, shopping and schools. The suburbs are also centrally located with good road and public transport links. - Avonhead and Ilam which largely make up this area are well established mature suburbs with a mixture of residents from young families attracted to the schooling and sporting opportunities to university students wanting to be close to class, and older people wanting to stay in the area they know and love and many domiciled since the suburbs were formed. - Much of this area was built in the 1960's and 1970's. While mostly permanent material and some fine examples of architecture from that era those houses are now 40 to 60 years old, many in need of major renovation, cold with minimal insulation if any and single glazing.	Oppose

			<p>- Upgrading and replacement housing is now due. There is a smattering of townhouse/units in this area. Most of these units were built 40 to 50 years ago and on cross lease sites and as such need updating. Allowing more town houses to be built would improve the housing stock and allow more people to live in this highly valued area for its amenities.</p> <p>Summary</p> <p>This is a well located area with superb amenities and very good infrastructure it should be at the top of the list to comply with the National Policy Statement and allow well designed intensification. Noise issues are minimal given the very few days the airport uses this area for approaching aircraft. Qualifying matters for this area mitigate any noise nuisance. To suppress new housing in this area will continue the areas decline in warm modern housing for those wanting to live close to all the advantages of living in this area.</p>	
Sandi Singh/ #440.7		Oppose	Oppose the application of Medium Density Residential Zone across the city.	
Summerset Group Holdings Limited/ #443.10		Seek Amendment	<p>Extend the MDRZ zoning to the entire Summerseton Cavendish village (147 Cavendish Road,Casebrook, Christchurch) , and legally described asLot 1 DP 519380 (record of title 815809).</p>

Jillian Schofield/ #467.2		Oppose	[O]ppose[s] the change in height restrictions that have been proposed and the number of buildings per section in Hornby and surrounding areas [such as] Hei Hei.	
Kem Wah Tan/ #471.22		Not Stated	[Retain operative plan zoning for postcode area 8053, including Aorangi Road]	
Rachel Sanders/ #475.1		Seek Amendment	We would like the Council to uphold PC14 in relation to Mount Pleasant, and similar areas in the Port Hills, remaining Residential Hills zone rather than being redesignated MDRS, for the reasons detailed in our submission. Not upholding it will increase risk to people's safety and increased environmental harm.	
Rachel Sanders/ #475.5		Seek Amendment	The attached document captures the details why we believe it is correct to retain Mount Pleasant as Residential Hills rather than MDRS. Notable topics are: Emergency service access	
Rachel Sanders/ #475.6		Seek Amendment	The attached document captures the details why we believe it is correct to retain Mount Pleasant as Residential Hills rather than MDRS. Notable topics are: Pedestrian Safety Cyclist Safety	
Rachel Sanders/ #475.7		Seek Amendment	The attached document captures the details why we believe it is correct to retain Mount Pleasant as Residential Hills rather than MDRS. Notable topics are: Lack of Amenities	
Rachel Sanders/ #475.8		Seek Amendment	The attached document captures the details why we believe it is correct to retain Mount Pleasant as Residential Hills rather than MDRS. Notable topics are: Sewerage and Storm Water Drainage	
Rachel Sanders/ #475.9		Seek Amendment	The attached document captures the details why we believe it is correct to retain Mount Pleasant as Residential Hills rather than MDRS. Notable topics are: Significance of Port Hills Aesthetics	
Rachel Sanders/ #475.10		Seek Amendment	The attached document captures the details why we believe it is correct to retain Mount Pleasant as Residential Hills rather than MDRS. Notable topics are: Emergency egress	

Rob Seddon-Smith/ #476.1		Support	[S]upport[s] the planned areas of intensification.	
Mark Siddall/ #478.1		Seek Amendment	[R]estrict the MRZ to areas surrounding the CBD and suburban shopping areas.	
Selma Claridge / #480.2		Seek Amendment	[That] Harris Crescent [Papanui, retains its operative zoning instead of Medium Density Residential]	
John Buckler/ #485.1		Seek Amendment	Change 45 St. Albans Street to a Medium Density Residential zone or preserve current sunlight.	
Janice Hitchon/ #495.3		Seek Amendment	That the Ashfield Place, Maidstone Road should not be changed from its present designation...[o]ppose the changes to height limits in the Ilam residential areas.	
Hone Johnson/ #498.1		Oppose	Oppose all higher density zoning changes	
Kyri Kotzikas/ #502.5		Oppose	Oppose the zoning of High Density Residential for Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street), and seek that it be Medium Density Residential zone.	
Michael Case & RJ Crozier/ #508.1		Seek Amendment	Amend part of the Future Urban Zone for 60 Croziers Road and 340 Cranford Road, Mairehau. Seek that part of these properties are zoned MRZ.	
R.J Crozier/ #511.1		Seek Amendment	Amend part of the Future Urban Zone for 60 Croziers Road and 340 Cranford Road, Mairehau. Seek that part of these properties are zoned Medium Density Residential.	
Chris Wilison/ #530.3		Seek Amendment	[Seeks that the area identified as] Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street), be rezoned as Medium Density Residential Zone as opposed to the proposed High Density Residential Zone under PC14.	
PRUDENCE MORRALL/ #535.2		Oppose	Change MRZ to not apply to Therese Street	
Deidre Rance/ #561.1		Seek Amendment	No medium [density zone in the Strowan area]	
Rachel Hu/ #564.1		Seek Amendment	[Standardise the MRZ and HRZ zones] e.g., choose for developers to have a clear guideline for 3-storeys or 6-storeys. Or at least make it more standard per suburb than every street block.	
Gareth Bailey/ #579.2		Seek Amendment	Exclude properties within waterway setbacks from MDRZ classification.	
Jaimita de Jongh/ #583.7		Seek Amendment	Seek that increased density is not allowed in areas that drain into the mid-Heathcote Ōpāwaho	
Nick Brown/ #585.1		Seek Amendment	[That the area of Strowan between] Heaton Street/Innes Road and Blighs Road [be zoned MRZ instead of HRZ]	
Northwood Residents' Association/ #592.1		Oppose	To not proceed with the rezoning of part of Northwood subdivision [from Residential Suburban to Medium Density Residential].	
Northwood Residents' Association/592.1	Chapman Tripp/ #FS2063.52	Oppose	<p>To not proceed with the rezoning of part of Northwood subdivision [from Residential Suburban to Medium Density Residential].</p> <p>NRA strongly opposes the planned rezoning of a significant part of Northwood from Residential Suburban (RS) to Medium Density Residential Zone (MRZ).</p> <p>We understand that the proposed change is arising from a change in legislation and are aware of the housing challenges that New Zealand is facing, including the need for more housing. However, we believe that Northwood is not suited for the proposed rezoning, and we have serious concerns about the negative impacts potentially resulting from it. In this submission, we have included our main concerns. In particular, the proposed rezoning raises concerns regarding its impact on the existing plan and the liveability of the subdivision, the environment, and the accrued risks of stormwater management issues:</p> <p>1. The Northwood subdivision was designed in its entirety with a view to accommodate a community within it that would have a mixture of housing density and land areas. These areas were well defined and co-exist well with each other within the subdivision. Northwood already contains significant areas of medium and high-density housing under its current plan. Northwood is an area of excellent town planning and, arguably, of great liveability, as demonstrated by the pride of its residents and the well looked-after subdivision.</p> <p>The plan introduces MRZ in a single contiguous block incorporating all sections within a certain distance to the Main North Road. While the proposed change may allow more sections to become available for intensification, it completely ignores the merits of the existing plan. NRA strongly opposes the use of unplanned rezoning in Northwood. The proposed MRZ swathe includes amongst other things, Northwood Villas, an over 55's entity with its own covenants. One of the features that defines the character of Northwood, is the layout of the current buildings on their sections. In general, the owners of the sections facing the road frontage have maintained the original guidelines of space and openness in keeping with the original covenants applied by the subdivision developer, RD Hughes. We argue that Northwood's current plan supports the ambience of our place.</p> <p>2. Christchurch City Council recently opened a consultation process on its proposed Urban Forest Plan. As outlined in the proposed plan, Northwood stands out with its higher canopy cover (15%) than all bordering areas. The NRA believes that the Northwood canopy cover should be protected. In addition to being a significant loss to the environment and the character of the area, the proposed change will be an impediment to CCC achieving its goals of growing its urban forest canopy (Goal 1) and of</p>	Oppose

			<p>protecting urban trees by looking after them as “critical infrastructure (Goal 3).</p> <p>3. Furthermore, the NRA raised concerns in the past about ongoing flooding issues in the Northwood subdivision. Part of the Northwood subdivision is predicted to be within the extent of a 1 in 50-year flood event. The NRA doesn’t support the rezoning as we believe it would only accentuate the issue and will potentially pose a health and safety risk to the Northwood residents.</p> <p>4. Lastly, we would like to highlight that significant developments are already happening in the area, with a large development across the Main North Road. We believe that it would be inappropriate to proceed with the proposed rezoning until the impacts of this major development on horizontal infrastructure, road usage and traffic are well understood.</p> <p>We urge the Council to work collaboratively with the Northwood Residents' Association to ensure that any proposed changes are in the best interests of the Northwood residents and the broader Christchurch community. We hope that you will consider our concerns and take appropriate action to protect the unique character and environment of Northwood and to protect its residents.</p> <p>[Please refer to attachment for full submission]</p>	
Northwood Residents' Association/592.1	Chapman Tripp/ #FS2064.51	Oppose	<p>To not proceed with the rezoning of part of Northwood subdivision [from Residential Suburban to Medium Density Residential].</p> <p>NRA strongly opposes the planned rezoning of a significant part of Northwood from Residential Suburban (RS) to Medium Density Residential Zone (MRZ).</p> <p>We understand that the proposed change is arising from a change in legislation and are aware of the housing challenges that New Zealand is facing, including the need for more housing. Cashmere Park Ltd, Hartward Investment Trust and Robert Brown/ #593.1		Seek Amendment	Rezone site in Hendersons Basin ODP to Medium Density Residential	
Carol Shu/ #626.1		Seek Amendment	Keep Hyde Park and Avonhead area all RS zoning.	
Tom Crawford/ #628.6		Support	[Regarding the Sunlight Access Qualifying Matter] seek[s] that the council drop this qualifying matter.	
Michael Palmer/ #647.1		Seek Amendment	[Limit extent of MRZ / intensification to the inner] suburbs surrounding the city centre including St Albans, Linwood, Philipstown, Addington and Merrivale.	
Lawrence & Denise May/ #665.2		Seek Amendment	If Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) are not included as a Residential Character Area, that the Area be zoned Medium Density Residential	
Cooper Mallett/ #666.5		Seek Amendment	Make all the tall buildings in the middle of the city.	
Liz Oliver/ #667.1		Seek Amendment	[Reduce proposed extent of MRZ] The MRZ should be concentrated closer to commercial areas.	
Keri Murison/ #668.2		Seek Amendment	Amend the zoning of Strowan from HRZ to MRZ	
Jack Gibbons/ #676.14		Seek Amendment	[Extend MRZ across the proposed Airport Noise Influence Area - relates to requests to remove that QM]	
Jack Gibbons/676.14	Christchurch International Airport Limited/ #FS2052.65	Seek Amendment	[Extend MRZ across the proposed Airport Noise Influence Area - relates to requests to remove that QM] The airport noise contour thrusts deep into the city covering a considerable amount of urban land. Council is proposing to prevent all zone changes in this area, exempting it from the MDRS / NPS-UD. The area is already urbanized, with plenty of existing residents, and is otherwise indistinguishable from elsewhere in the suburbs. It also covers some areas that should be HRZ. Other councils in New Zealand handle airport noise in areas like this by mandating improved noise insulation in the construction of new buildings, leaving the zoning as it otherwise would be. There is no just explanation why the council has chosen to suppress all construction over this option	Oppose
Donna Kenton-Smith/ #677.1		Oppose	[Seeks removal of] intensification plans for Merivale[; and considers it] more sensible to restrict the area where taller buildings can be built.	
Andrew McCarthy/ #681.4		Seek Amendment	[That] the entireexisting Residential Hills Zone is [zoned] MDRZ (Residential Hills Precinct).	
Andrew McCarthy/681.4	Red Spur Ltd/ #FS2068.44	Seek Amendment	<p>[That] the entireexisting Residential Hills Zone is [zoned] MDRZ (Residential Hills Precinct).</p> <p>it is clear that the intention of the Act is to allow more dwellings per hectare than waspreviously allowed</p> <p>[Supports intensification on the Hills and enabling] apartment-style living</p>	Support
Andrew McCarthy/681.4	Rachel Sanders/ #FS2074.4	Seek Amendment	<p>[That] the entireexisting Residential Hills Zone is [zoned] MDRZ (Residential Hills Precinct).</p> <p>it is clear that the intention of the Act is to allow more dwellings per hectare than waspreviously allowed</p> <p>[Supports intensification on the Hills and enabling] apartment-style living</p>	Oppose
Terence Sissons/ #696.2		Seek Amendment	Limit the HDRZ to the central city area and provide for MDRZs around the suburban shopping centres	
Ann-Mary & Andrew Benton/ #698.2		Seek Amendment	<ul style="list-style-type: none"> • That Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) be identified in the Christchurch District Pan as a Medium Density Residential zone and a Residential Character Overlay Area and be made subject to the rules that apply to Residential Character areas: or, • If Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) are not included as a Residential Character Area, that the Area be zoned Medium Density Residential: and, 	

			<ul style="list-style-type: none"> • That sunlight access be better protected by further amending the medium/high density southern boundary recession plane to 45° from 3m at the boundary: and, • That neighbours along the southern boundaries of any proposed developments that involve non-compliances with height or access to sunlight rules <i>can</i> be notified of the required resource consents and to make submissions. • Any further or other decisions that achieve the outcomes sought by this submission, or are required as a consequence of the relief [sought]. 	
Christs College/ #699.2		Oppose	Delete medium residential zone from 21 Gloucester Street.	
Ian McChesney/ #701.13		Seek Amendment	[That Rattray Street in Riccarton is zoned MRZ instead of HRZ] - Rattray St should be included in the MDR zone (i.e. included in the area south and west of the street).	
Ian McChesney/701.13	Hamish Ritchie/ #FS2020.2	Seek Amendment	[That Rattray Street in Riccarton is zoned MRZ instead of HRZ] - Rattray St should be included in the MDR zone (i.e. included in the area south and west of the street). The inclusion of Rattray St in the HDRZ is inappropriate and unjustified. Currently Rattray St is in the RSDT zone; this means that the proposed change is much more extreme than in most other areas (i.e. RSDT to HDR, rather than RMD to HDR as for Wainui St et al). The change is particularly important given Rattray St includes a number of narrow east-west aligned sections, which are unsuited to a HDR zone. It also seems to me inappropriate since the west side of Rattray St borders on the proposed Shands/Piko heritage area. Intensive, high rise development might be a jarring transition into the protected zone (I note the areas bordering Riccarton Bush for example have allowed for a transition from high density).	Support
Ian McChesney/701.13	Anne Dingwall/ #FS2037.565	Seek Amendment	[That Rattray Street in Riccarton is zoned MRZ instead of HRZ] - Rattray St should be included in the MDR zone (i.e. included in the area south and west of the street). The inclusion of Rattray St in the HDRZ is inappropriate and unjustified. Currently Rattray St is in the RSDT zone; this means that the proposed change is much more extreme than in most other areas (i.e. RSDT to HDR, rather than RMD to HDR as for Wainui St et al). Lauren Gibson/ #708.4		Oppose	[Opposes intensification plan change and in particular for 19a Russell Street]	
Philippa Tucker/ #709.4		Seek Amendment	That the northwest side of Windermere Road is not zoned Medium Density Residential	
Andrea Williams/ #711.1		Oppose	Amend residential zoning in Hornby from HDZ and MDZ to RS.	
Michele McKnight/ #726.3		Oppose	[Seeks] the council, to remove Gwynfa Ave and any other similiar streets on this hill from the medium density proposal	
Sutherlands Estates Limited / #728.10		Seek Amendment	Rezone all of the residential properties that front Storr Close, Glendore Drive, James Mackenzie Drive and Sutherlands Road to Future Urban	
Gwynfa Ave Residents Association/ #730.1		Seek Amendment	[Seeks that] the Council exclude Gwynfa Ave from increased residential density and ask them to also consider other private hill lanes who will be facing many of the same issues.	
Christian Jordan/ #737.1		Seek Amendment	Apply MDRS zone across all areas of the City.	
Christian Jordan/737.1	Anne Dingwall/ #FS2037.1471	Seek Amendment	Apply MDRS zone across all areas of the City. the key to creating affordable supply is the allowance of infill across the city wherever landis available.	Oppose
Woolworths/ #740.4		Support	Except as otherwise modified by this submission, including amended zoned boundaries associated with the North Halswell Town Centre zone and St Albans (Neighbourhood / Local) Centre zone, retain amended residential zoning and nomenclature.	

Woolworths/740.4	Kāinga Ora/ #FS2082.487	Support	Except as otherwise modified by this submission, including amended zoned boundaries associated with the North Halswell Town Centre zone and St Albans (Neighbourhood / Local) Centre zone, retain amended residential zoning and nomenclature. Woolworths supports the application of the NPS-UD (and the regional policy statement) provisions which prioritise development in and around centres. Woolworths has continued to invest and explore new opportunities in response to population growth in Christchurch and is currently working on several development proposals to address gaps in its network or to upgrade existing operations. Woolworths remains concerned that the increased residential intensification is not balanced with commensurate policy flexibility to meet supply side wellbeing needs, or the functional requirements of supermarkets.	Support
Simon Fowke/ #746.1		Oppose	Do not Re-Zone Paparua Street to Medium Density	
Karen Fowke/ #748.1		Oppose	Reject Medium Density Dwellings in Paparua Street	
Christchurch City Council/ #751.94		Seek Amendment	Change [zoning at 35 Hanmer Street (Map 32)] from HRZ to MRZ.	
Christchurch City Council/751.94	Anne Dingwall/ #FS2037.916	Seek Amendment	Change [zoning at 35 Hanmer Street (Map 32)] from HRZ to MRZ. Zoning beneath Heritage or Character areas is MRZ due to Policy 4, however this is mistakenly shown as HRZ.	Support
Christchurch City Council/ #751.97		Seek Amendment	Change zoning [of properties at 65-51 Shortland Street (Map 33)] to MRZ [instead of Residential Suburban]. [Refer to ATTACHMENT 2].	
Christchurch City Council/751.97	Anne Dingwall/ #FS2037.919	Seek Amendment	Change zoning [of properties at 65-51 Shortland Street (Map 33)] to MRZ [instead of Residential Suburban]. [Refer to ATTACHMENT 2]. Properties are not within LTPPA but are zoned Residential Suburban.	Support
Christchurch City Council/ #751.110		Seek Amendment	[Remove any MRZ zoning within the Tsunami Management Area and retain operative / RSDT zoning].	
Christchurch City Council/751.110	joseph zonneveld/ #FS2021.1	Seek Amendment	[Remove any MRZ zoning within the Tsunami Management Area and retain operative / RSDT zoning]. Some properties zoned RS and RSDT Zone have been incorrectly changed to MRZ instead of retaining the current zoning. Again, these changes are submitted to be more effective in achieving proposed Policy 5.2.2.5.2.	Seek Amendment
Christchurch City Council/751.110	Anne Dingwall/ #FS2037.932	Seek Amendment	[Remove any MRZ zoning within the Tsunami Management Area and retain operative / RSDT zoning]. Some properties zoned RS and RSDT Zone have been incorrectly changed to MRZ instead of retaining the current zoning. Again, these changes are submitted to be more effective in achieving proposed Policy 5.2.2.5.2.	Support
Christchurch City Council/751.110	LMM Investments 2012 Limited/ #FS2049.6	Seek Amendment	[Remove any MRZ zoning within the Tsunami Management Area and retain operative / RSDT zoning]. Some properties zoned RS and RSDT Zone have been incorrectly changed to MRZ instead of retaining the current zoning. Again, these changes are submitted to be more effective in achieving proposed Policy 5.2.2.5.2.	Oppose
Christchurch City Council/ #751.115		Seek Amendment	Change zoning [on Highsted Road] within the identified residential parcels (only) to MRZ [Refer to ATTACHMENT 25].

Christchurch City Council/751.139	Anne Dingwall/ #FS2037.961	Seek Amendment	Over MRZ area [at 160 Langdons Road, Map 24] change zoning to HRZ and apply TCIP [Refer to ATTACHMENT 42]. MRZ is shown in an area affected by Policy 3(d), and should have the same residential response for Papanui (HRZ with TCIP).	Support
Christchurch City Council/ #751.141		Seek Amendment	Remove [Large Local Centre Intensification Precinct] from MRZ sites [at Beverley Street / Papanui Road, Map 31] and apply the LLCIP to the HRZ site within. [Refer to ATTACHMENT 43].	
Christchurch City Council/751.141	Anne Dingwall/ #FS2037.963	Seek Amendment	Remove [Large Local Centre Intensification Precinct] from MRZ sites [at Beverley Street / Papanui Road, Map 31] and apply the LLCIP to the HRZ site within. [Refer to ATTACHMENT 43]. Site is zoned MRZ, but has LLCIP. The Precinct should encircle the MRZ sites as this only applies to HRZ.	Support
Margaret Stewart/ #755.1		Oppose	Remove Medium Density Residential zoning.	
Margaret Howley/ #765.1		Oppose	Oppose MRZ and any intensification of housing in Papanui streets which include the Papanui WWII Memorial Plantings.	
Brigitte Masse/ #775.1		Oppose	Seeks to retain streets in Spreydon as Residential Suburban Density Transition Zone, as opposed to zoning them as Medium Residential Zone.	

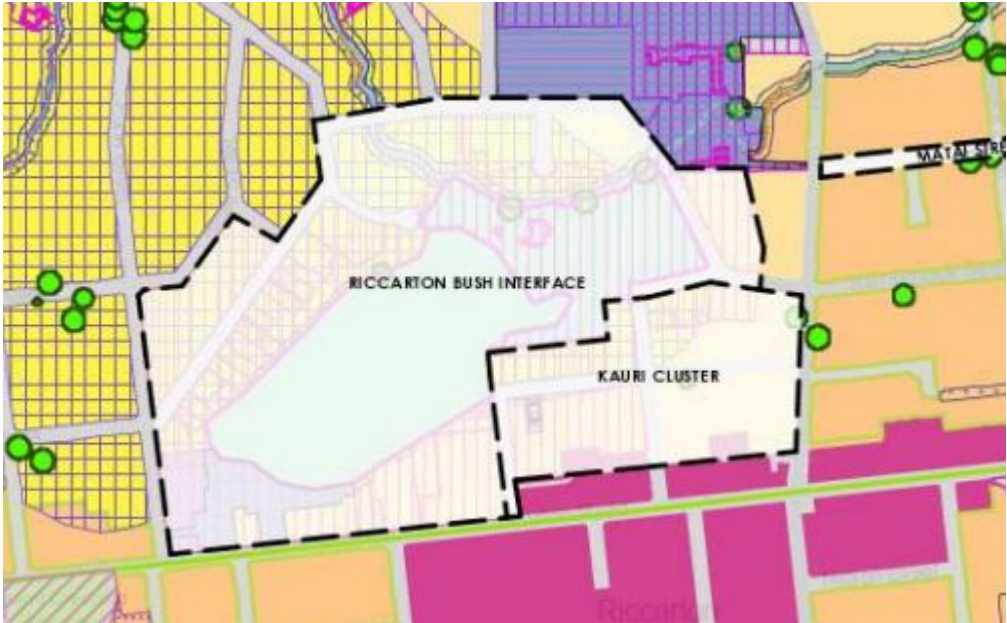

Glenda Duffell/ #779.1		Oppose	[Oppose intensification in areas with liquefaction risk]	
Jessica Adams/ #784.1		Oppose	Rezone Prestons subdivision from MRZ to Residential Suburban Zone.	
Vanessa Wells/ #785.2		Seek Amendment	Rezone area from Main North Road south east to medium density housing.	
Greater Hornby Residents Association/ #788.8		Support	Supports MRZ zoning in Hornby. Change HRZ to MRZ zoning.	
Greater Hornby Residents Association/788.8	Waipuna Halswell Hornby Riccarton Community Board/ #FS2027.27	Support	Supports MRZ zoning in Hornby. Change HRZ to MRZ zoning. After the Christchurch Earthquakes, Hornby saw a major migration of residents from the East of Christchurch to the West of Christchurch. This placed major pressure on our infrastructure that Hornby has never recovered for and the local Christchurch City Council is failing to address. The current Long-Term Plan of the Christchurch City Council does not even address our outstanding Infrastructure issues let alone what the planned High-Density Housing proposed will place on our embattled infrastructure. What we do know as residents is what is wrong and what is wrong as in the fight to Save Denton Park and we also know this is wrong. We have seen record numbers attending our meetings opposing the High Density proposed and surveys of over 80% of residents opposed in the Hornby area	Support
Eric Woods/ #789.11		Seek Amendment	Rezone the area from 135 to 185 Wainoni Road (and further afield), to "Medium Density Residential Zone" [instead of Residential Suburban]	
Eric Woods/ #789.13		Seek Amendment	Rezone the Residential Suburban portion of Keyes Road, to "Medium Density Residential Zone"	
Eric Woods/ #789.16		Seek Amendment	rezone the area from 157 to 193 Wainoni Road (and further afield), to "Medium Density Residential Zone" [instead of Residential Suburban]	
Carmel Woods/ #792.17		Oppose	Oppose Residential Suburban Zone as it applies to 135 to 185 Wainoni Road. Seek that it be zoned MRZ.	
Carmel Woods/ #792.18		Oppose	Oppose Residential Suburban Zone as it applies to 100 to 300 Wainoni Road, seek that this area is included in the Medium Density Residential Zone.	
Greg Partridge/ #794.1		Seek Amendment	South Richmond should be exempt from the Housing Intensification [Plan Change].	
Greg Partridge/794.1	Anne Dingwall/ #FS2037.724	Seek Amendment	South Richmond should be exempt from the Housing Intensification [Plan Change]. The submitter is concerned that natural hazard risks have not been adequately considered in implementing central government's requirements for housing intensification and development of qualifying matters. The submitter has provided extensive commentary on hazards in their submission. The submitter's analysis of earthquake and flood hazard risks to South Richmond and Christchurch in general can be summarised as follows: Earthquake Risk - The Christchurch Fault is an active seismic fault that runs under the city from close to Riccarton through to the eastern suburbs and off the coast of New Brighton. It is believed to have been responsible for the series of earthquakes that rocked the city on Boxing Day 2010 and may have caused the damaging earthquake of 1869. - The Christchurch Fault runs parallel to the more destructive Port Hills Fault which lies 5km to the south. - Christchurch sits within relatively close proximity to the Alpine Fault, one of the most active fault lines in the world, and one that has a history of sudden movement. The fault has ruptured four times in the past 900 years, each time producing an earthquake of about magnitude 8.	Support

			<p>- Seismic activity caused a lot of land in Christchurch to subside during the destructive Canterbury earthquakes of 2011 and 2012.</p> <p>- Computer modelling indicates that when the Alpine fault ruptures it will cause significant levels of peak ground velocity – the trampoline effect – meaning major structural damage to houses, commercial buildings and land here in Christchurch is almost certain, and will be widespread. It will produce one of the biggest earthquakes since European settlement of New Zealand, and it will have a major impact on the lives of many people.</p> <p>- Christchurch will be impacted by widespread liquefaction, the land will further subside, roads and bridges will be left damaged or impassable and the underground infrastructure will not be left intact.</p> <p>Flood Hazard Risk</p> <p>- Currently as little as 30mm of rainfall is all that is necessary before surface flooding builds up in Christchurch.</p> <p>- Niwa meteorologists have indicated that climate change is making rain more intense and more frequent in Christchurch because of a warming atmosphere holds more moisture.</p> <p>- What climate change has done is beef up the weather making bad flooding more likely, and more frequent due to the effects of</p> <ul style="list-style-type: none"> • Fluvial, or river floods – which occur when rivers burst their banks and flood the nearby lands. • Pluvial, or surface flooding - when the rain is just so heavy that it overwhelms local drainage • Coastal flooding, or storm surges – an occurrence when strong winds fling water onshore <p>- Current projections show that in less than 80 years about 35% of Christchurch will be inundated and vulnerable to regular flooding. Low-lying areas of the city – areas that used to be wetlands prior to European settlement – are most at risk, and they are not just coastal areas. Suburbs in central Christchurch that are earmarked for accelerated intensification, such as Edgware and St Albans are prone to flooding.</p> <p>- It would be reckless and irresponsible for Council allowing development to occur in flood prone areas and those that will flood in the future. Increasing the height of foundations and floor levels will not protect residents from having to be rescued from flood-stricken properties nor the massive costs of repairing flood damaged properties.</p> <p>- Controversial plans to increase housing density across Auckland have been delayed by a year, so that Auckland Council can assess the impact of the recent floods and decide where homes should be built. The government has given the council the extra time, but also wants Auckland to consider how more intensification might be possible in “resilient” parts of the city.</p> <p>- With Christchurch being flood prone and highly susceptible to significant seismic activity, surely the Christchurch City Council should be pointing that out to Central Government and asking them to quantify how resilient any part of the city actually is.</p>	
Greg Partridge/794.1	David Mountfort/ #FS2070.1	Seek Amendment	<p>South Richmond should be exempt from the Housing Intensification [Plan Change].</p> <p>The submitter is concerned that natural hazard risks have not been adequately considered in implementing central government's requirements for housing intensification and development of qualifying matters. Specifically in my case that the south side of Rata Street not be rezoned Medium Density</p>	Oppose

There is a comprehensive coverage regarding this issue in the submission from RBK [submission 188] under this topic.

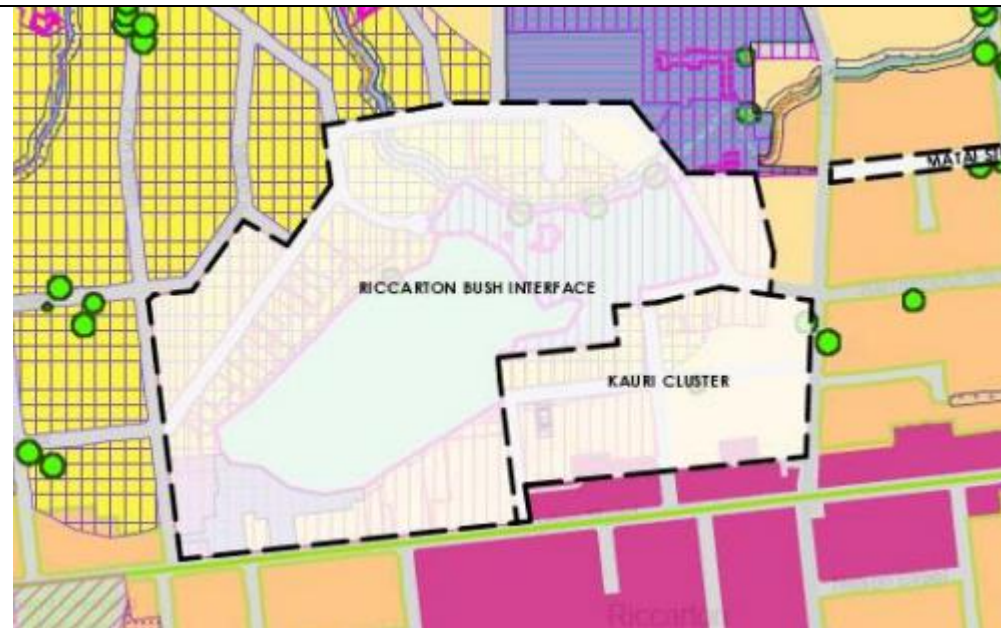

Medium Density allows 3 x 2-storey on sections with the added effect of excessive unrestricted on-street vehicle parking and the destruction of the beautiful Rata trees.

I submit there is nothing to be gained by changing the current zoning. Those who have moved into the south side of Rata Street and built new homes in good faith, moved families and older people into the area, and in doing so intensified the dwelling density, should not suddenly have their worlds upturned by the overturning of the decisions made by the IHP in 2015 after lengthy comprehensive deliberation. The functionality of Riccarton Bush/House would be severely inhibited by decisions that would allow excessive long-term on-street parking. This would certainly include the successful and popular Farmers' Market held on Saturday mornings where the local streets currently provide room for clients to find parking. Covering sites with concrete would impact the significant and welcome bird life that interacts with the Riccarton Bush/House and grounds.

This is discussed further in section 9.

[In terms of the RBK area, parking is already a problem and the more the area is intensified with limited off-street parking the congestion on the streets will grow. Having the Kauri Cluster choked with parked vehicles on a continual basis is hardly conducive to the well-being and general liveability of the area.]

Robert Leonard Broughton/851.5	Riccarton Bush Kilmarnock Residents Association ./ #FS2062.31	Seek Amendment	<p>[A]ll areas referred to in WSP's Putaringamotu Riccarton Bush Heritage Landscape Review [known as the Kauri Cluster] (recommended for inclusion in the RBIA) should be limited to 2-storeys and remain Residential Suburban density.</p> <p>That specifically the area remain as currently zoned: Residential Suburban. Medium Density allows a 3 x 2-storey on sections with the added effect of excessive unrestricted on-street vehicle parking and the destruction of the beautiful Rata trees.

I submit there is nothing to be gained by changing the current zoning. Those who have moved into the south side of Rata Street and built new homes in good faith, moved families and older people into the area, and in doing so intensified the dwelling density, should not suddenly have their worlds upturned by the overturning of the decisions made by the IHP in 2015 after lengthy comprehensive deliberation. The functionality of Riccarton Bush/House would be severely inhibited by decisions that would allow excessive long-term on-street parking. This would certainly include the successful and popular Farmers' Market held on Saturday mornings where the local streets currently provide room for clients to find parking. Covering sites with concrete would impact the significant and welcome bird life that interacts with the Riccarton Bush/House and grounds.

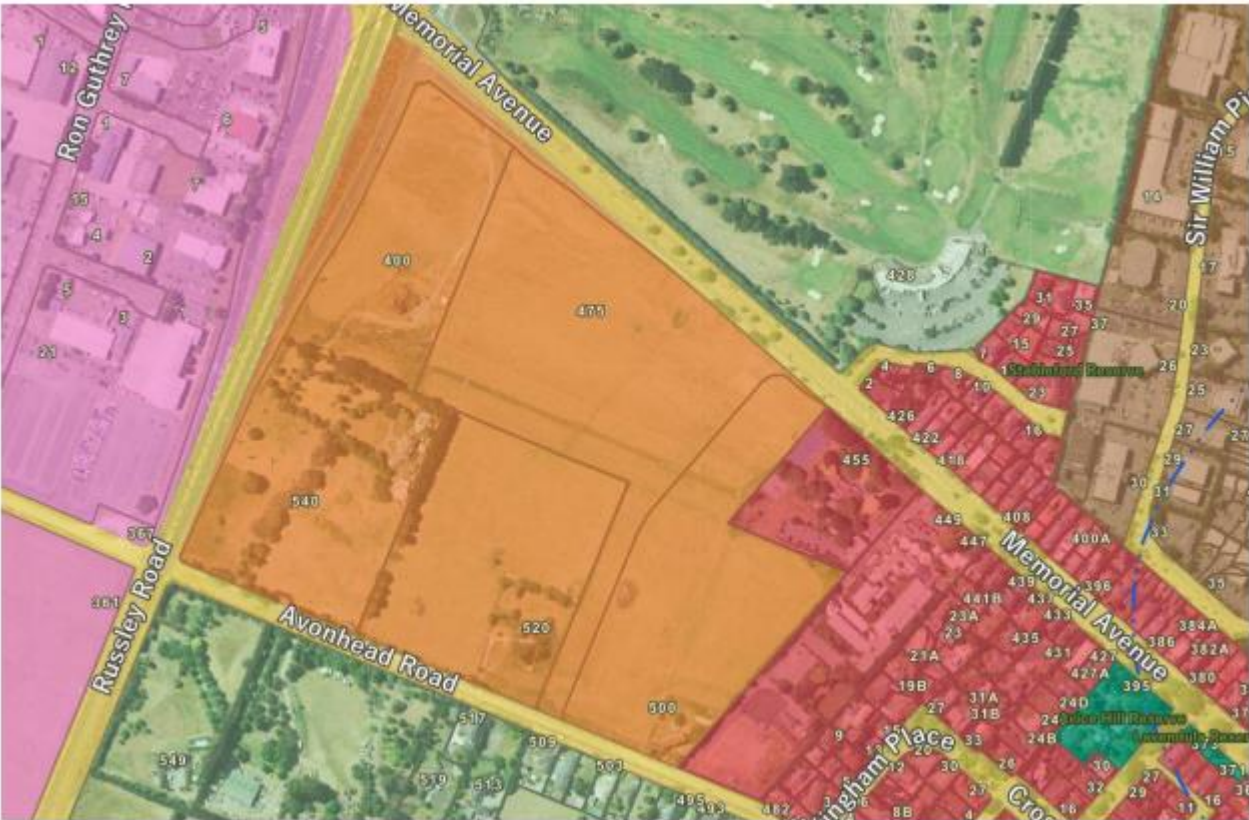

This is discussed further in section 9.

[In terms of the RBK area, parking is already a problem and the more the area is intensified with limited off-street parking the congestion on the streets will grow. Having the Kauri Cluster choked with parked vehicles on a continual basis is hardly conducive to the well-being and general liveability of the area.]

			 <p>There is a comprehensive coverage regarding this issue in the submission from RBK [submission 188] under this topic.</p> <p>Medium Density allows a 3 x 2-storey on sections with the added effect of excessive unrestricted on-street vehicle parking and the destruction of the beautiful Rata trees.</p> <p>I submit there is nothing to be gained by changing the current zoning. Those who have moved into the south side of Rata Street and built new homes in good faith, moved families and older people into the area, and in doing so intensified the dwelling density, should not suddenly have their worlds upturned by the overturning of the decisions made by the IHP in 2015 after lengthy comprehensive deliberation. Cathedral City Development Ltd / #880.3		Seek Amendment	Rezoning 85 Harry Ell Drive as MRZ or FUZ.	
Miles Premises Ltd/ #883.4		Seek Amendment	Rezoning 400, 475 Memorial Avenue and 500, 520 and 540 Avonhead Road from Industrial Park Zone to either Future Urban Zone or Medium Density Residential Zone.	
Miles Premises Ltd/883.4	Christchurch International Airport Limited/ #FS2052.107	Seek Amendment	<p>Rezoning 400, 475 Memorial Avenue and 500, 520 and 540 Avonhead Road from Industrial Park Zone to either Future Urban Zone or Medium Density Residential Zone.</p> <p>Rezoning/amend the current urban zoning of 400, 475 Memorial Avenue and 500, 520 and 540 Avonhead Road to allow the full range of business and related activities (industrial, office, accommodation, health, community, entertainment, recreation etc) and/or rezoning in full or part Future Urban Zone or Medium Density Residential, in all cases with no restrictions in activity type or standards due to airport noise effects.</p>	Oppose

				
Troy Lange/ #884.2		Seek Amendment	Rezone 120, 100,88, 76, 68, 66, 60, 46, 44, 42, 40 and 38 Hawthornden Road Future Urban Zone or MediumDensity Residential.	
Troy Lange/884.2	Christchurch International Airport Limited/ #FS2052.110	Seek Amendment	<p>Rezone 120, 100,88, 76, 68, 66, 60, 46, 44, 42, 40 and 38 Hawthornden Road Future Urban Zone or MediumDensity Residential.</p> <p>The land between the 50 and 55 dBA Ldn noise contours remains zoned Rural Urban Fringe with a minimum lot size of 4 ha for subdivision and a dwelling. The land is highly fragmented with existing lots generally 4 ha or smaller (due to historic planning regimes which enabled residential development on smaller lots where supported by, at that time, an economic horticultural use). The land is now almost exclusively used for rural lifestyle purposes, and is exempted from the National Policy Statement – Highly Productive Land (NPS-HPL) under Clause 3.5.7 ai) because the nearest equivalent zone is the Rural Lifestyle Zone.</p> <p>The inappropriateness of retaining the land between the current urban boundary and CIAL 50dBA Ldn noise contour in rural zoning was recognized by the Commissioners for Change 1 to the Canterbury Regional Policy (CRPS). In their 2009 recommendation on submissions and further submissions, they identified Special Treatment Areas in their recommended Policy 12 below:</p> <p>Policy 12: Special Treatment Areas Specific analysis and planning shall be undertaken to achieve the sustainable management of the natural and physical resources of the following areas and to meet the stated expectations: (a) In Northwest Christchurch (STA1) to determine the medium and long-term sustainable future of the area affected by airport noise.</p> <p>Methods 12.1 Christchurch City Council shall undertake specific planning investigations in relation to the three Special Treatment Areas by 2012 in conjunction with landowners within the areas and other stakeholders...</p> <p>12.3 Christchurch City Council shall include appropriate zoning and/or other provisions with the district plan as a result of Method 12.1</p> <p>Subsequent planning processes were ‘overtaken’ by legislative changes and earthquake related processes which followed after the 2010/11 Canterbury earthquakes. The expedited Land Use Recovery Plan (LURP) processes replaced the Commissioners decision on Change 1 to the CRPS, and all appeals, including those in relation to the location of the airport noise constrained land, and the basis for the same, were extinguished. The CRPS has not been reviewed since, so that ‘untested’ approach to airport noise constraints (which is out of step with national and international standards) remains.</p> <p>Enabling urban development between the 50 and 55 dBA Ldn contour is consistent with and gives effect to the National Policy Statement – Urban Development (NPS-UD). It will free up land for urban development in a location ideally suited to meeting the Council’s obligations to provide at least sufficient development capacity to meet expected demand for land for housing and business and will contribute to a well functioning urban environment</p>	Oppose
Peter Dyhrberg/ #885.2		Seek Amendment	[That] the areas of the city north of Armagh Street and between Fitzgerald Avenue to the East and Madras Street to the West ..be zoned as a Medium Density Residential [instead of] High Density Residential.

Waipuna Halswell-Hornby-Riccarton Community Board/ #902.31		Seek Amendment	<p>[That all sites within the Riccarton Bush Interface Area and on Matai Street] retain Suburban Density Zoning.</p> <p>[Note: Area includes sought extension to RBI: The southern side of Rata Street to Rimu Street and Kauri Street; Kahu Road opposite the entrance to Riccarton House; The Kauri Cluster, the precinct beside Riccarton House and Bush on the southern side; all [both sides of] Ngahere Street [and] Girvan Street; Houses adjoining the Avon e.g. 36a Kahu Road and adjoining houses; the larger area as indicated by the Riccarton Bush /Kilmarnock Residents' Association].</p>	
Waipuna Halswell-Hornby-Riccarton Community Board/902.31	Riccarton Bush Kilmarnock Residents Association ./ #FS2062.9	Seek Amendment	<p>[That all sites within the Riccarton Bush Interface Area and on Matai Street] retain Suburban Density Zoning.</p> <p>[Note: Area includes sought extension to RBI: The southern side of Rata Street to Rimu Street and Kauri Street; Kahu Road opposite the entrance to Riccarton House; The Kauri Cluster, the precinct beside Riccarton House and Bush on the southern side; all [both sides of] Ngahere Street [and] Girvan Street; Houses adjoining the Avon e.g. 36a Kahu Road and adjoining houses; the larger area as indicated by the Riccarton Bush /Kilmarnock Residents' Association].</p> <p>Matai Street has a Council tree-lined cycleway. The Board shares residents' view that if housing was to go to six stories on both sides of the street this would be an uninviting and cold part of the current tree lined Central City/University cycleway. It is also some distance from the main commercial centre.</p> <p>[In] the area from Kauri Street to Matai Street, [t]echnical evidence on this area was submitted to the Independent Hearings Panel on the Christchurch Replacement District Plan chaired by Sir John Hansen in 2015, with the panel deciding to retain suburban density and residential suburban transitional density zoning, influenced by the need for particular care in ensuring appropriate residential design outcomes, especially given the established amenity values in the vicinity of Riccarton Bush, coupled with the concerns expressed by residents as to how Residential Medium Density zoning would impact on the amenity values of their neighbourhood.</p> <p>The Board notes that as the foundation borough of Christchurch Riccarton has many historical buildings. Many visitors visit these places and the Board contends that the whole ambience of the area would be affected by possible six storied buildings surrounding these historical buildings. It would be cold and uninviting.</p> <p>There does not appear to be any clear reason to put aside the mapping of WSP. There will be little parking available for the Riccarton House Farmers market, if the area is zoned medium density. If zoned medium density, Riccarton House and Bush will be diminished. The heritage of this area is possibly taken for granted, but will become more important in future years. With the current eight metre setback for suburban density most residents have flourishing front gardens.</p>	Support

Submission Number	Further Submission No	Position	Decision Requested	FS Position
Martin Jones/ #15.3		Seek Amendment	Do not zone Cashmere View Street or surrounds as High Density Residential Zone.	
Martin Jones/ #15.7		Seek Amendment	Do not zone Cashmere View Street or surrounds as High Density Residential Zone.	
Alastair Grigg/ #28.6		Seek Amendment	[At the eastern end of Rugby Street, west of Papanui Road] change zone to Medium Density Residential Zone instead of High Density Residential Zone	
Malcolm Leigh/ #29.2		Seek Amendment	That Blair Avenue in Papanui will be rezoned from High Density Residential Zoning to Medium Density Residential Zoning through the application of a Qualifying Matter.	
Ilam and Upper Riccarton Residents' Association, Inc./ #39.1		Oppose	Oppose inclusion of land around the Bush Inn Shopping and Commercial Centre in Upper Riccarton in the High Density Residential Zone.	
Ilam and Upper Riccarton Residents' Association, Inc./39.1	Anne Dingwall/ #FS2037.63	Oppose	<p>Oppose inclusion of land around the Bush Inn Shopping and Commercial Centre in Upper Riccarton in the High Density Residential Zone.</p> <p>The residents' boundaries for the members of the Ilam and Upper Riccarton Residents' Association, Inc., are all on the northern side of Riccarton Road.</p> <p>The IURRA understands the Residential Suburban Density Transitional RSDT that relates to medium density and Residential Suburban {Low density}.</p> <p>The IURRA, Inc., do not think it acceptable to go beyond medium density!</p> <p>The IURRA area is densely populated with joined housing. Older people live individually or in couples in these units. There are no complaints regarding the current density. Why would Central Government wish to impose high density on these residents, affecting their community and potentially forcing them to move away from the IURRA area?</p> <p>We note that presently Riccarton Commercial & Shopping Centre and the Bush Inn Commercial & Shopping Centre are very close together. We understand that nowhere else in New Zealand are two shopping centres located so near to each other.</p> <p>It is for this reason that we ask that Bush Inn which is the smaller commercial centre in size be excluded from adherence to any new Building Intensification which involves the new building heights to six storey buildings with no car parks.</p> <p>Ilam and Upper Riccarton Residents' Association, Inc., includes a very large educational zone and such proposals and developments are clearly not suitable to this area.</p> <p>The Ilam and Upper Riccarton Resident's Association, Inc., wishes to speak at any hearing concerning the Changes re Building Intensification and Car-Parking in our area.</p> <p>Mental Health concerns have the IURRA's highest priority.</p>	Support

			We also wish for the Ilam and Upper Riccarton Residents' Assoc. (IURRA, Inc.,) to speak at any Hearings concerning these matters	
Steven & Diana Marshall/ #40.2		Seek Amendment	Change zoning of Helmores Lane/ Desmond Street/ Rhodes St (from Helmores to Rossall) from High Density Residential to Medium Density Residential	
Laura Cary/ #47.4		Oppose	Oppose the introduction of the High Density Residential Zone.	
Jeremy Wyn Harris/ #51.1		Oppose	Oppose the inclusion of Cox Street and surrounding streets in the High Density Residential Zone.	
Jeremy Wyn Harris/51.1	Anne Dingwall/ #FS2037.79	Oppose	<p>Oppose the inclusion of Cox Street and surrounding streets in the High Density Residential Zone.</p> <p>Dear planners,</p> <p>We (Jeremy, Joanna, Luke, Anna and Madeleine Wyn-Harris) of 27 Cox Street are NOT in support of the district plan changes for the proposed High-Density Residential Zone.</p> <p>We recently rebuilt our earthquake damaged home and as part of the process we obtained a resource consent (RMA/2019/380) which required us to adhere to privacy constraints and alignment with long term planning requirements (coherence/openness/attractiveness) of our small street. These requests were met along with thoughtful design of our home to face the northwest in order to maximise light and passive heating.</p> <p>If the proposed plan was to go ahead for houses surrounding our property, then building more than 8m and 11m high (the current zoning for us), would cause loss of:</p> <ol style="list-style-type: none"> 1. Privacy. Due to the significant use of glass in our living, lounge and hallway to bedrooms, there is a significant risk that we would lose all privacy to key areas of our home. Privacy to our backyard would also be impacted but as this is closer to north and west walls the impact would be lessened. We know that privacy is important, as we were required in our resource consent to keep trees on our north boundary to ensure privacy for our northern neighbours. 2. Sunlight. In winter, spring and autumn, we will lose a significant amount of light that we use for passive heating of our lounge, living, kitchen and upstairs areas. We would not receive any direct sun to these areas resulting in requiring active heating (electric or gas). Also any adjacent tall buildings would shade and impact growth of trees, plants and in particular grassed areas. Loss of greenery does not seem aligned with current environmental strategies. Greenery helps passively cool in summer months and is extremely important to human wellbeing. <p>At neighbouring heights of 16 or 32 metres, this renders aspects of our home unusable but also impacts the amount of greenery that can be planted and sustained in the general area. We assume that other neighbours would also be impacted by similar privacy and sunlight issues, particularly due to the combination of orientation (east-west) and width of Cox Street (very narrow).</p>	Support
Gavin Keats/ #52.6		Oppose	Opposes the extent of the High and Medium Density Residential Zones around commercial centres.	
Gavin Keats/52.6	Kauri Lodge Rest Home 2008 Limited/ #FS2059.13	Oppose	Opposes the extent of the High and Medium Density Residential Zones around commercial centres.	Oppose

			<p>The high and medium density zones around commercial centres are too large.</p> <p>I am pleased that CCC is trying really hard to improve things for Christchurch. As the rebuild progresses we have such a lovely liveable, walkable, and bikeable city, it is such a shame if government rules mean developers can push the council into approving poor housing design.</p>	
Tobias Meyer/ #55.9		Seek Amendment	Extend High Density Residential Zone area around Central City to those within 2km, and to at least 1km around other larger commercial Centres.	
Tobias Meyer/55.9	Christchurch International Airport Limited/ #FS2052.172	Seek Amendment	Extend High Density Residential Zone area around Central City to those within 2km, and to at least 1km around other larger commercial Centres. I think it is vitally important to incentivise development in the 5km closest to the city centre. This is the best place for people to live and the easiest place to live without a car. The current boundaries around city and local centres are quite small and could easily be extended a few blocks. Living near Stanmore Road I have easy access to the city. I call on you to increase the boundaries of HRZ and areas around local centres and either improve Mrz standards everywhere for more density or give extra incentive to MRZ in favourable places: Maybe even just within 3km of centre (at least within orbitor circle) and 500m of high frequency public transit routes. This is the area best suited to extra density. While our bus routes may change the current frequent routes will almost definitely be the same and be getting better. Even living 5km out from the centre has easy access to the city and other local centres. Possible incentives for MRZ in the inner 5km ring from the middle of the city: smaller setbacks in front half of property with a larger allowable built envelope, or allowing small businesses in the zone, or lower council contributions, or even with enough setback can go above height limits on large sites if the housing is accessible. Reiterate this is the place we want the most development. Please do not push back density any more.	Oppose

Heather Duffield/ #60.1		Seek Amendment	Amend the zoning of the Deans Avenue area from High Density Residential to Medium Density Residential.	
Heather Duffield/60.1	Christchurch International Airport Limited/ #FS2052.285	Seek Amendment	<p>Amend the zoning of the Deans Avenue area from High Density Residential to Medium Density Residential.</p> <ul style="list-style-type: none"> • The Deans Avenue area is now within a walking catchment of either the City Centre or Riccarton. • Deans Avenue is the only access to lots of houses within the area. • Current parking provision is inadequate. Freyberg Avenue is a dead end street, like others in the area, and is especially constrained when hospital works or mosque visitors park. There is no parking in the street for visitors to visit during the week or weekend. 	Support
Victoria Neighbourhood Association (VNA) / #61.43		Seek Amendment	Redraw the CCZ zone boundary to be the southern side of Victoria Square to be consistent with other CCZ boundary locations which do not include the park areas around the River Avon.	
Victoria Neighbourhood Association (VNA) / #61.43	Cambridge 137 Limited/ #FS2042.26	Seek Amendment	<p>Redraw the CCZ zone boundary to be the southern side of Victoria Square to be consistent with other CCZ boundary locations which do not include the park areas around the River Avon.</p> <p>The delineation of boundaries of the CCZ is way too simplistic and blunt. The delineation for the CCZ is the Town Hall on Kilmore St which has very little amenity value for residents in the VNA, to get to services residents must walk around the Town Hall and through Victoria Square to access the city, yet this is not factored at all.</p> <p>The concept of having a tiered city and enabling taller building in the HRZ vs the HRZ Precinct on paper makes sense but then for the VNA we have CCMUZ in between with a height overlay of 32m whereas the East of the city does not. This CCMUZ provides the intended break between the CCZ and HRZ we don't need two layers of tiering, therefore the precinct with a height limit of 14m should apply from Salisbury Street to provide a consistent approach as for the East/Melrose Street area.</p> <p>Having a one size fits all approach in this area is inconsistent with good urban form and social, economic and cultural wellbeing of the current residents.</p> <p>It seems unfair and discriminatory that residents living in central city streets will be more adversely impacted by Proposed plan changes in PC14 when compared to those living in medium density residential areas given recession plains do not apply to the first 20m of street frontage in the proposed HRZ under PC14.</p>	Oppose

Thomas Calder/ #62.6		Seek Amendment	Amend zoning of Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) from High Density Residential to Medium Density Residential.	
Lisa Fabri/ #66.1		Seek Amendment	Amend the zoning of the farm and lifestyle blocks on John Paterson Drive [from the Rural Urban Fringe Zone] to the Medium Density Residential Zone or the High Density Residential Zone.	
Rachel Davies/ #67.4		Seek Amendment	[Seeks to] reduce the zones for High and Medium Density to closer to the city centre - so that it is not encroaching on existing neighbourhoods in Spreydon and Hoon Hay.	
Rachel Davies/ #67.6		Seek Amendment	Three storey housing should only be found in and close to the city centre, not in existing older suburban areas.	
Rachel Davies/ #67.17		Seek Amendment	Develop more multistorey or terraced styled housing in new subdivisions where infrastructure can be put in place to best service these new dwellings.	
Rachel Davies/ #67.19		Seek Amendment	Rezone and develop underutilized areas of land closer to the city into new trendy housing development - the development near the railway in the Addington Court Theatre district is a good example of this type of land.	
Rachel Davies/ #67.21		Seek Amendment	Potentially redevelop existing large buildings into apartments e.g. Princess Margaret hospital (potentially moving the services offered there now to new premises to free up space not being used).	
Rachel Davies/ #67.23		Seek Amendment	Develop existing crown owned land into higher density housing e.g. the old Spreydon School site	
Darren Fabri/ #68.2		Seek Amendment	Rezone John Paterson Drive from rural to residential.	
Helen Spear/ #73.1		Not Stated	Not stated.	
Tony Rider/ #74.3		Seek Amendment	Amend and reduce intensification around Bush Inn/Church Corner	
Tony Rider/74.3	Anne Dingwall/ #FS2037.155	Seek Amendment	<p>Amend and reduce intensification around Bush Inn/Church Corner</p> <p>Submitter outlines the following negative impacts that arise with intensification, public transport, sunlight, well-being, infrastructure, traffic, privacy.</p> <p>We all want to see Christchurch grow and flourish for our future generations. But we want it to grow with us rather than overshadow us with three to five story building structures. Intensification will change our community ambiance and our skyline, fragmenting our current community life.</p> <p>People come to live in Church Corner/Bush Inn for the suburb 'backyard experience'. It is where a family can live. Children can play outdoors safely under parental control, and adults can work or relax knowing the charm and character of the area allows them so. People do not want multistorey townhouses here.</p> <p>By developing section by section, as and where developers decide to, we are creating haphazard effects on the people nearby. Organised development, such as has occurred in Singapore, would mean consistency in provision of facilities and infrastructure and potentially be an attractive environment for all.</p> <p>Take intensification to the actual city – our city centre where it belongs and not the 'perceived townships' being considered now. Canterbury can grow upwards and then outwards up from is our actual "Town Centre Zone."</p> <p>Alternatively, intensification in Rolleston and Halswell have been very successful. It has smaller land footprints, with green space and privacy. Why change a successful design and strategy.</p> <p>We are proud to be the Garden City of New Zealand. Urban renewal is exciting and revitalising - renovation of homes and businesses while keeping in style with who we are as a community revitalises our city. We won't lose our heritage and can still watch kiwi's taking on a 'do-er-upper' – a quintessential way for kiwis to progress up the home ownership ladder. We want to support our community and welcome new neighbours; be it in social housing, retail blocks, or private owners & renters. Design it right from the start and it will be successful. We want to fit our community together.</p>	Support
Sheila McLaughlin/ #75.1		Oppose	[That the area west of Riccarton Mall not be zoned High Density Residential - retain current zoning]	
Richard McLaughlin/ #77.2		Seek Amendment	Amend the planning maps to change the zoning of Watford Street and the surrounding Strowan Area (Watford Street, Normans Road, Halton Street and Hawthorne Street) from High Density Residential to Medium Density Residential.	
Linda Blake/ #78.4		Seek Amendment	Opposes requiring all building development in the Merivale HRZ zone to meet a minimum of 2 storeys	
Linda Blake/ #78.5		Seek Amendment	Reduce the extent of [the High Density Residential Zone] so that it only applies to those areas which are on core transport routes and within 800m walk to a bus stop and which have not had residential investment since the earthquake.	
Alice Mckenzie/ #84.2		Seek Amendment	The Old Sales Yard area south of Mayfair Street could be treated separately as it would be significantly more suited to a major and properly planned High Residential Development.	

Melissa and Scott Alman/ #86.7		Seek Amendment	Amend the zoning of Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) from High Density Residential to Medium Density Residential	
Blair McCarthy/ #90.1		Seek Amendment	Limit the High Density Residential Zone along Papanui Road north from the Merivale commercial centre to Heaton Street/Innes Road and south from the Papanui commercial centre to Blighs Road. That the area of proposed HRZ in between, particularly around St Andrews College and east of Watford Street, be zoned Medium Density Residential instead of HRZ.	
Blair McCarthy/90.1	Anne Dingwall/ #FS2037.163	Seek Amendment	Limit the High Density Residential Zone along Papanui Road north from the Merivale commercial centre to Heaton Street/Innes Road and south from the Papanui commercial centre to Blighs Road. That the area of proposed HRZ in between, particularly around St Andrews College and east of Watford Street, be zoned Medium Density Residential instead of HRZ. The Strowan neighbourhood has an amenity character and fabric (due to older, quality homes on large sections) and a sense of community which is very attractive to residents, which is highly valued and worthy of retention. The sense of community which is present would be undermined by the scale of intensification which is proposed under HRZ; There are a number of prominent trees remaining in the neighbourhood which reinforces the quality of open space amenity and character of our community and which clearly supports the Council's Urban Forest Plan 2023 initiative; but which would inevitably be threatened with the high level of intensification under HRZ. The area sought to be re-zoned to MRZ is not located near or adjacent to a commercial centre. HRZ will exacerbate existing flooding issues: urban intensification produces an increased level of hard surfaces (eg roof and paved areas) and a consequential reduction in 'soft' surfaces (eg grass, landscape areas); all of which increases the runoff rates of stormwater discharge to the side channel and gives rise to infiltration of this uncontrolled stormwater into the wastewater system. This already causes overflows and resulting sewage contamination in pockets of the Strowan area and will lead to contamination of waterways, streams and surface water. The proposed change to HRZ in the Strowan community will magnify the existing, significant on-street carparking problems. [Submission is supported by reference to Policies 14.8.2.5, 14.8.2.6, 14.2.4.2, 14.2.7.2 and Objective 14.2.7]	Support
Rebecca Perkins/ #94.1		Oppose	Remove the areas close to Papanui Road from the High Density Residential zone, especially those that are prone to flooding and do not have nearby stormwater systems that cope with heavy rain.	
Rebecca Perkins/94.1	Anne Dingwall/ #FS2037.168	Oppose	Remove the areas close to Papanui Road from the High Density Residential zone, especially those that are prone to flooding and do not have nearby stormwater systems that cope with heavy rain. The proposed areas for HRZ in Papanui, and specifically near Watford Street and Brenchley Avenue, will put pressure on existing stormwater systems that already struggle to cope in heavy rain. These areas regularly flood and both roads (Brenchley Avenue, and the section of Watford up to Normans Road and Halton Street) closed at least twice in the last year. On 10th April 2023, The Press newspaper reported that the Christchurch City Council's own specialist staff report into flood prone areas in Christchurch found them impossible to fix, and residents must accept this. In these circumstances, it seems possible at the very least for the CCC to plan in order to not make the problem worse by adding more properties and load to a struggling stormwater system. These areas of Papanui are already experiencing heavy parking and traffic use. The vision for the HRZ in the plan, extending out from Papanui road, would worsen this. I realise the MRZ is a government directive but with that change, too, some consideration needs to be given to upgrading stormwater infrastructure in this area, rather than adding to its loading in severe rain events. The Press article of 10th April, p.1, suggests the investigation into fixing flood prone areas needs to have more input from planners as you look to the future. Thank you for your consideration of these points.	Support
Tom Gilbert/ #95.1		Seek Amendment	[That the extent of the proposed high density residential zone along Papanui Road be reduced, to apply only to] those properties with a street frontage to Papanui Rd - not a block back.	

Mary Clay/ #100.2		Seek Amendment	Increases in density should be focused on the central city and around key hubs such as Riccarton or Northland	
Mary Clay/100.2	Vaughan Smith/ #FS2090.1	Seek Amendment	<p>Increases in density should be focused on the central city and around key hubs such as Riccarton or Northland</p> <p>The process by which the community has been consulted with has caused a general lack of understanding within the community. The documentation provided to the general public has contained numerous misleading and incorrect statements, which have resulted in a vast proportion of the community not able to understand the implications of the changes proposed.</p> <p>The proposal to increase density in certain parts of the city reflects a misguided and incorrect assumption that there is a need for the level of density proposed, when in fact there is sufficient land zoned for density increase already given the changes already made post earthquake.</p> <p>The proposed change has failed to take account of the nature of the existing residential environments. The complete failure of the plan change to assess effects on the residents of Christchurch is incomprehensible.</p> <p>The complete lack of proper provision to mitigate against privacy effects is disgraceful.</p> <p>The proposal will result in significant loss of tree and garden cover throughout the city.</p> <p>The proposal reflects a failure to understand how density should be correctly increased across a city.</p> <p>Much of the plan change documentation appears to be conceived on the incorrect premise that the change is a surety.</p> <p>There appears to be a failure to fully understand the implications of the change on the current zoning, and a lack of an assessment of how the proposal will affect existing housing stock</p> <p>The incomplete assessment carried out by the Council has resulted in proposed changes that will destroy the very character of Christchurch.</p> <p>The changes proposed do not reflect the wishes of the community and the lack of meaningful consultation is entirely undemocratic.</p> <p>The proposed changes must be rejected, as they do not reflect the community's need, nor do they properly balance the environmental, economic and social factors as required within the statutory framework.</p> <p>The exemptions proposed, particularly the high accessibility exemption, is based on unsupported conclusions and presumptions. Furthermore, some of the models used contain presumptions that are inconsistent with conditions that actually exist.</p> <p>The poorly conceived application of recession plane concepts has the potential to result in shockingly bad outcomes, and will result in (in many cases), complete loss of sunlight into dwellings and gardens. This will have hugely detrimental impacts on mental health in Christchurch, and will result in the complete loss of the ability of many inhabitants to grow vegetable and fruit gardens in Christchurch's climate.</p> <p>Furthermore, increases in density should be focused on the central city and around key hubs such as Riccarton or Northlands.</p>	Support
Zhijian Wang/ #102.2		Not Stated	<p>Adding medium-density and high-density housing to established neighborhoods is not an ideal solution. Infrastructure will not be able to cope with demand, infrastructure improvements will be costly and impact on rates, and there will be further interruption with excavations and road closures.</p> <p>There will be increased concrete and asphalt footprints and reduced garden areas, affecting the natural infiltration of rainwater, increasing the burden on infrastructure and that may cause flooding. There will be an associated impact on Christchurch's brand as a Garden City. which has taken time to develop.</p> <p>Instead, the urban-rural fringe area should be developed with medium and high density residential areas within 20-30 minutes of the City Centre. This is the ideal living and working environment where infrastructure can be planned and constructed according to the needs of the next 30 years. Funding would be from investors and developers, reducing financial pressure on the City Council and maintaining the stability of rates. Construction will not affect the traffic in the city.</p>

Karyn Butler/ #106.2		Support	That the Council amends the Housing and Business Choice Plan Change 14 (PC14) from the proposed High Density Residential Zone (HRZ) in a continuous strip parallel to Papanui Road through Strowan (stretching from Papanui Road to Watford Street) to a Medium Density Residential Zone (MRZ). In particular, the residential area of Watford Street, Christchurch.	

Karyn Butler/106.2	Anne Dingwall/ #FS2037.176	Support	<p>That the Council amends the Housing and Business Choice Plan Change 14 (PC14) from the proposed High Density Residential Zone (HRZ) in a continuous strip parallel to Papanui Road through Strowan (stretching from Papanui Road to Watford Street) to a Medium Density Residential Zone (MRZ). In particular, the residential area of Watford Street, Christchurch.</p> <p>The proposed change for High Density Residential Zone (HRZ) in a continuous strip parallel to Papanui Road through Strowan (stretching from Papanui Road to Watford Street), without any requirement for new developments to provide any on-site parking, will place significant additional pressure on basic transport infrastructure such as on-street carparking and traffic congestion all of which are not coping currently.</p> <p>1. INFRASTRUCTURE</p> <p>Relevant PC14 clause references and extracts are given in italics:</p> <p><i>Section 14.2.8.5 Policy – Infrastructure servicing for developments</i></p> <p><i>a. Ensure that developments are serviced with all required infrastructure in an effective and efficient manner</i></p> <p><i>Section 14.2.8.6 Policy – Integration and connectivity</i></p> <p><i>c. Avoid significant adverse effects and remedy or mitigate other adverse effects on existing businesses, rural activities or infrastructure.</i></p> <p>Adequate ‘infrastructure’ includes adequate carparking and a safe and effective transport network which does not contribute to traffic congestion.</p> <p>The submitter's specific concerns in relation to the impact of the proposed changes on this infrastructure in particular in my community of Strowan are as follows:</p> <ul style="list-style-type: none"> • The supply of on-street carparking spaces currently cannot keep-up with the demand for carparking, resulting in time-based (two hour maximum) parking restrictions on most surrounding streets. A major contributor to the on-street carparking issue is St Andrews’ College, which defines the southeast limit of Strowan in this area. The school has a total population of around 2000 and is growing with a large waiting list for entry. The proposed change to HRZ in the Strowan community will magnify this existing, significant on-street carparking problem; • The existing traffic management issues associated with St Andrews’ College also pose a significant health and safety issue – from morning and afternoon congestion in Normans Road and surrounding streets at school drop-off and pick-up times, causing delays and congestion at intersections linking with surrounding primary roads including Papanui Road and Strowan Road. All of these issues will be exacerbated by the proposed intensification of residential development in the community but especially by the proposed HRZ over many blocks. <p>2. LACK OF CARPARKING PROVISION FOR VULNERABLE MEMBERS OF OUR COMMUNITY</p> <p>Relevant PC14 clause references and extracts are:</p> <p><i>Section 7.2.1.2 Policy – High trip generating activities</i></p> <p><i>ix provide for the transport needs of people whose mobility is restricted</i></p> <p><i>Section 7.2.1.5 Policy – Design of Carparking areas and loading areas</i></p> <p><i>iii be accessible for people whose mobility is restricted</i></p> <p>At a general level, the removal of the requirements for new residential housing developments to provide for any on-site parking, will have a significant and disproportionate impact on a number of vulnerable groups in our community. These groups include:</p> <ul style="list-style-type: none"> • people with disabilities; • elderly residents; and • families with children. 	Support
--------------------	-------------------------------	---------	---	---------

This impact will be significant on both:

- existing residents and
- residents living in new developments

As increasingly they and their visitors will not be able to expect and/or rely on their ability to park close to their place of residence. This will be exacerbated significantly in the Strowan area where the current on-street carparking supply does not meet demand and this is a further reason why the proposed HRZ must not be implemented.

3. AMENITY/CHARACTER

Relevant PC14 clause references and extracts are given in italics:

Section 14.2.4.2 Policy – High quality, medium density residential development

a Encourage innovative approaches to comprehensively designed, high quality, medium density residential development, which is attractive to residents, responsive to housing demands and reflects the planned urban built character of an area.

The proposed HRZ which is shown to be almost continuous down Papanui Road and for at least one block either side of Papanui Road is not consistent with the stated intent of this Section/Policy above and it certainly does not support ‘...medium density residential development, which is attractive to residents, responsive to housing demands and reflects the planned urban built character of an area’.

The submitter's specific concerns in relation to the impact of the proposed changes on the amenity/character in particular in my community of Strowan are as follows:

- The Strowan neighbourhood has an amenity character and fabric and a sense of community which is very attractive to residents, which is highly valued and worthy of retention. This is comprised of a number of elements including:

- there is still a significant proportion of older, quality homes;

- the homes are typically on larger than average sections so a sense of open space is still present;

- there are a number of prominent trees and landscaping on properties which reinforces both the perception and reality of quality open space ‘around’ buildings (and which clearly supports the Council’s Urban Forest Plan 2023 initiative);

- new homes which have been built are typically two storey, with the scale, density and quality largely in keeping with the existing character and built form elsewhere in the Strowan community.

Submitter urges Council to identify the area of Strowan, particularly those blocks in the vicinity of St Andrews College, as worthy of definition as an area which warrants zoning as MRZ not HRZ as proposed in PC14, as the impact on infrastructure demand and amenity values under HRZ is significantly greater than under MRZ.

- the sense of community which is present would be undermined by the scale of intensification which is proposed under HRZ;

- there are a number of prominent trees remaining in the neighbourhood which reinforces the quality of open space amenity and character of our community, and which clearly supports the Council’s Urban Forest Plan 2023 initiative; but which would inevitably be threatened with the high level of intensification under HRZ as proposed in Plan Change 14.

CHANGE FROM HRZ TO MRZ IN STROWAN – SO AS TO BE CONSISTENT WITH STATED INTENTION

Relevant PC14 clause references and extracts are:

Section 14.2.7 Objective – High Density Residential Zone

a. High density residential development near larger commercial centres, commensurate with the expected demand for housing in these areas and the nature and scale of commercial activities, community facilities, and multimodal transport networks planned or provided in the commercial centres.

			<p>Section 14.2.7.2 Policy – High density location</p> <p><i>a. Enable high density residential development within walking catchments of the:</i></p> <p><i>i. City centre zone;</i></p> <p><i>ii. Town Centre zones of Riccarton, Papanui, and Hornby; and</i></p> <p><i>iii. Other larger commercial centres zoned as Town Centres and Local Centres; to a degree that responds to the planned scale and nature of each centre group and the range of activities planned or provided there.</i></p> <p>Clearly the part of Strowan proposed as HRZ does not meet these criteria as it is not located near or adjacent to a commercial centre.</p> <p>Submitter is keen to support others in their community who they know are highlighting similar concerns in their submissions.</p>	
Charles Etherington/ #108.1		Oppose	Remove High Density Residential zoning in the inner suburbs	
Andrew Butler/ #111.2		Seek Amendment	Amend the proposed High Density Residential Zone (HRZ) in a continuous strip parallel to Papanui Road through Strowan (stretching from Papanui Road to Watford Street) to a Medium Density Residential Zone (MRZ). In particular, the residential area of Watford Street, Christchurch	
Connor McIver/ #114.4		Seek Amendment	Amend the walkable catchments for the central city and other centres to 1.8km for the central city and 1.2km for the other centres.	
Tracey Strack/ #119.2		Oppose	<i>[Helmores Lane, Desmond Street and Rhodes Street to Rossall Street0]</i> this area should not be zoned highdensity.	
Tracey Strack/119.2	Patricia Harte/ #FS2069.1	Oppose	<p><i>[Helmores Lane, Desmond Street and Rhodes Street to Rossall Street0]</i> this area should not be zoned highdensity.</p> <p>We recognise the special character of this area and the effort people have gone to with new buildings, such as ours. In many parts of this area the land is rated TC3 and not suitable for taller buildings. There is also the issue of potential flood risk, both now and in the future. Large multi-unit structures can significantly reduce rainwater absorption into the ground and exacerbate flooding risk to the whole area.</p> <p>This area has been recognised as having a special character in the past. The combination of building quality and generous tree planting are immediately obvious to visitors. All day long we have people arriving who park outside our homes who use the area as an entry point to the Hagley park area. This would not be possible with large multi unit dwellings each generating multiple cars that would be left parked on the road rather than garaged.</p>	Support
Sandra Caldwell/ #120.1		Oppose	Rezone Papanui Street from High Density Residential and Medium Density Residential to Residential Suburban.	
Cameron Matthews/ #121.29		Seek Amendment	The area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, should be zoned for at least High Density Residential Zone, Mixed Use Zone or equivalent density, such that they are at least above baseline Medium Density Residential Zone density limits.	
Cameron Matthews/121.29	Ivan Thomson/ #FS2047.9	Seek Amendment	<p>The area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, should be zoned for at least High Density Residential Zone, Mixed Use Zone or equivalent density, such that they are at least above baseline Medium Density Residential Zone density limits.</p> <p>Because of the latent potential of the rail corridor and feasible station locations for passenger services, and the existing lack of urban density proximal to those locations, I suggest that the area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, be zoned for at least HRZ, MUZ or equivalent density, such that they are at least above baseline MRZ density limits.</p> <p>Christchurch plays host to a passenger rail station for inter-regional trips. At present this station largely serves tourist markets, though the extant rail network within Greater Christchurch has been investigated for future suburban rail services, and further growth of especially the inter-regional services is entirely plausible. The road link to Dunedin for example is increasingly congested, low resilience, and Air New Zealand manage to make a profit on the CHC-DUN route flying about 7 return trips daily – a trip which, unlike rail, doesn't also service interstitial centres like Ashburton, Timaru, or Oamaru. Considering the rail corridors are already publicly owned, cover large</p>	Oppose

			<p>parts of the city, and with much of the fixed infrastructure costs already paid for, they represent an attractive scaffold around which the city and wider region could grow in future without excessive cost burdens for new congestion-free transport infrastructure. Emerging metropolitan centres within Christchurch such as Hornby, Riccarton, and Papanui and Sydenham all lie on this corridor, as do the Rolleston and Rangiora slightly further afield.</p> <p>Unfortunately, past spatial planning has limited the growth around the rest of the rail corridor such that suburban rail services would likely see low utilisation and limited economic viability if run on the existing rail alignments, at least without lots of new growth in suburbs feasibly served by it – suburbs like Hornby, Addington, Riccarton, Papanui, Sydenham/Moorhouse, and even Heathcote Valley, Lyttelton, Rolleston and Rangiora. This is despite the huge advantages that such congestion-free, safe, rapid travel would provide to those using it, and those benefiting from that many fewer cars on the road, such as drivers, cyclists, pedestrians, and council finances in road maintenance.</p> <p>This mismatch in location between high urban density and latent high-capacity transport infrastructure will continue to be the case at least until spatial planning allows for higher urban densities within a walkable catchment of these feasible station locations, and/or such time as the rail corridor and services garner new investment – with both requirements currently locked in a chicken and egg scenario preventing progress. Though the immediate priority in public transport investment in Christchurch is rightly on improving the bus network and upgrading the City Spine route for tramway operation, cost-free allowances might be made now for the long-term evolution of the city’s urban form and transport network by increasing the density limits in centres proximal to the existing heavy railways.</p> <p>Even if a dedicated suburban rail system was not built, or new track into the city centre laid, many of these station locations could be feasibly served even by commuter-oriented services serving a dual purpose of inter-regional travel between Dunedin and Christchurch, and commuter services across Greater Christchurch and other Canterbury urban centres like Timaru and Ashburton. Such inter-regional services seem increasingly likely to form part of a future low-emission, resilient passenger transport system, accommodating future population growth spread throughout the South Island, replacing, or complimenting the many trips currently made by car and plane, and this would help to create a more integrated, resilient, and prosperous South Island economy.</p>

Cameron Matthews/ #121.37		Seek Amendment	Change the zoning of the area around Addington Centre and Addington MUZ to HRZ (or at least LCIP).	
Cameron Matthews/121.37	Christchurch International Airport Limited/ #FS2052.227	Seek Amendment	Change the zoning of the area around Addington Centre and Addington MUZ to HRZ (or at least LCIP). This is consistent with both NPS-UD and the proposed District Plan Objective 15.2.3 (b) i.e., “Mixed use zones located close to the City Centre Zone transition into high density residential neighbourhoods that contribute to an improved diversity of housing type, tenure and affordability and support a reduction in greenhouse gas emissions.”	Oppose
Cameron Matthews/121.37	Christchurch International Airport Limited/ #FS2052.254	Seek Amendment	Change the zoning of the area around Addington Centre and Addington MUZ to HRZ (or at least LCIP). This is consistent with both NPS-UD and the proposed District Plan Objective 15.2.3 (b) i.e., “Mixed use zones located close to the City Centre Zone transition into high density residential neighbourhoods that contribute to an improved diversity of housing type, tenure and affordability and support a reduction in greenhouse gas emissions.”	Oppose
Cameron Matthews/ #121.43		Seek Amendment	Change the zoning of the area around Addington Centre and the Addington Mixed Use Zone to a High Density Residential Zone.	
Cameron Matthews/121.43	Christchurch International Airport Limited/ #FS2052.233	Seek Amendment	<p>Change the zoning of the area around Addington Centre and the Addington Mixed Use Zone to a High Density Residential Zone.</p> <p>The area around both it, and around Addington MUZ is changed to HRZ (or at least LCIP), consistent with both NPS-UD and the proposed District Plan Objective 15.2.3 (b) i.e., “Mixed use zones located close to the City Centre Zone transition into high density residential neighbourhoods that contribute to an improved diversity of housing type, tenure and affordability and support a reduction in greenhouse gas emissions.”</p> <p>While the extent of this zone extends from Riccarton Rd to Blenheim Rd – the latter of which has no core Public Transport routes – the nearby suburb of Addington – particularly at the intersection of Whiteleigh and Lincoln Roads – is served by two core PT routes, and is proximal to housing, employment, and local retail/commercial/hospitality venues, but has no up-zoning planned – at least none exceeding baseline density requirements of the MDRS.</p> <p>Addington should be up-zoned to a Local Centre (Medium) and increased density in the surrounding neighbourhood permitted, by implementation of HRZ, or a Local Centre Intensification Precinct, or an equivalent mechanism.</p> <p>According to NPS-UD 2020 Policy 3d; our district plan must enable “within and adjacent to neighbourhood centre zones, local centre zones, and town centre zones (or equivalent), building heights and densities of urban form commensurate with the level of commercial activity and community services”. Given this graduated approach to density around neighbourhood cores is an expected outcome of NPS-UD, we apply this to Mixed Use Zone’s also, and should permit increased densities of development adjacent to the proposed Mixed Use Zone, which is served by two Core frequent PT lines.</p> <p>As proposed, the MUZ zone terminates abruptly in the middle of Addington, most sharply illustrated (see Figure 29) across Clarence Street South, where there is also no buffer around the LCZ zone of building heights “commensurate with the level of commercial activity”.</p>	Oppose

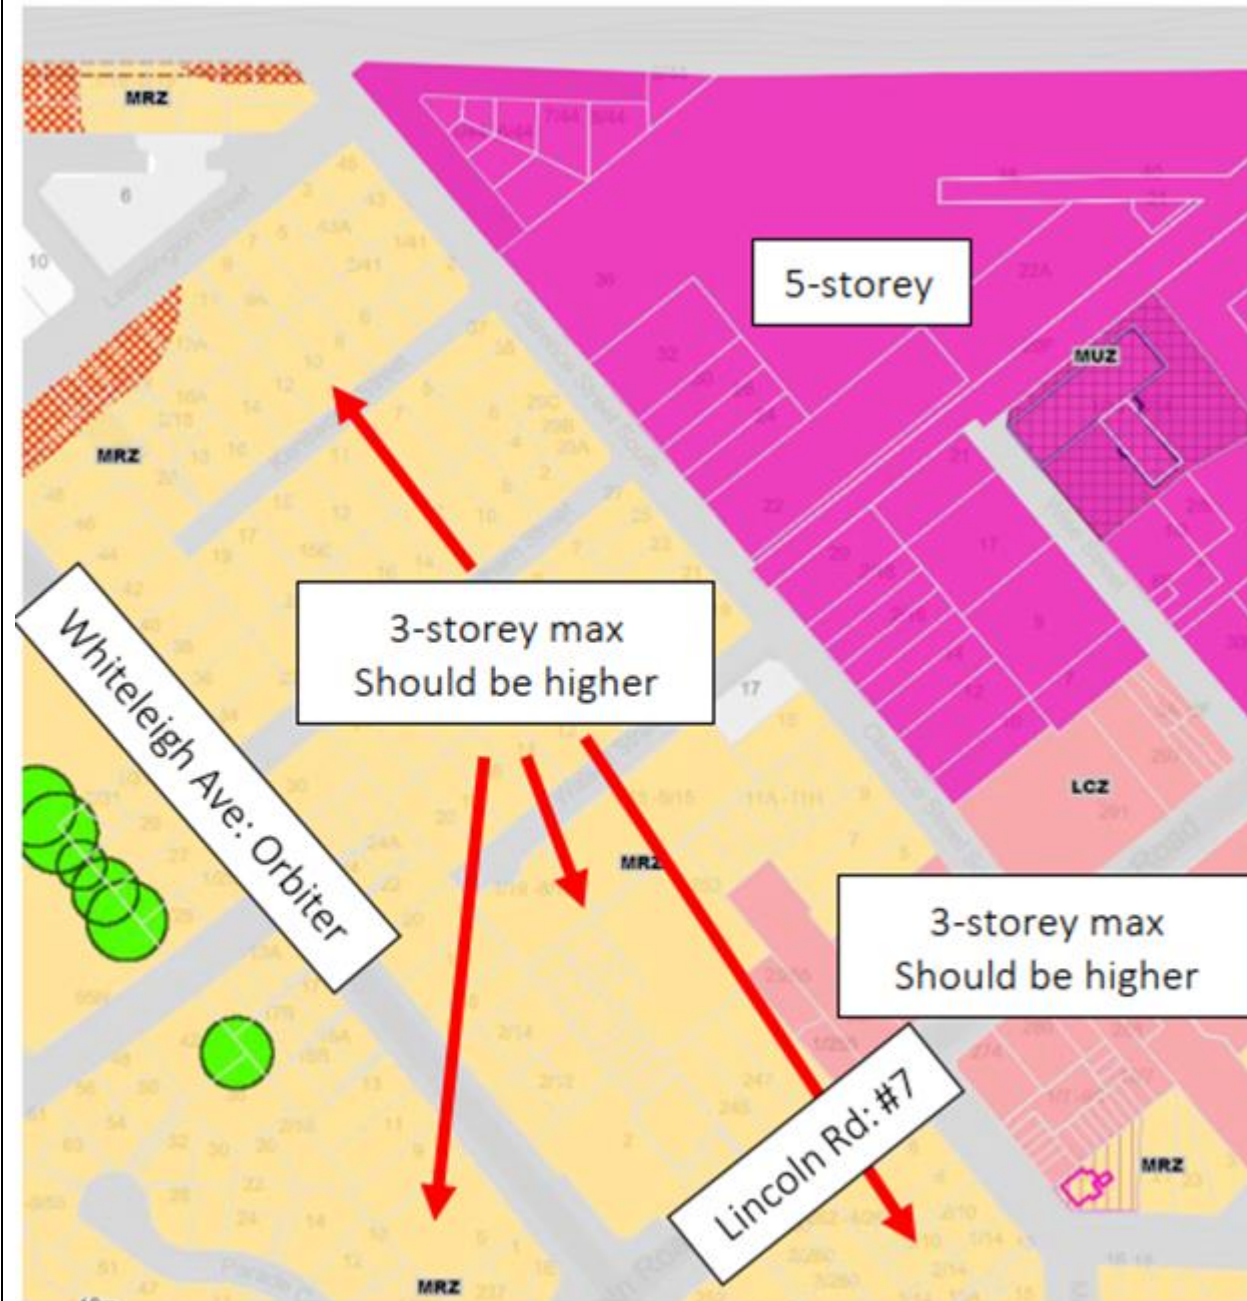

Figure 29 Addington proposed zoning exhibits only 3-storey densities in parts of commercial zone fronting Lincoln Road. Not only should this be higher, but a walkable catchment of housing should be too. The sharp difference in building densities in the adjacent MUZ is anomalous.

The anomaly here may be due in part to a misapplication of the proposed mixed-use policy (Policy 15.2.3.2 (a)), which seeks of MUZ areas: “...limiting their future growth and development to ensure commercial activity... is focussed within the network of commercial centres”. As Addington (and New Brighton for that matter) is such a centre, it is clearly inappropriate. This policy (15.2.3.2) should be revised with respect to MUZ areas adjacent to or forming part of commercial centres, as in Addington’s case. The current wording incorrectly implies that all MUZ areas are not within the strategic network of commercial centres, as Addington’s is.

Regarding wider impact, since the plan does not currently permit higher densities here than in other parts of the city (not subject to QM’s) which are far less-well connected to employment, retail, and entertainment opportunities, it incentivises growth in those more peripheral areas rather than preferentially in better connected and more central suburbs. This in-effect undermines the goals of NPS-UD and the (good) motivation behind CCC’s (flawed) Low PT Accessibility QM – i.e., that of concentrating growth in central and well-connected areas more economically served with reticulated utilities and transport infrastructure.

This effect is evident looking further down Lincoln Road to Aidanfield, where a new Town Centre Zone (TCZ) surrounded by HRZ is proposed on what’s now largely farmland. While I’m not opposed to this Aidanfield development (since it is infilling a strange rural exclave rather than sprawling the periphery of the city), it is nonsensical to provide for such intensive development farther away from the city centre before allowing higher levels of development in the existing urban footprint, along the same transit corridor, in the more centrally located suburb of Addington. Both locations share the same Core radial transit route of the #7, but in Addington’s

			case it also has the Orbiter service to connect it frequently with adjacent Key Activity Centres of Riccarton and Barrington. Aidanfield has the #60 to serve a similar function to connect it to Wigram, but that is a lower-frequency line connecting with lower-activity centres. Addington is also a walkable distance to the city centre, a feature lacking in Aidanfield.	
Cameron Matthews/ #121.47		Support	Around the Sydenham south commercial area, up-zone sites within blocks containing parts of Local Centre Zones from Medium Density Residential Zone to High Density Residential Zone to match the building height and density limits of the zone (i.e. to 14m).	
Cameron Matthews/121.47	Christchurch International Airport Limited/ #FS2052.237	Support	Around the Sydenham south commercial area, up-zone sites within blocks containing parts of Local Centre Zones from Medium Density Residential Zone to High Density Residential Zone to match the building height and density limits of the zone (i.e. to 14m). Around the Sydenham south commercial area, up-zone sites within blocks containing parts of Local Centre Zones from Medium Density Residential Zone to High Density Residential Zone to match the building height and density limits of the zone (i.e. to 14m).	Oppose
Philip Rance/ #122.2		Oppose	Opposes the increased level of housing intensification in areas indicated by the Council.	
Paul Cary/ #130.1		Oppose	That the High Density Residential Zone to be limited to the inner city and commercial areas as originally proposed.	
Paul Cary/130.1	Anne Dingwall/ #FS2037.201	Oppose	That the High Density Residential Zone to be limited to the inner city and commercial areas as originally proposed. The proposed Plan Change 14 will significantly reduce the amenity values, character and current quality of our neighbourhood.	Support
Tiffany Boyle/ #132.2		Oppose	Revoke the idea of high rise housing buildings in Hornby and work to rebuild existing infrastructure to handle the current demand in the area.	
Colin McGavin/ #140.3		Seek Amendment	[T]hat the boundary line for High Density Residential zoning [in Papanui] be along Harewood Road and Main North Road to the North and West, and the area to the South and East of this boundary line is zoned Residential Suburban.	
Colin McGavin/ #140.5		Seek Amendment	[T]hat the boundary line for High Density Residential zoning [in Papanui] be along Harewood Road and Main North Road to the North and West, and the area to the South and East of this boundary line is zoned Residential Suburban.	
Sue Sunderland/ #142.1		Seek Amendment	[Reduce extent of High Density Residential Zone and limit to] within the four avenues or the area of Riccarton between Riccarton and Blenheim Roads.	
Sue Sunderland/142.1	Riccarton Bush Kilmarnock Residents Association ./ #FS2062.33	Seek Amendment	[Reduce extent of High Density Residential Zone and limit to] within the four avenues or the area of Riccarton between Riccarton and Blenheim Roads. if Chch city wants to implement a change to the Plan in Chapter 14 then do this within the city's four avenues. There are plenty of empty sections here that could have huge residential developments and accommodate high density living. To put a 4-10 storey new build in an already cluttered neighbourhood like Merivale where the roads are narrow, there is already high traffic congestion from the private and general schools, Merivale Mall, St George's, Nurse Maude and Merivale Village will only exacerbate the problems of a fragile community. Carlton Mill Road to Rossall Street across to Papanui Road and through to Heaton Street [was converted to business/commercial use after the earthquakes - was intended to be temporary]	Support
Papanui Heritage Group/ #151.1		Oppose	Opposed to the High Density Residential Zone extending into the residential streets of Papanui and seek that it is greatly reduced and excludes the following streets - St James Avenue, Windermere Road, Gambia Street, Dormer Street, Perry Street, Halton Street, Paparoa Street, Rayburn Avenue and Tomes Road.	
Papanui Heritage Group/151.1	Anne Dingwall/ #FS2037.215	Oppose	Opposed to the High Density Residential Zone extending into the residential streets of Papanui and seek that it is greatly reduced and excludes the following streets - St James Avenue, Windermere Road, Gambia Street, Dormer Street, Perry Street, Halton Street, Paparoa Street, Rayburn Avenue and Tomes Road. Papanui is a popular suburb whose character comes from a range of building styles dating from the 1890s to the present day, and the presence of many street-side trees. The fifteen Memorial Avenues planted following World War II as memorials to those Christchurch citizens who died in the war, are a special feature of Papanui. Some streets adjoining the memorial avenues have also been planted and now make for a most attractive streetscape: Rayburn Avenue being a prime example.	Support
Papanui Heritage Group/151.1	Chapman Tripp/ #FS2063.17	Oppose	Opposed to the High Density Residential Zone extending into the residential streets of Papanui and seek that it is greatly reduced and excludes the following streets - St James Avenue, Windermere Road, Gambia Street, Dormer Street, Perry Street, Halton Street, Paparoa Street, Rayburn Avenue and Tomes Road. Papanui is a popular suburb whose character comes from a range of building styles dating from the 1890s to the present day, and the presence of many street-side trees. The fifteen Memorial Avenues planted following World War II as memorials to those Christchurch citizens who died in the war, are a special feature of Papanui. Some streets adjoining the memorial avenues have also been planted and now make for a most attractive streetscape: Rayburn Avenue being a prime example.	Oppose

Riccarton Bush - Kilmarnock Residents' Association/ #188.19		Seek Amendment	[That] the walking distances to Riccarton centre boundaries (which we understand the legislation states defines the extent of high density 6-storey residential zones) be reconsidered based, not on distance, but on time taken to walk to key amenities in the centre zone.	
Riccarton Bush - Kilmarnock Residents' Association/188.19	Anne Dingwall/ #FS2037.256	Seek Amendment	<p>[That] the walking distances to Riccarton centre boundaries (which we understand the legislation states defines the extent of high density 6-storey residential zones) be reconsidered based, not on distance, but on time taken to walk to key amenities in the centre zone.</p> <p>One of the stated aims of the intensification legislation is to discourage the use of cars by incentivising people to walk to key amenities. However, the extent of high-density residential zones is loosely based on walking distances, not verified walking times; and the distances are measured to centre boundaries, not to key amenities such as supermarkets. We submit walking times should be calculated to key amenities because, where centres are long and narrow, such as Riccarton, the walking time becomes impossibly long. A clear example is the city planners' decision to define the eastern boundary of the Riccarton town centre at the corner of Riccarton Rd and Harakeke St. The only amenities at that corner are a medical rooms/pharmacy and a Domino's Pizza shop.</p>	Support

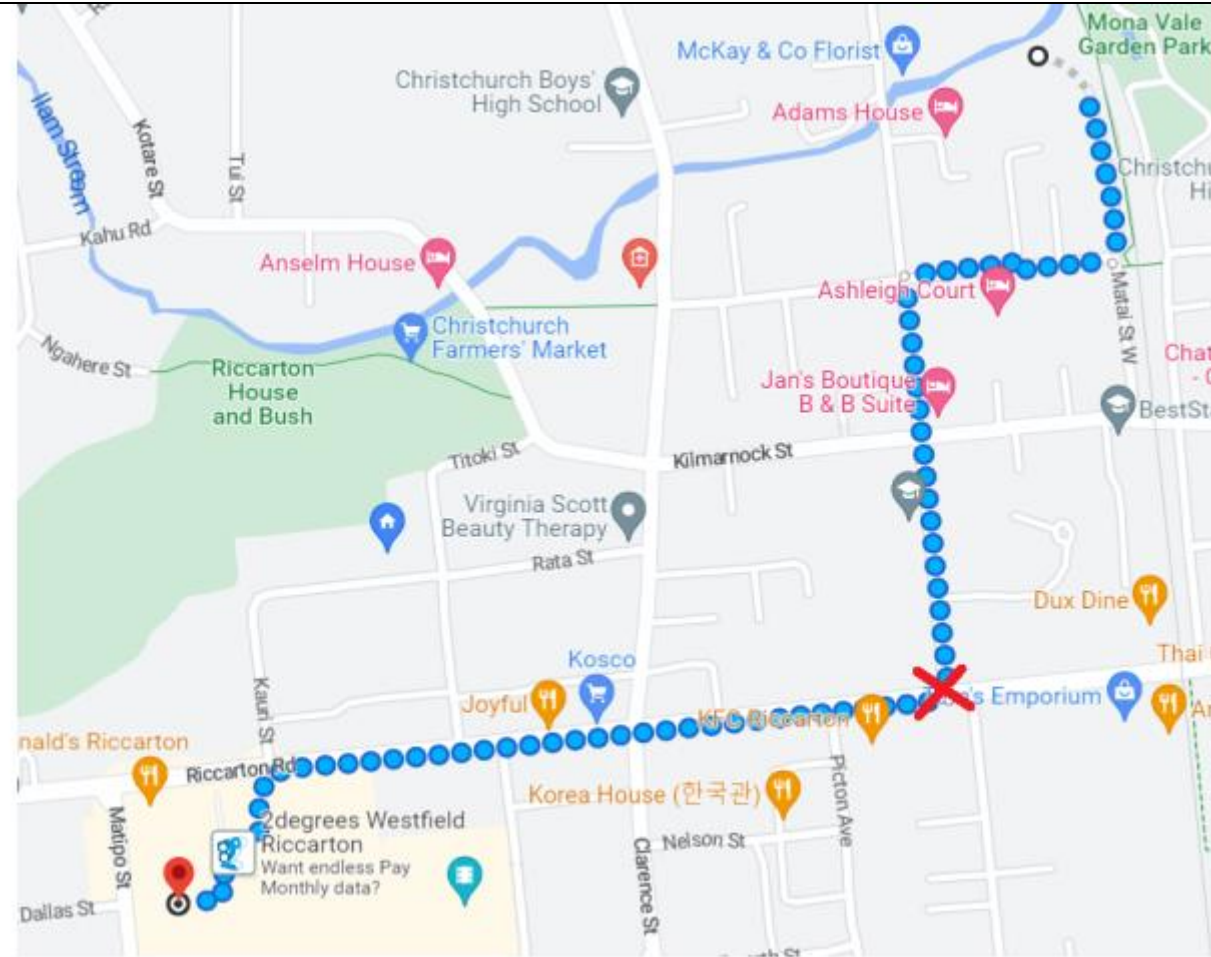

Figure 17 - Walking times/distances

We tested walking times and, walking the shortest route, the blue dotted line, from the north-west edge of the high-density zone (Kereru Lane) to the Harakeke St corner it takes 10 minutes, but then it is another ten minutes to the supermarket in Westfield Mall. That is 20 minutes to a critically important amenity and another 20 minutes talking back, and we did not conduct our test carrying bags of groceries, nor did we test it for people of varying abilities. This was not what the legislation intended and it calls into question again the thoroughness of the assessment of the social impacts of PC14.

Instead:

- Walking times should be based on the time it takes to walk to key amenities.
- Centre boundaries, if they are required to be used to determine the extent of 6-storey (walkable) zones, should be adjusted accordingly.
- Walking times should be tested in real time taking into account local conditions such as traffic, controlled intersections and any other barriers.
- They should take into account pedestrian capability, and not assume everyone is equally able.

Joshua Wight/ #199.5		Seek Amendment	Oppose restrictions on buildings above 14 m.	
Joshua Wight/199.5	Anne Dingwall/ #FS2037.280	Seek Amendment	<p>Oppose restrictions on buildings above 14 m.</p> <p>Restricting buildings above 14m defeats the purpose of NPS-UD by making it much less attractive for developers to build denser apartment-style buildings. Buildings in the HRZ are overly constrained by the rules for recession planes, setbacks, height limits, and building separation. In areas with older sites (e.g Riccarton, Papanui, city centre), the smaller than average site width combined with the aggressive rules means that a 5-storey house is largely not permitted. Given that units taller than 3-stories require additional investments (fire safety controls, lifts), this effectively limits feasible development in some HRZ areas to 3-storeys. Even on sites where the width is equal to the city-wide average width of 20 m, the width of the 5th floor of a building is limited to just 6 m. This reduces the feasibility of building 5-storey units. The rules for buildings in the HRZ are unnecessarily harsh, with the unintended consequence of promoting 3-storey houses over higher-density developments.</p> <p>Higher density areas allow more people to live closer to key bus routes, employment, services and amenities. These benefits will be mitigated by the harsh recession planes detailed in 14.6.2.2.b, which make it more financially feasible for developers to build 3-storeys than the intended higher density. Given that the council accepts that areas like Riccarton should be allowed to build taller than 3-storeys, then why are these rules applied in a way that limits development to just 3-storeys? These rules are at-odds with the direction of the NPS-UD, and as such we [the submitter] believe[s] that they should be relaxed or removed entirely.</p>	Oppose
Addington Neighbourhood Association / #205.37		Seek Amendment	That the Spine [Brougham Street Expressway between Waltham Road and Barrington Street] and other traffic corridors be subject to lower density residential standards than the proposed provisions allow for.	

Addington Neighbourhood Association /205.37	Kāinga Ora/ #FS2082.157	Seek Amendment	That the Spine [Brougham Street Expressway between Waltham Road and Barrington Street] and other traffic corridors be subject to lower density residential standards than the proposed provisions allow for. The Spine and other traffic corridors need to have restrictions on the amount of intensification along it, if the result will be that more traffic will flow from properties along it, on to an already overloaded transport route. In particular, properties along the should be restricted from higher density, as there are already problems with traffic entering and exiting this main traffic corridor from the properties opening on to it and traffic is expected to increase over the next 20 years.	Oppose

Deans Avenue Precinct Society Inc./ #222.2		Oppose	Oppose High Density Residential Zoning on sites that are bounded by the following streets on Planning Map 31 and 38. - North: Matai St East - West: Deans Ave - South: Moorhouse Ave - East: Railway line Except for sites located along/facing Riccarton Road, on the Guest Accommodation block, and the old Saleyards site (they can be High Density Residential Zone).	
Deans Avenue Precinct Society Inc./222.2	Anne Dingwall/ #FS2037.306	Oppose	Oppose High Density Residential Zoning on sites that are bounded by the following streets on Planning Map 31 and 38. - North: Matai St East - West: Deans Ave - South: Moorhouse Ave - East: Railway line Except for sites located along/facing Riccarton Road, on the Guest Accommodation block, and the old Saleyards site (they can be High Density Residential Zone). We oppose the Deans Avenue Precinct Society area becoming HRZ residential at this time, except for the areas noted. We consider that we do not meet the criteria in 14.2.7 Objective – High Density Residential Zone, to enable HRZ commensurate with demand, community facilities etc and 14.2.7.2 Policy (high density location to enable HRZ within walking catchment of city centre, town centre (Riccarton)).	Support

			<p>The focus for HRZ development in Christchurch must be on the central city for the next 5-10 years. Without a significant residential population in the central area, Christchurch will be a less vibrant, lively and attractive place bringing in tourists and those from the wider Christchurch and Canterbury areas. We need to fully capture the post-earthquake opportunity to make the central city a great place to live, especially for young people.</p> <p>Encouraging high density immediately adjacent to the centre in areas such as ours has the potential to reduce much needed residential development in the CBD. This gives the opportunity to do more work to ensure that new 4-6 storey blocks randomly placed in an area that is already densely developed with 1-2 storey units do not unreasonably affect the existing community.</p> <p>DAPS is largely outside the “walking catchment” of either Riccarton or CBD as defined by CCC (1.2 km from CBD or 600m from Riccarton town centre zone). Maps (Appendix 1) show that walkability / accessibility criteria are not met and the area is not closely connected to Riccarton, in part because of the barrier of the railway line and because many of the key amenities and services (supermarket, Wharenui primary school) are at the western end. Amenities within the City (library, swimming pool (under construction), supermarket) are perhaps better located, but also outside the designated walkability catchment.</p> <p>Urban form should support a diverse and connected neighbourhood where people want to live, not just pass through. Long term residents at various life stages are vital to maintaining a community spirit and taking responsibility for encouraging a friendly, caring and safe environment. Our community has many rental properties and many short term residents, but it is mostly the long term residents whose efforts help create a more resilient, connected and self-reliant community. If the area has an unattractive built environment it is unlikely to retain long term residents with a consequent reduction in social resilience.</p> <p>The Christchurch Mosque attacks in 2019 impacted local residents around the AlNoor mosque, as well as the Mosque community. The potential for higher buildings adjacent to the Mosque raises safety concerns for those who attend the mosque, and the local neighbourhood.</p>

Maps (Appendix 1) show that walkability / accessibility criteria are not met and the area is not closely connected to Riccarton, in part because of the barrier of the railway line and because many of the key amenities and services (supermarket, Wharenui primary school) are at the western end. Amenities within the City (library, swimming pool (under construction), supermarket) are perhaps better located, but also outside the designated walkability catchment.</p> <p>Urban form should support a diverse and connected neighbourhood where people want to live, not just pass through. Long term residents at various life stages are vital to maintaining a community spirit and taking responsibility for encouraging a friendly, caring and safe environment. Our community has many rental properties and many</p>	Support

			<p>short term residents, but it is mostly the long term residents whose efforts help create a more resilient, connected and self-reliant community. If the area has an unattractive built environment it is unlikely to retain long term residents with a consequent reduction in social resilience.</p> <p>The Christchurch Mosque attacks in 2019 impacted local residents around the AlNoor mosque, as well as the Mosque community. The potential for higher buildings adjacent to the Mosque raises safety concerns for those who attend the mosque, and the local neighbourhood.</p>	
Deans Avenue Precinct Society Inc./ #222.4		Support	<p>Support these areas being High Density Residential zoning on planning maps 31 and 38:</p> <ul style="list-style-type: none"> • the “Old Saleyards” block from south side of Mayfair to Lester • The Residential Guest Accommodation block (Chateau on the Park etc) • Properties with a boundary on Riccarton Road 	
Jennifer Smith/ #229.1		Oppose	Oppose zoning of 51 Jollie Street, Linwood as High Density Residential Zone.	
Kurt Higgison/ #232.2		Oppose	Opposes developments in already built areas and seeks that new development areas grow into new areas,	
Paul Clark/ #233.11		Support	Support high-density housing near the city and commercial centres.	
Susan Barrett/ #236.4		Oppose	That rather than wholesale non-consented High Density Residential Zone developments in Christchurch's existing suburbs, it would be preferable, more cost-effective, and quicker to apply these principles to forward-thinking, well-planned green field developments (with the right transport links)	
Marjorie Manthei/ #237.2		Not Stated	That Salisbury Street to Bealey Avenue is (not zoned High Density Residential zone) removed from the 'walkable catchment' area from the edge of the City Centre.	
Marjorie Manthei/ #237.39		Seek Amendment	[W]ithin the High Density Residential Zone from Salisbury Street to Bealey Avenue, between Colombo and Victoria Streets, review the zoning to ensure “it takes into account how the package of zones work together” (“Understanding and Implementing’ guide, Section 6, p28).	
Marjorie Manthei/237.39	Anne Dingwall/ #FS2037.332	Seek Amendment	[W]ithin the High Density Residential Zone from Salisbury Street to Bealey Avenue, between Colombo and Victoria Streets, review the zoning to ensure “it takes into account how the package of zones work together” (“Understanding and Implementing’ guide, Section 6, p28). I also cannot find a rationale for differences in maximum height on sites within the relatively small HDRZ from Salisbury Street to Bealey Avenue, between Colombo and Victoria Streets. Sites on some streets (or even one side of a street) are designated a ‘Precinct’, with a maximum consented height of 20m. Other sites have a maximum height of 32m. Oddly, the “lower” height covers sites facing busy streets such as Bealey Avenue, where taller buildings might be more easily accommodated. Some sites on the east side of Durham Street are within a ‘Precinct’, but those between Salisbury Street and the former women’s hospital site are not (making them more vulnerable to greater heights). It appears completely arbitrary and not very sensible. Having so much variation in a small neighbourhood defined by four major streets, does not ‘work together’.	Support
Andrea Floyd/ #239.7		Seek Amendment	[Reduce extent of medium and high density residential zones]	
Property Council New Zealand/ #242.3		Seek Amendment	The Property Council support an increased height limit of 32 metres to areas immediately surrounding the central city. However, we recommend that this wording be changed back to how it was written in last year’s consultation document i.e., “an increased height limit of 32 metres within a walkable catchment of 800m or 10 minutes” rather than “an increased height limit of 32 metres to areas immediately surrounding the central city”.	
Property Council New Zealand/242.3	Cambridge 137 Limited/ #FS2042.31	Seek Amendment	<p>The Property Council support an increased height limit of 32 metres to areas immediately surrounding the central city. However, we recommend that this wording be changed back to how it was written in last year’s consultation document i.e., “an increased height limit of 32 metres within a walkable catchment of 800m or 10 minutes” rather than “an increased height limit of 32 metres to areas immediately surrounding the central city”.</p> <p>This change in wording will lead to different interpretations and create uncertainty for the development community.</p>	Support
Ravensdown Limited/ #243.1		Oppose	Oppose the HRZ zoning of the land to the southwest and south of the Christchurch Works (312 Main South Road). Seeks that this land is rezoned to MRZ.	
Ravensdown Limited/243.1	Kāinga Ora/ #FS2082.201	Oppose	<p>Oppose the HRZ zoning of the land to the southwest and south of the Christchurch Works (312 Main South Road). Seeks that this land is rezoned to MRZ.</p> <p>High density residential zoning is not consistent with SD Objective 3.3.14 (now 3.3.15 under PC14) of the District Plan, nor does align with the policy framework of the IHZ which acknowledges the potential for both reverse sensitivity issues and a range of potential effects on more sensitive activities adjoining such sites. For this reason, Ravensdown considers that the area of land, which is of concern, should be rezoned MRZ. This zoning is consistent with the proposed rezoning of the land to the south and east of the land which is generally located to the south of the Christchurch Works.</p>	Oppose
Harvey Armstrong/ #244.11		Seek Amendment	Seeks that the Council review all existing vacant land closest to the CBD as to whether it is suitable for residential development.	

Harvey Armstrong/244.11	Brighton Observatory of Environment and Economics/ #FS2092.10	Seek Amendment	Seeks that the Council review all existing vacant land closest to the CBD as to whether it is suitable for residential development. It is concerning to see the residential housing sprawl being carried out on good versatile soils at considerable distance from the CBD. These sites all require expensive extension to city infrastructure and services. The environmental damage is being further accelerated by the creation of significant satellite towns like Lincoln, Rolleston	Seek Amendment
Harvey Armstrong/244.11	Kainga Ora - Homes and Communities/ #FS2099.2	Seek Amendment	Seeks that the Council review all existing vacant land closest to the CBD as to whether it is suitable for residential development. It is concerning to see the residential housing sprawl being carried out on good versatile soils at considerable distance from the CBD. Caitriona Cameron/ #272.12		Seek Amendment	Rattray St should be included in the MDR zone (i.e. included in the area south and west of the street).	
Caitriona Cameron/272.12	Christchurch International Airport Limited/ #FS2052.282	Seek Amendment	Rattray St should be included in the MDR zone (i.e. included in the area south and west of the street). The inclusion of Rattray St in the HDR is particularly inappropriate and unjust. The majority of properties west of Wainui St, i.e. from Peverel St south, are in MDR; including such a small street as Rattray St outside the boundary of Wainui St, makes it an anomaly. Currently Rattray St is in the RSDT zone; this means that the proposed change is much more extreme than in most other areas (i.e. RSDT to HDR, rather than RMD to HDR as for Wainui St et al). The change is particularly important given Rattray St includes many very narrow east-west aligned sections, which are unsuited to a HDR zone.	Support
Ian Chesterman/ #273.11		Support	[S]upport[s] high-density housing near the city and commercial centres.	
Robert Fleming/ #274.11		Support	[S]upport[s] high-density housing near the city and commercial centres.	
Mary Crowe/ #281.1		Seek Amendment	1. Amend the zoning of Hurley Street from High to Medium density.	
Mary Crowe/281.1	Clare Dale/ #FS2029.33	Seek Amendment	1. Amend the zoning of Hurley Street from High to Medium density. Re: Hurley Street Christchurch Central. The zoning for this street should be amended to Medium, not High density zone. There are a number of reasons for this. Firstly, it is on the edge of the red zone and suffers significant flooding in heavy rain events as does it's only vehicular access on Oxford Tce. For this reason, it is inappropriate that buildings up to 10 storeys could be built here. The character of the parkland area surrounding the street would also be negatively affected. Additionally, in regard to public transport, this area is very poorly provided for, with no bus route on Barbadoes, Madras or	Oppose

			Kilmore Streets, and only very infrequent buses on Fitzgerald ave. Therefore, this area does not come under the ""close to public transport"" description required for a High density zone.	
Brendan McLaughlin/ #282.1		Seek Amendment	No suburb should be classified as a High Density Residential Zone	
Damon Ross/ #283.1		Support	[Retain High Density Residential Zoning in the Papanui area]	
Damon Ross/283.1	Kāinga Ora/ #FS2082.230	Support	[Retain High Density Residential Zoning in the Papanui area] I support the changes made specifically in relation to the High Residential Zone in the Papanui area. This area has needed densification for a long time, and has all the hallmarks of an up and coming urban area. To let this area thrive and prosper greater densification is needed. The proposed HRZ near the shops will wonderfully complement the area and provide support for the demand of new entrants in the area.	Support
Michael Skinner/ #285.1		Oppose	[Seeks removal of Perry Street and Rayburn Avenue in Papanui as part of the proposed High Density Residential Zone and the Town Centre Intensification Precinct.]	
Millie Silvester/ #286.1		Oppose	Seek to rezone west side of Paparoa Street to Medium Density Residential instead, like the east side. We propose that the demarcation of High Density Residential zone be redrawn much closer to Northlands Mall. This will still allow for more housing without impacting the residents in the area, as stated above, and ruining what makes Paparoa Street a prime example of the Garden City.	
Mark Nichols/ #287.3		Seek Amendment	Seek densification in a planned and staged way by staging the effective date of the zoning changes in for example rings coming out from the city centre and/or major shopping areas, so that the densification occurs in a structured way over time, rather than in a haphazard way across most of the city. This will allow for a more staged build out of the infrastructure required to support the densification.	
Shayne Andreasend/ #301.2		Seek Amendment	Restrict the High Density Zone to INSIDE the four avenues	
Shayne Andreasend/301.2	Anne Dingwall/ #FS2037.411	Seek Amendment	Restrict the High Density Zone to INSIDE the four avenues Please restrict the High Density Zone to INSIDE the four avenues - make this zone an attractive and vibrant areawhere people want to live, then proceed later to engulf the surrounding suburbs AFTER the potential inside the four avenues is maximised. Considerations: 1) Christchurch has far more character and human values without high density housing. 2) Restriction to two levels is much safer in the event of an earthquake, especially in the unstable ground of St Albans. 3) Access to sunlight is good with the 35degree recession plane, even though that was designed for Auckland. 4) Traffic in Christchurch is already at capacity. Medium density can accommodate this, but high density housing will overload the roading system. 5) Our water pressure is already poor in St Albans. 6) Privacy has a value to the residents that is not mentioned anywhere in the MDRS.	Support
Matty Lovell/ #306.1		Seek Amendment	[That] St James Avenue, Papanui [is not zoned] High Density Residential.	
Jo Jeffery/ #316.4		Seek Amendment	[Reduce extent of HRZ zone] Keep the height change proposal within the four avenues until such a time that further housing is required outside of that.	
Mark Figgitt/ #320.2		Oppose	[Oppose the High Density Residential Zoning] and ensure that all high density is consented and checked for compliance across the Board.	
George Hooft/ #321.3		Seek Amendment	[Retain existing residential zones, outside the four aves and other new designated areas]	
Darryl Swann/ #323.2		Seek Amendment	Retain the operative District Plan zoning of land outside the Centre City.	
Vivienne Boyd/ #326.1		Seek Amendment	That higher density housing [is not enabled] on narrow, no exit streets.	
Bruce Taylor/ #328.1		Seek Amendment	Replace the HDRZ zoning with MDRS for all the properties on the east side of Allister Avenue [Merivale]	
Dominic Mahoney/ #329.1		Seek Amendment	Remove High Density Residential Zoning from Perry Street [Merivale]	
Eric Ackroyd/ #333.4		Seek Amendment	That higher density housing development be prioritised in the city centre ahead of other residential zones.	

Lorraine Wilmshurst/ #335.6		Seek Amendment	[That] suburban areas [are not zoned] High Density Residential	
Adrien Taylor/ #342.9		Support	[Retain proposed extent of high density residential zones]	
Luke Baker-Garters/ #344.17		Seek Amendment	Amend plan change 14 to zone all of the central city to mixed use zoning.	
Monique Knaggs/ #345.11		Support	Supports high-density housing near the city and commercial centres.	
George Laxton/ #346.11		Support	I support high-density housing near the city and commercial centres.	
Elena Sharkova/ #347.11		Support	Support high-density housing near the city and commercial centres. Seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Stephen Deed/ #349.2		Seek Amendment	Seek to retain a height limit of 2 stories for area near Lacebarks Lane that is closed to local industrial and commercial zones.	
Felix Harper/ #350.8		Support	[Retain proposed extent of high density residential zones]	
Jono de Wit/ #351.7		Seek Amendment	[T]he walkable catchment distances from town centres should be increased	
Jono de Wit/351.7	Kāinga Ora/ #FS2082.284	Seek Amendment	[T]he walkable catchment distances from town centres should be increased I think the walkable catchment distances from town centres should be increased because they are quite short at the moment and allowing more people to live close to these centres will be a good thing.	Support
Jono de Wit/ #351.9		Seek Amendment	The area north of Riccarton road and west of Straven Road should be HRZ not MRZ	
Jono de Wit/351.9	Riccarton Bush Kilmarnock Residents Association ./ #FS2062.57	Seek Amendment	The area north of Riccarton road and west of Straven Road should be HRZ not MRZ The area north of Riccarton road and west of Straven Road should be HRZ not MRZ because limiting density near a main public transport route that is so close to Riccarton central and on a planned MRT route does not make sense. This should be where apartments are allowed to be built! I think the area of Riccarton road between Riccarton and Church Corner town centres should be included in the six storey zone. This will be an MRT route and it needs to be allowed to build apartments close to it. It does not make sense to have the HRZ zone go all the way south to Blenheim Road in Riccarton central, but then only have MRZ right on Riccarton road slightly West of Riccarton central. This is the area where I currently live.	Oppose
Jono de Wit/351.9	Kāinga Ora/ #FS2082.286	Seek Amendment	The area north of Riccarton road and west of Straven Road should be HRZ not MRZ The area north of Riccarton road and west of Straven Road should be HRZ not MRZ because limiting density near a main public transport route that is so close to Riccarton central and on a planned MRT route does not make sense. Colin Gregg/ #376.2		Seek Amendment	That Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) be zoned Medium Density Residential [instead of HRZ]	
Colin Gregg/376.2	Patricia Harte/ #FS2069.3	Seek Amendment	That Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) be zoned Medium Density Residential [instead of HRZ] It has retained a sense of character and coherence that, we consider, is somewhat unique. It has a relationship to the Avon River and to the parklands beyond, which are part of, and provide a link to the rest of, Hagley Park. It has remained an enclave of relatively spacious residential dwellings that has also enabled the retention of many trees (including significant specimen trees) both within the streetscape and within private properties. Heritage items, including some of the surviving older residences, are an important part of the overall character of the Area. Changing the area around these items would remove their context and impact on their heritage setting. The inclusion of this area as a High-Density Residential zone threatens to destroy this character and the coherence it provides. In addition, we note that there may also be further constraints to High (or even Medium) Density development in the area, which is identified as TC3 land and much of which is also in the Council's own Flood Plain overlay. That is not to mention potential parking issues that would likely be created if there was a proliferation of High Density accommodation.	Support
Toka Tū Ake EQC/ #377.9		Seek Amendment	Consider restricting density of development in the High and Medium Density residential areas which intersect with the Flood Management overlay.	
Toka Tū Ake EQC/377.9	Kāinga Ora/ #FS2082.290	Seek Amendment	Consider restricting density of development in the High and Medium Density residential areas which intersect with the Flood Management overlay. Flood hazard risk is predicted to increase in the near future due to rising sea-levels, associated rising ground-water levels, and more frequent and intense rain events. Flooding does not pose high risk to life or to the structural integrity of buildings, but frequent, repeated flood events can have a severe effect on the wellbeing of residents and incur a high financial cost to businesses and residents due to loss of business, loss of access to buildings, damage to property and furnishings, and clean-up costs (including removing contaminated silt from under houses which can become a health hazard). We support the extent of the modelled Flood Management Areas and note that the threshold for this mapped extent is a greater intensity and lower likelihood flood than the lowest flood level modelled by other territorial authorities. We do not suggest that intensification should not be allowed in this area, but there should be some restriction on density in Medium and High Density Residential Areas which intersect with this overlay, in addition to the required floor level provision.	Oppose
Indiana De Boo/ #379.10		Support	[Retain proposed extent of high density residential zones]	
Kate Gregg/ #381.3		Seek Amendment	That Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) be identified in the Christchurch District Plan as a Medium Density Residential zone and a Residential Character Overlay Area and be made subject to the rules that apply to Residential Character areas.	
Kate Gregg/ #381.5		Seek Amendment	Seeks that if Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) are not included as a Residential Character Area, rezone to MRZ with additional qualifying matters including amending the sunlight access QM at medium/high density southern boundary recession plane to 45° from 3m at the boundary: and that neighbours along the southern boundaries of any proposed developments that involve non-compliance with height or access to sunlight rules can be notified of the required resource consents and to make submissions.	
Gina McKenzie/ #382.2		Oppose	[Seeks that] Hornby [be removed] from the list of suburbs for high density development.	
Christopher Seay/ #384.11		Support	[S]upport[s] high-density housing near the city and commercial centres.

Northwood Residents' Association/ #592.4		Oppose	To not proceed with the rezoning of part of Northwood subdivision [from Residential Suburban to Medium Density Residential].	
Northwood Residents' Association/592.4	Ryman Healthcare Limited/ #FS2095.2	Oppose	To not proceed with the rezoning of part of Northwood subdivision [from Residential Suburban to Medium Density Residential]. NRA strongly opposes the planned rezoning of a significant part of Northwood from Residential Suburban (RS) to Medium Density Residential Zone (MRZ). We understand that the proposed change is arising from a change in legislation and are aware of the housing challenges that New Zealand is facing, including the need for more housing. However, we believe that Northwood is not suited for the proposed rezoning, and we have serious concerns about the negative impacts potentially resulting from it. In this submission, we have included our main concerns. In particular, the proposed rezoning raises concerns regarding its impact on the existing plan and the liveability of the subdivision, the environment, and the accrued risks of stormwater management issues: 1. The Northwood subdivision was designed in its entirety with a view to accommodate a community within it that would have a mixture of housing density and land areas. These areas were well defined and co-exist well with each other within the subdivision. Northwood already contains significant areas of medium and high-density housing under its current plan. Northwood is an area of excellent town planning and, arguably, of great liveability, as demonstrated by the pride of its residents and the well looked-after subdivision. The plan introduces MRZ in a single contiguous block incorporating all sections within a certain distance to the Main North Road. While the proposed change may allow more sections to become available for intensification, it completely ignores the merits of the existing plan. NRA strongly opposes the use of unplanned rezoning in Northwood. The proposed MRZ swathe includes amongst other things, Northwood Villas, an over 55's entity with its own covenants. One of the features that defines the character of Northwood, is the layout of the current buildings on their sections. In general, the owners of the sections facing the road frontage have maintained the original guidelines of space and openness in keeping with the original covenants applied by the subdivision developer, RD Hughes. We argue that Northwood's current plan supports the ambience of our place. 2. Christchurch City Council recently opened a consultation process on its proposed Urban Forest Plan. As outlined in the proposed plan, Northwood stands out with its higher canopy cover (15%) than all bordering areas. The NRA believes that the Northwood canopy cover should be protected. In addition to being a significant loss to the	Oppose

			<p>environment and the character of the area, the proposed change will be an impediment to CCC achieving its goals of growing its urban forest canopy (Goal 1) and of protecting urban trees by looking after them as “critical infrastructure (Goal 3).</p> <p>3. Furthermore, the NRA raised concerns in the past about ongoing flooding issues in the Northwood subdivision. Part of the Northwood subdivision is predicted to be within the extent of a 1 in 50-year flood event. The NRA doesn’t support the rezoning as we believe it would only accentuate the issue and will potentially pose a health and safety risk to the Northwood residents.</p> <p>4. Lastly, we would like to highlight that significant developments are already happening in the area, with a large development across the Main North Road. We believe that it would be inappropriate to proceed with the proposed rezoning until the impacts of this major development on horizontal infrastructure, road usage and traffic are well understood.</p> <p>We urge the Council to work collaboratively with the Northwood Residents' Association to ensure that any proposed changes are in the best interests of the Northwood residents and the broader Christchurch community. We hope that you will consider our concerns and take appropriate action to protect the unique character and environment of Northwood and to protect its residents.</p> <p>[Please refer to attachment for full submission]</p>	
Northwood Residents' Association/592.4	Retirement Village Association of New Zealand Incorporated/ #FS2096.2	Oppose	<p>To not proceed with the rezoning of part of Northwood subdivision [from Residential Suburban to Medium Density Residential].</p> <p>NRA strongly opposes the planned rezoning of a significant part of Northwood from Residential Suburban (RS) to Medium Density Residential Zone (MRZ).</p> <p>We understand that the proposed change is arising from a change in legislation and are aware of the housing challenges that New Zealand is facing, including the need for more housing. 			<p>I support high-density housing near the city and commercial centres. We need to allow more people to live near services and amenities to reduce car dependency. This would allow more people to take active and public transport to commute, shop and play. I seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.</p> <p>The council is required by law to allow residential buildings of at least 6 storeys within a 1.2km radius of commercial centres such as malls and the city centre. The council plan to enable this, while also allowing up to 10 storeys for residential buildings closer to the city centre. This would enable a wider range of dense housing development options. It would also allow more people to live close to services and amenities.</p>	
Edward Parkes/ #661.4		Support	[S]upport[s] high-density housing near the city and commercial centres...seek[s] that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Bryce Harwood/ #662.4		Support	[S]upport[s] high-density housing near the city and commercial centres...seek[s] that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Catherine & Peter Morrison/ #664.4		Oppose	Seeks residential special character overlay in Desmond Street and the close surrounding streets of Helmores Lane and Rhodes Street up to Rossall Street.	
Cooper Mallett/ #666.3		Seek Amendment	Make all the tall buildings in the middle of the city.	
Keri Murison/ #668.1		Seek Amendment	Amend the zoning of Strowan from HRZ to MRZ	
Donna Kenton-Smith/ #677.2		Oppose	[Opposes] the planned intensification plans for Merivale.	
Logan Clarke/ #678.6		Seek Amendment	Seek a change of all the zoning within 500 m of Riccarton road (from Church Corner) and Papanui Road (to Northlands) to High density.	
Logan Clarke/678.6	Christchurch International Airport Limited/ #FS2052.144	Seek Amendment	<p>Seek a change of all the zoning within 500 m of Riccarton road (from Church Corner) and Papanui Road (to Northlands) to High density. I would change all the zoning within 500 m of Riccarton road (from Church Corner) and Papanui Road (to Northlands) to be High density with the long term goal of creating strong living corridors along these roads.</p> <p>Starting the build up now of these areas will provide the people to use the stop and go public transport system once it has been put in place. Although there is not a 'town center' to build around, as more people are in the area there will be likely to be more business growth to form a new town center which will ideally also grow out from the stop and go service.</p> <p>In tangent with this work should be done to make Riccarton road and Papanui road built for people with easy walkable and bikeable access along the roads with the ability for small commercial shops to pop up all along the roads.</p> <p>As a past university student, It would be good to also encourage more denser housing close to the university, particular between Kirkwood ave and Riccarton road. This will providing more housing for students enabling them to live closer to university in properties which do not require major maintenance or grounds work. While what is built is likely to be initially more expensive, as time goes on this will provide cheaper housing for students long into the future. I would also transition the sections between the university and Rountree street to high density for the same reasons.</p> <p>I would also propose the addition of a 'town center' along Lincoln road in Addington. Then allow housing within a 5 minute radius of there to also be high density. This will provide another area of natural growth as many sections in this space have been in the medium density zone for a while so contains town more townhouses. This will then be a more natural step up to high density compared to the some other areas. There is already a small town center area along Lincoln road road and would be a good natural space for growth.</p>	Oppose
Logan Clarke/678.6	Riccarton Bush Kilmarnock Residents Association ./ #FS2062.58	Seek Amendment	<p>Seek a change of all the zoning within 500 m of Riccarton road (from Church Corner) and Papanui Road (to Northlands) to High density. Terence Sissons/ #696.3		Seek Amendment	Limit the HDRZ to the central city area and provide for MDRZs around the suburban shopping centres	
Ian McChesney/ #701.12		Seek Amendment	[That Rattray Street in Riccarton is zoned MRZ instead of HRZ]	
Ian McChesney/701.12	Anne Dingwall/ #FS2037.564	Seek Amendment	[That Rattray Street in Riccarton is zoned MRZ instead of HRZ] The inclusion of Rattray St in the HDRZ is inappropriate and unjustified. Currently Rattray St is in the RSDT zone; this means that the proposed change is much more extreme than in most other areas (i.e. RSDT to HDR, rather than RMD to HDR as for Wainui St et al). The change is particularly important given Rattray St includes a number of narrow east-west aligned sections, which are unsuited to a HDR zone. It also seems to me inappropriate since the west side of Rattray St borders on the proposed Shands/Piko heritage area. Intensive, high rise development might be a jarring transition into the protected zone (I note the areas bordering Riccarton Bush for example have allowed for a transition from high density).	Support

Philippa Tucker/ #709.5		Oppose	That the northeast side of Windermere Road is not zoned High Density Residential	
Andrea Williams/ #711.2		Oppose	Amend residential zoning in Hornby from HDZ and MDZ to RS.	
Girish Ramlugun/ #713.11		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Russell Stewart/ #714.7		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Russell Stewart/714.7	Anne Dingwall/ #FS2037.572	Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres. We need to allow more people to live near services and amenities to reduce car dependency. This would allow more people to take active and public transport to commute, shop and play.	Oppose
Sara Campbell/ #715.11		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Jonty Coulson/ #717.11		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	

Gareth Holler/ #718.11		Seek Amendment	Focus housing intensification within the Four Avenues. Development of a range of high-density housing / apartment options to varying specifications should be encouraged in the CBD and not suburbia.	
Andrew Cockburn/ #719.11		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Ethan Pasco/ #721.4		Support	[S]upport[s] high-density housing near the city and commercial centres...seek[s] that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Alan Murphy/ #724.8		Support	Supports high-density housing near the city and commercial centres. Seeks that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Birdie Young/ #727.6		Support	[Retain] high-density housing near the city and commercial centres.	
Heather McVicar/ #731.1		Oppose	Remove the 'walkable catchment of the city centre' from Salisbury Street to Bealey Ave, including Peacock Street.	
Michael Hall/ #733.13		Support	[Retain] high-density housing near the city and commercial centres.	
Pim Van Duin/ #738.10		Support	I support high-density housing near the city and commercial centres.	
Woolworths/ #740.3		Support	Except as otherwise modified by this submission, including amended zoned boundaries associated with the North Halswell Town Centre zone and St Albans (Neighbourhood / Local) Centre zone, retain amended residential zoning and nomenclature.	
Woolworths/740.3	Kāinga Ora/ #FS2082.486	Support	Except as otherwise modified by this submission, including amended zoned boundaries associated with the North Halswell Town Centre zone and St Albans (Neighbourhood / Local) Centre zone, retain amended residential zoning and nomenclature. Woolworths supports the application of the NPS-UD (and the regional policy statement) provisions which prioritised development in and around centres. Woolworths has continued to invest and explore new opportunities in response to population growth in Christchurch and is currently working on several development proposals to address gaps in its network or to upgrade existing operations. Woolworths remains concerned that the increased residential intensification is not balanced with commensurate policy flexibility to meet supply side wellbeing needs, or the functional requirements of supermarkets.	Support
Matthew Gibbons/ #743.3		Seek Amendment	Higher density near the airport should be allowed - people can install sound proofing. Perimeter block housing should be easier.	
Matthew Gibbons/743.3	Anne Dingwall/ #FS2037.1470	Seek Amendment	Higher density near the airport should be allowed - people can install sound proofing. Perimeter block housing should be easier. Removal of recessional planes and setbacks is good. Density around the central city is desirable. However, density should be permitted everywhere. Higher density will improve amenities like shopping and public transport. Demand creates its own supply. Hence the low public transport accessibility area should go. Higher density near the airport should be allowed - people can install sound proofing. Perimeter block housing should be easier. Setbacks are not desirable. Hence 14.6.2.2.b should be removed. So should 14.6.2.2.c. iv A and B. No new heritage areas should be allowed as they restrict development in parts of Christchurch where people want to live. A good rule would be that for every house added to a heritage area another is removed. The rules need to be changed to permit greater density in a wide range of places. Making it easier to build new houses will improve affordability and result in a more compact city that is cheaper to service and with lower transport times. It will also make active commuting easier and save on roads.	Oppose
Matthew Gibbons/743.3	Christchurch International Airport Limited/ #FS2052.121	Seek Amendment	Higher density near the airport should be allowed - people can install sound proofing. Perimeter block housing should be easier. Removal of recessional planes and setbacks is good. Density around the central city is desirable. However, density should be permitted everywhere. Site is zoned MRZ, but has LLCIP. ThePrecinct should encircle the MRZ sitesas this only applies to HRZ	Support
Amanda Smithies/ #752.11		Support	support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Piripi Baker/ #753.11		Support	[Supports] high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Alex Shaw/ #754.11		Support	[Supports] high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Margaret Stewart/ #755.2		Oppose	Remove High Density Residential zoning.	
Kay and Megan Mintrom and Pearce/ #757.1		Oppose	Retain existing zoning of 30 Sawtell Place, Northcote.	
ChristchurchNZ/ #760.25		Seek Amendment	At 2 Barnett Ave and 14 Johnson Street: <ul style="list-style-type: none"> • Rezone all of Lot 5 DP537999 (as at 12 May 2023) to HRZ (Large Local Centre Precinct) instead of part HRZ (Large Lot Local Centre Precinct and part MUZ. • Retain the proposed zoning of Lot 3 DP 537999 (as at 12 May 2023) as HRZ (Large Local Centre Precinct) 	
Mark Thompson/ #761.1		Oppose	[Seeks] that: <ul style="list-style-type: none"> - [that] Plan Change 14 be scrapped in [its] entirety and Christchurch so they can decide if that want this level of intensification. - Intensification of [the] area south of Bealey Avenue, central city is scrapped. - The following actions taken by Council: a) A referendum for the people of Christchurch so they can decide if that want this level of intensification. b) Commission a social impact assessment that can articulate the impact and costs of intensification across different parts of Christchurch. 	
Mark Darbyshire/ #768.4		Support	Supports HRZ near commercial centres as proposed.	
Sarah Griffin/ #771.1		Seek Amendment	[Limit HRZ to] an area which makes more sense, such as central Riccarton and the outskirts of the immediate city.	
Robert Braithwaite/ #772.3		Oppose	1. Lower Medium Density rules for the immediate residential area similar to those that apply under the current zoning to: <ul style="list-style-type: none"> - retain the character, amenity and scale of this residential area and - retain Sunlight Access to smaller lots 	
Vanessa Wells/ #785.1		Seek Amendment	[Seeks] that the high-density area be restricted to the commercial area surrounding Northlands Mall, to the north of Main North Road and Harewood Road. From Main North Road southeast should remain medium density housing. There is plenty yet to be in-filled for future generations, which will still retain the special character of the suburb.	
Peter Heffernan/ #787.1		Oppose	Delete high density zoning for Halliwell Avenue, Papanui	
Greater Hornby Residents Association/ #788.2		Seek Amendment	(Seeks that) High Density can not extend more than 10km from the Centre ofChristchurch	
Greater Hornby Residents Association/ #788.3		Oppose	Remove HRZ from area surrounding Ravensdown Hornby a Fertiliser factory	
Greater Hornby Residents Association/ #788.7		Seek Amendment	Remove High Residential Zoning from areas adjacent to schools.	
Greater Hornby Residents Association/ #788.10		Support	Supports MRZ zoning in Hornby. Change HRZ to MRZ zoning.	
Greg Partridge/ #794.2		Seek Amendment	The submitter requests that the area of South Richmond be made exempt from housing intensification via a qualifying matter due to natural hazard risks, in particular risk from future earthquakes and flooding.	

			<p>Its proximity to the Red Zone and the propensity for the land in this area to suffer significant structural damage when the Southern Fault Line ruptures (or the Christchurch Fault or Greendale Fault ruptures again) means it would be foolhardy of the Council to allow increased intensification to proceed in this part of the city.</p>	
Greg Partridge/794.2	Anne Dingwall/ #FS2037.725	Seek Amendment	<p>The submitter requests that the area of South Richmond be made exempt from housing intensification via a qualifying matter due to natural hazard risks, in particular risk from future earthquakes and flooding.</p> <p>Its proximity to the Red Zone and the propensity for the land in this area to suffer significant structural damage when the Southern Fault Line ruptures (or the Christchurch Fault or Greendale Fault ruptures again) means it would be foolhardy of the Council to allow increased intensification to proceed in this part of the city.</p> <p>The submitter is concerned that natural hazard risks have not been adequately considered in implementing central government's requirements for housing intensification and development of qualifying matters. The submitter has provided extensive commentary on hazards in their submission. The submitter's analysis of earthquake and flood hazard risks to South Richmond and Christchurch in general can be summarised as follows:</p> <p>Earthquake Risk</p> <ul style="list-style-type: none"> - The Christchurch Fault is an active seismic fault that runs under the city from close to Riccarton through to the eastern suburbs and off the coast of New Brighton. It is believed to have been responsible for the series of earthquakes that rocked the city on Boxing Day 2010 and may have caused the damaging earthquake of 1869. - The Christchurch Fault runs parallel to the more destructive Port Hills Fault which lies 5km to the south. - Christchurch sits within relatively close proximity to the Alpine Fault, one of the most active fault lines in the world, and one that has a history of sudden movement. The fault has ruptured four times in the past 900 years, each time producing an earthquake of about magnitude 8. - Seismic activity caused a lot of land in Christchurch to subside during the destructive Canterbury earthquakes of 2011 and 2012. - Computer modelling indicates that when the Alpine fault ruptures it will cause significant levels of peak ground velocity – the trampolining effect – meaning major structural damage to houses, commercial buildings and land here in Christchurch is almost certain, and will be widespread. It will produce one of the biggest earthquakes since European settlement of New Zealand, and it will have a major impact on the lives of many people. - Christchurch will be impacted by widespread liquefaction, the land will further subside, roading and bridges will be left damaged or impassable and the underground infrastructure will not be left intact. <p>Flood Hazard Risk</p> <ul style="list-style-type: none"> - Currently as little as 30mm of rainfall is all that is necessary before surface flooding builds up in Christchurch. - Niwa meteorologists have indicated that climate change is making rain more intense and more frequent in Christchurch because of a warming atmosphere holds more moisture. - What climate change has done is beef up the weather making bad flooding more likely, and more frequent due to the effects of <ul style="list-style-type: none"> • Fluvial, or river floods – which occur when rivers burst their banks and flood the nearby lands. • Pluvial, or surface flooding - when the rain is just so heavy that it overwhelms local drainage • Coastal flooding, or storm surges – an occurrence when strong winds fling water onshore - Current projections show that in less than 80 years about 35% of Christchurch will be inundated and vulnerable to regular flooding. Low-lying areas of the city – areas that used to be wetlands prior to European settlement – are most at risk, and they are not just coastal areas. Suburbs in central Christchurch that are earmarked for accelerated intensification, such as Edgware and St Albans are prone to flooding. 	Support

			<p>- It would be reckless and irresponsible for Council allowing development to occur in flood prone areas and those that will flood in the future. Increasing the height of foundations and floor levels will not protect residents from having to be rescued from flood-stricken properties nor the massive costs of repairing flood damaged properties.</p> <p>- Controversial plans to increase housing density across Auckland have been delayed by a year, so that Auckland Council can assess the impact of the recent floods and decide where homes should be built. The government has given the council the extra time, but also wants Auckland to consider how more intensification might be possible in “resilient” parts of the city.</p> <p>- With Christchurch being flood prone and highly susceptible to significant seismic activity, surely the Christchurch City Council should be pointing that out to Central Government and asking them to quantify how resilient any part of the city actually is.</p>	
Waka Kotahi (NZ Transport Agency) / #805.24		Seek Amendment	Update the Residential Suburban Zone properties subject to the Airport Noise Influence Area to the appropriate zoning required under the MDRS.	
Waka Kotahi (NZ Transport Agency) /805.24	Miles Premises Ltd/ #FS2050.15	Seek Amendment	<p>Update the Residential Suburban Zone properties subject to the Airport Noise Influence Area to the appropriate zoning required under the MDRS.</p> <p>Waka Kotahi supports the general intent of the qualifying matter to address effects related to noise from aircraft on residential properties, which reflects the noise rules in the District Plan. However, it is considered that the qualifying matter should not result in the downzoning of these residential properties and should be subject to MDRS provisions.</p> <p>It is recommended that the residential properties within the Airport Noise Influence Area overlay be rezoned in accordance with MDRS while remaining subject to this qualifying matter, but provide for a consenting pathway where increased density can occur if they can address effects of noise associated with the operation of the airport.</p>	Support

Waka Kotahi (NZ Transport Agency) / #805.38		Seek Amendment	Increase the walkable catchment to 1500m.	

Waka Kotahi (NZ Transport Agency) /805.38	Kāinga Ora/ #FS2082.604	Seek Amendment	<p>Increase the walkable catchment to 1500m.</p> <p>Waka Kotahi supports the use of walkable catchments around key commercial areas and the associated upzoning of these areas. However, the 1200m city centre walkable catchment as proposed is not supported does not reflect the walkable catchment of the city centre or realises the development capacity required by the NPS-UD. It is considered that the extent of the city centre walkable catchment should be at least 1500m for the following reasons:</p> <ul style="list-style-type: none"> • This reflects the s32 Walkability Assessment that outlines that people are generally comfortable to walk for 20min, which relates to approximately 1500m. • Christchurch is flat and relatively central to many residential neighbourhoods where people would typically use active modes of transport to get to the City Centre rather than travelling by private vehicle, which increases the walkability of the city. • As many centres as possible should be up-zoned to the fullest extent possible to provide for local services for people who will be living in the walkable catchments. Enabling additional densities in these areas will also support provision of public transport and active transport infrastructure in the future by concentrating population– Council should take a long term view approach to enabling increased density. • This achieves the objectives of the NPS-UD in creating well-functioning urban environments. 	Support
Howard Pegram/ #807.4		Oppose	Remove blanket MDRS across the city.	
Josh Garmonsway/ #808.6		Seek Amendment	[S]eek[s] that council enable 6 to 10 storeys for residential buildings near commerical centres.

			<p>OCHT support the implementation of a MRZ over all relevant residential zones. As set out in this submission, OCHT oppose the Public Transport Accessibility QM and therefore seek as a consequence of deleting this QM that the RS and RSDT zoned areas within this QM be rezoned to MRZ.</p> <p>OCHT note some ambiguity in the provisions as to whether the land that is subject to the Tsunami Risk QM is intended to be zoned MRZ or RS/ RSDT. Whilst agreeing that a high risk of natural hazards is a legitimate QM, our submission raises concerns with whether the costs and benefits of this QM strike an appropriate balance, and question the appropriateness of using a threshold of a 1:500 year event plus a 1m rise in sea levels as the mapping base. Use of a lower density RS/ RSDT zoning should only be used where the risk of hazards is proven to be high and with a high return period.</p> <p>OCHT support the inclusion of a High Density Residential Zone in inappropriate locations close to the City Centre and larger suburban commercial centres.</p> <p>[Please see attachment]</p>

David Smithson/ #888.1		Seek Amendment	That the Council change the HRZ which is proposed for the eastern blocks of Strowan from Normans Road to Blighs Road to MRZ.	
Susanne Elizabeth Hill/ #889.1		Support	Supports HRZ near city centre, opposes location in outer suburbs.	
Graham William Hill/ #890.1		Oppose	Opposes HRZ in Strowan, particularly 85 Normans Road.	
Alan John David Gillies/ #891.1		Seek Amendment	[That] the High Density Residential Zone proposed for the Strowan Residential blocks from Normans to Blighs Road be changed to a Medium Density Residential Development zone.	
Wayne Robertson/ #892.1		Seek Amendment	[Restrict] the High Density Residential Zone to within the four avenues, and where new subdivisions/whole areas are developed outside the four avenues	
Jacq Woods/ #894.2		Seek Amendment	Replace HRZ with MRZ on Strowan blocks west of Papanui Road from Normans Road to Blighs Road, along Watson Road.	

Tim Priddy/ #895.1		Seek Amendment	That the proposed High Density Residential Zone (HRZ) for the blocks in the Strowan area, west of Papanui Road, from Normans Road to Blighs Road be revised to Medium Density Residential Zone (MRZ).	
Claire Coveney/ #896.2		Seek Amendment	Seeks that all high density housing is located near cycleways and rail corridors, and away from wetlands and rivers.	
Denis McMurtrie/ #898.1		Seek Amendment	[That the HRZ around Northlands does not extend south of Harewood Road and Main North Road]	
John Hudson/ #901.11		Seek Amendment	Change Watford St from HRZ to MRZ	
John Hudson/ #901.12		Seek Amendment	Change Watford St from HRZ to MRZ	
John Hudson/ #901.13		Seek Amendment	Change Watford St from HRZ to MRZ	
Waipuna Halswell-Hornby-Riccarton Community Board/ #902.2		Seek Amendment	[That HRZ is not applied to any area currently zoned Residential Suburban, Residential Medium Density or Residential Suburban Density Transition]	
Waipuna Halswell-Hornby-Riccarton Community Board/902.2	Chapman Tripp/ #FS2063.180	Seek Amendment	[That HRZ is not applied to any area currently zoned Residential Suburban, Residential Medium Density or Residential Suburban Density Transition] The Board is concerned that some areas are moving from suburban density to high density. This means that some citizens are in a suburban density area, where the maximum is currently two storeys, now moving to high density, six storeys. There are three areas in the Board are facing this scenario - Church Corner represented by the Church Corner Residents' Association, the area around Riccarton House and Bush, represented by the Riccarton Bush /Kilmarnock Residents' Association and Hornby represented by the Greater Hornby Residents Association. Obviously, this affects longstanding residents, but at a recent meeting new residents who bought character homes or built new homes in Riccarton expressed anger -they had bought in an area that was low density to now find there was a government mandate for high density. Hornby similarly has some areas where this is occurring. This seems particularly unfair for the residents affected in this way. The Board requests that a rule be included providing that no area that is suburban density currently should be re-zoned high density.	Oppose

Jeremy Wyn Harris/ #51.2		Seek Amendment	Focus on low carbon intensification of the Central City rather than in suburban neighbourhoods.	
Jeremy Wyn Harris/51.2	Anne Dingwall/ #FS2037.80	Seek Amendment	<p>Focus on low carbon intensification of the Central City rather than in suburban neighbourhoods.</p> <p>Furthermore, while we appreciate that density may need to increase in time, this both seems extreme and premature, and done without context to the rebuild, geography, geotechnical issues, environmental concerns and local housing supply/demand. Today there are a number of empty sections in the central city along with a central city population that both desires and requires intensification. We are unsure why we don't focus on low carbon intensification in the CBD (requiring more materials such as wood as opposed to concrete and steel) in the first instance. We think everyone in Christchurch would like to see a clean, denser inner city, rather than fragmented neighbourhoods of the occasional 32 metre high building built without consideration to materials that will result in significant emissions from construction.</p>	Support

Support

Reduce the extent of the CCZ core to encourage a compact core with the north and north west boundary returning to be the southern eastern corner of Victoria Square, and the North Frame reinstated from the Kilmore/Victoria/Durham St intersection. Refer to figure 5 of submission.

Figure 5

Showing the zoning that VNA would like to see changed for Victoria St as part of PC14 – the restoration of the North Frame/Fringe as shown in light purple which incorporates mixed use and a height limit of 21m to be consistent with the South Frame.

PC14 should consider and enable and encourage smaller businesses back into the city core by having attractive smaller buildings with high aesthetic and amenity, rather than old fashioned skyscrapers and encouraging a compact city to return vibrancy to the “core.”

There is no consideration in PC14 on what the people of CHC want and need, or consideration of the “Have your say” feedback and intent of the CCRP of a low rise, garden city with a consolidated core. Whilst the idea of a tiered city makes sense as per the diagram in its intent below depicts the extreme proposed height in the CCZ of 90m is without any robust justification other than a way to justify three storeys in the MDRZ.

			<p>The only rationale we can see for the 90m height limit is the Property Economics Report July 2022. This report recommends that the less limits on building height will encourage freedom to develop and higher yield thereby making city attractive to developers and that this, in turn, will signal that this is the city centre, thereby encouraging more development in this area.</p> <p>Add to this that there was no consideration in the Property Economics Report July 2022 report relating to demand trends in commercial high rise making this recommendation an academic exercise in planning to develop a tiered city scape to arrive at the MDRS of 11m in height. The report also acknowledges that it is unlikely that a 90m buildings will actually be developed and flies in the face of what the people of Christchurch want, yet the tier approach of the city design is predicated on a start enabled hight of 90m.</p> <p>The Property Economics Report July 2022 establishes that whilst larger corporates make up less than 20% of CHC’s business community they contribute 70% employment. No doubt this is true, but one should not assume that that this 70% employment all need to work in the city centre given the move to flexible working and WFH which is here to stay.</p> <p>The assumption in the report is that these people will drive much needed foot traffic is flawed given market trends in workforce especially larger employers like call centres, and public service who embrace WFH to reduce costs in real estate. It would be better to encourage buildings in the CCZ that will meet the needs of SME’s rather than large corporates to create a dynamic city centre that supports retail.</p> <p>There is a solution between enabling and at the same time delivering to what the people of Christchurch want as a low-rise city, this would also fit with developers opinion that there is enough existing capacity in CHC and there is no need to go higher. The desired urban profile could be achieved by reducing the maximum heights in all central city zones by at least 50% for now. This would still enable but without creating massive over enablement which comes with significant risk of creating a ghost town and making CHC highly unattractive for both residents and commercial.</p> <p>The current boundary of the CCZ in the proposed PC14 also shows that the corner of Kilmore and Durham St and Victoria St is the start of the city. Post-quake CCC deliberately erected arches on this corner signalling the “gateway to the city” there are information boards telling you what these arches are. A gateway into to the city cannot therefore be in the city (otherwise it wouldn’t be a gateway) A gang plank to get you onto a boat for example as a similar concept, where the gangplank is not the boat itself.</p> <p>A gateway to the city can’t therefore be part of the city, the city must start beyond the gateway...surely? The boundary of the city centre should therefore be reduced to showcase and signal a compact core.</p>	
Rachel Davies/ #67.24		Seek Amendment	Prioritize or incentivise high density residential development starting from the city center then working outward, once land there has first been developed.	
Rachel Davies/67.24	Brighton Observatory of Environment and Economics/ #FS2092.3	Seek Amendment	<p>Prioritize or incentivise high density residential development starting from the city center then working outward, once land there has first been developed.</p> <p>Hoon Hay, Christchurch is my home, the place where we chose to buy and bring up our family in a home that was in a safe neighbourhood with a backyard, where our children can play, we can grow a garden and have space, peace and privacy. I feel this is typical of many residents who chose to live in the suburban areas that fringe the city center. I am now constantly shocked each time I travel down a local street to see so many properties demolished and replaced with two storey townhouses; many that are terraced, offering no space or privacy. They go nowhere to enhance the character of the neighbourhoods they now dominate. The original homes now seem squashed and overshadowed by these towering monstrosities. Gone is their light, privacy and peace; replaced by multiple dwellers, their cars, noise and pressure on existing infrastructure. It frightens me to say the least that this seems to be the future of Christchurch.</p> <p>I speak from a more protected position, as when I found our property on the Christchurch District Plan Map, we are in the Residential Suburban Zone and have another protective layer of being identified as having low public transport accessibility - again thanks needs to go to the Council for acknowledging this and using it to our advantage to prevent more sprawl of the MDRS. I am however aware that this level of protection is vulnerable as there is never any guarantee that zones don’t change. The only thing that makes me different from a poor family who finds themselves in the Residential Medium Density or Transition Zones are a couple of streets! It is frightening to think that their little slice of paradise could be dramatically threatened if a developer buys a property next to them and fills it to capacity with two or three storey units!</p> <p>Increased building heights in suburban areas will dramatically reduce sunlight for existing properties.</p> <p>Multiple storey dwellings negatively impact on the privacy of existing single storey residences.</p>	Seek Amendment

			<p>Developing properties which once housed four to five people to house 12 plus people puts pressure on existing services - predominantly water, stormwater and sewerage.</p> <p>More people living on a property with no access to a garage or off street parking means more vehicles are parked on the street, thus impacting on existing parking spaces for original residents.</p> <p>Existing gardens, trees and green space are destroyed and replaced with concrete or other impervious surfaces - this alters our so called 'Garden City' identity. What quality of life do these new residents have with an outdoor area, the size of a small patio? Is that the type of home we want the future children of Christchurch to be brought up in? How will they have a love of nature, fun and play outside - if their own outdoor space is a piece of exposed aggregate or a wooden deck the size of a carpark, if that? Sure the developers may argue that children can be taken to a local park to play - but really? Children should be able to play outside whenever they want, at their own home! Also, what happens to the rain that falls? It can no longer be absorbed by a lawn or garden - instead it becomes runoff increasing the risk of flooding.</p> <p>We are not Auckland or Wellington! We have space to expand in a range of areas. Many of the new subdivisions that keep popping up seem to have zones enabling high density multi storey housing - we often don't see this in reality though - instead we see single story dwellings on teeny tiny plots of land.</p> <p>The only ones who seem to be benefiting from this change are the developers who are lining their pockets with the profits from destroying existing neighbourhoods. They don't care what happens next once they've destroyed homes and built multiple dwellings at high speed with cost cutting measures. They just want the payout at the end and the move on to find the next plot of land. They squeeze people out and create a domino effect. Those strong enough or brave enough to say no to their buying power, get punished later when their land is worth nothing as it's been surrounded.</p>	
Tony Rider/ #74.2		Support	Support for Bush Inn's/Church Corner zoning as a Local Centre Zone and not Town Centre Zone.	
Tony Rider/74.2	Anne Dingwall/ #FS2037.154	Support	<p>Support for Bush Inn's/Church Corner zoning as a Local Centre Zone and not Town Centre Zone.</p> <p>The Bush Inn Centre is failing, with high rents, limited parking, and businesses finding success by moving elsewhere. People are more interested in open, modern malls like the successful Tower Junction and Northlink Shopping Centres. They cater for a wider range of shopping needs. The Bush Inn mall is very small and half empty, and has been rated mediocre by patrons.</p> <p>Lets compare Northlink to Bush Inn as an example. Using 2018 Census Data, Bush Inn and immediate surrounding areas (Fig 2) [Riccarton West, Wharenui, Upper Riccarton, Sockburn North, Ilam South, Ilam University, Deans Bush] has 23,031 people with 6981 occupied private dwellings in a 7.45KM2 area. This makes a density of 3091 people per KM2 . Northlink is in Northlands (Fig 3), and when including immediately surrounding areas (Papanui East, Papanui West, Papanui North, Northcote) there are 10005 people in 3879 occupied private dwellings in a 4.86KM2 area. This is only 2058 people per KM2 ; more than a thousand less per KM2 when compared to Bush Inn and surrounding areas.</p> <p>This shows the Bush Inn / Church Corner area is more densely populated, larger in size, larger in population, and larger in housing – yet the so called “Town Centre Zone” is failing year by year. There has even been a reported 1338 increase in population between 2013 and 2018 for Bush Inn and surrounding areas, with the number of private dwellings becoming unoccupied also increasing (Fig 4). This is a notable increase of persons living in the same home – population increase and persons living in closer proximity, with the mall continuing to increase in vacant retail lots. Bush Inn Centre is not a Town Centre Zone</p>	Support
Cameron Matthews/ #121.24		Seek Amendment	Change Addington to a Medium Local Centre.	
Cameron Matthews/121.24	Christchurch International Airport Limited/ #FS2052.214	Seek Amendment	<p>Change Addington to a Medium Local Centre.</p> <p>While the extent of this zone extends from Riccarton Rd to Blenheim Rd – the latter of which has no core Public Transport routes – the nearby suburb of Addington – particularly at the intersection of Whiteleigh and Lincoln Roads – is served by two core PT routes, and is proximal to housing, employment, and local retail/commercial/hospitality venues, but has no up-zoning planned – at least none exceeding baseline density requirements of the MDRS.</p> <p>Addington should be up-zoned to a Local Centre (Medium) and increased density in the surrounding neighbourhood permitted, by implementation of HRZ, or a Local Centre Intensification Precinct, or an equivalent mechanism.</p> <p>According to NPS-UD 2020 Policy 3d; our district plan must enable “within and adjacent to neighbourhood centre zones, local centre zones, and town centre zones (or equivalent), building heights and densities of urban form commensurate with the level of commercial activity and community services”. Given this graduated approach to density around neighbourhood cores is an expected outcome of NPS-UD, we apply this to Mixed Use Zone's also, and should permit increased densities of development adjacent to the proposed Mixed Use Zone, which is served by two Core frequent PT lines.</p>	Oppose

As proposed, the MUZ zone terminates abruptly in the middle of Addington, most sharply illustrated (see Figure 29) across Clarence Street South, where there is also no buffer around the LCZ zone of building heights “commensurate with the level of commercial activity”.

Figure 29 Addington proposed zoning exhibits only 3-storey densities in parts of commercial zone fronting Lincoln Road. Not only should this be higher, but a walkable catchment of housing should be too. The sharp difference in building densities in the adjacent MUZ is anomalous.

The anomaly here may be due in part to a misapplication of the proposed mixed-use policy (Policy 15.2.3.2 (a)), which seeks of MUZ areas: “...limiting their future growth and development to ensure commercial activity... is focussed within the network of commercial centres”. As Addington (and New Brighton for that matter) is such a centre, it is clearly inappropriate. This policy (15.2.3.2) should be revised with respect to MUZ areas adjacent to or forming part of commercial centres, as in Addington’s case. The current wording incorrectly implies that all MUZ areas are not within the strategic network of commercial centres, as Addington’s is.

Regarding wider impact, since the plan does not currently permit higher densities here than in other parts of the city (not subject to QM’s) which are far less-well connected to employment, retail, and entertainment opportunities, it incentivises growth in those more peripheral areas rather than preferentially in better connected and more central suburbs. This in-effect undermines the goals of NPS-UD and the (good) motivation behind CCC’s (flawed) Low PT Accessibility QM – i.e., that of concentrating growth in central and well-connected areas more economically served with reticulated utilities and transport infrastructure.

			This effect is evident looking further down Lincoln Road to Aidanfield, where a new Town Centre Zone (TCZ) surrounded by HRZ is proposed on what's now largely farmland. While I'm not opposed to this Aidanfield development (since it is infilling a strange rural exclave rather than sprawling the periphery of the city), it is nonsensical to provide for such intensive development farther away from the city centre before allowing higher levels of development in the existing urban footprint, along the same transit corridor, in the more centrally located suburb of Addington. Both locations share the same Core radial transit route of the #7, but in Addington's case it also has the Orbiter service to connect it frequently with adjacent Key Activity Centres of Riccarton and Barrington. Aidanfield has the #60 to serve a similar function to connect it to Wigram, but that is a lower-frequency line connecting with lower-activity centres. Addington is also a walkable distance to the city centre, a feature lacking in Aidanfield.	
Cameron Matthews/ #121.25		Seek Amendment	Lyttelton should qualify as a Local Centre (Medium) [and] gain commensurate permitted density within the centre and in the surrounding neighbourhood.	
Cameron Matthews/121.25	Christchurch International Airport Limited/ #FS2052.215	Seek Amendment	Lyttelton should qualify as a Local Centre (Medium) [and] gain commensurate permitted density within the centre and in the surrounding neighbourhood. In Lyttelton's case, essentially the entire urban area is excluded from intensification via application of various Qualifying Matters (regardless of their sometimes-dubious merits – see section: LOW PUBLIC TRANSPORT ACCESSIBILITY AREA). This is despite being well connected to public transport (with multiple bus routes and a ferry connection) and offering a broad range of amenities – including hospitality, entertainment, retail, schooling, etc. However, the proposed zoning extent for the Local Centre in this area is limited to only the CBP zone, which is poised to retain existing District Plan rules – i.e., there is no intensification in Lyttelton enabled by this proposed plan. No buffer zone is planned around this Local Centre zone for adjacent residential intensification “commensurate with the level of commercial activity” as required by NPS-UD Policy 3d, despite there being no natural hazard QM or infrastructure QM constraints. Lyttelton should qualify as a Local Centre (Medium) gain commensurate permitted density within the centre and in the surrounding neighbourhood.	Oppose
Cameron Matthews/ #121.33		Seek Amendment	Sumner should qualify as a Local Centre (Medium) [and] gain commensurate permitted density within the centre and in the surrounding neighbourhood.	
Cameron Matthews/121.33	Christchurch International Airport Limited/ #FS2052.223	Seek Amendment	Sumner should qualify as a Local Centre (Medium) [and] gain commensurate permitted density within the centre and in the surrounding neighbourhood. For Sumner, we have a very similar situation as Lyttelton, with good (if not excellent) Public Transport (#3, Christchurch's most-frequent Core bus service), a high degree of local amenities including retail, bars, cafés, a supermarket, and excellent recreation opportunities. However, this high-demand suburb (see Figure 12) is also severely limited in permitted intensification. Adjacent to the LCZ zone is only Residential Suburban Density Transition Zone (RSDT), which retains existing District Plan rules. Along the beachfront blocks we have MRZ zones, nearly compliant with MDRS, but further from the coast the zoning reverts to low-density Residential Suburban Zone (RS). This is curious as the sites further from the coast are at reduced risk from coastal hazards (reflecting in the reduction in Coastal Hazard Risk Management Area priority) yet are zoned at lower densities. The only other difference which could be accounting for the reduced density zoning in the more-inland blocks is the application of the Low PT Accessibility QM to those blocks, despite them having identical PT provision as the rest of Sumner and being well-within an 800m walkable catchment of the LCZ zone. Though I don't think we should necessarily intensify areas at high risk of increasingly severe coastal hazards, the zoning in this area is clearly not in line with the level of risk from natural hazards, nor commensurate with the level of commercial activity as required by NPS-UD.	Oppose
Cameron Matthews/ #121.34		Seek Amendment	Wigram should qualify as a Local Centre (Medium) [and] gain commensurate permitted density within the centre and in the surrounding neighbourhood.	
Cameron Matthews/121.34	Christchurch International Airport Limited/ #FS2052.224	Seek Amendment	Wigram should qualify as a Local Centre (Medium) [and] gain commensurate permitted density within the centre and in the surrounding neighbourhood. In Wigram, the Local Centre Zone (LCZ, 14m permitted) has no surrounding buffer zone of intensification “commensurate with the level of commercial activity and community services”. The adjacent sites (and walkable catchment) to this LCZ zone are only MRZ, with its permitted building height of only 11m. Suggested change is to up-zone sites adjacent to this commercial zone to match the building height and density limits of the zone. The Wigram area Local Centre should also certainly qualify as a Medium Local Centre, considering its high number of local amenities including a supermarket, mall, hospitality, cinema, etc, and the surrounding residential area should be up-zoned for commensurate building heights, i.e. 4 or more storeys.	Oppose
Cameron Matthews/ #121.40		Seek Amendment	Around the Sydenham south commercial area, up-zone sites within blocks containing parts of this commercial centre to match the building height and density limits of the zone (i.e. to 14m).

Cameron Matthews/ #121.45		Seek Amendment	The area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, should be zoned for at least High Density Residential Zone, Mixed Use Zone or equivalent density, such that they are at least above baseline Medium Density Residential Zone density limits.	
Cameron Matthews/121.45	Christchurch International Airport Limited/ #FS2052.235	Seek Amendment	<p>The area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, should be zoned for at least High Density Residential Zone, Mixed Use Zone or equivalent density, such that they are at least above baseline Medium Density Residential Zone density limits.</p> <p>Because of the latent potential of the rail corridor and feasible station locations for passenger services, and the existing lack of urban density proximal to those locations, I suggest that the area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, be zoned for at least HRZ, MUZ or equivalent density, such that they are at least above baseline MRZ density limits.</p> <p>Christchurch plays host to a passenger rail station for inter-regional trips. At present this station largely serves tourist markets, though the extant rail network within Greater Christchurch has been investigated for future suburban rail services, and further growth of especially the inter-regional services is entirely plausible. The road link to Dunedin for example is increasingly congested, low resilience, and Air New Zealand manage to make a profit on the CHC-DUN route flying about 7 return trips daily – a trip which, unlike rail, doesn't also service interstitial centres like Ashburton, Timaru, or Oamaru. Considering the rail corridors are already publicly owned, cover large parts of the city, and with much of the fixed infrastructure costs already paid for, they represent an attractive scaffold around which the city and wider region could grow in future without excessive cost burdens for new congestion-free transport infrastructure. Emerging metropolitan centres within Christchurch such as Hornby, Riccarton, and Papanui and Sydenham all lie on this corridor, as do the Rolleston and Rangiora slightly further afield.</p> <p>Unfortunately, past spatial planning has limited the growth around the rest of the rail corridor such that suburban rail services would likely see low utilisation and limited economic viability if run on the existing rail alignments, at least without lots of new growth in suburbs feasibly served by it – suburbs like Hornby, Addington, Riccarton, Papanui, Sydenham/Moorhouse, and even Heathcote Valley, Lyttelton, Rolleston and Rangiora. This is despite the huge advantages that such congestion-free, safe, rapid travel would provide to those using it, and those benefiting from that many fewer cars on the road, such as drivers, cyclists, pedestrians, and council finances in road maintenance.</p> <p>This mismatch in location between high urban density and latent high-capacity transport infrastructure will continue to be the case at least until spatial planning allows for higher urban densities within a walkable catchment of these feasible station locations, and/or such time as the rail corridor and services garner new investment – with both requirements currently locked in a chicken and egg scenario preventing progress. Though the immediate priority in public transport investment in Christchurch is rightly on improving the bus network and upgrading the City Spine route for tramway operation, cost-free allowances might be made now for the long-term evolution of the city's urban form and transport network by increasing the density limits in centres proximal to the existing heavy railways.</p> <p>Even if a dedicated suburban rail system was not built, or new track into the city centre laid, many of these station locations could be feasibly served even by commuter-oriented services serving a dual purpose of inter-regional travel between Dunedin and Christchurch, and commuter services across Greater Christchurch and other Canterbury urban centres like Timaru and Ashburton. Such inter-regional services seem increasingly likely to form part of a future low-emission, resilient passenger transport system, accommodating future population growth spread throughout the South Island, replacing, or complimenting the many trips currently made by car and plane, and this would help to create a more integrated, resilient, and prosperous South Island economy.</p>	Oppose

That Riccarton be a Town Centre or Neighbourhood Centre, not a Large Town Centre.

1. Only Hagley Park separates the two centres. Placing a large town right next to a metropolitan centre is odd and inappropriate and, we submit, an accidental and unintended result of poor planning and poorly regulated urban development over a long period of time, at the expense of both Riccarton and the CBD. If a city council priority is rejuvenating the central city, designating Riccarton a Large Town is a mistake. It will further draw residential and business activity away from the CBD. We submit large centres be some distance from the centre where they can support surrounding urban areas, complementing the city council's objectives, not working against them.
2. The eastern boundary of the Riccarton centre has been set at Harakeke St for no apparent reason, creating a longer rectangular commercial area which has unintended consequences when it comes to the level of intensification allowed in the surrounds. Locally, the centre boundary has always been regarded as Picton Ave [the blue line on Fig 3] and that is where it should be placed.

Oppose

It is within the city council's power to reconsider the Riccarton centre designations and make the commercial area smaller in order to encourage activity and growth where it needs to happen, in the city

Graeme McNicholl/ #226.3		Oppose	Rezone Addington, Sydenham and Phillipstown to mixed use commercial with apartment living above.	
Graeme McNicholl/226.3	Christchurch International Airport Limited/ #FS2052.142	Oppose	Rezone Addington, Sydenham and Phillipstown to mixed use commercial with apartment living above. This would allow for this old industrial area of town to be upgraded and change to allow high rise apartment living in an organic way over time. This helps to keep the city compact by not driving some home owners to the outer lying districts and keeps people closer to the city centre, utilizing the new amenities such as the Metro Sports Centre, theatres, restaurants, bars and retail that are still under development. We need to give the city a chance to realize the vision that was set in the blue-print for the city following the earthquakes.	Oppose
Property Council New Zealand/ #242.12		Support	Support the proposed amendments that seek to rezone Industrial General Zoned land within proximity of the central city to Commercial Mixed Use.	
City Salvage/ #249.1		Seek Amendment	Re-zone the residential portion of 544 Tuam Street and the adjoining land at 102-104 Mathesons Road, to Local Centre .	
Stephen Bryant/ #258.7		Seek Amendment	Re-designate Merivale a Medium Town Centre.	
Ara Poutama Aotearoa/ #259.1		Support	Retain the proposed Local Centre Zone for Rāwhiti Community Corrections, 296 Breezes Road, Aranui.	
Ara Poutama Aotearoa/ #259.2		Support	Retain the proposed Town Centre Zone for Winston Avenue Community Corrections, 16 Winston Avenue, Papanui.	
Scentre (New Zealand) Limited/ #260.8		Seek Amendment	Riccarton should be recognized as a Metropolitan Centre in the District Plan to be inline with the NPS-UD as opposed to a Town Centre.	
Scentre (New Zealand) Limited/260.8	Anne Dingwall/ #FS2037.357	Seek Amendment	<p>Riccarton should be recognized as a Metropolitan Centre in the District Plan to be inline with the NPS-UD as opposed to a Town Centre.</p> <p>Scentre considers that Riccarton qualifies as a Metropolitan Centre because of its sub-regional role in Christchurch and this should be recognised in the District Plan.</p> <p>In giving effect to the NPS-UD, the Council is required to intensify areas within and adjacent to particular types of centres, to a degree that is commensurate with the level of commercial activity and community facilities within them. As a result, PC14 provides for the realignment of the commercial centres framework in the District Plan to the framework of centres set out under the NPS-UD. Specifically, the NPS-UD provides that each individual centre should be identified as one of the following on a tiered basis: City Centre, Metropolitan Centre, Town Centre, Local Centre and Neighbourhood Centre. As a result, the focus of intensification begins with the City Centre and is made commensurate to each centre's role in the centre hierarchy.</p>	Oppose

			<p>Scentre considers Riccarton meets the criteria for Metropolitan Centres in the NPS-UD, given its size, function and the catchment it serves. The definition of Metropolitan Centre is found in the National Planning Standards ("NPS"), being:</p> <p><i>"Areas used predominantly for a broad range of commercial, community, recreational and residential activities. The zone is a focal point for subregional urban catchments"</i></p> <p>It is appropriate for Riccarton to be identified as a Metropolitan Centre as that status recognises the centre's important role in the centres' hierarchy, anticipates and enables ongoing growth and intensification both within and adjacent to the centre, improvement of public transport services, and an increased height limit. This better gives effect to the NPS-UD and the Housing Supply Act by providing for further intensification in and around the centre.</p> <p>Riccarton is a substantial and diverse centre, with important roles in Christchurch's retail and hospitality sectors, business services, financial services, property services, administrative and support services, and health.</p> <p>Riccarton is at the next level in the commercial centres' hierarchy, below the CBD, and has a well-established sub-regional role, which is a key feature in the NPS definition. Riccarton's sub-regional role has been confirmed through ongoing research into the number and range of business units, the level of employment, and its contribution to the Christchurch economy (GDP), as well as through consumer research into both shopping patterns and the wider roles of centres. Importantly, the research shows Riccarton's steady development and growth, in line with underlying population and demand growth in its main service area, and across urban Christchurch (and hinterland).</p> <p>Riccarton's role as a Metropolitan Centre is directly consistent with other Metropolitan Centres throughout New Zealand's urban system, including Auckland, Hamilton, Wellington, and Tauranga</p>

Luke Baker-Garters/ #344.18		Seek Amendment	Amend plan change 14 to zone all of the central city to mixed use zoning.	
Balmoral Limited / #386.1		Oppose	Rezone the sites at 336 and 340 Preston's Road and 427 and 435 Marshland Road Local Centre Zone (Prestons)	
Mike Singleton/ #390.4		Seek Amendment	Allow high density/mixed commercial use and development on [the] old sale yard site [at Canterbury Agricultural Park].	
Jeff Vesey/ #439.1		Seek Amendment	The Avonhead shops on the corner of Withells Road and Merrin Street should be rezoned Local Centre Zone and the surrounding area be subject to housing intensification rules as per other LocalCentres such as Prestons in Burwood.	
Jeff Vesey/439.1	Christchurch International Airport Limited/ #FS2052.125	Seek Amendment	The Avonhead shops on the corner of Withells Road and Merrin Street should be rezoned Local Centre Zone and the surrounding area be subject to housing intensification rules as per other LocalCentres such as Prestons in Burwood. Avonhead Mall including a Countdown supermarket and surrounding shops should be rezoned Local Centre. It is larger than Prestons and Halswell and is possibly an oversight in its classificationby Council. This area is also affected by the Airport Noise Influence Area qualifying matter and therefore the land surrounding the shops will be retained in current zoning.	Oppose
Joseph Corbett-Davies/ #444.3		Support	I support the mixed use rezoning of Sydenham/South City and laneway plan.	
Hamish Paice/ #492.1		Support	[P]articularly like the mixed use zone proposed in Sydenham as it will mean people can live near where they work and shop.	
Hamish Paice/492.1	Anne Dingwall/ #FS2037.497	Support	[P]articularly like the mixed use zone proposed in Sydenham as it will mean people can live near where they work and shop. Decision Sought:No specific amendments, but more public green space please! I support the changes as I think we need to allow more density in our city to cope with increases in population. I particularly like the mixed use zone proposed in Sydenham as it will mean people can live near where they work and shop. Only comment I have is that we should have more public green space, as 1) public green space is important for our physical and mental health, and 2) for storm water purposes, with increased density we will see a decrease in permeable surface on private land so we need more public land dedicated to this. If it means an increase in rates then so be it, our rates are super low anyway for the services that council provide.	Support
Central Riccarton Residents' Association Inc/ #638.2		Seek Amendment	[That Riccarton is not classified as a Town Centre]

Cooper Mallett/ #666.4		Seek Amendment	Make all the tall buildings in the middle of the city.	
Jack Gibbons/ #676.5		Seek Amendment	Rezone all Neighborhood Center Zones (NCZ)'s larger than 3000sqm as Local Center Zone (LCZ). [Relates to request for more Local Centre Intensification Precincts]	
Jack Gibbons/ #676.17		Seek Amendment	Expand the application of Local Centre Intensification Precincts to more centres / more area[s] of the city [-] Namely within a 200m walking catchment of every grouping of shops with more than 3000sqm of land.	
Logan Clarke/ #678.7		Seek Amendment	Seeks the addition of a 'town center' along Lincoln road in Addington.	
Logan Clarke/ #678.8		Seek Amendment	Change the zoning at 247 Riccarton road (Toyota Dealership) from General Industrial to Mixed Use Zone.	
Tony Dale/ #679.8		Oppose	Because it is adjacent to the Christchurch CBD, Riccarton should not, as is proposed, be designated a large Town Centre. This will worsen the situation that allowed Riccarton to get to its current size in the first place - largely at the expense of the CBD.	
Tony Dale/679.8	Riccarton Bush Kilmarnock Residents Association ./ #FS2062.37	Oppose	Because it is adjacent to the Christchurch CBD, Riccarton should not, as is proposed, be designated a large Town Centre. This will worsen the situation that allowed Riccarton to get to its current size in the first place - largely at the expense of the CBD. Designating Riccarton a Large Town will hinder efforts to resuscitate Christchurch's moribund CBD, as Riccarton will continue to draw residential and business activity away from the central city. The impact of this proposed designation for Riccarton, coupled with the centre destination for Church Corner, will result in an almost continuous corridor of high-rise densification from the CBD all the way out to Curletts Road and Villa Maria College. It is within the city council's power to reconsider designations and make the Riccarton commercial area smaller in order to encourage activity and growth where it needs to be: in the CBD.	Support
Sam Kealy/ #690.1		Seek Amendment	Rezone Industrial Land at Wairakei Road to Commercial	
Foodstuffs/ #705.1		Seek Amendment	Rezone 304 Stanmore Road Local Centre Zone

Foodstuffs/ #705.10		Seek Amendment	Amend the zoning of Lot 10 DP 17997 and part of Lot 13 DP 17997 at New World Ilam to LCZ.	
NHL Properties Limited/ #706.1		Seek Amendment	Rezone the site and adjoining HDRZ land to Central City Mixed Use (CCMU).	
Sophie Burt/ #725.4		Seek Amendment	Addington should be included a Local Centre Zone	
Sophie Burt/725.4	Christchurch International Airport Limited/ #FS2052.156	Seek Amendment	Addington should be included a Local Centre Zone Addington should be included in the Precinct Plan as a Larger Local Centre. [C]onsidering its proximity to the city centre and Hagley Park, the existing mix of uses and infrastructure, including rail and road, the rapid increase in residential development and the existing land currently occupied by the existing Stadium and Racecourse, and at a smaller scale, the Court Theatre, it will see potentially very significant change and regeneration.	Oppose
Sophie Burt/ #725.5		Seek Amendment	Addington should be a Mixed-Use Zone	
Sophie Burt/725.5	Christchurch International Airport Limited/ #FS2052.157	Seek Amendment	Addington should be a Mixed-Use Zone Addington should be a Mixed-Use Zone – Comprehensive Housing Precinct Development Plans as Sydenham and Lancaster Park are.	Oppose

Woolworths/ #740.7		Seek Amendment	Amend zoning of the St Albans Centre from Neighbourhood to Local Centre (Small)	
Woolworths/740.7	Kāinga Ora/ #FS2082.489	Seek Amendment	<p>Amend zoning of the St Albans Centre from Neighbourhood to Local Centre (Small)</p> <p>The increased density of residential development enabled through PC14 should be accompanied by increased opportunities in centres (and edge of centres) to accommodate additional services that will be required. In that context, it is appropriate to extend the zoning of specified centres to ensure that they are better able to accommodate the services that will be required in the future.</p> <p>The role of St Albans Centre should be elevated in the hierarchy of Centres from Neighbourhood Centre Zone (St Albans) to Local Centre (St Albans) in recognition of the extent of residential intensification that has occurred in its catchment since 2012, as enabled by PC14, and the Council's inability to account for the Hardie and Thomson built form constraints associated with the 3,451m2 of Local Centre at 1062 Colombo Street which disenables commercial redevelopment to provide for community wellbeing in this area. Regardless the permitted extent of commercial floorspace provided for the St Albans centre exceeds the 3,000m2 GFA capacity constraint identified in Policy 15.2.1 Table 15.1 as appropriate to Neighbourhood Centres.</p>	Support
Woolworths/ #740.9		Seek Amendment	Amend the zoned boundaries and ODP for North Halswell associated with the Town Centre Zone and High Density Residential Zone	
Woolworths/740.9	Kāinga Ora/ #FS2082.490	Seek Amendment	<p>Amend the zoned boundaries and ODP for North Halswell associated with the Town Centre Zone and High Density Residential Zone</p> <p>Rezone that area of North Halswell which has been notated as HRZ to Town Centre Zoning to reflect the consented land uses and roading demarcation provided by RMA2017/3185 as approved through Environment Court Decision NZEnvC 133[2021].</p> <p>Retention of HRZ as shown in PC14 does not reflect the anticipated and consented land uses as well as infrastructure which acts as a geophysical and perpetual boundary between the Commercial Core and the Residential Zone.</p> <p>The operative plan considerations as to maximum retail floorspace thresholds (Rule 15.4.4.2.3) and office (Rule 15.4.4.2.4) are retained to ensure matters associated with retail provision and traffic generation remain as those considered and made operative through the replacement District Plan process.</p> <p>The location of the Indicative Features (being Green Corridor, Stormwater Network and Internal Street) are not sought to be amended.</p>	Support
Ryman Healthcare Limited/ #749.1		Seek Amendment	[That] 20 Radcliffe Road, Northwood (Northwood site) is rezoned from proposed Town Centre Zone (TCZ) to High Density Residential (HRZ)	
Ryman Healthcare Limited/749.1	Kāinga Ora/ #FS2082.496	Seek Amendment	<p>[That] 20 Radcliffe Road, Northwood (Northwood site) is rezoned from proposed Town Centre Zone (TCZ) to High Density Residential (HRZ)</p> <p>Ryman's Northwood site occupies the entirety of the area currently zoned TCZ.</p> <p>It also understands that the land is no longer needed for long term commercial purposes. Ryman therefore submits it is no longer logical to retain a commercial zoning for the site.</p> <p>It submits this outcome is more aligned with the intent of the Enabling Housing Act and the National Policy Statement on Urban Development 2020, by appropriately providing for a residential activity that is planned to provide housing for Christchurch City's rapidly growing ageing population.</p>	Oppose
Christchurch City Council/ #751.101		Seek Amendment	Apply Large Format Retail Zone across [all of the site at 229 Marshlands Road subject to Private Plan Change 6 - refer to ATTACHMENT 4]	

Christchurch City Council/751.101

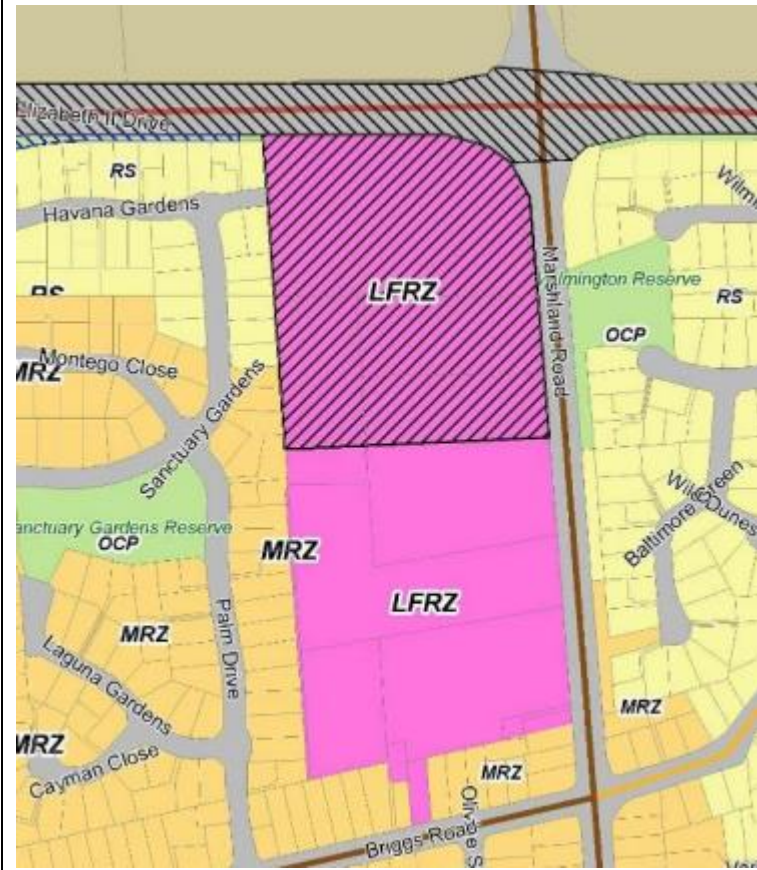

Anne Dingwall/
#FS2037.923

Seek Amendment

Apply Large Format Retail Zone across [all of the site at 229 Marshlands Road subject to Private Plan Change 6 - refer to ATTACHMENT 4]

Support

Apply Large Format Retail Zone across [all of the site at 229 Marshlands Road subject to Private Plan Change 6 - refer to ATTACHMENT 4]

Site is incorrectly mapped, showing three different zones, including introducing High Density Residential Zoning. The operative zone for this site is Commercial Retail Park Zone, Plan Change 14 proposes to change the zoning of Commercial Retail Park Zone to Large Format Retail Zone as per the National Planning Standards. This site is subject to

			a consent order that resolved Private Plan Change 6 to the Christchurch District Plan. The Council requests that the zoning for this site is rezoned to Large Format Retail Park Zone.	
Christchurch City Council/ #751.114		Seek Amendment	Change Industrial Zoning at 4,6,8 Lismore Street (Map 39) to Mixed Use Zone with Comprehensive Housing Precinct. [Refer to ATTACHMENT 24].	
Christchurch City Council/751.114	Anne Dingwall/ #FS2037.936	Seek Amendment	Change Industrial Zoning at 4,6,8 Lismore Street (Map 39) to Mixed Use Zone with Comprehensive Housing Precinct. [Refer to ATTACHMENT 24]. The title between 4, 6, 8 Lismore Street and the street is zoned industrial, the title is surrounded by Mixed Use Zone (Comprehensive Housing Precinct) and was intended to be zoned as Mixed Use Zone with a Comprehensive Housing Precinct. If this area of industrial general zone was not altered it would result in an island of industrial general amongst Mixed Use Zone.	Support
Christchurch City Council/751.114	ChristchurchNZ/ #FS2048.21	Seek Amendment	Change Industrial Zoning at 4,6,8 Lismore Street (Map 39) to Mixed Use Zone with Comprehensive Housing Precinct. Waka Kotahi (NZ Transport Agency) / #805.1		Seek Amendment	[That] the maximum enabled height of 32m (10 storeys) for residential activities should be applied to the City Centre, rather than the current proposed approach with two heights (32m in the immediate surrounds, then 20m thereafter).	

Waka Kotahi (NZ Transport Agency) /805.1	Chapman Tripp/ #FS2063.99	Seek Amendment	<p>[T]hat the maximum enabled height of 32m (10 storeys) for residential activities should be applied to the City Centre, rather 3 than the current proposed approach with two heights (32m in the immediate surrounds, then 20m thereafter).</p> <p>Waka Kotahi supports the use of walkable catchments around key commercial areas and the associated upzoning of these areas. However, the 1200m city centre walkable catchment as proposed is not supported does not reflect the walkable catchment of the city centre or realises the development capacity required by the NPS-UD. It is considered that the extent of the city centre walkable catchment should be at least 1500m for the following reasons:</p> <ul style="list-style-type: none"> • This reflects the s32 Walkability Assessment that outlines that people are generally comfortable to walk for 20min, which relates to approximately 1500m. • Christchurch is flat and relatively central to many residential neighbourhoods where people would typically use active modes of transport to get to the City Centre rather than travelling by private vehicle, which increases the walkability of the city. • As many centres as possible should be up-zoned to the fullest extent possible to provide for local services for people who will be living in the walkable catchments. Enabling additional densities in these areas will also support provision of public transport and active transport infrastructure in the future by concentrating population– Council should take a long term view approach to enabling increased density. • This achieves the objectives of the NPS-UD in creating well-functioning urban environments. 	Support

Ann Clay/ #104.5		Oppose	[Remove Low Public Accessibility Areas QM]	
Heather Woods/ #107.27		Seek Amendment	Amend 19.4 to remove the Qualifying Matter of "Low Public Transport Accessibility Area" in this area from 100 to 193 Wainoni Road (and further afield), or on all roads on regular bus stops to the central city.	
Heather Woods/ #107.31		Seek Amendment	Amend zoning to remove the Qualifying Matter of "Low Public Transport Accessibility Area" on all of Keyes Road (and further afield), or on all roads on regular bus routes to the central city.	
Nikki Smetham/ #112.3		Support	[Retain Low Public Transport Accessibility Qualifying Matter]	
Nikki Smetham/112.3	Anne Dingwall/ #FS2037.185	Support	[Retain Low Public Transport Accessibility Qualifying Matter] In general we are in full support for the proposed Qualifying Standards to Chapter 14 Residential including transport qualifying standards.	Support
Connor McIver/ #114.6		Oppose	Oppose the Low Public Transport Accessibility Area Qualifying Matter.	
Cameron Matthews/ #121.19		Oppose	The Low Public Transport Accessibility Qualifying Matter should be removed from the proposal because its spatial extent is incorrectly identified, including some of the city's premier public transport routes.	
Cameron Matthews/121.19	Christchurch International Airport Limited/ #FS2052.209	Oppose	<p>The Low Public Transport Accessibility Qualifying Matter should be removed from the proposal because its spatial extent is incorrectly identified, including some of the city's premier public transport routes.</p> <p>SEE IMAGES INCLUDED IN SUBMISSION</p> <p>While I feel this proposed Qualifying Matter shouldn't have to exist, since we shouldn't be planning for new residential developments which either do not or are never planned to have reasonable public transport access, I can accept that in some instances – due to, for example unsustainable legacy urban growth patterns – that this may be a necessary restriction.</p> <p>However, as currently planned many specific areas affected by this overlay are not disproportionately lacking accessibility via public transport – many are in fact currently within walkable catchments of one or more of our all-day high-frequency Core Bus Routes. Examples include:</p> <ul style="list-style-type: none"> • Burwood through to Queenspark, served by #7 • Avonside, served by the Orbiter (our most-boarded bus service) • Cranford Street, between Innes and Main North Roads, sees the Orbiter, #91, #92, and #28 pass through it • Sumner, served by the #3, our most-frequent bus service • Centaurus Road around Major Aitken Dr and Bowenvale Ave, as well as Eastern Terrace in Beckenham, served by the Orbiter • Cashmere, around Cracroft Reserve, is served by every other bus on the #1 route 	Oppose

In these cases, the application of the QM to these areas appears clearly erroneous, as CCC's first criteria for which the QM would NOT apply (Residential areas within 800m walk from High Frequency (Core) Routes) is not true. Despite the criteria themselves being seemingly arbitrary (as discussed below), to not even apply said criteria when identifying the spatial extent of the proposed QM is, at-best, highly questionable, and is a clear failure from CCC to evaluate "the specific characteristics on a site-specific basis to determine the spatial extent" (NPS-UD 3.33 3bii) for this proposal – thus failing to meet the requirements for a Qualifying Matter.

Other examples include several communities served by 'future-core' services – those that are currently planned to be upgraded to all-day high-frequency routes within the planning horizon of the Christchurch PT Futures programme.

- Casebrook-Northwood, Heathcote Valley, and Lyttelton, all served by the #28. Stage 2 of Christchurch PT Futures plans for enhancement of this route to a high-frequency Core route.
- Shirley through to Southshore, served by #60. Stage 5 of Christchurch PT Futures plans for enhancement of this route to a high-frequency Core route.

Though these 'future-core' services are, inexplicably, not included in CCC's seemingly arbitrary criteria (Qualifying Matters, Part 3, section 6.32.1) identifying the spatial extent of the proposed QM, they do provide extremely functional PT connections at reasonable frequencies and are in the process of being upgraded to Core routes, in accordance with the Christchurch Transport Plan and the Greater Christchurch Public Transport Futures plan, to be completed within the next 6 years. The communities which these routes serve should therefore NOT be excluded from intensification rules on the basis of poor public transport accessibility, as they currently have better public transport than many other areas and it's only planned to improve.

Lastly, several other communities which – though not as extensive as anyone would like – do have existing provision of public transport. These are services which could practicably be upgraded for higher frequencies and/or capacities and/or better/more stop locations over time with the developing urban form of the city.

- Mt Pleasant, served by the #140
- Westmorland, served by the #44
- Halswell south of Sparks Rd, served by the #100
- Racecourse Rd, sees the #140 and #86 along Yaldhurst Rd, and is served directly by the #130 connecting to both Hornby and Riccarton.

While the #140 route is planned to be re-routed (according to Greater Christchurch Public Transport Futures plan) and that may be being used as by CCC as justification for applying the QM to some affected areas (e.g. Mt Pleasant), it seems tough to argue that failure to provide additional services to fill this manufactured gap in coverage is a valid reason to deny intensification to those areas. It's also tough to argue that planned reductions in service should be accounted for (when restricting density) but planned improvements in service should not. Planned improvements are now funded as part of the Greater Christchurch PT Futures programme (<https://greaterchristchurch.org.nz/news/pt-futures-funding-boost>), such as branching core routes to improve coverage and frequency on Orbiter, #1, #3, #5, #7, and improvements in frequency on #28, #44, #60, #80, #100, #120, #125, #130, #140 to highlight a few.

Though the argument for implementing these restrictions might be that the existing PT services offer insufficient accessibility, that argument would be inconsistent with the fact that many of the affected communities share identical public transport services as nearby or adjacent communities, or even communities farther from key activity centres along the same PT route.

- #1 route on Hackthorne Road equally serves residents within 800m of the Sign of the Takaha as those at the intersection with Dyers Pass Road, but the former is subject to the LPTAA QM despite being further than 800m from any other PT services (Figure 16 and Figure 17), or,
- #28, where Heathcote Valley, Norwich Quay in Lyttelton and Winchester Street in Lyttelton all see largely identical service (ignoring the diamond-harbour ferry – though nearly all Lyttelton is within 800m of this, too – and the low-frequency #155), yet Norwich Quay is the only one of the three which is not affected by the LPTAA QM (Figure 18 and Figure 19), or,
- #3 route, which serves Sumner's main area (Mariner and Nayland Streets) just as frequently as it does the base of Mt Pleasant, or Main Rd through Redcliffs, or Moncks Bay, or the back-blocks of Sumner (Figure 20 and Figure 21). Yet here, all but the main strip through Sumner are deemed to have low PT accessibility, despite having identical accessibility as each other (and on our most frequent bus service, no less).

The QM spatial extent is also demonstrably unrelated to broader accessibility, as independent measures of accessibility highlight many of the areas within the QM extent as having good accessibility to a representative range of daily needs.

			<p>In their Section 32 report (Section 32 report Part 1 Appendix 3), CCC use the output from their ‘density enablement model’ as a crude measure of accessibility, partially to justify (Section 32 report Part 2 (QMs), Part 3, 6.32.3) the vast extent of the LPTAA QM. Their model was not developed to explicitly measure accessibility, particularly the lack thereof, but was developed to score commercial centres for capability to support up zoning beyond MDRS requirements, and in establishing their catchment sizes. Some overlap with accessibility exists, but unfortunately, the improper use of this in-house tool results in some unusual results on close inspection.</p> <p>Better measures of city-wide accessibility exist. Researchers from the University of Canterbury have evaluated NZ cities, including Christchurch on a site-by-site basis to find walking, cycling, durations to a range of everyday amenities, and have published (after peer-review) their method and results (https://doi.org/10.1016/j.cities.2022.103924).</p> <p>What their work shows (Figure 23) is that for a representative range of everyday amenities and services, accessibility via walking is excellent in many places which CCC’s model excludes or minimises, like Sumner, Redcliffs, Wigram, Oaklands/Halswell, Riccarton, Fendalton, Bishopdale, Merivale/St Albans, and Richmond. Others – most notably Aidanfield – seem to score highly in the CCC model but in reality, consist of literal open fields (see Figure 33), with none of the ‘intensification enablers’ ostensibly required by CCC’s model, except a Core Bus Route. Meanwhile, accessibility via cycling (Figure 24) is excellent for the vast majority of the city.</p> <p>In addition to the inconsistent application, there is a very high impact associated with implementing this QM over the proposed extent. Indeed, it is by far the most impactful proposed QM by CCC. In their Section 32 Report, CCC states (Section 32 report Part 2 Qualifying Matters, Part 3, 6.32.6) that “the areas proposed to be subject to this qualifying matter are extensive, covering approximately 12,096 hectares of land”. They also acknowledge that it reduces total plan-enabled development capacity by as many as 216,280 households (conservatively), or 34,100 feasible dwellings (Section 32 report Part 1 Appendix 1, February 2023 Greater Christchurch Housing Development Capacity Assessment). This is out of an assessed plan-enabled capacity (excluding application of all proposed QM’s) of 875,000 (a 24.7% reduction in total capacity), or a reduction from the otherwise-feasible capacity of 142,000 new dwellings by 24%. It’s clear that rather than reserving this density restriction to our most peripheral and/or least-easily connected communities, the proposed Qualifying Matter has been applied extremely broadly, covering parts of the city which have decent if not excellent public transport accessibility, and are otherwise commercially feasible for new growth.</p> <p>It should also be noted, that though CCC’s impact assessment asserts that plan-enabled and feasible capacity is still “surplus” to demand. Housing demand is not fixed, it is responsive to supply – the response function being the price. Therefore, we cannot accept a reduction in so-called “surplus” capacity without also accepting an increase in housing costs – the latter being an outcome inconsistent with the objectives of MDRS and NPS-UD. We shouldn’t be planning for housing ‘sufficiency’, but for housing abundance, otherwise housing costs will be needlessly elevated.</p> <p>To summarise, the Low Public Transport Accessibility Area – as proposed – is arbitrarily defined, does not correctly identify its own spatial extent, mis-characterises the public transport services available to affected areas, is unrelated to public transport provision or accessibility, vastly reduces plan-enabled and feasible housing capacity, and will lead to increased housing costs. It should be either scaled down to only cover those rare few, small areas which are inexplicably both zoned for residential uses and are genuinely lacking access to existing, planned, or practicable PT services, or else should be removed from the proposal altogether, due to the small-scale of benefits this QM would offer to the city and affected residents when restricted to a suitable spatial extent.</p>	
Cameron Matthews/121.19	Andrew McCarthy/ #FS2081.1	Oppose	<p>The Low Public Transport Accessibility Qualifying Matter should be removed from the proposal because its spatial extent is incorrectly identified, including some of the city’s premier public transport routes.</p> <p>SEE IMAGES INCLUDED IN SUBMISSION</p> <p>While I feel this proposed Qualifying Matter shouldn’t have to exist, since we shouldn’t be planning for new residential developments which either do not or are never planned to have reasonable public transport access, I can accept that in some instances – due to, for example unsustainable legacy urban growth patterns – that this may be a necessary restriction.</p> <p>However, as currently planned many specific areas affected by this overlay are not disproportionately lacking accessibility via public transport – many are in fact currently within walkable catchments of one or more of our all-day high-frequency Core Bus Routes. It should be either scaled down to only cover those rare few, small areas which are inexplicably both zoned for residential uses and are genuinely lacking access to existing, planned, or practicable PT services, or else should be removed from the proposal altogether, due to the small-scale of benefits this QM would offer to the city and affected residents when restricted to a suitable spatial extent.</p>	
Tom Logan/ #187.8		Oppose	Remove [the Low Public Transport Accessibility Areas] QM entirely or amend to reduce scope.	
Tom Logan/187.8	Anne Dingwall/ #FS2037.237	Oppose	Remove [the Low Public Transport Accessibility Areas] QM entirely or amend to reduce scope. The Low Public Transport Accessibility Qualifying Matter should be removed from the proposal because the criteria used to identify its spatial extent is arbitrary and prevents strategic growth in areas served by decent and improving PT routes. Should an entire area really be precluded from all future development solely on the basis that it is not currently served by a core public transport route? A lack of public transport access is a manufactured reason to not allow density, as it unnecessarily limits density due to inadequate planning on the part of the regional council. It also ignores different measures of accessibility to amenities, beyond public transport use. Better measures of city-wide accessibility should have been used, rather than the simple model used by the council in their analysis. Given the promotion of active public transport by the council, why was this mode not considered in their analysis of accessibility for the QM?	Oppose

Paul Clark/ #233.5		Oppose	Oppose [Low PublicTransport Accessibility Qualifying Matter]	
Paul Clark/233.5	Anne Dingwall/ #FS2037.322	Oppose	Oppose [Low PublicTransport Accessibility Qualifying Matter] The council plans to restrict housing in some areas of the city because they are poorly serviced by the lack of current high frequency public transport routes. Some areas solely designated with this qualifying matter such as in Casebrook and Styx are close to rail corridors, existing commercial areas and are serviced by low frequency routes. In the future, these areas could see a boost in service by more buses on current routes or introduction of a commuter rail service.	Oppose
Property Council New Zealand/ #242.15		Seek Amendment	Property Council strongly supports density near key transport nodes, especially those that connect larger commercial centres. However, we are concerned that Christchurch City Council is establishing public transport as a qualifying matter in order to reject future MDRS or proposed high-density areas. It is important that there be a co-ordinated approach between the delivery of future transport and housing projects.	
Property Council New Zealand/242.15	Kāinga Ora/ #FS2082.196	Seek Amendment	Property Council strongly supports density near key transport nodes, especially those that connect larger commercial centres. However, we are concerned that Christchurch City Council is establishing public transport as a qualifying matter in order to reject future MDRS or proposed high-density areas. It is important that there be a co-ordinated approach between the delivery of future transport and housing projects. The Council is proposing to limit the extent of where the MDRS would be enabled to near the highest-frequency bus routes and routes that connect larger commercial centres. This Qualifying Matter focuses intensification within and around commercial centres. This is to promote the use of public transport and reduce dependency on the use of private vehicles. The Qualifying Matter would not restrict any current Residential Medium-Density Areas or proposed High-Density Areas.	Support

Sam Holdaway/ #300.3		Seek Amendment	Include Kenwyn Ave in Medium Density [or]...introduce a medium zone between the [Residential Suburban Density] and Medium Density.	
Sam Holdaway/300.3	Kāinga Ora/ #FS2082.238	Seek Amendment	Include Kenwyn Ave in Medium Density [or]...introduce a medium zone between the [Residential Suburban Density] and Medium Density. We live in Kenwyn Ave, St Albans. We want the plan amended to include our street as Medium Residential Zone or introduce a medium zone between the RSD and Medium Density. Our street is currently shown as Suburban Density due to a Qualifying Matter Areas with little or no public transport allow reduced housing density for new developments. To put this into perspective we live 600m away from a main arterial route bus stop. 100m away from a cycle way which leads directly into the City. 4km away from the CBD, 1km away from Northlands mall and 20m away from a reserve. We have a 780m2 section with a perfect opportunity to provide a 2nd and possibly 3rd dwelling. The opportunity to provide a zone between suburban density and medium density seems to have been overlooked. A zone that gives the opportunity to build a 2nd or 3rd 2 story dwelling on a large section under 900m2. Somewhere between 3x 3 story dwellings and no option to develop (Residential Suburban Zone). Michael Campbell/322.1	Kāinga Ora/ #FS2082.273	Seek Amendment	Seeking that the council advise how the designation of Public Transport Accessibility Restriction is decided and how it can be removed as the city grows and outer suburbs need better transport solutions.	Support

			<p>The current designation is too broad and does not take into account the fact that many high-frequency transport routes already operate in and through these areas. Council should not use this to reduce public or active transport investment and initiatives in the affected areas and the submitter strongly pushes back on any move for the council to ignore the public transport needs of the outer suburbs.</p> <p>This <i>[Public Transport Accessibility Restriction]</i> has the potential to designate, the suburbs in question to be forever dependent on the use of private motor vehicle to provide access to, and get around the city. This may dis-encourage future investment in these areas for public and active transport including additional or different bus routes, light rail, cycle ways and walking. It will mean investment in these areas will go to other parts of the city that do not fall under this designation. It will also mean more pollution and more congestion in these areas.</p> <p>If anything outer suburbs should be a priority for council to improve access to public transport, to encourage people out of private vehicles. Outer suburbs do not have the benefit of being within walking distance to the cbd or shops, so council should be looking to improve options for this, not take them away.</p> <p>This will also mean that the council will not be able to adequately fulfil its requirements of net carbon zero. Having recently declared a climate emergency, this is an arbitrary designation, that is a choice based one. Other designations based on natural hazards make sense. However, this one is only in place because the council (or other local authority) has chosen not to invest to make public transport a suitable option for these areas, which affects accessibility. Pressure will be placed on council by residents to not invest in future public transport improvements in these areas for fear of having the designation removed.</p> <p>The submitter is based in the Limes in Parklands, a 10 minute walk to the number 7 bus route. This is one of the most high-frequency bus routes in Christchurch that goes direct to the CBD. Anywhere near this route should not have this designation applied to. Note - the submitter has no interest in developing their land into higher density, however is concerned that the council may decide to pull back or withdraw investment in active or public transport once the designation is in place. I very much want more of this, not less.</p>	
Michael Campbell/ #322.2		Seek Amendment	Seeking a review of the 'Public Transport Accessibility Restriction' to remove any areas within a 10 minute walk to a high frequency bus route or any other bus route that runs to/through the CBD or otherwise across the city and to only be applied in areas where the population numbers do not support public transport investment e.g. Brooklands.

Michael Redepenning/ #374.5		Oppose	[Regarding the Low Public Transport Accessibility Qualifying Matter] seek[s] that the council drop this qualifying matter.	
Michael Redepenning/374.5	Anne Dingwall/ #FS2037.482	Oppose	[Regarding the Low Public Transport Accessibility Qualifying Matter] seek[s] that the council drop this qualifying matter. The council plans to restrict housing in some areas of the city because they are poorly serviced by the lack of current high frequency public transport routes. Some areas solely designated with this qualifying matter such as in Casebrook and Styx are close to rail corridors, existing commercial areas and are serviced by low frequency routes. In the future, these areas could see a boost in service by more buses on current routes or introduction of a commuter rail service. I oppose the Low Public Transport Accessibility Area Qualifying Matter as I believe that the public transport layout and network will need changes to prepare and accommodate future growth. We should not define future growth in Christchurch based on these routes. This would also artificially limit future housing in our city. I seek that the council drop this qualifying matter.	Oppose

Kane Lacey/ #421.1		Seek Amendment	The public transport qualifying matter overlay is removed from the top of Hackthorne Road and surrounding areas that are walking distance to the Hackthorne Road bus stops.	
Kane Lacey/421.1	Kāinga Ora/ #FS2082.307	Seek Amendment	The public transport qualifying matter overlay is removed from the top of Hackthorne Road and surrounding areas that are walking distance to the Hackthorne Road bus stops. The draft planning maps show that the top of Hackthorne Road, Cashmere has a Low Public Transport Qualifying matter overlay. This isn't consistent with the lower half of Hackthorne Road and doesn't make sense when the buses final stop is at the top of Hackthorne Road (At the sign of the Takaha). Therefore, there is no issue with public transport in that area.	Support

Andrew McCarthy/ #681.2		Oppose	Remove QM-Low PT from proposed plan. Remove QM-Low PT from hill suburbs Taylor's Mistake, Scarborough, all hill sites in Sumner, Clifton Hill, Redcliffs, Moncks Spur, Mt Pleasant, St Andrew's Hill, Lyttleton, Heathcote Valley, Hillsborough and Westmorland	
Andrew McCarthy/681.2	Red Spur Ltd/ #FS2068.45	Oppose	Remove QM-Low PT from proposed plan. Remove QM-Low PT from hill suburbs Taylor's Mistake, Scarborough, all hill sites in Sumner, Clifton Hill, Redcliffs, Moncks Spur, Mt Pleasant, St Andrew's Hill, Lyttleton, Heathcote Valley, Hillsborough and Westmorland My main reason for opposing the LPTAQM is that it does not give effect to the intent of the RMAA and NPS UD, especially over most of the hill suburbs. [I]n choosing to zero in on Objective 3(b) Council has deliberately ignored 3(c) which states that district plans must enable more people to live in areas of high demand. Council has not followed due process in establishing the LPTAQM [nor established the necessity or validity of the LPTAQM]. In establishing the LPTAQM, Council has effectively excluded over a third of the residential sites in the city from densification (22585 out of 66355 sites). This is an utterly enormous chunk of the city to be excluded and goes against the intention of the Act that every zone would have the MDRS incorporated. On the hill area of the city, the effects of the LPTAQM are even more marked, with 78%(!) of the lots excluded from densification by the LPTAQM (s6.32.6, s32 Report, Qualifying Matters –Part 3).	Oppose

			The creation of the LPTAQM stems from a clear link in the Council’s mind between intensification and high frequency public transport, i.e., you can’t have intensification unless you have the latter. This linkage is spurious. Other Tier 1 Councils do not seem to have seen fit to create a similar linkage, notably not CCC’s local peers at WDC and SDC.

The number 3 bus route that services Sumner for instance (Sumner being identified as a Low Transport Accessibility Area under PC14) is currently the highest frequency bus service in the city at a 10 minute all day frequency. There are 6 buses per hour going to Sumner and leaving from Sumner every weekday. • Identifying areas as having low public transport accessibility when upgrades have already been planned in those areas appears inconsistent with transport planning. <p>The impression given to the public by the identification of these areas as having low public transport accessibility seems counterproductive to the Greater Christchurch Partnership’s efforts to sell PT Futures improvements, particularly when the bus-based PT Futures improvements are modelled to deliver 106% patronage increase while the walk-out-and-go style MRT proposal only adds an additional 17% on top of that.</p>	Support
Graeme Boddy/ #703.2		Seek Amendment	[Requests] status of Eastern Terrace between the iron bridge adjacent Bowenvale Avenue and the footbridge at Malcolm Street to be changed from being 'Protected by being to far from public transport' to the fuller protection of being 'Part of the Character Area of the Beckenham Loop'	
Girish Ramlugun/ #713.5		Oppose	Oppose the Low Public Transport Accessibility Area Qualifying Matter and seek that the council drop this qualifying matter.	
Girish Ramlugun/713.5	Anne Dingwall/ #FS2037.567	Oppose	Oppose the Low Public Transport Accessibility Area Qualifying Matter and seek that the council drop this qualifying matter. I believe that the public transport layout and network will need changes to prepare and accommodate future growth. We should not define future growth in Christchurch based on these routes. This would also artificially limit future housing in our city.	Oppose

Michael Hall/ #733.6		Oppose	[Regarding the Low Public Transport Accessibility Qualifying Matter] seek[s] that the council drop this qualifying matter.	
Christian Jordan/ #737.6		Oppose	Remove QM- Low PT from plan in all areas.	
Christian Jordan/737.6	Anne Dingwall/ #FS2037.1476	Oppose	Remove QM- Low PT from plan in all areas. there is no justification and it is potentially unlawful to reduce density due to transportaccessibility given that provision of space for private transport mitigates this impact. If this is a valid qualifying matter it defeats the entire purpose of the legislation which is to enableaffordable housing supply, as it grants a council the option to zone the city essentially as per thestatus quo. It is also questionable how recession plane and road setbacks are affected bytransport accessibility. Furthermore the location of these zones is questionable, take the area between Innes Rd, Rutlandand Cranford Sts; and also the area around Autumn Pl on Winters Rd. Both locations areimmediately adjacent to major cycleways, a major arterial and within a very short walk of CranfordSt bus stops. They are also only a short distance to Merivale and Papanui shopping. Thereappears to be little validity in the qualifying matter.	Oppose
Pim Van Duin/ #738.5		Oppose	[Regarding the Low Public Transport Accessibility Qualifying Matter] seek[s] that the council drop this qualifying matter.	

Christchurch City Council/ #751.99		Seek Amendment	Remove LTPPA over sites within 800m from Orbiter bus stops, including where the route is planned to be changed, and change the underlying zoning of the now un-impacted parcels to MRZ. In areas currently zoned Residential Hills, also add the Residential Hills Precinct when changing to MRZ. [Maps 32, 46, 45, 30, 24, 25] [Refer to ATTACHMENT 3 and updated planning maps].	
Christchurch City Council/751.99	Anne Dingwall/ #FS2037.921	Seek Amendment	<p>Remove LTPPA over sites within 800m from Orbiter bus stops, including where the route is planned to be changed, and change the underlying zoning of the now un-impacted parcels to MRZ. In areas currently zoned Residential Hills, also add the Residential Hills Precinct when changing to MRZ. [Maps 32, 46, 45, 30, 24, 25] [Refer to ATTACHMENT 3 and updated planning maps].</p> <p>Council has proposed a qualifying matter for areas with poor accessibility to core bus routes, known as the Low Public Transport Accessibility Area (LPTAA). This includes those distant from the Orbiter bus route, however the LTPPA has only been applied on the notified planning maps over properties within a walking catchment from this bus route. The LPTAA spatial extent has also not been considered where bus routes will be changed (improved) in accordance with the Public Transport Futures investment programme.</p> <p>This change to the spatial extent of the LPTAA affects 2,012 residential parcels which under this submission are proposed to change the underlying zoning from the notified zone to a Medium Residential Density Zone. Of these parcels, 313 have been notified as being within the Residential Hill Zone, 1,673 within the Residential Suburban Zone, 25 within the Residential Suburban Density Transition Zone, and one parcel is within the Residential New Neighbourhood Zone.</p> <p>Based on the operative site densities permitted for each zone, it is estimated that the sum of these parcels would have a plan-enabled capacity of 673 additional residential units. Applying MRZ is estimated to provide a plan-enabled capacity of 8,456 additional units, being a potential 7,783 gain in development capacity. Plan-enabled only represents what is theoretically possible and does not evaluate the commercial feasibility of development or other site-specific constraints.</p>	Support
Christchurch City Council/751.99	Ivan Thomson/ #FS2047.11	Seek Amendment	<p>Remove LTPPA over sites within 800m from Orbiter bus stops, including where the route is planned to be changed, and change the underlying zoning of the now un-impacted parcels to MRZ. In the alternative, the RVA seeks the provision of a retirement village specific regime in the RSZ, that applies the MDRS. The RVA opposes a relevant residential zone not applying the MDRS standards on account of the zone being a “qualifying matter” because of the Low Public Transport Accessibility qualifying matter, which is beyond the scope of the Enabling Housing Act.</p> <p>The RVA also opposes the applicability of the qualifying matter to retirement villages, who, due to age and mobility constraints, do not use public transport in the same manner as other demographics. Suitable sites in residential areas are rare and therefore reductions in the opportunities to use sites for retirement villages will not meet the intensification requirements of the Enabling Housing Act.</p>	Seek Amendment
Carter Group Limited/ #814.243		Oppose	Amend the planning maps in respect of either side of Beachville Road, Redcliffs to remove the Low Public Transport Accessibility overlay.	
Carter Group Limited/814.243	Kāinga Ora/ #FS2082.1073	Oppose	<p>Amend the planning maps in respect of either side of Beachville Road, Redcliffs to remove the Low Public Transport Accessibility overlay.</p> <p>For the reasons expressed in the submission above, the submitter opposes the zoning and overlays applying to the land either side of Beachville Road in Redcliffs (as indicated in the figure included with this submission point). Specifically, the submitter:</p> <p>...</p> <p>e. Opposes the Low Public Transport Accessibility overlay, noting this area has convenient access to public transport connections on Main Road. The submitter generally opposes this overlay, noting that any current deficiencies in accessibility to public transport can be remedied over time to meet demands (e.g. through additional public investment, technological solutions, ride sharing such as Uber Pool, etc) and should not be relied on as a basis to disenable development or intensification.</p>	Seek Amendment

Ministry of Housing and Urban Development/ #859.1		Oppose	That the Low Public Transport Accessibility Qualifying Matter [is] deleted and the appropriate underlying zoning is applied	
Ministry of Housing and Urban Development/859.1	Anne Dingwall/ #FS2037.1218	Oppose	<p>That the Low Public Transport Accessibility Qualifying Matter [is] deleted and the appropriate underlying zoning is applied</p> <p>HUD submits that council's analysis of the LPTAQM is insufficient to meet the legal requirements of [section]77L.</p> <p>This qualifying matter limits the amount of feasible development capacity in Christchurch by 26,400 additional dwellings. The council's approach does not reflect the required legal approach outlined above, rather seeming to start from a position of excluding application of the MDRS first. Furthermore, using a qualifying matter means applying a static approach to a dynamic issue (the availability of public transport). It is realistic that the supply of public transport is likely to change over the duration of a plan, and also more frequently than plan variations can efficiently keep up with.</p> <p>HUD submits that the characteristic that Christchurch City Council (CCC) purports makes the level of development provided by the MDRS inappropriate – distance to public transport – is not one which Parliament considered an inappropriate reason for the MDRS to apply. Unlike policy 3 of the NPS-UD which specifically referred to differing levels of intensification being enabled within walkable catchments of certain features (including rapid transit) compared to outside walkable catchments – the requirement to apply the MDRS intentionally did not contain such a link to any form of transport or other service or amenity. This was a deliberate decision as increased density better supports the financial viability of public transport and the uptake of active transport modes, such as cycling and walking.</p> <p>HUD also submits that the MDRS and NPS-UD are intended to work together to enable development, rather than one restricting the application of the other.</p>	Oppose

Brooke McKenzie/ #183.1		Oppose	Oppose the Low Density Residential Airport Influence Zone and Airport Influence Density Precinct that would reduce housing density.	
Brooke McKenzie/183.1	Christchurch International Airport Limited/ #FS2052.80	Oppose	<p>Oppose the Low Density Residential Airport Influence Zone and Airport Influence Density Precinct that would reduce housing density.</p> <p>The safe TC1 land, cost effectively developed for housing to the east of the city protected currently by (and under expert panel and Ecan Review) the airport contours must be immediately directed for release to cater for the housing desired by many.</p> <p>These unwise decisions made to protect airport contours have cost this city dearly, as development is supportive in other areas of the city. The Halswell land continues to be developed on a flood plateau that is the catchment tributary for the Heathcote and Avon rivers. With climate change and the insanity of the council and minister’s decision will be rewarded with continuous flooding. Still subdivisions get approved into these totally unsuitable areas because there are currently few alternatives.</p> <p>This city needs land for subdivision and it has been widely agreed for 30 plus years that the most suitable TC1 land has been the western fringe out to the airport. There has never been any argument about this fact. The impediment has been protection of the airport and the powers that be persuaded that an outer control boundary (OCB) of 50dbn was the limit for residential and other development. This was determined by a very persuasive airport company and their consultants that development within this band was detrimental to health and may lead to the airport being curfewed. No one wants the airport to be curfewed and the remedy proposed will ensure their protection. However every other airport in New Zealand including Auckland (UNCURFEWED) has accepted the 1992 standard NZ6805 with an OCB of 55dbn.</p> <p>There is currently a review underway by an international expert panel to determine the Air Noise Contours that have protected the airport from encroaching development for many years at 50dbn OCB which is the lowest in the world. ECAN will have most probably received the final REPORT by the time PC14 is heard by Council. This report will only confirm the position of the new contours. However where they fall is not the point. The contours will simply show lines on a map and are only relevant to a decision that ECAN alone will make regarding the OCB Christchurch city will be subject to in the future. Everyone is on the same page when it comes to the fact that the OCB of 50dbn was never reasonable and that to supply the cities future requirements NZ6805 at 55 OCB will be the minimum and sensibly 57dbn inclusive.</p> <p>At the same time we have a fine international airport now under management who appear to be more receptive to change and prepared to adapt. At the same time protection of such an asset is, in my opinion, desirable. In 30 years having a solid wall of houses out to the 55dbn inclusive OCB will then put pressure on to go to 60dbn OCB which even these days is very common around similar airports. The solution is in fact very simple and can be implemented under PC14 and protect both the airport and the city once the development reaches the OCB. The airport needs a buffer zone between higher density housing by creating a SOFT FRINGE of lower density housing made up of 1 acre lots creating a protective band around the airport which will stop long term future conflict. For example a 10 acre block split into 8 sections would have a single water supply and sewage disposal placed strategically to eventually link into the city system when such infrastructure reaches such developments. The fact is that such large land parcels will attract substantial homes and be extremely well treed and landscaped well before more intensive development reaches the boundary. This soft fringe buffer zone should commence at 54 and cease at 57 inclusive. Many landowners on current 10 acre blocks in this SOFT FRINGE will have no intentions of splitting their land thus maintaining desirability of close in lifestyle blocks. There’s one point that’s relevant. We live in a world of noise. Inner city, main city roads, motorways, in our cars and in our houses at much higher NOISE levels than close proximity to our airport. With diversity of development people have a choice and know the advantages and disadvantages pertaining to their decision. That choice is lost if councils elect to restrict variation.</p>	Oppose

			<p>I seek the following decision from the Council: The safe TC1 land commencing at 54 dbn and ceasing at 57dbn inclusive be determined as a low density SOFT FRINGE BUFFER ZONE to future protect the city from intensification infringement and airport from further OCB extension. This SOFT FRINGE to include all suitable land within the Christchurch City boundaries with approval for subdivision into a minimum of 1 acre plots.</p> <p>I further seek a decision from the council that it be recognised that there are many and varied operations that by merit should determine they are suitable within contours inside and outside what is decided the OCB for SOFT FRINGE.</p> <p>I am seeking that Council make changes to a specific site or sites : Approving 1 acre lots 54 to 57dbn to be established on all suitable land within the Christchurch Boundaries.</p>	
Brooke McKenzie/ #183.2		Seek Amendmen t	Land within the 54 dbn and 57 dbn be a 'Soft Fringe Buffer Zone' to with 1 arce lots	
Brooke McKenzie/183.2	Miles Premises Ltd/ #FS2050.33	Seek Amendmen t	<p>Land within the 54 dbn and 57 dbn be a 'Soft Fringe Buffer Zone' to with 1 arce lots</p> <p>The Government has recently instructed new rules for intensification of housing. This in effect is offering one type of development in apartment type buildings. The way Christchurch has fought back and determined such development to certain areas is in my opinion the correct one. We require, and will continue to require, a diverse range of housing types. Small to larger apartments will suit a sector of the homeowner but others with families will continue to want the “quarter acres section” whilst the small holdings of 1-10 acres will always be in demand. That is what diversity means and people must always have a choice to suit their circumstances and desires.</p> <p>The airport needs a buffer zone between higher density housing by creating a SOFT FRINGE of lower density housing made up of 1 acre lots creating a protective band around the airport which will stop long term future conflict. Victor Ong/ #210.2		Seek Amendmen t	Extend Airport Noise Boundary to 60 dba	
Victor Ong/210.2	Miles Premises Ltd/ #FS2050.34	Seek Amendmen t	<p>Extend Airport Noise Boundary to 60 dba</p> <p>We are aware that certain areas around the Christchurch Airport are currently impacted by the Airport Air Noise Boundary, making them unsuitable for residential development according to the current CCC district plan.</p> <p>I would like to propose an extension of the Air Noise Boundary to 60dBA, taking into consideration the following reasons:</p> <ul style="list-style-type: none"> - Both Auckland and Wellington City currently permit the construction of houses within Air Noise Boundaries exceeding 65dBA. This indicates that a slightly lower boundary of 60dBA is reasonable and practical for housing development. Please refer to the attached - Studies have shown that areas with an Air Noise Boundary of 65dBA can still be habitable for residential purposes. Therefore, a lower boundary of 60dBA should be acceptable for residential development without significant adverse effects on the well-being of residents. - The existing Air Noise Boundary drawn by CCC was established several decades ago, when airplane engines were generally noisier. However, modern aircraft now feature more advanced engines that produce considerably less noise. Updating the Air Noise Boundary would reflect this technological advancement and allow for appropriate residential development. - Current housing designs incorporate improved sound insulation, enabling them to better accommodate noise levels. With advancements in construction techniques and materials, houses are now better equipped to mitigate noise disturbances, providing residents with a comfortable living environment even within areas affected by moderate noise levels. 	Seek Amendmen t
Victor Ong/210.2	Christchurch International Airport Limited/ #FS2052.115	Seek Amendmen t	<p>Extend Airport Noise Boundary to 60 dba</p> <p>We are aware that certain areas around the Christchurch Airport are currently impacted by the Airport Air Noise Boundary, making them unsuitable for residential development according to the current CCC district plan.</p>	Oppose

			<p>I would like to propose an extension of the Air Noise Boundary to 60dBA, taking into consideration the following reasons:</p> <ul style="list-style-type: none"> - Both Auckland and Wellington City currently permit the construction of houses within Air Noise Boundaries exceeding 65dBA. This indicates that a slightly lower boundary of 60dBA is reasonable and practical for housing development. Please refer to the attached - Studies have shown that areas with an Air Noise Boundary of 65dBA can still be habitable for residential purposes. Therefore, a lower boundary of 60dBA should be acceptable for residential development without significant adverse effects on the well-being of residents. - The existing Air Noise Boundary drawn by CCC was established several decades ago, when airplane engines were generally noisier. However, modern aircraft now feature more advanced engines that produce considerably less noise. Updating the Air Noise Boundary would reflect this technological advancement and allow for appropriate residential development. - Current housing designs incorporate improved sound insulation, enabling them to better accommodate noise levels. With advancements in construction techniques and materials, houses are now better equipped to mitigate noise disturbances, providing residents with a comfortable living environment even within areas affected by moderate noise levels. 	
Robert Fletcher/ #307.5		Seek Amendment	[Seeks to reduce or remove the number of qualifying matter exceptions added since last year]	
Robert Fletcher/307.5	Christchurch International Airport Limited/ #FS2052.79	Seek Amendment	[Seeks to reduce or remove the number of qualifying matter exceptions added since last year] I am dissatisfied with the number of qualifying matter exceptions added since last year ... as well as an the airport contour zone, which I think has very little impact on the livability of those areas. These don't seem like good and genuine reasons why intensification should be constrained.	Oppose

Karelia Levin/ #479.1		Support	Approve PC14 in respect of the Airport Noise Influence Area.	
Jack Gibbons/ #676.11		Oppose	[Remove QM Airport Noise Influence Area]	
Jack Gibbons/676.11	Christchurch International Airport Limited/ #FS2052.62	Oppose	[Remove QM Airport Noise Influence Area] The airport noise contour thrusts deep into the city covering a considerable amount of urban land. Council is proposing to prevent all zone changes in this area, exempting it from the MDRS / NPS-UD. The area is already urbanized, with plenty of existing residents, and is otherwise indistinguishable from elsewhere in the suburbs. It also covers some areas that should be HRZ. Other councils in New Zealand handle airport noise in areas like this by mandating improved noise insulation in the construction of new buildings, leaving the zoning as it otherwise would be. There is no just explanation why the council has chosen to suppress all construction over this option	Oppose

Andrew Kyle/833.2	Christchurch International Airport Limited/ #FS2052.89	Oppose	<p>That the 50dBA air noise contour be excluded from becoming a Qualifying Matter. 3. Plan change 14 is stated as being designed to bring Christchurch's District Plan in line with government direction that has been given via the National Policy Statement-Urban Development (NPS-UD) and the Resource Management (Enabling Housing Supply and Other Matters) Amendment Act (The Act) to enable more development in the city's urban footprint.</p> <p>4. However, it quickly becomes clear via the raft of new and modified. Qualifying Matters that what is at play in this plan change, is a move to significantly push back against the new national standards.</p> <p>5. While the lawyers, consultants, planners and Others on billable hours will enjoy this farce the question remains: Where will the needed 40,000 new homes be enabled?</p> <p>6. It has been indicated that a very high threshold of evidence is needed in order to establish an issue as a Qualifying Matter. The impact of these matters is to defeat the very intent of the Governmental intensification direction. Therefore, it is not surprising that the evidential threshold should be extremely high. The legal battles over what is and is not deemed to be</p>	Oppose

			<p>a Qualifying matter will, I submit ensure that the needed Intensification will be stalled, significantly.</p> <p>7. The qualifying Matter that I am submitting on is the CIAL Noise residential activity avoidance contour, specifically the 50 dBA Ldn air noise Contour. This noise level equates to a slightly elevated speech. This contour impacts and negates new residential home building on hundreds of acres surrounding the Christchurch International Airport. These contours were required to be re-evaluated every ten years last due 2017 and are currently subject to protracted re-evaluation following Regional Councils requiring CIAL to do so in 2022.</p> <p>9. If the 50dBA air noise contour is permitted to be entrenched as a Qualifying Matter, then the opportunity for residential housing to be enabled on the safest remaining undeveloped land in Christchurch will be lost. Again, where are these 40,000 new homes going?</p>	
Historic Places Canterbury/ #835.5		Support	The submitter supports this qualifying matter.	
Historic Places Canterbury/835.5	Anne Dingwall/ #FS2037.592	Support	<p>The submitter supports this qualifying matter.</p> <p>The submitter strongly supports all the proposed Qualifying Matters, but in particular those matters listed under Matters of National Importance (RMAs.6), including historic heritage; Public Open Space Areas; Residential Heritage Areas and Residential Character Areas; Sunlight Access; Riccarton Bush Interface; and the Otakaro Avon River Corridor.</p> <p>Although their concerns as a group relate primarily to heritage, we consider that many of the other qualifying matters such as the Tsunami Management Areas and Vacuum Sewer Wastewater Constraint and Low Public Transport Accessibility Areas are sensible qualifying matters which will help to protect quite large areas of the city from the random high density developments that will have adverse consequences in the longer term, and will also help to maintain their existing character.</p>	Support

Robert Leonard Broughton/ #851.7		Seek Amendment	[Seek] the properties on the southern side of Rata Street, should, for reason and consistency, all be included in the Airport Noise Influence Zone.	
Robert Leonard Broughton/851.7	Christchurch International Airport Limited/ #FS2052.98	Seek Amendment	[Seek] the properties on the southern side of Rata Street, should, for reason and consistency, all be included in the Airport Noise Influence Zone. Modelling is not an exact process and I fail to understand that, whilst the properties on the north side of Rata Street are in the zone, those on the south side some 20 metres away are not. Often when in my lounge at 25 Rata Street (on the south side of Rata Street) I experience substantial vibration and noise from planes flying low overhead that I have rushed outside to see if there was an issue. I can hear the noise from the testing of engines.	Support
Christchurch International Airport Limited (CIAL) / #852.1		Seek Amendment	Amend the spatial extent of the QM on the planning maps to show the outer extent of the updated remodelled 50dBA Ldn Air Noise Annual Average and Outer Envelope contours dated May 2023, and the operative contour, as illustrated on the Plan attached as Appendix A(i).

Seek Amendment

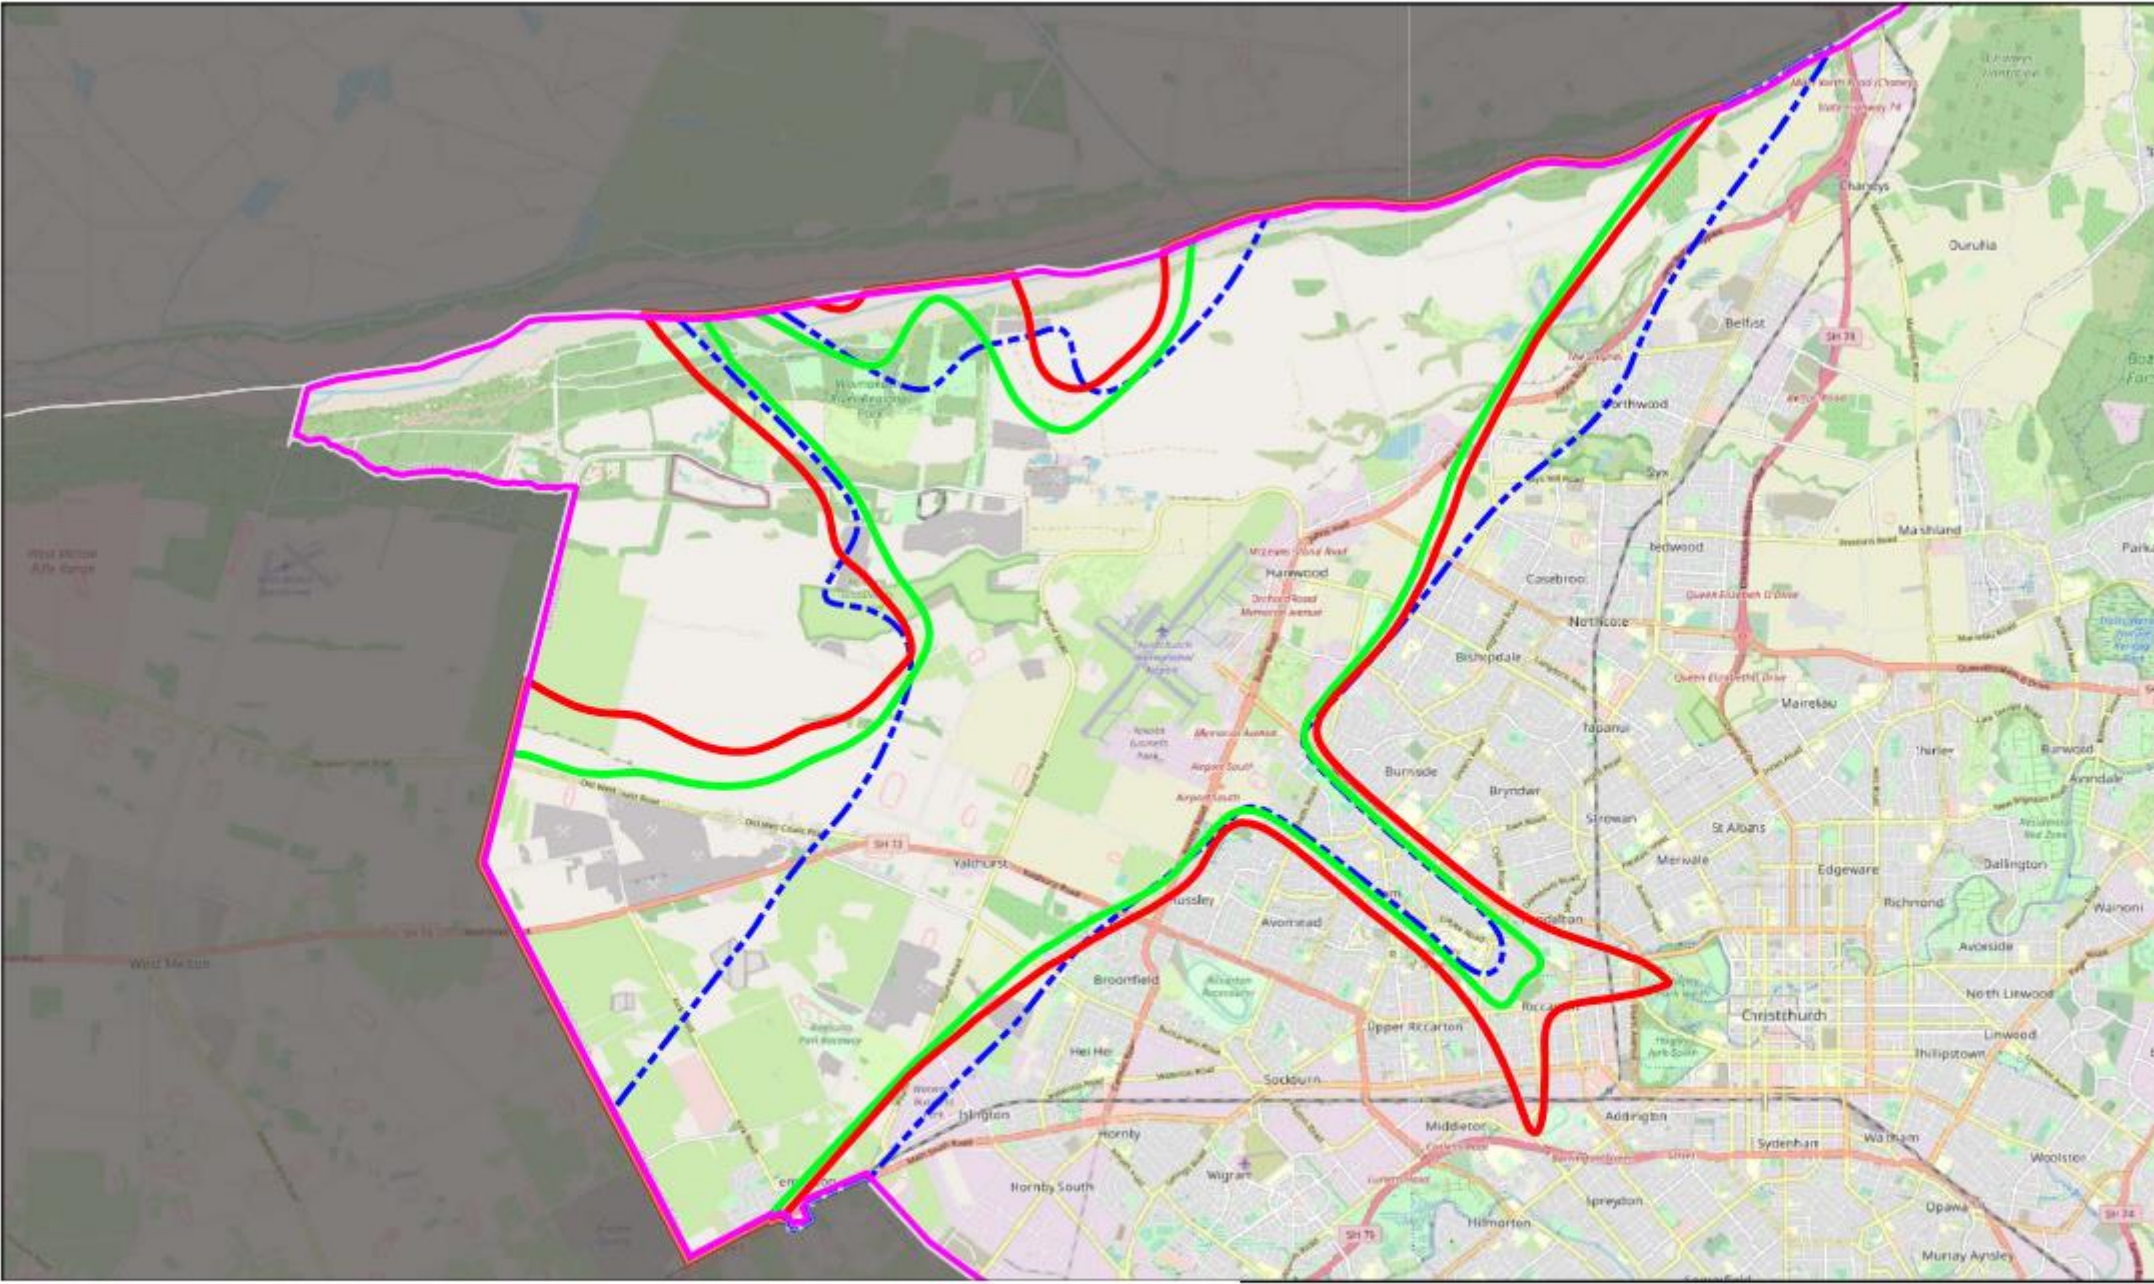

Amend the spatial extent of the QM on the planning maps to show the outer extent of the updated remodelled 50dBA Ldn Air Noise Annual Average and Outer Envelope contours dated May 2023, and the operative contour, as illustrated on the Plan attached as Appendix A(i).

The PC14 planning maps show the spatial extent of the 50dBA Ldn Air Noise Annual Average contour as it existed in February 2022.

Since that time, the final remodelling has been completed and the May 2023 Annual Average and the Outer Envelope contours are different to those from February 2022.

Given this, the spatial extent of the QM as shown on the planning maps requires amendment to cover all areas where sensitive activities may be subject to noise levels of 50dBA Ldn or greater. This, together with the retention of the existing relevant Plan rules, will ensure appropriate amenity outcomes for sensitive activities beneath the contour and to ensure the effective and efficient operation of Christchurch Airport.

Planning Maps > QM - Any Coastal Hazard

Submission Number	Further Submission No	Position	Decision Requested	FS Position
Heather Woods/ #107.28		Seek Amendment	Amend the zoning of 157 to 193 Wainoni Road (and further afield), to “Medium Density Residential Zone” because the Qualifying Matter of “Tsunami Management Area” only applies to a small part of the properties, and is less of a risk than places like Marine Parade that are “Medium Density Residential Zone” with the Qualifying Matter of “Tsunami Management Area” applying to the whole property.	
Heather Woods/ #107.32		Seek Amendment	Amend zoning for the Residential Suburban portion of Keyes Road, to “Medium Density Residential Zone” because the Qualifying Matter of “Tsunami Management Area” is not sufficient risk by itself as it is less of a risk than places like Marine Parade and 286 to 388 Keyes Road that are “Medium Density Residential Zone” with the Qualifying Matter of “Tsunami Management Area” and also “Coastal Hazard Medium Risk Management Area” applying to the whole property.	

Te Mana Ora/Community and Public Health/ #145.3		Support	Te Mana Ora supports the proposed Qualifying Matters related to high-risk natural hazards, including coastal inundation, coastal erosion and tsunami hazard.	
Te Mana Ora/Community and Public Health/145.3	Anne Dingwall/ #FS2037.204	Support	<p>Te Mana Ora supports the proposed Qualifying Matters related to high-risk natural hazards, including coastal inundation, coastal erosion and tsunami hazard.</p> <p>Te Mana Ora supports increasing the density of housing and creating more compact urban environments, to meet the needs of the growing population in Ōtautahi Christchurch. As highlighted within the Housing and Business Choice and Heritage Consultation Document, 40,000 more houses will be needed to meet demand in the next 30 years. The growing need for housing, alongside the risks and impacts of climate change need to be carefully considered.</p> <p>The National Adaptation Plan 2022 noted that there is increasing risk to housing from extreme weather events, drought, increased fire weather and sea-level rise (Ministry for the Environment. 2022. Aotearoa New Zealand's first national adaptation plan. Wellington. Ministry for the Environment). Climate change is already severely impacting communities in Aotearoa New Zealand as highlighted by recent events, including the damage caused by flooding in Auckland and by Cyclone Gabrielle in Hawke's Bay and Gisborne.</p> <p>Damaged housing and displacement caused by extreme weather events and climate change will impact the existing housing supply, resulting in increased demand and impacting affordability. In Aotearoa New Zealand, about 675,000 people live in flood prone areas and 72,000 people live in areas at risk of storm surges (Ministry for the Environment. 2022. Aotearoa New Zealand's first national adaptation plan. Wellington. Ministry for the Environment). These numbers will only increase as extreme weather events increase and sea-levels rise, putting additional pressure on housing.</p> <p>Building housing in areas that are at risk of flooding and sea level rise will only compound issues of housing availability and affordability. Therefore, limiting density in high-risk areas and increasing housing density in areas of Ōtautahi Christchurch that are less exposed to climate risks will increase our resilience to climate change and support our housing needs as we experience more extreme weather and greater impacts from climate change around Aotearoa New Zealand.</p>	Support
Te Mana Ora/Community and Public Health/145.3	Toka Tū Ake EQC ./ #FS2075.28	Support	<p>Te Mana Ora supports the proposed Qualifying Matters related to high-risk natural hazards, including coastal inundation, coastal erosion and tsunami hazard.</p> <p>Te Mana Ora supports increasing the density of housing and creating more compact urban environments, to meet the needs of the growing population in Ōtautahi Christchurch. Winstone Wallboards Limited (WWB)/ #175.5		Seek Amendment	Further assessment required on the Tsunami Management Overlay mapping.	
Steve Smith/ #197.3		Oppose	[Remove Tsunami Management Area]	
Winstone Wallboards Limited (WWB) / #369.1		Seek Amendment	[That] Further assessment of the extent [of the Qualifying Matter Tsunami Management Area] is undertaken	
South Shore Resident's Association (SSRA) / #380.3		Seek Amendment	[That a more likely scenario than] representative concentration pathway 8.5 (RCP 8.5 and its 83rd percentile derivative RCP 8.5H+) [is used] to predict coastal hazard lines.	

South Shore Resident's Association (SSRA) /380.3	Toka Tū Ake EQC ./ #FS2075.11	Seek Amendment	[That a more likely scenario than] representative concentration pathway 8.5 (RCP 8.5 and its 83rd percentile derivative RCP 8.5H+) [is used] to predict coastal hazard lines. SSRA are concerned about the information and data being used for the mapping of the areas that will be informed by PC14 coastal hazards QM. SSRA have observed much chater in both scientific and parliamentary realms regarding the use of the unlikely scenario of RCP8.5. SSRA understands that the coastal mapping uses the representative concentration pathway 8.5 (RCP 8.5 and its 83rd percentile derivative RCP 8.5H+) to predict coastal hazard lines. We have reservations on this because this pathway is now described as 'not a likely' or a 'plausible scenario' by the latest IPCC report (AR6). Given that the NZCPS (2010) Policy 24 states "giving priority to the identification of areas at high risk of being affected" and "taking into account national guidance and the best available information on the likely effects of climate change on the region or district. SSRA wonder if the CCC use of 8.5 and the resulting mapping of the coastal areas with this 'unlikely' or 'plausible' scenario-IPCC report (AR6) pathway is problematic, overly cautious and does not reflect the "likely effects" given indicated in the NZCPS. The result is it may stifle community growth in areas that are unlikely to be affected for a long period of time.	Oppose
South Shore Resident's Association (SSRA) / #380.4		Seek Amendment	[That the Coastal Hazards Qualifying Matters] only apply to residential zoned land, [not rural or other zones that are not subject to Plan Change 14].	
South Shore Resident's Association (SSRA) /380.4	Toka Tū Ake EQC ./ #FS2075.12	Seek Amendment	[That the Coastal Hazards Qualifying Matters] only apply to residential zoned land, [not rural or other zones that are not subject to Plan Change 14]. conscious that the coastal hazards objectives and policies apply to all zones, whereas qualifying matters should only apply to existing residential zoned land & perhaps some other "urban" zones where residential development is contemplated. The risk it seems is that people in rural zones may be affected by the coastal hazards provisions but may be entirely unaware of this possibility.	Oppose
South Shore Resident's Association (SSRA) / #380.10		Oppose	[Delete Qualifying Matter Tsunami Management Area]	
South Shore Resident's Association (SSRA) /380.10	Toka Tū Ake EQC ./ #FS2075.15	Oppose	[Delete Qualifying Matter Tsunami Management Area] It is our view that the CCC is overreaching in its risk management of coastal areas in relation to tsunami planning restrictions. Tsunami risk is a rare and unlikely event and, if it occurs, large South American events have been shown to have ample warning timeframes. We question if other hazards such as fire risk or surface flooding (increased risk due to climate change), both of which have occurred, will be subjected to similar restrictions. We believe it is sufficient to provide residents with warning systems. Ensure that residents have appropriate routes to either vertically or horizontally evacuate, and let residents self-manage the risk. We don't believe it is appropriate to manage this through the District Plan.	Oppose
Fay Brorens/ #644.1		Support	[Retain] precautions around Natural Hazards including, flooding, liquefaction and sea level rise.	
KI Commercial Limited/ #694.2		Seek Amendment	Amend the planning maps to rezone the entirety of the site at 51 Heberden Avenue (as shown in Figure 1 above) residential (either Residential Hills or Medium Density Residential) and the removal of all qualifying matters.	
Christian Jordan/ #737.7		Seek Amendment	Remove Tsunami Management Area.	
Christian Jordan/737.7	Anne Dingwall/ #FS2037.1477	Seek Amendment	Remove Tsunami Management Area. I acknowledge that there is a small risk of damaging Tsunami, however plans to mitigate the risks should be made and areas where homes can either be elevated or there is an easy escape path should not be put in no development zones. Given the existing communities in the area and the need for the area to not fall into decay, a more in-depth analysis and long term plan needs made, especially when many of the proposed medium density areas have their own issues with local flooding which are not addressed by any qualifying matters (such as around Papanui and Fendalton streams).	Oppose
Carmel Woods/ #792.10		Oppose	Oppose the Tsunami Management Area QM from 157 to 193 Wainoni Road, and the surrounding area.	
Carmel Woods/ #792.16		Oppose	Oppose the Tsunami Management Area QM for Keyes Road.	
Carter Group Limited/ #814.244		Oppose	Amend the planning maps in respect of either side of Beachville Road, Redcliffs to remove the Coastal Hazard Medium and High Risk Management Area, and High Floodplain Hazard Management Area, and Tsunami Management Area overlays.	
Carter Group Limited/814.244	Kāinga Ora/ #FS2082.1074	Oppose	Amend the planning maps in respect of either side of Beachville Road, Redcliffs to remove the Coastal Hazard Medium and High Risk Management Area, and High Floodplain Hazard Management Area, and Tsunami Management Area overlays. For the reasons expressed in the submission above, the submitter opposes the zoning and overlays applying to the land either side of Beachville Road in Redcliffs (as indicated in the figure included with this submission point). Specifically, the submitter: Opposes the Coastal Hazard Medium and High Risk Management Area, High Floodplain Hazard Management Area and Tsunami Management Area Overlays and Qualifying Matters, generally, and specifically for the land identified. The submitter considers that these overlays and QMs are overly and	Seek Amendment

			<p>unreasonably conservative and they inappropriately preclude or constrain development capacity and intensification that can incorporate measures to avoid or manage natural hazards (minimum floor levels, building resilience measures, etc).</p> 	
Historic Places Canterbury/ #835.4		Support	The submitter supports this qualifying matter.	
Historic Places Canterbury/835.4	Anne Dingwall/ #FS2037.591	Support	<p>The submitter supports this qualifying matter.</p> <p>The submitter strongly supports all the proposed Qualifying Matters, but in particular those matters listed under Matters of National Importance (RMAs.6), including historic heritage; Public Open Space Areas; Residential Heritage Areas and Residential Character Areas; Sunlight Access; Riccarton Bush Interface; and the Otakaro Avon River Corridor.</p> <p>Although their concerns as a group relate primarily to heritage, we consider that many of the other qualifying matters such as the Tsunami Management Areas and Vacuum Sewer Wastewater Constraint and Low Public Transport Accessibility Areas are sensible qualifying matters which will help to protect quite large areas of the city from the random high density developments that will have adverse consequences in the longer term, and will also help to maintain their existing character.</p>	Support
Historic Places Canterbury/835.4	Anne Dingwall/ #FS2037.689	Support	<p>The submitter supports this qualifying matter.</p> <p>The submitter strongly supports all the proposed Qualifying Matters, but in particular those matters listed under Matters of National Importance (RMAs.6), including historic heritage; Public Open Space Areas; Residential Heritage Areas and Residential Character Areas; Sunlight Access; Riccarton Bush Interface; and the Otakaro Avon River Corridor.</p> <p>Although their concerns as a group relate primarily to heritage, we consider that many of the other qualifying matters such as the Tsunami Management Areas and Vacuum Sewer Wastewater Constraint and Low Public Transport Accessibility Areas are sensible qualifying matters which will help to protect quite large areas of the city from the random high density developments that will have adverse consequences in the longer term, and will also help to maintain their existing character.</p>	Support
Lyttelton Port Company Limited/ #853.17		Oppose	Remove Tsunami Management Area qualifying matter from LPC's City Depot site in Hillsborough.	
Ebin Scaria Jose/ #1034.1		Oppose	Oppose the application of QM Tsunami Management area on 20 Holland Street, Avonside.	

Planning Maps > QM - Any Heritage Layer

Te Mana Ora/Community and Public Health/145.18	Anne Dingwall/ #FS2037.209	Support	Te Mana Ora supports the protection of Residential Heritage Areas and recognises the need to balance housing development with protecting areas of cultural heritage and identity. Te Mana Ora supports the protection of Residential Heritage Areas and recognises the need to balance housing development with protecting areas of cultural heritage and identity. Engagement with cultural heritage promotes community wellbeing, and these shared spaces support community belonging and identity (Taçon, P. S., & Baker, S. (2019). New and emerging challenges to heritage and well-being: A critical review. <i>Heritage</i> , 2(2), 1300-1315).	Support
Ceres New Zealand, LLC/ #150.29		Oppose	Remove the Central City Heritage Qualifying Matter and Precinct applied to 25 Peterborough Street and 87-93 Victoria Street and update the planning maps accordingly.	
Ceres New Zealand, LLC/150.29	Christian Jordan/ #FS2093.7	Oppose	Remove the Central City Heritage Qualifying Matter and Precinct applied to 25 Peterborough Street and 87-93 Victoria Street and update the planning maps accordingly. An appropriate maximum height of any building on 25 Peterborough Street and 87-93 Victoria Street would be 90m to enable an economical redevelopment of both properties and restoration of the heritage buildings therein.	Oppose
Logan Brunner/ #191.2		Oppose	[That proposed Residential Heritage Areas are removed]	
Logan Brunner/191.2	Anne Dingwall/ #FS2037.265	Oppose	[That proposed Residential Heritage Areas are removed] We oppose all changes to heritage areas. The PC13 changes represent a considerable expansion in number and area heritage precincts. These heavily restrict people from building more housing and are often located in parts of the city with the best street grids for livable intensification. The council claims that the number of properties is low, but this is concealing the large lots and large land area these areas consume, and proximity to amenities. The council should consider keeping the amount of heritage area fixed, adding more if they please, but removing other areas deemed to be of the lowest value. Heritage or character value should not be used as a reason to protect housing that is not up to standard. These designations are often removed from the reality of the value that these houses actually provide to their residents. The aesthetic value of these houses should not trump the need of residents to live in comfortable, safe, and healthy homes. What is the point of housing if not to provide those qualities?	Oppose

Emma Wheeler/ #206.1		Seek Amendment	[New Residential Heritage Area] Make both St James Avenue and Windermere Road category 1 Streets, protecting both the plaques, trees and the people the already enjoy and use these streets. Removing both streets from the intensification plan.	
Emma Wheeler/206.1	Anne Dingwall/ #FS2037.298	Seek Amendment	[New Residential Heritage Area] Make both St James Avenue and Windermere Road category 1 Streets, protecting both the plaques, trees and the people the already enjoy and use these streets. Removing both streets from the intensification plan. We support the protection of the war memorial streets. New Zealand men and women sacrificed their lives to defend Aotearoa. Freedom and stability in this region are a luxury Kiwis have enjoyed for some time, but let's not kid ourselves, it has come at a cost which cannot be measured and certainly should not be forgotten. It would be all too easy to rezone our war memorial streets to suit the current fashion of urban intensification, this we understand, but in the rush to reinvent the wheel should we pause and genuinely reflect the price of freedom we have today? Respect for the fallen should not be taken lightly nor be politicised. These are war memorial streets which belong to proud Cantabrian's who remember. Lest we forget.	Support
Michael Dore/ #225.5		Seek Amendment	The History, Character and Heritage of our City of Christchurch should be protected at all costs	
Michael Dore/225.5	Anne Dingwall/ #FS2037.316	Seek Amendment	The History, Character and Heritage of our City of Christchurch should be protected at all costs If we allow the government to adopt their one size fits all greater intensification strategy we will have let down our future generations. It seems the easiest option to adopt and most importantly fails to consider and respect the lives and the health of the people and the investment they have made who already live in the areas most affected. The heavy-handed approach is like hitting a tack with a sledgehammer.	Support
Michael Dore/225.5	Heritage New Zealand Pouhere Taonga/ #FS2051.118	Seek Amendment	The History, Character and Heritage of our City of Christchurch should be protected at all costs If we allow the government to adopt their one size fits all greater intensification strategy we will have let down our future generations. Helen Broughton/ #886.2		Seek Amendment	Supports the Riccarton Bush Interface Area as a qualifying matter, but considers a greater area should be included.	
Helen Broughton/886.2	Christchurch International Airport Limited/ #FS2052.272	Seek Amendment	Supports the Riccarton Bush Interface Area as a qualifying matter, but considers a greater area should be included. I support Riccarton House and Bush being a qualifying matter, but consider a greater area needs to be included for the following reasons:. 1 The WSP report commissioned by the Council mapped out a larger area. The south side of Rata street between Rata and Rimu Street was included as was Kahu Road opposite the entrance to Riccarton House. It was a council planning decision to make this area medium density with a height limit of two storeys. This is a compromise, but I advocate strongly that this area remain suburban density. There is no clear reason to set aside the WSP mapping. 2 Recognition needs to be given to the Kauri Cluster which could be included within the qualifying matter of Riccarton House and Bush. In 2007/2008 the area was turned into a precinct by narrowing of carriageway ,grass berms widened, street thresholds introduced or upgraded ,native trees planted in accordance with the street names- Rata trees for Rata Street, Rimu trees for Rimu street etc 3 Medium density will mean that there will only be a 1.5 metre separation between the fenceline and a house - taking away the current front gardens and the likely removal of roadside reserve trees as the developer has the ability to determine where a driveway is placed. If roadside reserve trees need to come down ,Council cannot stop their removal but can insist on replacement trees- usually young saplings. 4 Riccarton House and Bush/ Putaringamotu is a unique NZ heritage site that we have probably taken for granted. Riccarton Bush is of national significance and Riccarton House and Cottage are defined as Highly Significant..Maori were in the area before the arrival of the Deans family.The appropriate surrounding environment for such a significant heritage site is suburban density.. WSP have provided drawings of medium density and high density zoning which demonstrate how the environs and this significant heritage site could be undermined. The significance of this site will only increase in future years and it is imperative Council does not impose higher buildings around this site. 5 There is a larger area around Riccarton House and Bush that the Riccarton Bush /Kilmarnock Residents' Association requests retain suburban density. I fully support this submission	Support

Danne Mora Limited/ #903.46		Seek Amendment	Remove/amend heritage setting unless the listing is approved under PC13	
Kerstin Rupp/ #1001.2		Seek Amendment	Seeks that all of Chester Street East is included in the Residential Heritage Area.	
Keith and Helen Paterson and Verity/ #1002.3		Seek Amendment	Amend the planning maps to include the section of Kilmore St west of Dawson St to Barbadoes St to be included in the Chester St/ Dawson Lane Residential Heritage Area.	
Kate Askew/ #1005.2		Support	Supports the inclusion of Heritage Areas's including HA11 Shelley Forbes Street.	
Ian Shaw/ #1007.1		Seek Amendment	<p>The submitter seeks that the following areas be added to the Chester St heritage area:</p> <p>1. The area East of Dorset Street to Fitzgerald Avenue.</p>	

			2. The properties located on Kilmore Street that abound the heritage area of Chester Street East, eg., the Northboundaries of 129, 131 and 133 Chester Street	
Mark Winter/ #1008.1		Seek Amendment	Retain a heritage and character status for Beverley Street.	
Richard Abey-Nesbit/ #1009.1		Support	The submitter supports limitation of heritage areas.	
Robert Forsyth/ #1010.1		Seek Amendment	The submitter requests that Beverley Street retain its heritage zoning.	
John Hardie/ #1012.1		Oppose	The submitter opposes the inclusion of 47 Rue Balguerie under Qualifying Matters.	
Simon and Judith Adamson and Hudson/ #1013.2		Seek Amendment	The submitter requests that Chester St East is included in the Chester Street Residential Heritage Area.	
Susan Parle/ #1014.3		Seek Amendment	The submitter requests that Chester St East is included in the Chester St Residential Heritage Area.	
Mary Crowe/ #1015.2		Seek Amendment	The submitter requests that the entirety of Chester Street East is included in the Residential Heritage Area.	
Waipapa Papanui-Innes-Central Community Board/ #1016.1		Seek Amendment	The entire area or whole street from Chester Street East to Fitzgerald Ave be included in the Residential Heritage Area.	
Jayne Smith/ #1017.4		Support	The submitter supports Residential Heritage Areas but has some concerns regarding the ability to make alterations to the exterior of their property for sustainability and other reasons.	
Julie Florkowski/ #1019.2		Support	Supports the Residential Heritage Areas.	
Julie Florkowski/1019.2	Heritage New Zealand Pouhere Taonga/ #FS2051.121	Support	<p>Supports the Residential Heritage Areas.</p> <p>Residential Heritage Areas of Otautahi, Christchurch, deserve special protection as part of their unique contributing identity to this city.</p> <p>We note that the 16 Papanui War Memorial Avenues including Alpha Avenue have been accorded 'highly significant' status; elevating their recognised status as a memorial street, the title originally being granted in 1947. The streets, plaques and trees contribute to the unique identity of this part of Papanui. They help to preserve the cultural and spiritual heritage of not just the past but also of the current local community. As long term (31+ years) residents of Alpha Avenue, I contend that stringent efforts should be made to preserve the heritage of the memorial avenues. I have strictly observed this during any renovations that we have undertaken over the duration of my tenure, careful to conserve the original character of our home. Densification would undermine the heritage and aesthetic values of these distinctive areas.</p> <p>I strongly support any initiative that protects the recognised Residential Heritage Areas of Otautahi, Christchurch.</p>	Support
Chris Florkowski/ #1020.3		Support	Support the Qualifying Matter - Residential Heritage Areas	
Chris Florkowski/1020.3	Heritage New Zealand Pouhere Taonga/ #FS2051.122	Support	<p>Support the Qualifying Matter - Residential Heritage Areas</p> <p>Residential Heritage Areas of Otautahi, Christchurch, deserve special protection as part of their unique contributing identity to this city.</p> <p>We note that the 16 Papanui War Memorial Avenues including Alpha Avenue have been accorded 'highly significant' status; elevating their recognised status as a memorial street, the title originally being granted in 1947. Bosco Peters/ #1022.1		Seek Amendment	That Council recognises the whole of Chester Street East as having special heritage character.	
Marius and Roanna Purcaru/ #1024.3		Seek Amendment	That the special heritage and character of Chester Street East include the whole of Chester Street East [that the whole of Chester Street East is included as a Residential Heritage Area].	
Kristin Mokes/ #1025.1		Oppose	Please reconsider adding so many more heritage sites - especially [in the] suburbs	
Maxine Webb/ #1026.1		Support	The submitter supports the heritage areas as a qualifying matter and is of the view that they should have a wider extent to protect the character of Christchurch.	

Maxine Webb/1026.1	Heritage New Zealand Pouhere Taonga/ #FS2051.123	Support	<p>The submitter supports the heritage areas as a qualifying matter and is of the view that they should have a wider extent to protect the character of Christchurch.</p> <p>The submitter is concerned by the systematic loss of the character of central Christchurch to medium and high density housing development for the following reasons:</p> <ul style="list-style-type: none"> - Low amenity value - Low aesthetic value - No parking - Not accessible - No space for bins - Low quality of life for residents - Dumping of unwanted furniture. <p>The submitter believes it is important to preserve what the city has left and to try and save as much of the city's heritage as possible. Christchurch was already being redeveloped before the imposition of these high density rulings and as such they have very much missed the mark for the city.</p>	Support
Daniel John Rutherford/ #1027.2		Seek Amendment	The submitter requests that 20 and 20b MacMillan Avenue are excluded from the MacMillan Ave Residential Heritage Area.	
Paul Mollard/ #1030.1		Oppose	Remove any reference to residential heritage areas and make those areas subject to the same development rules as the rest of the city.	
Sam Spekreijse/ #1033.1		Oppose	Oppose all heritage overlays.	
Sam Spekreijse/1033.1	Heritage New Zealand Pouhere Taonga/ #FS2051.115	Oppose	Oppose all heritage overlays. These whole areas are not significant enough to be given effective indefinite exemption to intensification, especially with the buffer zone requirements as planned. Listing specific buildings is sufficient to retain the vast majority of the cultural value.	Oppose
Ben Hay-Smith/ #1035.1		Oppose	Oppose heritage overlay to 9 Ford Road, Opawa, 129 High Street, Christchurch, 159 Manchester Street, Christchurch, 35 Rata Street, Riccarton and the 25 baches at Taylor's Mistake.	
justin avi/ #1037.1		Oppose	Remove Antonio Hall (265 Riccarton Road) from the heritage list.	
Peter Earl/ #1038.1		Oppose	The submitter opposes all heritage areas in Plan Change 14 and requests Council stay in line with the government's policy direction for intensification.	
Peter Earl/1038.1	Heritage New Zealand Pouhere Taonga/ #FS2051.116	Oppose	<p>The submitter opposes all heritage areas in Plan Change 14 and requests Council stay in line with the government's policy direction for intensification.</p> <p>The submitter opposes all heritage areas in Plan Change 14. The submitter believes that if these buildings were truly valuable then the free market would retain them. By forcing their maintenance and existence on their owners the Council prevents the growth and development of the city where more valuable uses of the land might be implemented, such as additional housing.</p> <p>The submitter does not want to see more old buildings falling to bits and asbestos in the city while they struggle to pay rent due to a lack of housing supply.</p>	Oppose
Neil McNulty/ #1040.1		Oppose	Oppose the Residential Heritage Area as it applies to Forbes Street, Sydenham.	
Ruth Morrison/ #1041.2		Seek Amendment	Keep the area around Paparoa St, Dormer St, Rayburn Ave and Perry St as heritage area	
Cameron Parsonson/ #1043.1		Seek Amendment	Remove 471 ferry road from the schedule of designated heritage buildings.	
Cameron Parsonson/1043.1	Chris Smith/ #FS2025.1	Seek Amendment	<p>Remove 471 ferry road from the schedule of designated heritage buildings.</p> <p>I make application to remove 471 ferry road from the schedule of designated heritage buildings for the following reasons:</p> <p>Original method of construction means that it is not possible to economically disassemble and rebuild the structure.</p>	Support

			<p>Engineering a rebuild of this stacked rubble-stone building would be expensive and require near full disassembly of the structure in order to rebuild it, putting it beyond feasibility.</p> <p>There is little community interest in the asset being restored. Its construction material is its most novel endearing feature, but if restored would offer little economic or commercial interest to the owner or the community.</p> <p>Any rebuild would likely require significant local government heritage grants if it was to be pursued.</p> <p>The building is landlocked; access is via an easement over another property from the rear and new traffic islands and the pedestrian crossing configuration mean that it's Ferry road frontage is unusable.</p>	
Cameron Matthews/ #1048.29		Seek Amendment	Remove all Residential Heritage Areas from the plan.	
Cameron Matthews/1048.29	Heritage New Zealand Pouhere Taonga/ #FS2051.117	Seek Amendment	Remove all Residential Heritage Areas from the plan. I oppose the proposed Residential Heritage Areas. I think they shouldn't be Qualifying Matters and should all be removed from the plan.	Oppose
Cameron Matthews/ #1048.31		Seek Amendment	Remove all Residential Heritage Areas from the plan, particularly [the] Lyttleton [Residential Heritage Area].	
Cameron Matthews/ #1048.32		Seek Amendment	Remove all Residential Heritage Areas from the plan, particularly [the] Piko/Shand [Residential Heritage Area].	
Cameron Matthews/ #1048.33		Seek Amendment	Remove all Residential Heritage Areas from the plan, particularly [the] Inner City West [Residential Heritage Area].	
Oxford Terrace Baptist Church/ #1052.3		Seek Amendment	Seek that the whole of Chester Street East be included in the Residential Heritage Area.	
Jono De Wit/ #1053.1		Oppose	Oppose the Piko Crescent Residential Heritage Area.	
The Canterbury Jockey Club/ #1059.1		Support	Retain the deletion of Heritage Setting 183 from the Heritage Items and Settings Aerial Maps and Natural and Cultural Heritage Planning Map 30C as notified.	
The Canterbury Jockey Club/ #1059.2		Seek Amendment	Amend Heritage Setting 684 as shown on the Heritage Items and Settings Aerial Maps and Natural and Cultural Heritage Planning Map 30C.	
Elizabeth Harris/ #1061.4		Support	The submitter seeks that the Inner City West Residential Heritage Area overlay is removed from 31 Cashel Street and other properties on Cashel Street.	
Marie Byrne/ #1063.2		Seek Amendment	Include existing Medium Density Residential area in Phillipstown Cashel Street to Ferry Road, Bordesley Street to Nursery Road to a Qualifying matter - heritage area.	
Richard and Suzanne Peebles/ #1072.1		Seek Amendment	Reduce the spatial extent of the heritagesetting 423 (for heritage item 209 at 27Glandovey Road) so as to exclude 7 and 9Thornycroft Street.	
Diana Shand/ #1075.1		Seek Amendment	Supports the Inner West Residential Heritage Area and seeks that Cranmer Square be included in the Inner City West Residential Heritage Area.	
Diana Shand/1075.1	Anne Dingwall/ #FS2037.668	Seek Amendment	Supports the Inner West Residential Heritage Area and seeks that Cranmer Square be included in the Inner City West Residential Heritage Area. This is not only for people that live in the area, but for all the city. The heritage and character of domestic architecture, the established trees, the public and private gardens, the sunlight, the heritage buildings and the older architecture in both institutions and domestic homes, gives us our colonial development history with a concentration of architectural, cultural and social history that not only attracts tourism, but brings and retains people in our community. This central "cultural quarter" gives a sense of pride and place well beyond the residents. I support Plan Change 13 measures that recognise of importance of residential heritage and character, and support the all Residential Heritage Areas that are proposed, indeed would further strength them. I would continue to ask that Cranmer Square be included in the Inner City West Residential Heritage area .	Support
Waihoru Spreydon-Cashmere-Heathcote Community Board / #1077.1		Support	Supports the addition of the MacMillan Avenue and Shelley/Forbes Street Residential Heritage Areas.

Martin Jones/ #15.6		Seek Amendment	Introduce a new Residential Character Area over Cashmere View Street.	
Patricia Dench/ #19.3		Seek Amendment	Fairview Street should be within a Residential Character Area.	
Les Drury/ #20.3		Seek Amendment	1/19 Fairview Street should be within a Residential Character Area.	
Christine Parkes/ #25.2		Seek Amendment	That the area of Cashmere View St, Fairview St and nearby Ashgrove Tce be [included in] a [residential] character area.	
Steve Parkes/ #27.2		Seek Amendment	That the area of Cashmere View St be identified as a suburban [residential] character area.	
Joanne Knudsen/ #33.3		Support	Support the identification of Bewdley Street and Evesham Crescent within the Residential Evesham/Bewdley Character Area.	
Joanne Knudsen/ #33.4		Support	Support the identification of Roker Street as in the Residential Roker Character Area.	
Joanne Knudsen/ #33.5		Support	Support the identification of Ryan Street as within the Residential Ryan Character Area.	
Keith Shaw/ #35.1		Support	Retain 23 Birdwood Avenue in a Residential Character Area.	
Sharina Van Landuyt/ #41.4		Support	Support[s] the proposal to include Ryan Street within a Residential Character Area.	
Thomas Calder/ #62.1		Seek Amendment	Include Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) as a Residential Character Overlay Area.	
Melissa and Scott Alman/ #86.1		Seek Amendment	Identify Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) as a Residential Character Area	
Melissa and Scott Alman/86.1	Anne Dingwall/ #FS2037.158	Seek Amendment	<p>Identify Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) as a Residential Character Area</p> <p>Area has been previously identified as a special amenity area (SAM8).</p> <p>It has retained a sense of character and coherence that, we consider, is somewhat unique. It has a relationship to the Avon River and to the parklands beyond, which are part of, and provide a link to the rest of, Hagley Park. It has remained an enclave of relatively spacious residential dwellings that has also enabled the retention of many trees both within the streetscape and within private properties.</p> <p>There are also heritage items within the Area.. These structures and the surrounding neighborhood tell the story of the city's past. It is essential that we protect and preserve its heritage for future generations</p>	Support
Andrew Laurie/ #92.1		Seek Amendment	The area near and including Ashgrove Tce, Fairview St and Cashmere View St should be a Heritage Value Residential Character zone, and a resource consent should be required before any development can proceed.	
Andrew Laurie/92.1	Anne Dingwall/ #FS2037.165	Seek Amendment	The area near and including Ashgrove Tce, Fairview St and Cashmere View St should be a Heritage Value Residential Character zone, and a resource consent should be required before any development can proceed. The area near and including Ashgrove Tce, Fairview St and Cashmere View St should be designated a Heritage Value Residential Character zone, because the character and style of houses in this area are of value and enhance the aesthetic of the neighbourhood, which would be compromised by the type of buildings permissible under the MRZ rules.	Support
Ross Pheloung/ #101.2		Oppose	Cashmere View Street and surrounding streets should be within a Character Area.	
Tracey Strack/ #119.3		Seek Amendment	That Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) be identified in the Christchurch District Plan as a Medium Density Residential zone and a Residential Character Overlay Area and be made subject to the rules that apply to Residential Character areas	
Cameron Matthews/ #121.6		Oppose	Request removal of the Cashmere [Character Areas]: (Hackthorn Road), Beckenham Loop, Roker and Penrith [streets].	

Cameron Matthews/121.6

Christchurch
International Airport
Limited/ #FS2052.196

Oppose

Request removal of the Cashmere [Character Areas]: (Hackthorn Road), Beckenham Loop, Roker and Penrith [streets].

For Cashmere CA (Hackthorn Road):

By not allowing increased density here, where public transport service provision is good (see FIGURE 17 in section: LOW PUBLIC TRANSPORT ACCESSIBILITY AREA for more detail [below]):

Figure 17 Low Public Transport Accessibility areas (purple hatching) highlighted in red, vs. identical PT provision in blue area. Special/Residential Character Area Qualifying Matter (SCA QM) also proposed within blue zone, preventing densification here too.

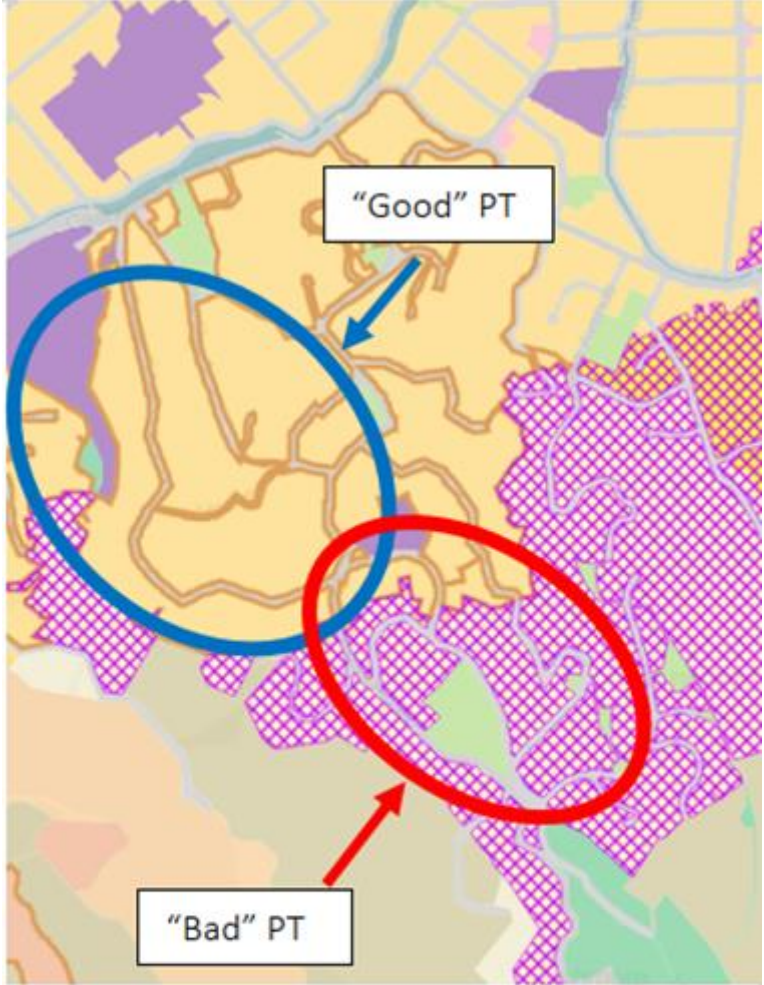

we would be encouraging growth at potentially low densities elsewhere, with worse local business and employment, and worse public and active transport access, and other negative externalities. That impact runs counter to NPS-UD, specifically: Objective 8(a); Policy 1(3); Policy 1(c).

As evident, none of the characteristics identified are adversely affected by residential density, excluding "Large, two-storey dwellings on typical sites". Nothing about being allowed to build to 11m height implies you must remove a front garden, or the basalt retaining wall at the street, or not build with timber cladding, or dormers, or any other specific features that were identified as defining the character of the area. Indeed, many identified characteristics, even if they were considered somehow consistent across the spatial extent of the proposed QM, are not managed any differently via application of the proposed QM. To imply, therefore, that a small change in permitted built form (3 units, 3 storeys) is, of itself, some adverse effect – thus requiring restriction via a QM – solely because it is different to the previously permitted built form (1 unit, 2 storeys) is, in my view, not consistent with NPS-UD.

Regarding Beckenham Loop:

There is nothing special about the housing in this area that's not also found in nearby Somerfield, or any of the rest of the city built circa 1930. These suburbs all have a mix of older and newer houses in a normal inner-suburban setting. The "character" is not "special". It's certainly not special enough to warrant the forced retention of low-density housing in an area proximal to the city centre, both the Orbiter and the #1 bus (both high-frequency core routes), and decent cycleway provision along Tennyson through to the city via Strickland/Antigua Street cycleway.

Oppose

			<p>Regarding Roker/Penrith: The SCA covering Roker and Penrith Streets is at least fairly limited in terms of spatial extent but identifies nothing “special” about the “character” of area that would be negatively affected by increased housing density. These streets are both aesthetically nice, but the aspect that makes them this way is not the ageing and incohesive mix of older and newer low-density houses hidden behind trees and parked cars. What gives these areas particularly valuable character is, only, the regular lining of mature street trees. Increased housing density does not reduce this local amenity, it shares it. The SCA proposed meanwhile, does nothing to protect these trees, it only enforces retention of low-density housing behind them.</p> <p>Roker is also part of the Quarryman’s trail, one of the most-used cycleways in the city, which also serves riders travelling to or from nearby Penrith. Sitting between Sydenham South and Barrington local/town centres and being proximal to the city centre via cycling or other modes, it’s an area perfectly suited for increased density.</p>	
Cameron Matthews/121.6	Kāinga Ora/ #FS2082.52	Oppose	<p>Request removal of the Cashmere [Character Areas]: (Hackthorn Road), Beckenham Loop, Roker and Penrith [streets].</p> <p>For Cashmere CA (Hackthorn Road): By not allowing increased density here, where public transport service provision is good (see FIGURE 17 in section: LOW PUBLIC TRANSPORT ACCESSIBILITY AREA for more detail [below]):</p>  <p><i>Figure 17 Low Public Transport Accessibility areas (purple hatching) highlighted in red, vs. identical PT provision in blue area. Special/Residential Character Area Qualifying Matter (SCA QM) also proposed within blue zone, preventing densification here too.</i></p> <p>we would be encouraging growth at potentially low densities elsewhere, with worse local business and employment, and worse public and active transport access, and other negative externalities. That impact runs counter to NPS-UD, specifically: Objective 8(a); Policy 1(3); Policy 1(c). As evident, none of the characteristics identified are adversely affected by residential density, excluding “Large, two-storey dwellings on typical sites”. Nothing</p>	Support

			<p>about being allowed to build to 11m height implies you must remove a front garden, or the basalt retaining wall at the street, or not build with timber cladding, or dormers, or any other specific features that were identified as defining the character of the area. Indeed, many identified characteristics, even if they were considered somehow consistent across the spatial extent of the proposed QM, are not managed any differently via application of the proposed QM. To imply, therefore, that a small change in permitted built form (3 units, 3 storeys) is, of itself, some adverse effect – thus requiring restriction via a QM – solely because it is different to the previously permitted built form (1 unit, 2 storeys) is, in my view, not consistent with NPS-UD.</p> <p>Regarding Beckenham Loop: There is nothing special about the housing in this area that's not also found in nearby Somerfield, or any of the rest of the city built circa 1930. These suburbs all have a mix of older and newer houses in a normal inner-suburban setting. The "character" is not "special". It's certainly not special enough to warrant the forced retention of low-density housing in an area proximal to the city centre, both the Orbiter and the #1 bus (both high-frequency core routes), and decent cycleway provision along Tennyson through to the city via Strickland/Antigua Street cycleway.</p> <p>Regarding Roker/Penrith: The SCA covering Roker and Penrith Streets is at least fairly limited in terms of spatial extent but identifies nothing "special" about the "character" of area that would be negatively affected by increased housing density. These streets are both aesthetically nice, but the aspect that makes them this way is not the ageing and incohesive mix of older and newer low-density houses hidden behind trees and parked cars. What gives these areas particularly valuable character is, only, the regular lining of mature street trees. Increased housing density does not reduce this local amenity, it shares it. The SCA proposed meanwhile, does nothing to protect these trees, it only enforces retention of low-density housing behind them. Roker is also part of the Quarryman's trail, one of the most-used cycleways in the city, which also serves riders travelling to or from nearby Penrith. Sitting between Sydenham South and Barrington local/town centres and being proximal to the city centre via cycling or other modes, it's an area perfectly suited for increased density.</p>	
Deborah BROWN/ #124.1		Seek Amendment	That 15 Cashmere View Street is included as a suburban character area.	
Simon BROWN/ #125.1		Seek Amendment	That 15 Cashmere View Street is included as a suburban character area.	
Chris Wells/ #126.1		Seek Amendment	That Cashmere View Street is included as a suburban character area.	
Sulekha Korgaonkar/ #128.2		Support	Retain Ryan Street as a residential character area and the provisions that maintain the streets character.	
Melissa Macfarlane/ #135.1		Support	Retain any applicable residential character qualifying matters for the St Albans Malvern Street area.	
Melissa Macfarlane/135.1	Susan Wall/ #FS2015.3	Support	Retain any applicable residential character qualifying matters for the St Albans Malvern Street area. In addition to my previously submitted submission, I would like to clarify that I generally support residential character qualifying matters applying to my house and the wider St Albans area around Malvern Street.	Support
Aaron Jaggar/ #141.1		Seek Amendment	List Ryan Street as a Residential Character Area.	
Bill Marks/ #143.1		Support	Support the identification of Ryan Street as a Character Area.	
Jill Edwards/ #162.2		Seek Amendment	That the area surrounding and including Rose st should require a resource consent for development and that the area be zoned as a suburban character area	
James and Adriana Baddeley/ #164.3		Seek Amendment	That Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) be identified as a Residential Character Overlay Area.	
Catherine & Peter Baddeley/ #165.1		Seek Amendment	That Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) be identified as a Residential Character Overlay Area	
Bernard Hall JP (Retired)/ #168.2		Support	Please retain RYAN STREET, CHRISTCHURCH, 8011 as a CHARACTER STREET without multistory infill structures.	
Bernard Hall JP (Retired)/168.2	Anne Dingwall/ #FS2037.227	Support	<p>Please retain RYAN STREET, CHRISTCHURCH, 8011 as a CHARACTER STREET without multistory infill structures.</p> <p>I have lived at 14 Ryan Street since March 1974. During this time the street has won street awards for its presentation as a community. Residents have mowed the berms and looked after its over all presentation. At one time tour buses would travel down the street so people could enjoy it. Residents were/are proud of the street. We raised 4 sons in our house. And have proudly looked after ou.r gardens.</p> <p>I understand the trees are classified as Heritage Trees, unfortunately the contractor TreeTech is too casual.</p>	Support

			<p>Sadly we were shocked to see 2 story infill housing under construction in the street and now live in fear that they may be built next door to us and destroy our life style what is left of it, I am 87 years old. I spent 35 years serving my comuinty as a JP now retired.</p> <p>Needless to say we love Ryan Street classified as a Character Street.</p>	
Rosanne Hawarden/ #182.2		Seek Amendment	That Jane Deans Close be included as a Residential Heritage Area.	
Riccarton Bush - Kilmarnock Residents' Association/ #188.13		Seek Amendment	Jane Deans Close should [have intensification restricted through a Qualifying Matter]	
Riccarton Bush - Kilmarnock Residents' Association/188.13	Anne Dingwall/ #FS2037.250	Seek Amendment	<p>Jane Deans Close should [have intensification restricted through a Qualifying Matter]</p> <p>because of its special character and socialsignificance, and recognising its importance as an ANZAC memorial street.</p> <p>The street is named after earlyRiccarton settler and community leader, Jane Deans. The entrance to Jane Deans Close [Fig 14] and a cairn at the end of the cul-de-sac commemorate thesoldiers of the 20th New Zealand Infantry Battalion and Armoured Regiment who lost their lives inGreece, Crete, and North Africa from 1939 to 1945.The cairn was erected soon after the street was formed post-1997 and replaced an original memorialerected in 1948 that had been nearby.An ANZAC Day commemoration is held annually in the street at the cairn.</p> <p>PC14 proposes Jane Deans Close be re-zoned high-density residential, meaning 6-storeys.We submit that level of development is inappropriate.</p>	Support

Robert Smillie/ #770.1		Support	[S]upport[s] the making of Ryan Street into a 'character' [area] and thereby give it some protections.	
Beckenham Neighbourhood Association Inc / #773.3		Support	[Retain Character Areas]	
Rebecca Lord/ #776.1		Support	[S]eek[s] that the council does make Ryan Street a character area	
Marie Dysart/ #791.6		Support	Support QM- Character area over the Beckenham Loop (Tennyson Street, Heathcote River, Colombo Street).	
Marie Dysart/ #791.7		Support	Support QM- Character area over the Beckenham Loop expanded area (Tennyson Street, Heathcote River, Colombo Street).	
Benjamin Love/ #799.1		Oppose	[That Residential Character Areas are removed]	
Benjamin Love/799.1	Kāinga Ora/ #FS2082.592	Oppose	[That Residential Character Areas are removed] Christchurch does not have many historical or character buildings, and entire subdivisions should not be excluded from intensifying, because some residents oppose new developments. The excuse of character area is often used as a way to prevent new developments; however these areas often lack character/historical significance when compared to many historical foreign cities/towns.	Support
Waihoru Spreydon-Cashmere-Heathcote Community Board / #804.9		Support	[S]upports the inclusion of the new character areas in Roker St, Spreydon and Bewdley and Evesham Crescent on Barrington.	
Waka Kotahi (NZ Transport Agency) / #805.6		Oppose	That the designated Character Areas are reduced in extent.	
Linda Morris/ #816.1		Support	The submitter supports the Character Area for Beckenham	

Historic Places Canterbury/ #835.3		Support	The submitter supports this qualifying matter.	
Historic Places Canterbury/835.3	Anne Dingwall/ #FS2037.590	Support	<p>The submitter supports this qualifying matter.</p> <p>The submitter strongly supports all the proposed Qualifying Matters, but in particular those matters listed under Matters of National Importance (RMAs.6), including historic heritage; Public Open Space Areas; Residential Heritage Areas and Residential Character Areas; Sunlight Access; Riccarton Bush Interface; and the Otakaro Avon River Corridor.</p> <p>Although their concerns as a group relate primarily to heritage, we consider that many of the other qualifying matters such as the Tsunami Management Areas and Vacuum Sewer Wastewater Constraint and Low Public Transport Accessibility Areas are sensible qualifying matters which will help to protect quite large areas of the city from the random high density developments that will have adverse consequences in the longer term, and will also help to maintain their existing character.</p>	Support
Historic Places Canterbury/835.3	Anne Dingwall/ #FS2037.688	Support	<p>The submitter supports this qualifying matter.</p> <p>The submitter strongly supports all the proposed Qualifying Matters, but in particular those matters listed under Matters of National Importance (RMAs.6), including historic heritage; Public Open Space Areas; Residential Heritage Areas and Residential Character Areas; Sunlight Access; Riccarton Bush Interface; and the Otakaro Avon River Corridor.</p> <p>Although their concerns as a group relate primarily to heritage, we consider that many of the other qualifying matters such as the Tsunami Management Areas and Vacuum Sewer Wastewater Constraint and Low Public Transport Accessibility Areas are sensible qualifying matters which will help to protect quite large areas of the city from the random high density developments that will have adverse consequences in the longer term, and will also help to maintain their existing character.</p>	Support
Historic Places Canterbury/ #835.21		Support	The submitter welcomes the addition of three new character areas and while they regret the removal of two character areas in Sumner and the reduction in size of 7 of the existing character areas, they recognise that these no longer meet the criteria and should therefore be removed or require boundary adjustments. They welcome the inclusion of Residential Character Areas as a Qualifying matter and the introduction of restricted discretionary status to help better manage and protect character areas. They also support more restrictive subdivision for character areas.	
Historic Places Canterbury/835.21	Anne Dingwall/ #FS2037.608	Support	The submitter welcomes the addition of three new character areas and while they regret the removal of two character areas in Sumner and the reduction in size of 7 of the existing character areas, they recognise that these no longer meet the criteria and should therefore be removed or require boundary adjustments. They welcome the inclusion of Residential Character Areas as a Qualifying matter and the introduction of restricted discretionary status to help better manage and protect character areas. They also support more restrictive subdivision for character areas.	Support
Historic Places Canterbury/835.21	Anne Dingwall/ #FS2037.706	Support	The submitter welcomes the addition of three new character areas and while they regret the removal of two character areas in Sumner and the reduction in size of 7 of the existing character areas, they recognise that these no longer meet the criteria and should therefore be removed or require boundary adjustments. They welcome the inclusion of Residential Character Areas as a Qualifying matter and the introduction of restricted discretionary status to help better manage and protect character areas. They also support more restrictive subdivision for character areas.	Support
Maureen Kerr/ #868.2		Seek Amendment	Protect and maintain special character and quality of existing homes in area from Papanui Road to Watford Street.	
Jane and Andrew Sutherland- Norton and Norton/ #1006.1		Seek Amendment	Somerfield and Lower Cashmere suburbs should be in a character area. Resource consent should be required before any development can proceed.	
Mark Winter/ #1008.2		Seek Amendment	Retain a heritage and character status for Beverley Street.	
Jeanne Cooper/ #1031.1		Seek Amendment	Provide a buffer zone between character areas and RMD intensive housing [High Density Residential Zone].	
Jeanne Cooper/1031.1	Kāinga Ora/ #FS2082.828	Seek Amendment	Provide a buffer zone between character areas and RMD intensive housing [High Density Residential Zone]. My property is in and on the border of an existing character area. It is also close to Merivale shopping and Papanui bus route. I am concerned that building height changes mean that a high building can border my northern property boundary and block sunlight from my house. My street is already undergoing intensive housing changes with 26 dwellings replacing 2. All trees are going or gone and soft surface is replaced by hard. No parking provision for 18 of the 26 new proposed or underway building. So the existing character area is bordered by intensive housing. Surely there should be a buffer between character and intensive areas with according building regulations. I am also concerned that 24 more properties with no soft surface to absorb rain water will adversely affect the drainage system which to my 40 residency has not been upgraded apart from adding new drainage pipes to the extra housing. Similarly power supply has simply been adjusted to eliminate several poles and add wiring to the existing poles left. I don't think this is clever city planning and can see future problems.	Oppose
Jono De Wit/ #1053.2		Oppose	Oppose the Piko Crescent Character Area.	

Joanne Nikolaou/ #1054.1		Seek Amendment	Seek that a new Character Area be included for Cashmere Somerfield.	
Waihoru Spreydon-Cashmere-Heathcote Community Board / #1077.2		Support	Supports the inclusion of the new character areas in Roker St,Spreydon and Bewdley and Evesham Crescent on Barrington.	
Waihoru Spreydon-Cashmere-Heathcote Community Board /1077.2	Anne Dingwall/ #FS2037.665	Support	<p>Supports the inclusion of the new character areas in Roker St,Spreydon and Bewdley and Evesham Crescent on Barrington.</p> <p>The Waihoru Spreydon-Cashmere Community Board (The Board) appreciates the opportunity to make a submission to theChristchurch City Council on the Proposed Draft Heritage Plan Change (PC13), and thanks staff forthe work done on this matter.</p> <p>The Board's statutoryrole is, "to represent,and act as an advocate for, theinterests of its community" and "to prepare an annual submission to the territorial authority for expenditure within the community" (Local Government Act 2002, section52). The Board provides this submission in its capacity as a representative of the communities in the Spreydon-Cashmere-Heathcotearea.</p> <p>Our Community Board Plan's vision is that Spreydon-Cashmere-Heathcote is a place where people are activelyengaged and contribute to thriving communities and environments, where theyfeel they belong and are safe and connected with each other.</p> <p>TheBoard understands the need for increased intensification to address a range ofissues, not least of which is climate change mitigation. The Board's concern is that intensificationdoes not occur in an ad hoc fashion, but instead takes into account all thesocial and environmental factors that enables people to continue to enjoy andthrive in their local settings, and considers the proposed plan changes as akey tool for creating a cohesive approach.</p>	Support
Dr. Bruce Harding/ #1079.1		Seek Amendment	Seek clarification on the RHA 8 (Macmillan Avenue) boundary, as it was all covered in the Special Amenity Area (SaM 17 & 17A) provisions inthe late 1990s City Plan. Why is one end of the street singled out and the home of John Macmillan Brown (35 Macmillan Ave)excluded.	
Dr. Bruce Harding/1079.1	Anne Dingwall/ #FS2037.662	Seek Amendment	<p>Seek clarification on the RHA 8 (Macmillan Avenue) boundary, as it was all covered in the Special Amenity Area (SaM 17 & 17A) provisions inthe late 1990s City Plan. Why is one end of the street singled out and the home of John Macmillan Brown (35 Macmillan Ave)excluded.</p> <p>Do the former SaM17/17a character overlays still in place and continue to have effect? If not, why not? I would seekpolicy clarity in the finalized PC13 documentation by way of footnote or policy box for the better informing of citizens andratepayers. The underlying heritage kaupapa/philosophy and criteria for character retention needs to be clearly affixed to planningdocuments/schemata.Our proposed Heritage Plan Change (PC13) from Harding, Bruce</p>	Support
Dr. Bruce Harding/ #1079.2		Seek Amendment	seek confirmation that homes/properties of iconic citizens (in all city RHAs) are clearly delineated in the revised City Plan—so for Cashmere, for example, "Rise Cottage" (Westenra Terrace), the Ngaio Marsh House (37 Valley Road)

Cameron Matthews/ #121.15		Oppose	Request removal of the Riccarton Bush Interface Qualifying Matter.	
Cameron Matthews/121.15	Christchurch International Airport Limited/ #FS2052.205	Oppose	<p>Request removal of the Riccarton Bush Interface Qualifying Matter.</p> <p>SEE IMAGES IN SUBMISSION</p> <p>PūtaringamotuRiccarton Bush Heritage Landscape Review 2022 - used by CCC to provide rationale for the QM - asserts that “Views of Pūtaringamotu from neighbouringstreets”, “Visual connectivity between Pūtaringamotu and other planted elements”, “an element across the skyline”, “View of distinctive tall podocarp trees”, and “Viewsto Pūtaringamotu for residents and passers-by” all would be negatively affectedby implementation of NPS-UD and MDRS, and that limiting building heights in theaffected area to 2 storeys equates [Appendix 43 Pūtaringamotu Riccarton BushHeritage Landscape Review 2022, section 5.3] to “protection of outstandingnatural features” and “historic heritage” from inappropriate subdivision, useand development under RMA Section 6 (b) and (f). If views from neighbouring anddistant sites are indeed significantly impacted as suggested, there remains noevidence that this constitutes any use, subdivision, or development of theoutstanding natural feature or historic heritage, and can therefore not be“inappropriate subdivision, use and development” of said natural feature orhistoric heritage.</p> <p>I would also contest the idea that views – of what are in most cases the topmetre or so of distant podocarp trees poking up behind the rooflines ofexisting houses, largely indistinct from various street- trees and privateplantings – constitutes some ‘outstanding natural feature’ in of itself.Riccarton Bush proper, yes, and the heritage items within theheritage-protected setting of Riccarton Grounds, such as Riccarton House andsignificant trees, but the limited, indistinct, interrupted and generallyunimpressive views of distant treetops “currently available down driveways” arenot in themselves the outstanding feature here. And since Riccarton Bush,House, and significant individual trees are protected from development bydesignation and council-ownership, permitting medium or high-density housing innearby sites is not a degradation of any amenity value provided by the openspace, outstanding natural features, or heritage items.</p> <p>The Riccarton Bush Interface Area Qualifying Matter should be removed from theproposal, as the true amenity of Riccarton Bush and Grounds is unaffected byincreased residential density.</p> <p>NPS-UD allows for QMs to restrict development in some locations, such as “openspace provided for public use, but only in relation to the land that is openspace” (NPS-UD 2020 3.32 1 (d)), or “an area subject to a designation or heritage order, but only in relation to the land that is subject to the designation or heritage order” (NPS-UD 2020 3.32 1 (e)).Yet the Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022 5.3, used to justify implementation of thisproposed QM over the proposed spatial extent, cites reasons such as “loss ofgreenspace adjacent to Pūtaringamotu”; with the proposed QM then specificallyapplying a density control to sites not included in the protected extent ofeither Riccarton Bush, nor the surrounding grounds of Riccarton House, nor landzoned as open space.</p> <p>Furthermore, CCC state in their Section 32 report that another option thatwould limit the extent of the proposed QM to only those sites immediatelyadjoining Riccarton Bush (instead of the multi-block-coverage QM proposed),would have the effect of “...ensuring that Riccarton Bush is protected from theeffects of medium density development” and that “the values of Riccarton Bush itself would not bedegraded”, and “this approach is effective at addressing the issue”. This options assessment</p>	Oppose

shows plainly that at least one option is available to better “achieve the greatest heights and densities directed by Policy 3, while maintaining the specific characteristics” of the area, as required by NPS-UD (3.33 3biii).

Even if we are to accept (though I don’t think we should) that these views are somehow worth sacrificing homes for, in many cases the proposed QM does no more to protect them than without the QM. For example, from Riccarton Road even the existing District Plan allows for construction obscuring all visible parts of the distant and indistinct Riccarton Bush. Meanwhile on Kahu Road, the roadway divides the residential sections from Riccarton Grounds. Any views of Riccarton Bush or House or Grounds are unaffected by increased residential density here, aside from being shared more widely with more residents.

Other reasons cited in Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022 as “affecting an area of significant indigenous flora and fauna” include ground disturbance associated with construction damaging root systems, changes to soil hydrology, reduced habitat and corridors for birds, less permeable surfaces, and alteration of microclimates. Few of these reasons are particular to housing of a specific density. For example, most root systems will predominantly exist in the upper-most layers of soil, which would be equally affected by construction of a single-storey house as they would a multi-storey one. Regarding habitat and corridors for birds, tree canopy requirements proposed for MRZ and HRZ zoning would apply here, if not for the proposed QM, so tree loss in the sites adjacent to Riccarton Bush would be protected against without resorting to density constraints. The MRZ or HRZ rules would actually offer more protection for trees and landscaping than is currently provided by the Residential Suburban (RS) zoning proposed to remain in effect around Riccarton Bush under the proposed QM, with RS zoning excluding planting requirements from single-unit sites. With respect to permeable surfaces replenishing ground aquifers, both proposed MRZ and HRZ zoning rules require 20% or more of the site provided for landscaping, with buildings not exceeding 50% of the site area. Neither rule set has specific requirements for surface permeability, though either could without applying density constraints which exceed maxima allowed by MDRS and NPS-UD. Lastly, while I’m not an expert on the differential effects of structures of differing heights on soil hydrology, nor the effects of buildings on microclimates, I suspect these effects are manageable without density constraints, and that the spatial extent of the proposed QM makes no reference to the hydrological catchment of Riccarton Bush.

Regarding impact, at least 1220 units are prevented by application of this QM in terms of plan-enabled capacity, though this doesn’t consider the considerable overlap of this proposed QM with the similarly restrictive proposal for the Airport Noise Contour QM, so is likely to be greater if that QM is excluded.

What isn’t evident from this impact assessment is the desirability of this location. Riccarton’s commercial area is a Large Town Centre – Key Activity Centre with huge commercial and retail activity. Riccarton Road (which the proposed QM area adjoins) plays host to 3 of our 5 most frequent Core public transport services (#3, #5, and Orbiter) and is poised to upgrade to a Bus Rapid Transit (BRT) or Light Rail Transit (LRT) corridor in the medium term, denoted in the proposed plan by the City Spine Transport Corridor. There is a Major Cycle Route (Uni-Cycle MCR) running through Riccarton Grounds, connecting the nearby University of Canterbury with Riccarton, Hagley Park, and the central city. According to The Property Group’s New Medium Density Residential Standards (MDRS) - Assessment of Housing Enabled in Christchurch City 2022 (Section 32 report Part 2 Appendix 3) much of the feasible development enabled under PC14 is concentrated in Riccarton Central, due to the significant accessibility values of the area.

Aside from the high amenity value of the area in general, the identification of the spatial extent of the proposed QM is over-zealous. For example, on Kauri St’s West side, sites as many as 8-deep (1 Kauri St) are proposed for these density restrictions. On Hinau St, not only are the proposed sites not adjacent to Riccarton Bush, but they are on an entirely different block, with Totara St (and any underground services) in between. For example, 67 Hinau St is over 160m from the nearest part of the bush, with as many as 7 other sites plus a road in between.

In summary, the unique characteristics of this area are contained within the existing reserve, not the proposed ‘interface area’, with public walkways and cycleways permitting extensive access to the public to experience Riccarton Bush, House, and Grounds to experience them from within. Any other alleged amenity value provided to the adjacent sites in terms of obscure and indistinct views of trees are overstated. The true amenity value of these sites is in their proximity to – not their views of – the bush, the commercial centre of Riccarton, the University campus, desirable school zones, Hagley Park, and the City Centre. These amenity and accessibility values are better shared than hoarded and are not diminished with higher enabled density. Any reduction in amenity value within Riccarton Bush, House, Grounds, or to any significant individual trees or heritage items (which have their own standalone protections) that might occur because of applying MRZ or HRZ zoning to within proposed RBI QM area is negligible, and the proposed QM is, as demonstrated by CCC’s own options analysis, not consistent with NPS-UD requirements to “achieve the greatest heights and densities directed by Policy 3, while managing the specific characteristics”. It is desirable and strategic to increase the number of permitted homes in this area – to a level commensurate with the nearby Riccarton commercial centre and proportionate to the available and planned Public and Active Transport infrastructure. The proposed Riccarton Bush Interface Area QM should therefore be removed or limited to only those specific sites (such as those directly adjoining the Bush) where development at commensurate density may have strong evidence that it would significantly negatively impact the natural or heritage value within the open space zones themselves.

<p>Cameron Matthews/121.15</p>	<p>Riccarton Bush Kilmarnock Residents Association ./ #FS2062.66</p>	<p>Oppose</p>	<p>Request removal of the Riccarton Bush Interface Qualifying Matter.</p> <p>SEE IMAGES IN SUBMISSION</p> <p>Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022 - used by CCC to provide rationale for the QM - asserts that “Views of Pūtaringamotu from neighbouring streets”, “Visual connectivity between Pūtaringamotu and other planted elements”, “an element across the skyline”, “View of distinctive tall podocarp trees”, and “Views to Pūtaringamotu for residents and passers-by” all would be negatively affected by implementation of NPS-UD and MDRS, and that limiting building heights in the affected area to 2 storeys equates [Appendix 43 Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022, section 5.3] to “protection of outstanding natural features” and “historic heritage” from inappropriate subdivision, use and development under RMA Section 6 (b) and (f). If views from neighbouring and distant sites are indeed significantly impacted as suggested, there remains no evidence that this constitutes any use, subdivision, or development of the outstanding natural feature or historic heritage, and can therefore not be “inappropriate subdivision, use and development” of said natural feature or historic heritage.</p> <p>I would also contest the idea that views – of what are in most cases the tops of distant podocarp trees poking up behind the rooflines of existing houses, largely indistinct from various street- trees and private plantings – constitutes some ‘outstanding natural feature’ in of itself. Riccarton Bush proper, yes, and the heritage items within the heritage-protected setting of Riccarton Grounds, such as Riccarton House and significant trees, but the limited, indistinct, interrupted and generally unimpressive views of distant treetops “currently available down driveways” are not in themselves the outstanding feature here. And since Riccarton Bush, House, and significant individual trees are protected from development by designation and council-ownership, permitting medium or high-density housing in nearby sites is not a degradation of any amenity value provided by the open space, outstanding natural features, or heritage items.</p> <p>The Riccarton Bush Interface Area Qualifying Matter should be removed from the proposal, as the true amenity of Riccarton Bush and Grounds is unaffected by increased residential density.</p> <p>NPS-UD allows for QMs to restrict development in some locations, such as “open space provided for public use, but only in relation to the land that is open space” (NPS-UD 2020 3.32 1 (d)), or “an area subject to a designation or heritage order, but only in relation to the land that is subject to the designation or heritage order” (NPS-UD 2020 3.32 1 (e)). Yet the Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022 5.3, used to justify implementation of this proposed QM over the proposed spatial extent, cites reasons such as “loss of greenspace adjacent to Pūtaringamotu”; with the proposed QM then specifically applying a density control to sites not included in the protected extent of either Riccarton Bush, nor the surrounding grounds of Riccarton House, nor land zoned as open space.</p> <p>Furthermore, CCC state in their Section 32 report that another option that would limit the extent of the proposed QM to only those sites immediately adjoining Riccarton Bush (instead of the multi-block-coverage QM proposed), would have the effect of “...ensuring that Riccarton Bush is protected from the effects of medium density development” and that “the values of Riccarton Bush itself would not be degraded”, and “this approach is effective at addressing the issue”. This options assessment shows plainly that at least one option is available to better “achieve the greatest heights and densities directed by Policy 3, while maintaining the specific characteristics” of the area, as required by NPS-UD (3.33 3biii).</p> <p>Even if we are to accept (though I don’t think we should) that these views are somehow worth sacrificing homes for, in many cases the proposed QM does no more to protect them than without the QM. 			<p>landscaping, with buildings not exceeding 50% of the site area. Neither ruleset have specific requirements for surface permeability, though either could without applying density constraints which exceed maxima allowed by MDRS and NPS-UD. Lastly, while I'm not an expert on the differential effects of structures of differing heights on soil hydrology, nor the effects of buildings on microclimates, I suspect these effects are manageable without density constraints, and that the spatial extent of the proposed QM makes no reference to the hydrological catchment of Riccarton Bush.</p> <p>Regarding impact, at least 1220 units are prevented by application of this QM in terms of plan-enabled capacity, though this doesn't consider the considerable overlap of this proposed QM with the similarly restrictive proposal for the Airport Noise Contour QM, so is likely to be greater if that QM is excluded.</p> <p>What isn't evident from this impact assessment is the desirability of this location. Riccarton's commercial area is a Large Town Centre – Key Activity Centre with huge commercial and retail activity. Riccarton Road (which the proposed QM area adjoins) plays host to 3 of our 5 most frequent Core public transport services (#3, #5, and Orbiter) and is poised to upgrade to a Bus Rapid Transit (BRT) or Light Rail Transit (LRT) corridor in the medium term, denoted in the proposed plan by the City Spine Transport Corridor. There is a Major Cycle Route (Uni-Cycle MCR) running through Riccarton Grounds, connecting the nearby University of Canterbury with Riccarton, Hagley Park, and the central city. According to The Property Group's New Medium Density Residential Standards (MDRS) - Assessment of Housing Enabled in Christchurch City 2022 (Section 32 report Part 2 Appendix 3) much of the feasible development enabled under PC14 is concentrated in Riccarton Central, due to the significant accessibility values of the area.</p> <p>Aside from the high amenity value of the area in general, the identification of the spatial extent of the proposed QM is over-zealous. For example, on Kauri St's West side, sites as many as 8-deep (1 Kauri St) are proposed for these density restrictions. On Hinau St, not only are the proposed sites not adjacent to Riccarton Bush, but they are on an entirely different block, with Totara St (and any underground services) in between. For example, 67 Hinau St is over 160m from the nearest part of the bush, with as many as 7 other sites plus a road in between.</p> <p>In summary, the unique characteristics of this area are contained within the existing reserve, not the proposed 'interface area', with public walkways and cycleways permitting extensive access to the public to experience Riccarton Bush, House, and Grounds to experience them from within. Any other alleged amenity value provided to the adjacent sites in terms of obscure and indistinct views of trees are overstated. The true amenity value of these sites is in their proximity to – not their views of – the bush, the commercial centre of Riccarton, the University campus, desirable school zones, Hagley Park, and the City Centre. These amenity and accessibility values are better shared than hoarded and are not diminished with higher enabled density. Any reduction in amenity value within Riccarton Bush, House, Grounds, or to any significant individual trees or heritage items (which have their own standalone protections) that might occur because of applying MRZ or HRZ zoning to within proposed RBI QM area is negligible, and the proposed QM is, as demonstrated by CCC's own options analysis, not consistent with NPS-UD requirements to "achieve the greatest heights and densities directed by Policy 3, while managing the specific characteristics". It is desirable and strategic to increase the number of permitted homes in this area – to a level commensurate with the nearby Riccarton commercial centre and proportionate to the available and planned Public and Active Transport infrastructure. The proposed Riccarton Bush Interface Area QM should therefore be removed or limited to only those specific sites (such as those directly adjoining the Bush) where development at commensurate density may have strong evidence that it would significantly negatively impact the natural or heritage value within the open space zones themselves.</p>	
Cameron Matthews/121.15	The Riccarton Bush Trust/ #FS2085.12	Oppose	<p>Request removal of the Riccarton Bush Interface Qualifying Matter.</p> <p>SEE IMAGES IN SUBMISSION</p> <p>Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022 - used by CCC to provide rationale for the QM - asserts that "Views of Pūtaringamotu from neighbouring streets", "Visual connectivity between Pūtaringamotu and other planted elements", "an element across the skyline", "View of distinctive tall podocarp trees", and "Views to Pūtaringamotu for residents and passers-by" all would be negatively affected by implementation of NPS-UD and MDRS, and that limiting building heights in the affected area to 2 storeys equates [Appendix 43 Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022, section 5.3] to "protection of outstanding natural features" and "historic heritage" from inappropriate subdivision, use and development under RMA Section 6 (b) and (f). If views from neighbouring and distant sites are indeed significantly impacted as suggested, there remains no evidence that this constitutes any use, subdivision, or development of the outstanding natural feature or historic heritage, and can therefore not be "inappropriate subdivision, use and development" of said natural feature or historic heritage.</p> <p>I would also contest the idea that views – of what are in most cases the top metre or so of distant podocarp trees poking up behind the rooflines of existing houses, largely indistinct from various street-trees and private plantings – constitutes some 'outstanding natural feature' in of itself. Riccarton Bush proper, yes, and the heritage items within the heritage-protected setting of Riccarton Grounds, such as Riccarton House and significant trees, but the limited, indistinct, interrupted and generally unimpressive views of distant treetops "currently available down driveways" are not in themselves the outstanding feature here. And since Riccarton Bush, House, and significant</p>	Oppose

individual trees are protected from development by designation and council-ownership, permitting medium or high-density housing in nearby sites is not a degradation of any amenity value provided by the open space, outstanding natural features, or heritage items.

The Riccarton Bush Interface Area Qualifying Matter should be removed from the proposal, as the true amenity of Riccarton Bush and Grounds is unaffected by increased residential density.

NPS-UD allows for QMs to restrict development in some locations, such as “open space provided for public use, but only in relation to the land that is open space” (NPS-UD 2020 3.32 1 (d)), or “an area subject to a designation or heritage order, but only in relation to the land that is subject to the designation or heritage order” (NPS-UD 2020 3.32 1 (e)). Yet the Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022 5.3, used to justify implementation of this proposed QM over the proposed spatial extent, cites reasons such as “loss of green space adjacent to Pūtaringamotu”; with the proposed QM then specifically applying a density control to sites not included in the protected extent of either Riccarton Bush, nor the surrounding grounds of Riccarton House, nor land zoned as open space.

Furthermore, CCC state in their Section 32 report that another option that would limit the extent of the proposed QM to only those sites immediately adjoining Riccarton Bush (instead of the multi-block-coverage QM proposed), would have the effect of “...ensuring that Riccarton Bush is protected from the effects of medium density development” and that “the values of Riccarton Bush itself would not be degraded”, and “this approach is effective at addressing the issue”. This options assessment shows plainly that at least one option is available to better “achieve the greatest heights and densities directed by Policy 3, while maintaining the specific characteristics” of the area, as required by NPS-UD (3.33 3biii).

Even if we are to accept (though I don’t think we should) that these views are somehow worth sacrificing homes for, in many cases the proposed QM does no more to protect them than without the QM. For example, from Riccarton Road even the existing District Plan allows for construction obscuring all visible parts of the distant and indistinct Riccarton Bush. Meanwhile on Kahu Road, the roadway divides the residential sections from Riccarton Grounds. Any views of Riccarton Bush or House or Grounds are unaffected by increased residential density here, aside from being shared more widely with more residents.

Other reasons cited in Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022 as “affecting an area of significant indigenous flora and fauna” include ground disturbance associated with construction damaging root systems, changes to soil hydrology, reduced habitat and corridors for birds, less permeable surfaces, and alteration of microclimates. Few of these reasons are particular to housing of a specific density. For example, most root systems will predominantly exist in the upper-most layers of soil, which would be equally affected by construction of a single-storey house as they would a multi-storey one. Regarding habitat and corridors for birds, tree canopy requirements proposed for MRZ and HRZ zoning would apply here, if not for the proposed QM, so tree loss in the sites adjacent to Riccarton Bush would be protected against without resorting to density constraints. The MRZ or HRZ rules would actually offer more protection for trees and landscaping than is currently provided by the Residential Suburban (RS) zoning proposed to remain in effect around Riccarton Bush under the proposed QM, with RS zoning excluding planting requirements from single-unit sites. With respect to permeable surfaces replenishing ground aquifers, both proposed MRZ and HRZ zoning rules require 20% or more of the site provided for landscaping, with buildings not exceeding 50% of the site area. Neither rule set have specific requirements for surface permeability, though either could without applying density constraints which exceed maxima allowed by MDRS and NPS-UD. Lastly, while I’m not an expert on the differential effects of structures of differing heights on soil hydrology, nor the effects of buildings on microclimates, I suspect these effects are manageable without density constraints, and that the spatial extent of the proposed QM makes no reference to the hydrological catchment of Riccarton Bush.

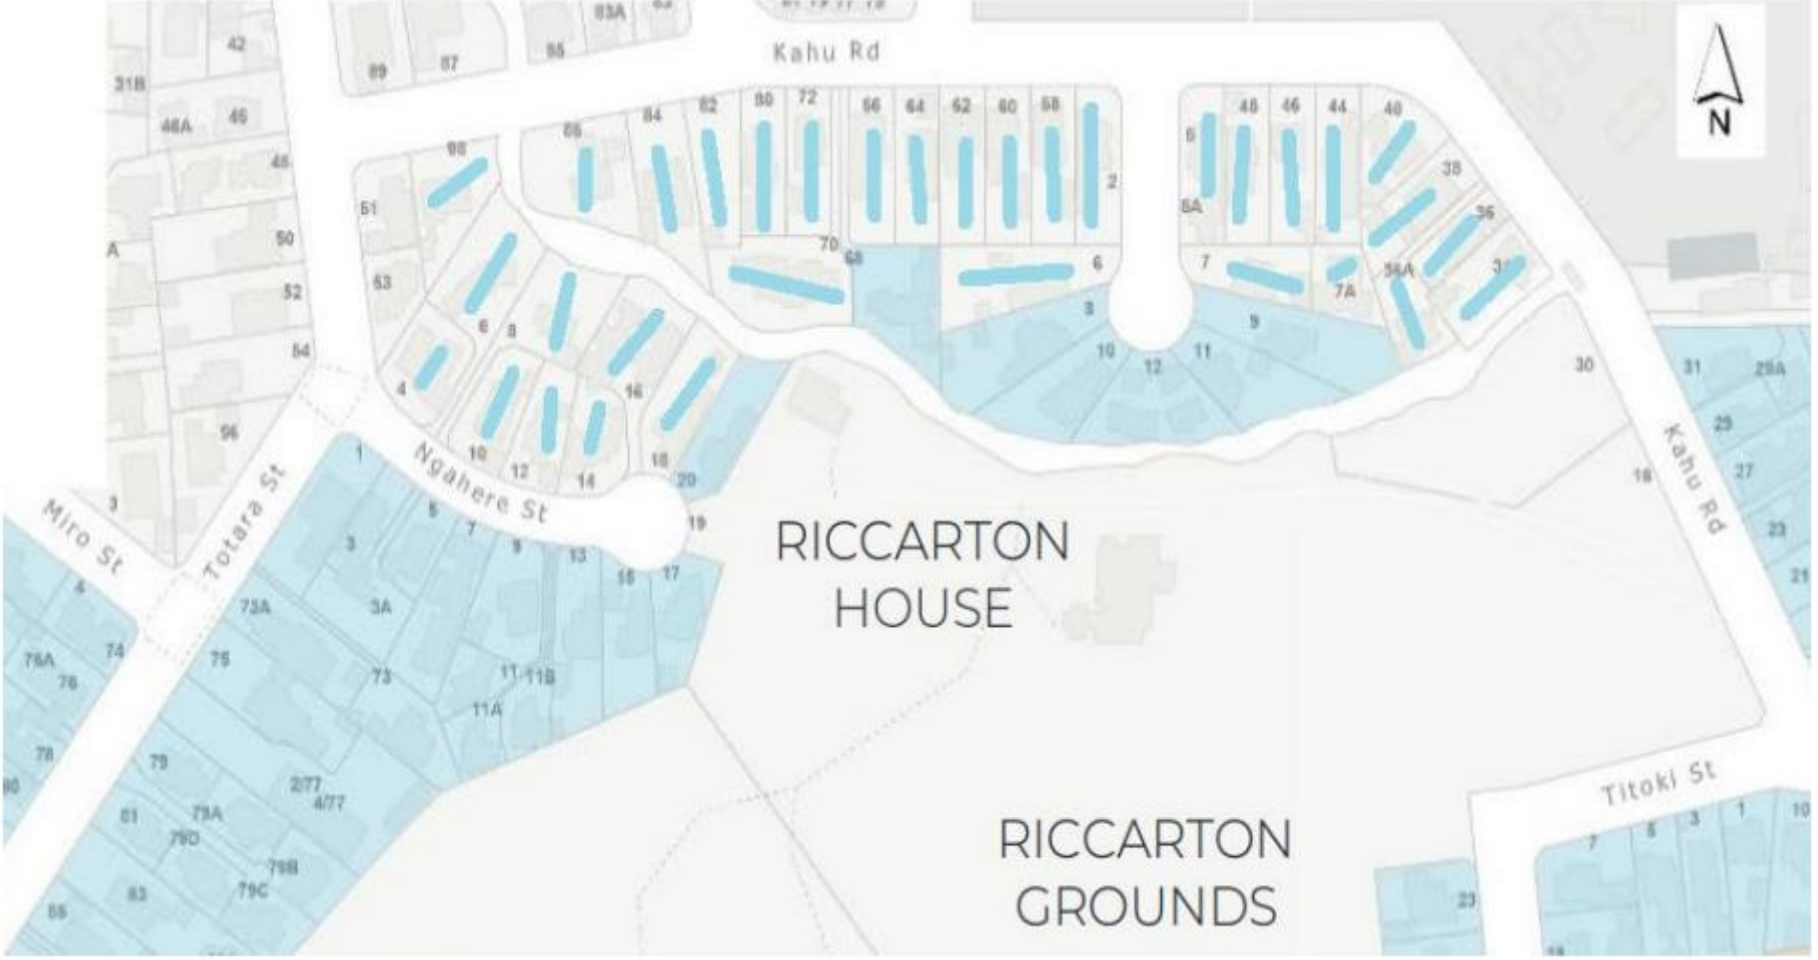

Regarding impact, at least 1220 units are prevented by application of this QM in terms of plan-enabled capacity, though this doesn’t consider the considerable overlap of this proposed QM with the similarly restrictive proposal for the Airport Noise Contour QM, so is likely to be greater if that QM is excluded.

What isn’t evident from this impact assessment is the desirability of this location. Riccarton’s commercial area is a Large Town Centre – Key Activity Centre with huge commercial and retail activity. Riccarton Road (which the proposed QM area adjoins) plays host to 3 of our 5 most frequent Core public transport services (#3, #5, and Orbiter) and is poised to upgrade to a Bus Rapid Transit (BRT) or Light Rail Transit (LRT) corridor in the medium term, denoted in the proposed plan by the City Spine Transport Corridor. There is a Major Cycle Route (Uni-Cycle MCR) running through Riccarton Grounds, connecting the nearby University of Canterbury with Riccarton, Hagley Park, and the central city. According to The Property Group’s New Medium Density Residential Standards (MDRS) - Assessment of Housing Enabled in Christchurch City 2022 (Section 32 report Part 2 Appendix 3) much of the feasible development enabled under PC14 is concentrated in Riccarton Central, due to the significant accessibility values of the area.

			<p>Aside from the high amenity value of the area in general, the identification of the spatial extent of the proposed QM is over-zealous. For example, on Kauri St's West side, sites as many as 8-deep (1 Kauri St) are proposed for these density restrictions. On Hinau St, not only are the proposed sites not adjacent to Riccarton Bush, but they are on an entirely different block, with Totara St (and any underground services) in between. For example, 67 Hinau St is over 160m from the nearest part of the bush, with as many as 7 other sites plus a road in between.</p> <p>In summary, the unique characteristics of this area are contained within the existing reserve, not the proposed 'interface area', with public walkways and cycleways permitting extensive access to the public to experience Riccarton Bush, House, and Grounds to experience them from within. Any other alleged amenity value provided to the adjacent sites in terms of obscure and indistinct views of trees are overstated. The true amenity value of these sites is in their proximity to – not their views of – the bush, the commercial centre of Riccarton, the University campus, desirable school zones, Hagley Park, and the City Centre. These amenity and accessibility values are better shared than hoarded and are not diminished with higher enabled density. Any reduction in amenity value within Riccarton Bush, House, Grounds, or to any significant individual trees or heritage items (which have their own standalone protections) that might occur because of applying MRZ or HRZ zoning to within proposed RBI QM area is negligible, and the proposed QM is, as demonstrated by CCC's own options analysis, not consistent with NPS-UD requirements to "achieve the greatest heights and densities directed by Policy 3, while managing the specific characteristics". It is desirable and strategic to increase the number of permitted homes in this area – to a level commensurate with the nearby Riccarton commercial centre and proportionate to the available and planned Public and Active Transport infrastructure. The proposed Riccarton Bush Interface Area QM should therefore be removed or limited to only those specific sites (such as those directly adjoining the Bush) where development at commensurate density may have strong evidence that it would significantly negatively impact the natural or heritage value within the open space zones themselves.</p>	
Cameron Matthews/ #121.39		Seek Amendment	The area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, should be zoned for at least HRZ, MUZ or equivalent density, such that they are at least above baseline MRZ density limits.	
Cameron Matthews/121.39	Christchurch International Airport Limited/ #FS2052.229	Seek Amendment	<p>The area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, should be zoned for at least HRZ, MUZ or equivalent density, such that they are at least above baseline MRZ density limits.</p> <p>Because of the latent potential of the rail corridor and feasible station locations for passenger services, and the existing lack of urban density proximal to those locations, I suggest that the area around the existing passenger rail station in Addington and around other feasible station locations such as Hornby, Riccarton, Papanui, Sydenham/Moorhouse, Heathcote Valley and Lyttelton, be zoned for at least HRZ, MUZ or equivalent density, such that they are at least above baseline MRZ density limits.</p> <p>Christchurch plays host to a passenger rail station for inter-regional trips. At present this station largely serves tourist markets, though the extant rail network within Greater Christchurch has been investigated for future suburban rail services, and further growth of especially the inter-regional services is entirely plausible. The road link to Dunedin for example is increasingly congested, low resilience, and Air New Zealand manage to make a profit on the CHC-DUN route flying about 7 return trips daily – a trip which, unlike rail, doesn't also service interstitial centres like Ashburton, Timaru, or Oamaru. Considering the rail corridors are already publicly owned, cover large parts of the city, and with much of the fixed infrastructure costs already paid for, they represent an attractive scaffold around which the city and wider region could grow in future without excessive cost burdens for new congestion-free transport infrastructure. Emerging metropolitan centres within Christchurch such as Hornby, Riccarton, and Papanui and Sydenham all lie on this corridor, as do the Rolleston and Rangiora slightly further afield.</p> <p>Unfortunately, past spatial planning has limited the growth around the rest of the rail corridor such that suburban rail services would likely see low utilisation and limited economic viability if run on the existing rail alignments, at least without lots of new growth in suburbs feasibly served by it – suburbs like Hornby, Addington, Riccarton, Papanui, Sydenham/Moorhouse, and even Heathcote Valley, Lyttelton, Rolleston and Rangiora. This is despite the huge advantages that such congestion-free, safe, rapid travel would provide to those using it, and those benefiting from that many fewer cars on the road, such as drivers, cyclists, pedestrians, and council finances in road maintenance.</p> <p>This mismatch in location between high urban density and latent high-capacity transport infrastructure will continue to be the case at least until spatial planning allows for higher urban densities within a walkable catchment of these feasible station locations, and/or such time as the rail corridor and services garner new investment – with both requirements currently locked in a chicken and egg scenario preventing progress. Though the immediate priority in public transport investment in Christchurch is rightly on improving the bus network and upgrading the City Spine route for tramway operation, cost-free allowances might be made now for the long-term evolution of the city's urban form and transport network by increasing the density limits in centres proximal to the existing heavy railways.</p>	Oppose

			Even if a dedicated suburban rail system was not built, or new track into the city centre laid, many of these station locations could be feasibly served even by commuter-oriented services serving a dual purpose of inter-regional travel between Dunedin and Christchurch, and commuter services across Greater Christchurch and other Canterbury urban centres like Timaru and Ashburton. Such inter-regional services seem increasingly likely to form part of a future low-emission, resilient passenger transport system, accommodating future population growth spread throughout the South Island, replacing, or complimenting the many trips currently made by car and plane, and this would help to create a more integrated, resilient, and prosperous South Island economy.	
Te Mana Ora/Community and Public Health/ #145.16		Support	Te Mana Ora supports the different proposals to support tree cover in the Housing and Business Choice Plan Change Consultation Document, including to update tree setbacks to better protect individual trees and to incentivise more tree planting, Financial Contributions, and the Schedule of Significant and Other Trees becoming a Qualifying matter.	
Ceres New Zealand, LLC/ #150.26		Oppose	Delete the Significant and other Trees overlay applied to 25 Peterborough Street and update Planning Map 32C and H10 accordingly.	
Jenny Crooks/ #159.2		Oppose	That 25a Greenhaven Drive, Burwood, be rezoned from Rural Urban Fringe Zone to residential (Medium Density Residential Zoning preferred).	
Jorge Rodriguez/ #178.2		Seek Amendment	Request that the claim that the St Albans area is a Low Public Accessibility Area be re-evaluated.	
Tom Logan/ #187.6		Seek Amendment	<i>[Regarding Riccarton Bush Interface Qualifying Matter]</i> reduce proposed area to <i>[the adjoining sites]</i> being 40 houses.	
Tom Logan/187.6	Anne Dingwall/ #FS2037.236	Seek Amendment	<p><i>[Regarding Riccarton Bush Interface Qualifying Matter]</i> reduce proposed area to <i>[the adjoining sites]</i> being 40 houses.</p> <p>We disagree with the extension of the Riccarton Bush interface. Allowing more houses in the Riccarton Bush area does not reduce the amenity but shares it. The danger of including this QM is that it solely benefits existing wealthy homeowners who can afford to live in the area by keeping house prices close to the Bush at unobtainable levels. The extension of the interface is justified by a desire to maintain views of the Bush from streets in the area. This mostly amounts to views of distant treetops, largely indistinguishable from the various street-trees and private plantings. The true amenity of the Bush is in its accessibility from the surrounding area, especially given it is intersected by the Uni-Cycle MCR. This accessibility would only be increased if more people were permitted to live within the general vicinity of the Bush, and as such the amenity provided by the Bush would increase.</p> <p>The application of the Riccarton Bush interface is at odds with the NPS-UD. <p>Riccarton Bush - Kilmarnock Residents' Association/ #188.7</p>		<p>Seek Amendment</p>	<p>[That the Riccarton Bush Interface QM Overlay is extended to include] the small residential area directly north of Riccarton House and Bush, bounded by Ngahere St, Totara St and Kahu Rd</p>  <p>The map shows a residential area north of Riccarton House and Riccarton Grounds. The area is bounded by Ngahere St to the south, Totara St to the west, and Kahu Rd to the east. The area is shaded in light blue and contains numerous residential lots, some of which are numbered. The map also shows other streets like Miro St, Titoki St, and various lot numbers such as 31B, 42, 48A, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200, 202, 204, 206, 208, 210, 212, 214, 216, 218, 220, 222, 224, 226, 228, 230, 232, 234, 236, 238, 240, 242, 244, 246, 248, 250, 252, 254, 256, 258, 260, 262, 264, 266, 268, 270, 272, 274, 276, 278, 280, 282, 284, 286, 288, 290, 292, 294, 296, 298, 300, 302, 304, 306, 308, 310, 312, 314, 316, 318, 320, 322, 324, 326, 328, 330, 332, 334, 336, 338, 340, 342, 344, 346, 348, 350, 352, 354, 356, 358, 360, 362, 364, 366, 368, 370, 372, 374, 376, 378, 380, 382, 384, 386, 388, 390, 392, 394, 396, 398, 400, 402, 404, 406, 408, 410, 412, 414, 416, 418, 420, 422, 424, 426, 428, 430, 432, 434, 436, 438, 440, 442, 444, 446, 448, 450, 452, 454, 456, 458, 460, 462, 464, 466, 468, 470, 472, 474, 476, 478, 480, 482, 484, 486, 488, 490, 492, 494, 496, 498, 500, 502, 504, 506, 508, 510, 512, 514, 516, 518, 520, 522, 524, 526, 528, 530, 532, 534, 536, 538, 540, 542, 544, 546, 548, 550, 552, 554, 556, 558, 560, 562, 564, 566, 568, 570, 572, 574, 576, 578, 580, 582, 584, 586, 588, 590, 592, 594, 596, 598, 600, 602, 604, 606, 608, 610, 612, 614, 616, 618, 620, 622, 624, 626, 628, 630, 632, 634, 636, 638, 640, 642, 644, 646, 648, 650, 652, 654, 656, 658, 660, 662, 664, 666, 668, 670, 672, 674, 676, 678, 680, 682, 684, 686, 688, 690, 692, 694, 696, 698, 700, 702, 704, 706, 708, 710, 712, 714, 716, 718, 720, 722, 724, 726, 728, 730, 732, 734, 736, 738, 740, 742, 744, 746, 748, 750, 752, 754, 756, 758, 760, 762, 764, 766, 768, 770, 772, 774, 776, 778, 780, 782, 784, 786, 788, 790, 792, 794, 796, 798, 800, 802, 804, 806, 808, 810, 812, 814, 816, 818, 820, 822, 824, 826, 828, 830, 832, 834, 836, 838, 840, 842, 844, 846, 848, 850, 852, 854, 856, 858, 860, 862, 864, 866, 868, 870, 872, 874, 876, 878, 880, 882, 884, 886, 888, 890, 892, 894, 896, 898, 900, 902, 904, 906, 908, 910, 912, 914, 916, 918, 920, 922, 924, 926, 928, 930, 932, 934, 936, 938, 940, 942, 944, 946, 948, 950, 952, 954, 956, 958, 960, 962, 964, 966, 968, 970, 972, 974, 976, 978, 980, 982, 984, 986, 988, 990, 992, 994, 996, 998, 1000.</p> <p>Figure 5 - Area to add to the RBIA</p>	
<p>Riccarton Bush - Kilmarnock Residents' Association/188.7</p>	<p>Tony Dale/ #FS2036.7</p>	<p>Seek Amendment</p>	<p>[That the Riccarton Bush Interface QM Overlay is extended to include] the small residential area directly north of Riccarton House and Bush, bounded by Ngahere St, Totara St and Kahu Rd</p>	<p>Support</p>

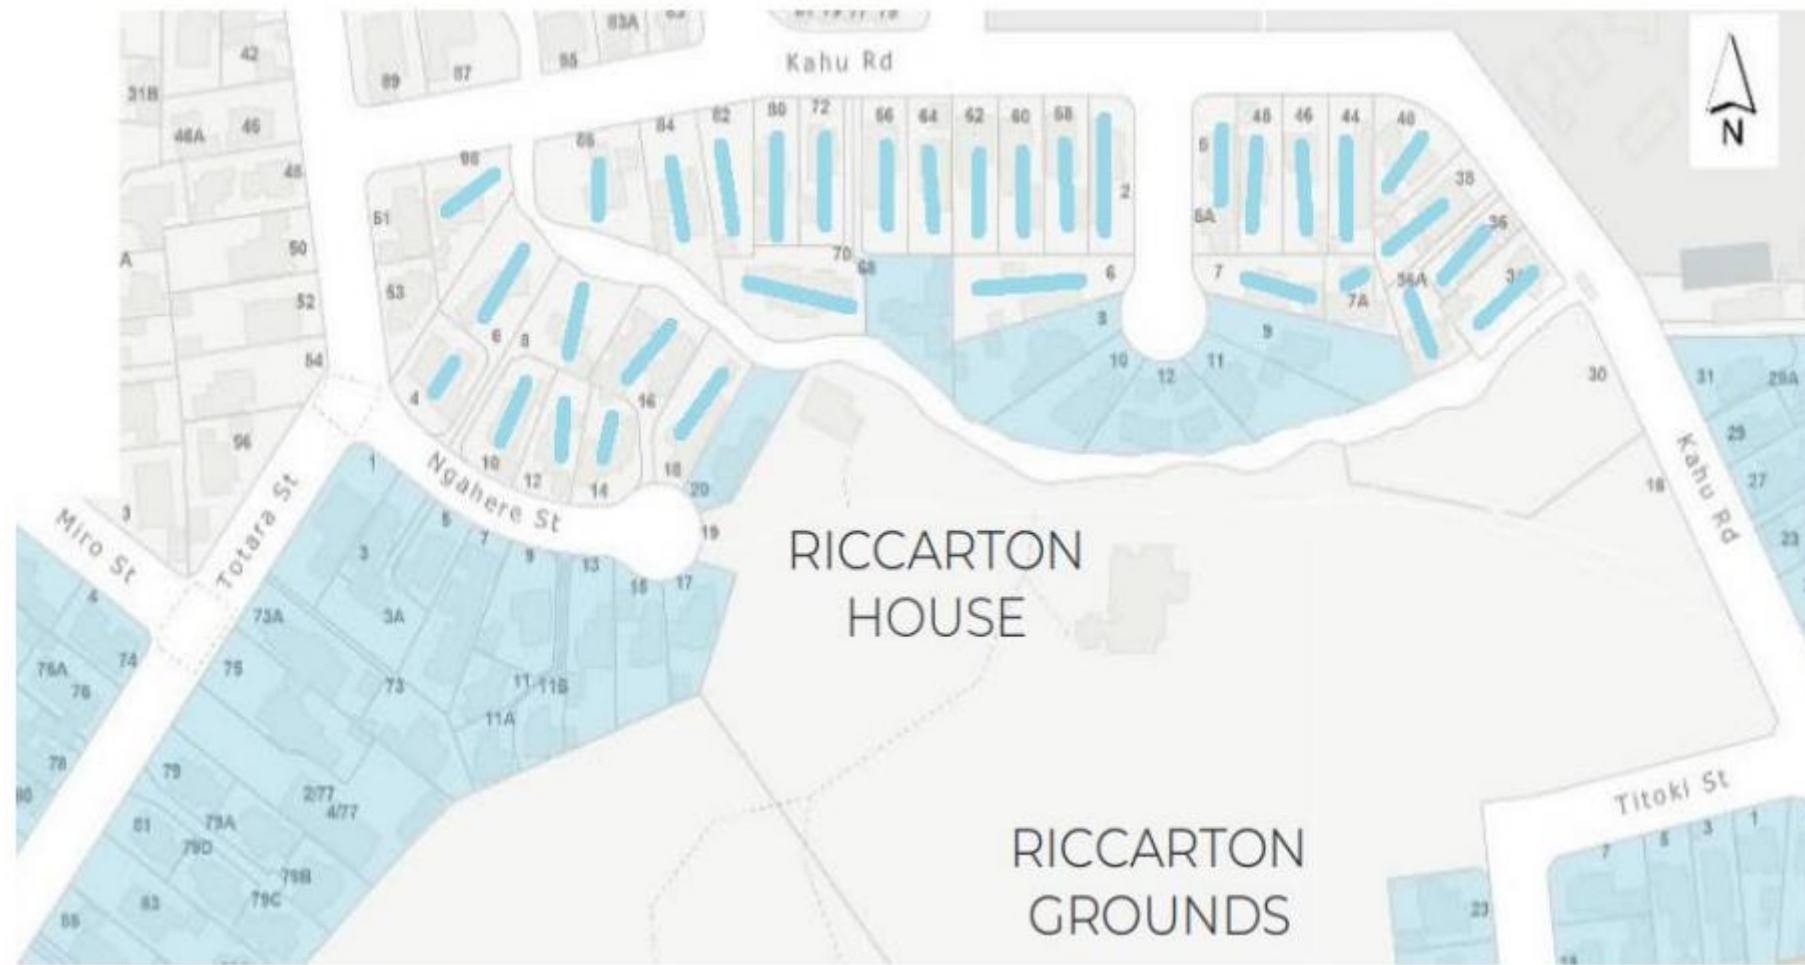

Figure 5 - Area to add to the RBIA

- recognising the importance of the views, setting, surroundings and context of the residential environment
- preserving its amenity and character
- for consistency with the Qualifying Matter proposed.

We submit WSP's Pūtarīngamotu - Riccarton Bush Heritage Landscape Review did not adequately consider the visual impact from the north. Taller buildings will block views [Fig 4] from both Kahu Rd and Kotare St. Nor did the report adequately assess the impact on views from Riccarton Bush grounds of 34, 36 and 36A Kahu Rd. This part of our submission is supported in an initial assessment by Landscape Architects, Kamo Marsh.

Neither did the WSP review consider the importance of including both sides of Ngahere St in the RBIA. It is a busy cul-de-sac, a major cycleway, and one of only two public access points to Riccarton House and Bush. Placing additional traffic, pedestrian and on-street parking pressure on this street is unreasonable, inappropriate and unsafe.

Figure 4 - The view looking south to Riccarton Bush and the grounds

The south side of Ngahere St is recommended by the city council to be part of the RBIA therefore, for consistency, so should the north side. It is also right to include all these sites in the RBIA because of their close proximity to Riccarton House and Bush, the Avon River, the historic Deans farmbuildings and the Christchurch Boys High School site.

Riccarton Bush - Kilmarnock Residents' Association/ #188.21		Seek Amendment	New Qualifying Matter for areas subject to frequent surface flooding	
Riccarton Bush - Kilmarnock Residents' Association/188.21	Anne Dingwall/ #FS2037.258	Seek Amendment	<p>New Qualifying Matter for areas subject to frequent surface flooding</p> <p>A number of streets in our area experience serious surface water flooding in prolonged moderate to heavy weather events and, of course, these are expected to occur more frequently. This is also a health issue because some residents report overloaded systems frequently mean they cannot flush toilets or drain showers until water levels recede.</p> <p>Streets commonly affected include ● Titoki St ● Kahu Rd ● Ngahere St ● Nikau Place ● Bradshaw Terrace ● Matai Street West [Note: some of these streets are not located within the current extent of the Flood Management Area Overlay]</p> <p>There appears to be no reference anywhere in PC14, nor are Qualifying Matters proposed, to protect against the on-going and growing risk and frequency of surface water flooding on many vulnerable Christchurch streets. The city council has admitted it will not be able to fix surface flooding issues on many of the Christchurch streets which are most frequently flooded in heavy rain. It can only mitigate flooding and, in some cases, the cost of doing that will be prohibitive.</p> <p>Infrastructure limitation and scientific climate change projections (including their effects) should be more of a consideration when considering Qualifying Matters where flooding is frequent, is expected to get worse and the problem cannot (or will not) be fixed. A Citywide Surface Water Flooding Update report [Appendix 5] from the CCC meeting agenda of 5 April 2023 shows the council is yet to investigate or prioritise this work. The report shows: ● The council has not prioritised flooding issues across the city or developed plans to fix them, although it does have a list of potential projects. ● Many of these projects will not be viable or feasible given their scale, technical challenges and the costs of the work relative to the benefits. ● It may be possible, from an engineering perspective, to significantly reduce flood risk in some ponding-prone streets but it may not be viable to do so. ● More work is needed to confirm if remedial work is viable or feasible at problem spots across the city.</p> <p>This could, we suggest, take years. In many cases we suspect the problems will never be fixed.</p>	Support

Riccarton Bush - Kilmarnock Residents' Association/ #188.24		Seek Amendment	[T]heentire area represented by the Riccarton Bush Kilmarnock Residents' Association should bedesignated a Qualifying Matter Pūtaringamotu-Riccarton Precinct.	
Riccarton Bush - Kilmarnock Residents' Association/188.24	Anne Dingwall/ #FS2037.261	Seek Amendment	<p>[T]heentire area represented by the Riccarton Bush Kilmarnock Residents' Association should bedesignated a Qualifying Matter Pūtaringamotu-Riccarton Precinct.</p>  <p><i>Figure 1 - Riccarton Bush Kilmarnock Residents' Association area</i></p> <p>RiccartonHouse is the original site of European settlement in Christchurch. Ngāi Tuahiwilived in the area before Europeans arrived. The area is a treasure because ittells a story of indigenous settlement, then European settlement, conflict,cooperation, and development. Despite change over time, much of the area'scharacter remains, and what is left should be protected. There are importantheritage buildings and trees scattered throughout old Riccarton. The precinctstill includes a large number of late 19th century to mid-20th centuryresidences plus:</p> <ul style="list-style-type: none"> • Mona Vale on the north-eastern boundary • BrittenStables • The city to university cycleway along Matai St West and Ngahere St. • Riccarton House and its surrounds (including the Kauri Cluster, Kahu Road andTotara Street) • Notable trees • The original Riccarton Estate farmbuildings • the historic Kahu Rd bridge • Janes Deans Close war memorial • Christchurch Boys High School buildings and war memorial • Most importantly,Pūtaringamotu, part of which the Deans family retained for preservation asRiccarton Bush. That stand of ngahere is a taonga and almost all that is leftof the original indigenous forests of the plains. <p>Theresidents in our area have already been through the intensification debate oncealready. There were lengthy proceedings prior to 2015, before an IndependentHearings Panel, considering the Christchurch Replacement DistrictPlan. Its deliberations were based on evidence, not government-imposeddictates. It ruled medium density was not appropriate in our area. Seven yearsafter that review we have enough houses in Christchurch and ample land on whichto build more. The argument today, in favour of more density across the entircity, is weak. There is nothing to suggest that panel's decisions, reachedafter thousands of pages of evidence were heard, should be overturned.</p> <p>Aspart of that same district plan review, Character Areas, formerly known asSpecial Amenity Areas or SAMs, were reassessed to identify whether theyremained distinctive with a residential character worthy ofretention. Character Area 7, was the area north of Riccarton Road and eastof Clyde Road, bounded by the Avon River to the north, and Riccarton Bush tothe south-east. It included Totara, Hinau, Miro and Konini Streets and majorsection of Puriri St. The report determined, given the circumstances atthe time, the existing character areas should not be retained. We think itwas a short-sighted decision. However, while it was determined there wereinsufficient groupings of properties for this area to be retained as aCharacter Area, the report did acknowledge the area has defining elements thatinclude; the quality of the streetscape, the large building setbacks, thevisual relationship to Riccarton Bush and the Avon River and the resultingunusual street layout.</p>	Support

			<p>Riccartonlandscape architect and New Zealand Institute of Landscape Architects member, Graham H. Densem BA DipLA (Cant) ANZILA supports the concept of a designated Pūtarīngamotu-Riccarton area that includes the wider area of Westfield Mall and surrounds, including residential areas and the bush. Such a plan he said would better identify more and less desirable development places. A step towards that, we submit, is to designate the Riccarton Bush Kilmarnock area a Qualifying Matter pending a more cohesive, planned, controlled approach to future development.</p>	
<p>Riccarton Bush - Kilmarnock Residents' Association/188.24</p>	<p>Christchurch International Airport Limited/ #FS2052.309</p>	<p>Seek Amendment</p>	<p>[T]he entire area represented by the Riccarton Bush Kilmarnock Residents' Association should be designated a Qualifying Matter Pūtarīngamotu-Riccarton Precinct.</p>  <p><i>Figure 1 - Riccarton Bush Kilmarnock Residents' Association area</i></p> <p>Riccarton House is the original site of European settlement in Christchurch. Ngāi Tuahiwi lived in the area before Europeans arrived. The area is a treasure because it tells a story of indigenous settlement, then European settlement, conflict, cooperation, and development. Despite change over time, much of the area's character remains, and what is left should be protected. There are important heritage buildings and trees scattered throughout old Riccarton. The precinct still includes a large number of late 19th century to mid-20th century residences plus:</p> <ul style="list-style-type: none"> • Mona Vale on the north-eastern boundary • Britten Stables • The city to university cycleway along Matai St West and Ngahere St. • Riccarton House and its surrounds (including the Kauri Cluster, Kahu Road and Totara Street) • Notable trees • The original Riccarton Estate farm buildings • the historic Kahu Rd bridge • Janes Deans Close war memorial • Christchurch Boys High School buildings and war memorial • Most importantly, Pūtarīngamotu, part of which the Deans family retained for preservation as Riccarton Bush. That stand of ngahere is a taonga and almost all that is left of the original indigenous forests of the plains. <p>The residents in our area have already been through the intensification debate once already. There were lengthy proceedings prior to 2015, before an Independent Hearings Panel, considering the Christchurch Replacement District Plan. Its deliberations were based on evidence, not government-imposed dictates. It ruled medium density was not appropriate in our area. Seven years after that review we have enough houses in Christchurch and ample land on which to build more. The argument today, in favour of more density across the entire city, is weak. There is nothing to suggest that panel's decisions, reached after thousands of pages of evidence were heard, should be overturned.</p> <p>As part of that same district plan review, Character Areas, formerly known as Special Amenity Areas or SAMs, were reassessed to identify whether they remained distinctive with a residential character worthy of retention. Character Area 7, was the area north of Riccarton Road and east of Clyde Road, bounded by the Avon River to the north, and Riccarton Bush to the south-east. It included Totara, Hinau, Miro and Konini Streets and major section of Puriri St. The report determined, given the circumstances at the time, the existing character areas should not be retained. We think it was a short-sighted decision. However, while it was determined there were insufficient groupings of properties for this area to be retained as a Character Area, the report did acknowledge the area has defining elements that include; the quality of the streetscape, the large building setbacks, the visual relationship to Riccarton Bush and the Avon River and the resulting unusual street layout.</p>	<p>Support</p>

Riccartonlandscape architect and New Zealand Institute of Landscape Architects member, Graham H. Densem BA DipLA (Cant) ANZILA supports the concept of adesignated Pūtarīngamotu-Riccarton area that includes the wider area ofWestfield Mall and surrounds, including residential areas and the bush. Such aplan he said would better identify more and less desirable development places. A step towards that, we submit, is to designate the Riccarton Bush Kilmarnockarea a Qualifying Matter pending a more cohesive, planned, controlled approach to future development.

Riccarton Bush - Kilmarnock Residents' Association/188.24

Kāinga Ora/ #FS2082.107

Seek Amendment

[T]heentire area represented by the Riccarton Bush Kilmarnock Residents' Association should be designated a Qualifying Matter Pūtarīngamotu-Riccarton Precinct.

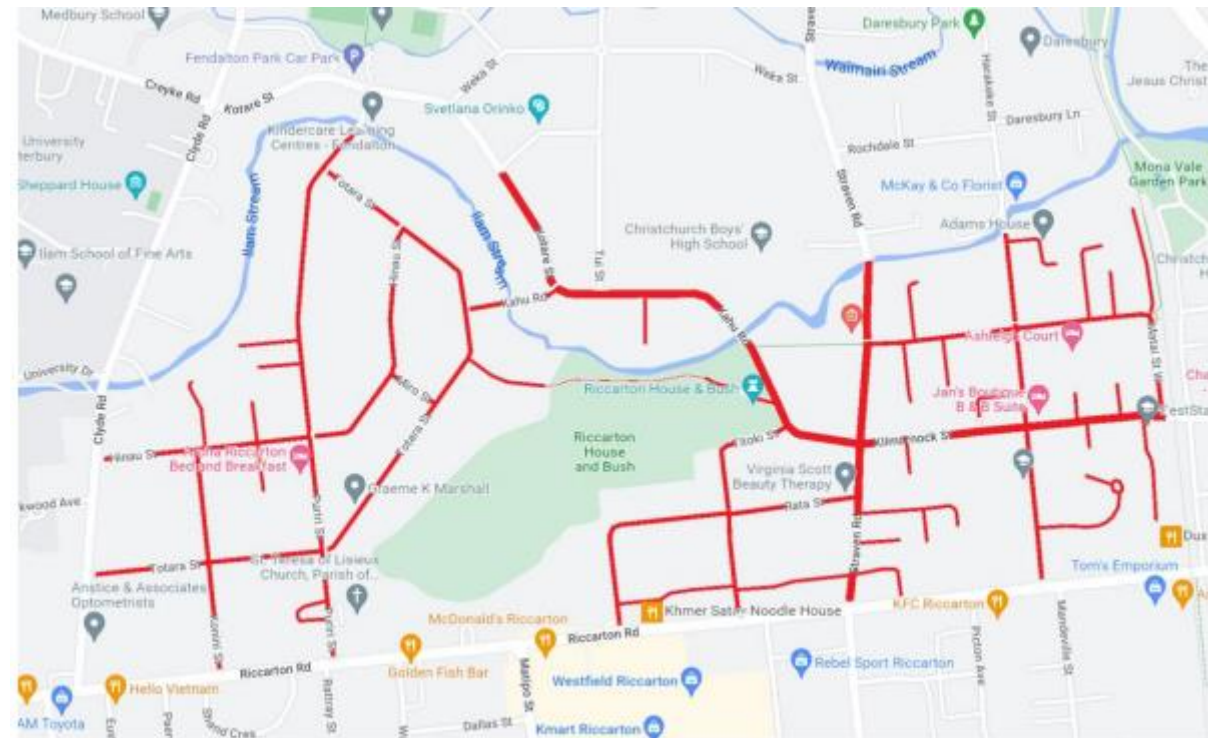

Figure 1 - Riccarton Bush Kilmarnock Residents' Association area

RiccartonHouse is the original site of European settlement in Christchurch. Ngāi Tuahiwilived in the area before Europeans arrived. The area is a treasure because it tells a story of indigenous settlement, then European settlement, conflict, cooperation, and development. Despite change over time, much of the area's character remains, and what is left should be protected. There are important heritage buildings and trees scattered throughout old Riccarton. The precinct still includes a large number of late 19th century to mid-20th century residences plus:

- Mona Vale on the north-eastern boundary
- Britten Stables
- The city to university cycleway along Matai St West and Ngahere St.
- Riccarton House and its surrounds (including the Kauri Cluster, Kahu Road and Totara Street)
- Notable trees
- The original Riccarton Estate farm buildings
- the historic Kahu Rd bridge
- Janes Deans Close war memorial
- Christchurch Boys High School buildings and war memorial
- Most importantly, Pūtarīngamotu, part of which the Deans family retained for preservation as Riccarton Bush. That stand of ngahere is a taonga and almost all that is left of the original indigenous forests of the plains.

The residents in our area have already been through the intensification debate once already. There were lengthy proceedings prior to 2015, before an Independent Hearings Panel, considering the Christchurch Replacement District Plan. Its deliberations were based on evidence, not government-imposed dictates. It ruled medium density was not appropriate in our area. Seven years after that review we have enough houses in Christchurch and ample land on which to build more. The argument today, in favour of more density across the entire city, is weak. There is nothing to suggest that panel's decisions, reached after thousands of pages of evidence were heard, should be overturned.

As part of that same district plan review, Character Areas, formerly known as Special Amenity Areas or SAMs, were reassessed to identify whether they remained distinctive with a residential character worthy of retention. Character Area 7, was the area north of Riccarton Road and east of Clyde Road, bounded by the Avon River to the north, and Riccarton Bush to the south-east. It included Totara, Hinu, Miro and Konini Streets and major section of Puriri St. The report determined, given the circumstances at the time, the existing character areas should not be retained. We think it was a short-sighted decision. However, while it was determined there were insufficient groupings of

			<p>properties for this area to be retained as a Character Area, the report did acknowledge the area has defining elements that include; the quality of the streetscape, the large building setbacks, the visual relationship to Riccarton Bush and the Avon River and the resulting unusual street layout.</p> <p>Riccarton landscape architect and New Zealand Institute of Landscape Architects member, Graham H. Densem BA DipLA (Cant) ANZILA supports the concept of a designated Pūtarīngamotu-Riccarton area that includes the wider area of Westfield Mall and surrounds, including residential areas and the bush. Such a plan he said would better identify more and less desirable development places. A step towards that, we submit, is to designate the Riccarton Bush Kilmarnock area a Qualifying Matter pending a more cohesive, planned, controlled approach to future development.</p>	
Matt Edwards/ #189.6		Seek Amendment	Reduce the area of the Ric Bush interface back to the current level of 40 sites.	
Matt Edwards/189.6	Christchurch International Airport Limited/ #FS2052.244	Seek Amendment	<p>Reduce the area of the Ric Bush interface back to the current level of 40 sites.</p> <p>We disagree with the extension of the Riccarton Bush interface. Allowing more houses in the Riccarton Bush area does not reduce the amenity but shares it. The danger of including this QM is that it solely benefits existing wealthy homeowners who can afford to live in the area by keeping house prices close to the Bush at unobtainable levels. The extension of the interface is justified by a desire to maintain views of the Bush from streets in the area. This mostly amounts to views of distant treetops, largely indistinguishable from the various street-trees and private plantings. The true amenity of the Bush is in its accessibility from the surrounding area, especially given it is intersected by the Uni-Cycle MCR. This accessibility would only be increased if more people were permitted to live within the general vicinity of the Bush, and as such the amenity provided by the Bush would increase.</p> <p>The application of the Riccarton Bush interface is at odds with the NPS-UD. NPS-UD allows for QM to restrict development in “open space provided for public use, but only in relation to the land that is open space” (NPS-UD 2020 3.32 1 (d)) or “an area subject to a designation or heritage order but only in relation to the land that is subject to the designation or heritage order” (NPS-UD 2020 3.32 1 (e)). This QM is applying density control to sites not included in the protected extent of either Riccarton Bush, nor the surrounding grounds of Riccarton House, nor land zoned as open space. The Section 32 report mentions that solely limiting the interface to adjoining sites (rather than the much greater area proposed in the QM) would have the effect of “...ensuring that Riccarton Bush is protected from the effects of medium density development” and that “the values of Riccarton Bush itself would not be degraded”, and “this approach is effective at addressing the issue”. This option should have been implemented in the QM, rather than the expansive area that is currently proposed.</p>	Oppose

This aligns with my experience in the area. In recent years we have had issues such as: <ol style="list-style-type: none"> Flooding, with the Wairarapa stream having risen to the bottom of bridges several times. If it broke its banks it would flood Queens Avenue and Garden Road. Stormwater systems have clearly been at capacity, with some overflow. In recent flooding events a neighbouring section has been almost entirely covered in surface water flooding. As night follows day, a site with intensive housing development generates more stormwater, due to increased hardstand area (three houses compared with one), and reduced area available for landscaping and lawn that slows stormwater transfer to the public system. This area is an identified Flood Management Area in the District Plan. In particular, this means that new builds sit significantly higher than adjacent older homes. These older homes will be particularly at risk from future flooding if housing intensification is allowed to occur, as the increased stormwater run-off will exacerbate existing flooding issues. 	Oppose
William Bennett/ #255.5		Seek Amendment	Introduce a TC3 land QM.	
William Bennett/255.5	Kāinga Ora/ #FS2082.212	Seek Amendment	<p>Introduce a TC3 land QM.</p> <p>In addition, we note that there may also be further constraints to High (or even Medium) Density development in the area, which is identified as TC3 land and much of which is also in the Council’s own Flood Plain overlay. That is not to mention potential parking issues that would likely be created if there was a proliferation of High Density accommodation.</p> <p>We acknowledge that this may not be the only area in Christchurch that holds these fears. We are firmly of the view that such views should not be unnecessarily discounted, where they can be justified.</p>	Oppose

Stephen Bryant/ #258.1		Seek Amendment	Additional traffic impact qualifying matter for developments around small feeder streets inMerivale due to narrowness of existing streets.	
Stephen Bryant/258.1	Anne Dingwall/ #FS2037.347	Seek Amendment	<p>Additional traffic impact qualifying matter for developments around small feeder streets inMerivale due to narrowness of existing streets.</p> <p>I believe the PC14 planning document prepared by the Council requires further changes. I have focused on the effects on Merivale but the points related to Recession planes and Privacy/Overshadowing are general.</p> <p>Traffic</p> <p>The proposed plan change designates Merivale a Significant Town Centre (more on this below). This will allow residential buildings to be built to a height of 20m with a minimum set back of 1m on side boundaries. More particularly there is no requirement for parking spaces on site. Recent experience with multi unit housing shows these cars will be semi permanently parked on the roads. There can be no doubt that the people in the proposed new high rise developments will have cars – Christchurch, as recently reported, has the poorest uptake of public transport of all the major cities. The working from home trend increases the problem. The roads around Merivale Village, because of their longevity, are much narrower than is normal for Christchurch. It is important that city planners and traffic planners familiarise themselves with the narrow size of Cox St, Stirling St, Akela St, Office Rd (especially by the Mall), Rugby St (especially off Papanui Rd), Winchester St (by St Margarets), Andover St, Tonbridge St, Rastrick St, Shrewsbury St and Merivale Lane. These streets do not allow traffic to pass by with cars parked on either side. Some would struggle to allow 1 car to pass with cars parked on both sides. It is no use allowing significant intensification here when the narrow roading infrastructure simply will not support it. Traffic impact should be a qualifying matter for developments around these small feeder streets in Merivale. A precedent has been set on a significant suburban issue as a residential housing qualifying matter with the Shirley vacuum pump system storm water limit.</p>	Support

Ivan Thomson/ #324.2		Seek Amendment	Confirm the Waterway Setback that applies to Pope's Drain is 5m.	
Jono de Wit/ #351.2		Seek Amendment	Seek to remove or significantly reduce the size of Riccarton Bush Interface Qualifying Matter is removed completely or reduced in size significantly so it is only on the north side of Riccarton bush - furthest away from the public transport corridor and town centre of Riccarton Road.	
Jono de Wit/351.2	Christchurch International Airport Limited/ #FS2052.241	Seek Amendment	Seek to remove or significantly reduce the size of Riccarton Bush Interface Qualifying Matter is removed completely or reduced in size significantly so it is only on the north side of Riccarton bush - furthest away from the public transport corridor and town centre of Riccarton Road. I generally support the changes to zoning and rules to allow people to build housing with higher density and more storeys on their land because it will allow the city to grow and house it's people without continually sprawling further and further out. It should result in more housing where people want to live for more affordable prices. It will allow more people to live closer to public transport, work and shops which will mean more people will be able to have a viable choice of taking public transport, walking or biking instead of adding to traffic jams. I do not support the Riccarton Bush interface qualifying matter because I do not believe it meets the strict requirements for a qualifying matter and it will have a large negative effect on the density which will be able to be built around the important Riccarton Road transport corridor and close to Riccarton central. It makes no sense to plan mass rapid transport down Riccarton road while at the same time severely limiting the amount of housing which can be built on the northern side of it in central Riccarton. I do not believe this QM is in the interest of the city or the people who may want to live close to Riccarton and the future MRT there. I do not support the sunlight QM because it will delay the MDRS and the tree financial contributions from taking effect and will likely result in a worse built form especially in the six storey zones due to the setbacks and recession planes required. I would support a sunlight QM if it had the same boundaries as the transport access QM so that it did not delay the MDRS in the most important areas and does not reduce the density able to be built in the six storey zones. The area north of Riccarton road and west of Straven Road should be HRZ not MRZ because limiting density near a main public transport route that is so close to Riccarton central and on a planned MRT route does not make sense. This should be where apartments are	Oppose

			<p>allowed to be built! I think the area of Riccarton road between Riccarton and Church Corner town centres should be included in the six storey zone. This will be an MRT route and it needs to be allowed to build apartments close to it. It does not make sense to have the HRZ zone go all the way south to Blenheim Road in Riccarton central, but then only have MRZ right on Riccarton road slightly West of Riccarton central. This is the area where I currently live. I think the Airport Noise Influence Area should be moved further back from Riccarton road to allow higher density close to this important public transport route. I do not support the Residential Heritage Area QM south of Shand Crescent in Riccarton for the same reasons. I do not think this area meets the threshold to be a protected area especially when it is located so close to Riccarton Road public transport corridor. I think the walkable catchment distances from town centres should be increased because they are quite short at the moment and allowing more people to live close to these centres will be a good thing.</p>

David Murison/ #692.10		Seek Amendment	<p>I urge Council to identify the area of Strowan, particularly those blocks in the vicinity of St Andrews College, as worthy of definition as an area which warrants zoning as MRZ not HRZ as proposed in PC14, as the impact on infrastructure demand and amenity values under HRZ is significantly greater than under MRZ.</p> <p>I seek that this change be made by way of ‘Area limited by Qualifying Matters’ or other appropriate means</p>	
David Murison/692.10	Kāinga Ora/ #FS2082.443	Seek Amendment	<p>I urge Council to identify the area of Strowan, particularly those blocks in the vicinity of St Andrews College, as worthy of definition as an area which warrants zoning as MRZ not HRZ as proposed in PC14, as the impact on infrastructure demand and amenity values under HRZ is significantly greater than under MRZ.</p> <p>I seek that this change be made by way of ‘Area limited by Qualifying Matters’ or other appropriate means</p> <p>I urge Council to identify the area of Strowan, particularly those blocks in the vicinity of St Andrews College, as worthy of definition as an area which warrants zoning as MRZ not HRZ as proposed in PC14, as the impact on infrastructure demand and amenity values under HRZ is significantly greater than under MRZ.</p> <p>I seek that this change be made by way of ‘Area limited by Qualifying Matters’ or other appropriate means for the following reasons:</p> <ul style="list-style-type: none"> the area has existing significant infrastructure issues (including carparking, vehicle congestion, flooding issues which impact both stormwater and wastewater systems); the presence of St Andrews’ College is important. Whilst the College undoubtedly enhances and reinforces the character of the neighbourhood, the impact of its attraction to families across the city as providing education of a ‘special character’, means that the College’s current and future growth places pressure on the local community (in terms of carparking, traffic congestion) the amenity value of the neighbourhood would be negatively impacted. There is a character of older quality housing on larger than average sections which reinforces the reality of open space, and recent low rise (typically two storey), new housing developments of a consistent appropriate quality suitable for families, where many existing trees have been retained with on-site carparking provided; the sense of community which is present and increasing would be undermined by the scale of intensification which is proposed under HRZ; there are a number of prominent trees remaining in the neighbourhood which reinforces the quality of open space and clearly supports the Council’s Urban Forest Plan 2023 initiative; but which would inevitably be threatened with the high level of intensification under HRZ as proposed in Plan Change 14. <p>Noting that the following extract is taken from Council’s PC14 documentation</p> <p><i>Areas limited by Qualifying Matters</i></p> <p><i>Not all parts of our city are suitable for the level of increased development. Some areas have qualities, known as Qualifying Matters, which mean rules enabling increased development will be modified to maintain and protect those qualities or manage their effects.</i></p> <p><i>This may include keeping a lower level of residential density and building heights, or managing development through specified matters and resource consent conditions</i></p> <p>[Please refer to attachment for full submission]</p>	Oppose

			<p>Seeks that Council identify the area of Strowan, particularly those blocks in the vicinity of St Andrews College, as worthy of definition as an area which warrants zoning as Medium Density Residential Zone not High Density Residential Zone. Seek that this change be made by way of 'Area limited by Qualifying Matters' or other appropriate means</p> <p>I urge Council to identify the area of Strowan, particularly those blocks in the vicinity of St Andrews College, as worthy of definition as an area which warrants zoning as MRZ not HRZ as proposed in PC14, as the impact on infrastructure demand and amenity values under HRZ is significantly greater than under MRZ.</p> <p>I seek that this change be made by way of 'Area limited by Qualifying Matters' or other appropriate means for the following reasons:</p> <ul style="list-style-type: none"> the area has existing significant infrastructure issues (including carparking, vehicle congestion, flooding issues which impact both stormwater and wastewater systems); the presence of St Andrews' College is important. Whilst the College undoubtedly enhances and reinforces the character of the neighbourhood, the impact of its attraction to families across the city as providing education of a 'special character', means that the College's current and future growth places pressure on the local community (in terms of carparking, traffic congestion) the amenity value of the neighbourhood would be negatively impacted. There is a character of older quality housing on larger than average sections which reinforces the reality of open space, and recent low rise (typically two storey), new housing developments of a consistent appropriate quality suitable for families, where many existing trees have been retained with on-site carparking provided; the sense of community which is present and increasing would be undermined by the scale of intensification which is proposed under HRZ; there are a number of prominent trees remaining in the neighbourhood which reinforces the quality of open space and clearly supports the Council's Urban Forest Plan 2023 initiative; but which would inevitably be threatened with the high level of intensification under HRZ as proposed in Plan Change 14. <p>Noting that the following extract is taken from Council's PC14 documentation</p> <p><i>Areas limited by Qualifying Matters</i></p> <p><i>Not all parts of our city are suitable for the level of increased development. Some areas have qualities, known as Qualifying Matters, which mean rules enabling increased development will be modified to maintain and protect those qualities or manage their effects.</i></p> <p><i>This may include keeping a lower level of residential density and building heights, or managing development through specified matters and resource consent conditions</i></p> <p>[Please refer to attachment for full submission]</p>

The Board of Trustees of the Te Ara Koropiko West Spreydon School / #815.1		Seek Amendment	Request that proximity to a Primary School is introduced as a Qualifying Matter.	
The Board of Trustees of the Te Ara Koropiko West Spreydon School /815.1	Kāinga Ora/ #FS2082.673	Seek Amendment	<p>Request that proximity to a Primary School is introduced as a Qualifying Matter.</p> <p>The Board of Trustees of the Te Ara Koropiko West Spreydon School wish to submit in opposition of the introduction of the MDRZ (Medium Density Residential Zone) without due consideration for the impact on Primary Schools in suburban Christchurch.</p> <p>The Ministry of Education, together with other government stakeholders, funded a rebuild of Te Ara Koropiko West Spreydon School less than 5 years ago. This modern, purpose-built campus is beloved by the community and has been designed to provide a state-of-the-art place of learning for up to 358 students. We are currently looking to have just 270 enrolled by June.</p> <p>The below roll data is based on the 1st of July (July Roll Return Date)</p> <p>2023 - 263 (as of 10.05.23)</p> <p>2022 - 263</p> <p>2021 - 288</p> <p>2020 - 289</p> <p>2019 - 292</p> <p>2018 - 324</p> <p>We have seen a steady reduction of our school roll in the last 3 years, with anecdotal evidence from leavers stating that to be able to secure the 3- and 4-bedroom homes they wish to raise their families in, they must leave the area.</p> <p>We understand that people wishing to buy a home near the school are facing significant barriers, as the buying power of developers has pushed prices up.</p>	Oppose

			<p>This article (https://www.stuff.co.nz/life-style/homed/renting/131298574/is-christchurchs-rental-market-under-pressure-from-aucklanders) well describes the shortage of 3- and 4- bedroom homes available to rent juxtaposed with the oversupply of townhouses.</p> <p>The broad implementation of a MDRZ across Christchurch suburbs will exacerbate this issue exponentially and have a dramatic impact on our – and other - school rolls, ultimately leading to the loss of Kaiako FTEs and other funding.</p> <p>Te Ara Koropiko West Spreydon School is at the centre of our community and should be valued as such. If we do not safeguard the future of our school, the Board is concerned that not only will this be detrimental to our school, but will also lead to the community losing its special character. As a Board we are particularly concerned about the impact this will have on whānau Māori and tamariki Māori, and importance of preserving and enhancing whanaungatanga, and ensuring equitable access to high quality housing and education.</p> <p>We strongly believe that access to high quality education is the right of every child in New Zealand - no-one has the right to take that away. However, with the way school funding works, we are at risk of losing both management units and staff due to our roll decreasing. This does not happen nicely where it is simply a matter of one less class, but rather creates staffing difficulties that prevent students being able to access good quality teaching at all times. At Te Ara Koropiko West Spreydon School, we have worked hard to create a culture of community engagement and connection and we are committed to seeing this continue and grow. We do not believe that more 1- and 2- bedroom apartments will be beneficial to building a strong and resilient community as anecdotally, it seems it is driving our precious families out of our suburb.</p> <p>Based on the above article, this appears to be a wider issue, and our suggestion is that all suburban primary schools are protected from the impacts of increased densification.</p>

			<p>The commercial area north of Riccarton Rd in the Riccarton centre should be height-restricted to a height that is inappropriate given the proximity of low-rise residential dwellings immediately to the north.</p> <p>I agree with the points made in the RBK submission [188].</p> <p>In addition the proposed phalanx of high rise allowed along Riccarton Road would turn the road into a very unpleasant environment on a regular basis since it would allow for a wind tunnel effect for the prevailing Christchurch easterly winds which are strong and invariably cold. The same effect would come with the westerlies especially unpleasant when raining. A plethora of 5-6 storey buildings would also cause major issues in an earthquake event.</p>	
<p>Robert Leonard Broughton/ #851.13</p>		<p>Seek Amendment</p>	<p>Establish a planned Putaingamotu-Riccarton Precinct as a new qualifying matter.</p> 	
<p>Robert Leonard Broughton/851.13</p>	<p>Riccarton Bush Kilmarnock Residents Association ./ #FS2062.43</p>	<p>Seek Amendment</p>	<p>Establish a planned Putaingamotu-Riccarton Precinct as a new qualifying matter.</p>	<p>Support</p>

In the absence of a properly assessed plan for intensification and development in Riccarton, the entire area represented by the Riccarton Bush Kilmarnock Residents' Association (RBK) should be designated a Qualifying Matter, with current zonings maintained as agreed in the Christchurch Replacement District Plan Review of 2015, pending a comprehensive planning review. I strongly support the argument in item 12 of the same heading in the RBK presentation [submission 188].

A strong argument for this proposal is that this area is a **community, it is also a character/heritage area.**

Community

It would be difficult to ignore the effect a community has on its area. **Community values help define the character of an area.** The area given by the Riccarton Bush – Kilmarnock Residents' Association (refer its submission) to the north of Riccarton Road and including the Riccarton House and Bush, has predominantly owner occupied properties many with long standing residents. It is a diverse community of different age groups, encompassing older retired residents and families of various ages. As the CCC planners discovered at the previous attempt to change the zoning when a large number of residents attended the planning meeting in the Chateau, there is a **strong sense of community**. The anger at these current proposals was also evident at a recent meeting attended by residents of all ages. Residents know one another, stop to talk whilst walking in the area, and look out for one another. The residents are also proud of their area and look after their properties and the CCC areas such as the grass berms and planting. Indeed residents have won garden awards. Also the residents recognise the need to protect Riccarton Bush.

This Riccarton Bush surrounding area encompasses a wide variety of buildings with old character homes (some dating from the 1920s) both single and two storey, new architect designed homes, smaller units, town houses, and revamped older homes. The materials used in construction vary from traditional wooden weatherboard to brick and modern materials. Older character homes have distinctive brick chimneys and slate roofs whilst newer homes have modern profile colour steel. Basically there is a diverse mixture of old and new, well-spaced buildings, contributing to a general positive ambience. The land occupancy varies. There are larger sections, medium sections and small sections. Infill has occurred over time replacing older buildings with multiple new buildings. However there have been new family homes built on bigger sites. The

current Residential Suburban (formerly Living 1) zoning has controlled the nature of the infill thus contributing to the essential character of this area. However the density of dwellings/apartments has considerably increased over the years. The result has been so far a **balanced increase in keeping with the area.**

There has been an influx of people of all ages including families who sought to live in the area precisely for the reasons given. Yes it is close to commercial and educational facilities as well as greenspace. The area boasts a very useful cycle route from the University, through the Riccarton House grounds, along Matai Street, and hence through Hagley Park to the city centre area. This gives access to a significant number of educational sites, heritage sites, Hagley Park, and the central city area. At least one cycleway success story that will be set back if this intensification goes through.

Character and Residential Heritage Areas.

Character arguments largely revolve around the historical significance of what was a large part of Christchurch's founding Riccarton Borough, and the remaining character gems in the area. Our last remnant stand of swamp dwelling kahikatea, Pūtaringamotu is the Māori name for the area now known as Dean's Bush. Maori of Ngāi Tūāhuriri, a sub-tribe of Ngāi Tahu, occupied the land which became part of the Deans family farm in the 1800s. The area was named Riccarton after the area the Deans came from in Scotland. Beginning in the 1880s the Deans began to sell the Riccarton property. The naming of the streets in the area was designed to showcase the Maori names of trees in keeping with the history of the area. For example Rata Street appears on a 1912 map and in street directories in 1914. One resident is listed.

The City Council went to considerable effort in 2007 (Consultation Letter April 2007) to reconstruct the streets to make the area known as the Kauri Cluster a community based area acknowledging amenity. In doing so the Council reinforced the street names by planting Kauri, Rata and Rimu trees on the newly established grass berms. These trees are now of good size and the Rata trees have been in full bloom. It would be criminal if the fine landscaping carried out was destroyed. The area is a popular community amenity for walkers, cyclists, and indeed tourists as well as home for an established Farmers' market in the grounds of Riccarton House on Saturday mornings.

The wider area is tree-filled. Home to the many varieties of birds that connect with the Bush area. It contains numerous examples of quality character pre-war housing as well as a number of significant sites including Mona Vale, Britten Stables, original Riccarton Estate farm buildings, two war memorials, Christchurch Boys High School and, of course, the iconic and unique Avon River and Riccarton House and the last remaining area of original native Bush.

There are a number of studies on Neighbourhood Character (refs: Moonee Valley Character Study 2012, City of Moonee Valley, Victoria, Australia; Higham Ferrers Neighbourhood Plan- Preserving our Past and Enhancing our Future, September 2014; Higham Ferrers, East Northamptonshire, England. (<http://www.highamferrersneighbourhoodplan.org.uk>)) are two that have drawn extensively on other studies.

Of special interest is Chapter 3 in the Moonee Valley Report, WHAT IS A NEIGHBOURHOOD CHARACTER (Appendix A). The basis of the Moonee Valley Report was the definition: "**Neighbourhood character is the qualitative interplay of built form, vegetation and topographic characteristics, in both the private and public domains that make one place different from another**".

Access to open space is often considered an essential part of an area's character.

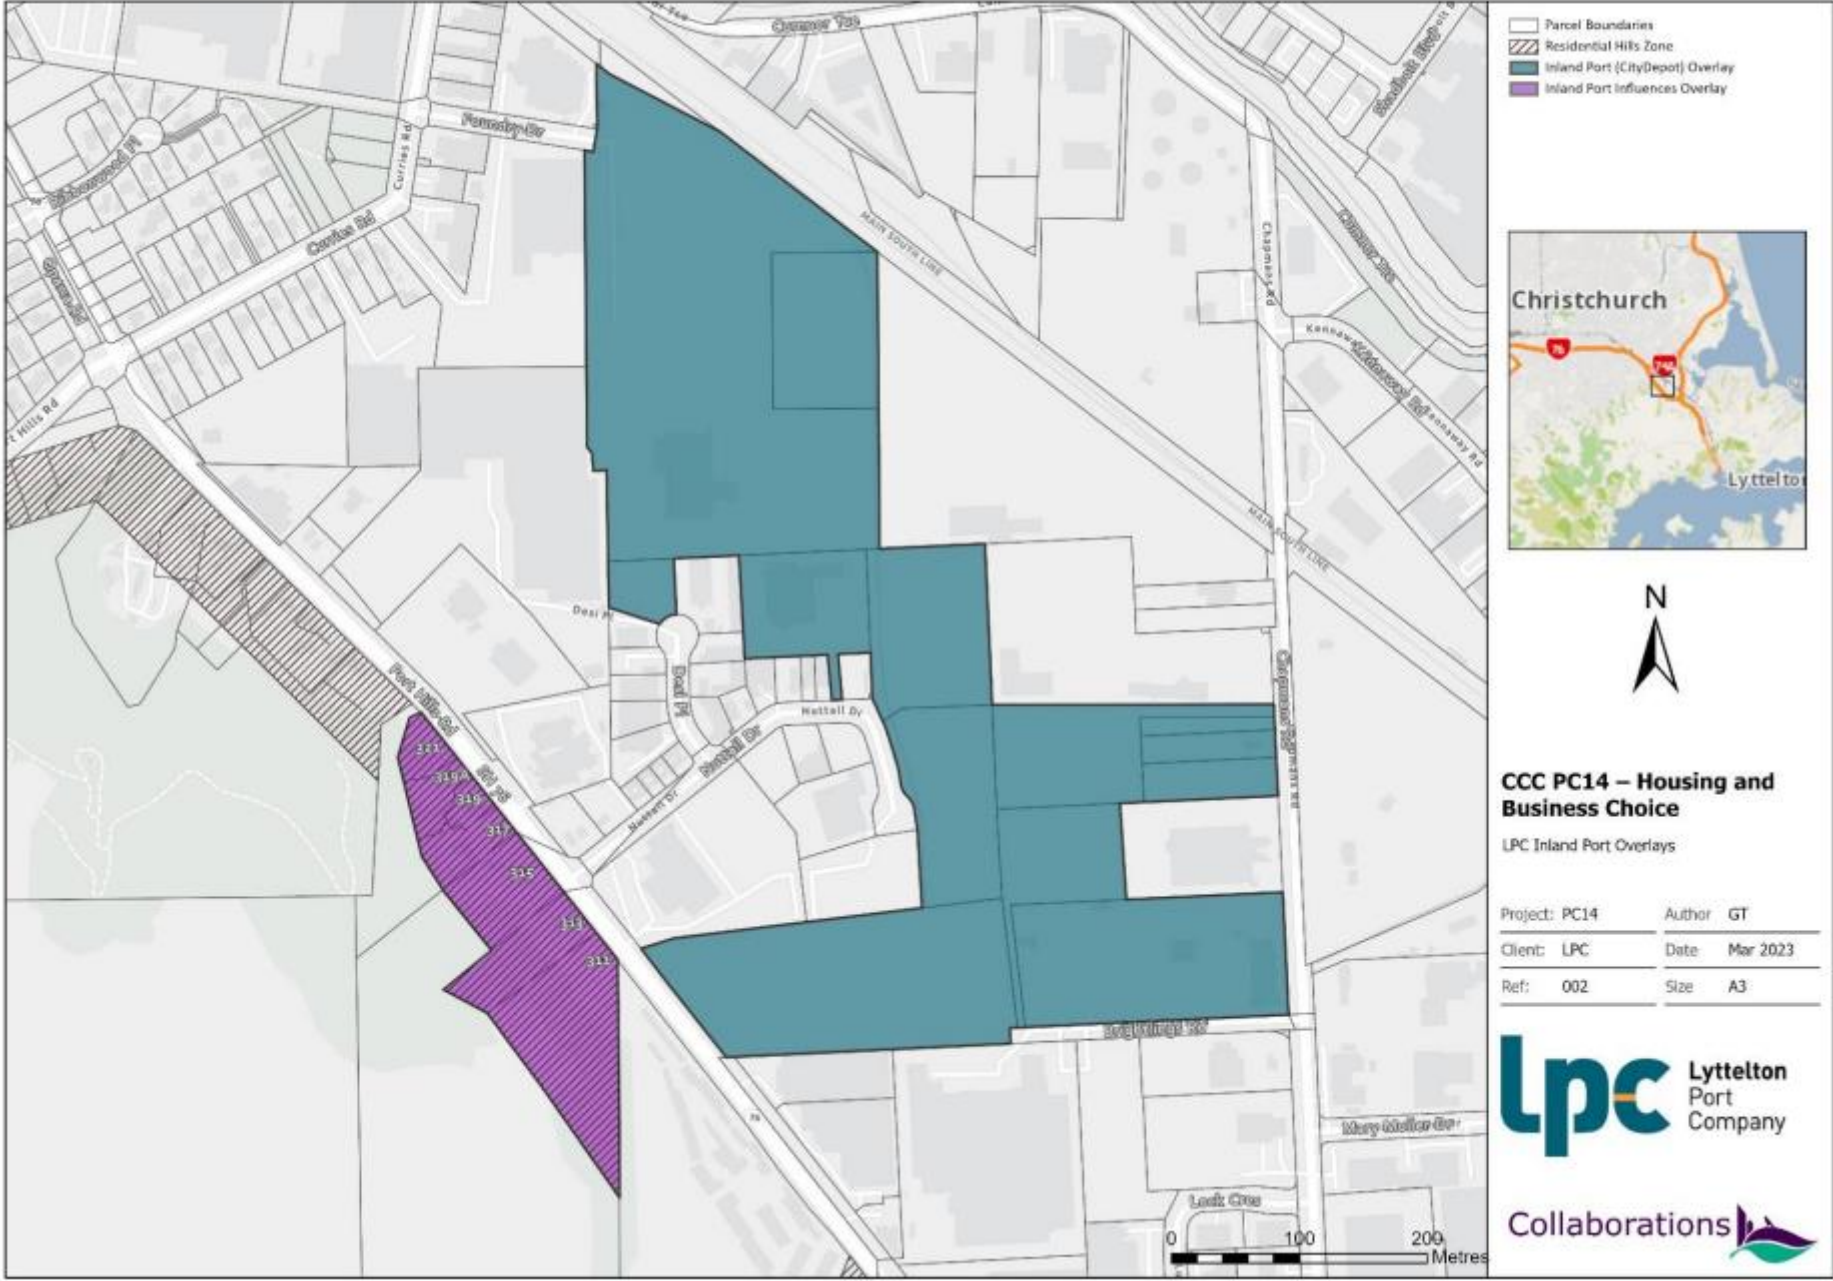

The differentiation between different types of character areas is not simply a question of architectural style or era of development and certainly not dictated by a set of absolute rules. Neighbourhood character is also founded on the siting and building form of the area, and the way that the buildings interact with and relate to the landscape. These factors should be the basis for the application of neighbourhood character policies. Neighbourhood character is not about the imposition of design styles. Rather it should be about recognising the distinctive characteristics of different urban forms and their relationship to topography and vegetation. Getting this right is the best way of maintaining and enhancing the sense of place of the municipalities' residential areas. Neighbourhood character descriptions and evaluations should focus on the preferred character.

The City Council invited and encouraged residents in 2015 to submit the area for the newly created Category 2 Character Area. On the basis of this encouragement considerable effort was made in a comprehensive submission. This was turned down.

At each time, our community strongly disagreed with the consultant's opinion. We still do. A methodology for assessing character and heritage should be a methodology the community can agree on. Character and heritage is not about ticking boxes. It is very much in the eye of the beholder and community views should always be given considerable weight. It is time for Christchurch planners to look elsewhere in the world for what constitutes character in the 21st century and is worth maintaining for the future. Will our grandchildren ask why the old photographs show an area that no longer exists because of draconian, not to say blinkered, planning.

The draconian and poorly planned development to the south of the Westfield Mall should give the panel food for thought as to what happens when unbridled development is allowed.

Yes, RBK area needs to be designated a Qualifying Matter. Because of its significance to Christchurch, it needs protection. Riccarton is an historic part of Christchurch. The area is tree-filled. It contains numerous examples of quality character pre-war housing as well as a number of significant sites including Mona Vale, Britten Stables,

			original Riccarton Estate farm buildings, two war memorials, Christchurch Boys High School and, of course, the iconic and unique Avon River and Riccarton House and Bush. Leave these residential zones as they are.

Guy Mortlock/ #32.2		Seek Amendment	Rezone the block bounded by Creyke Road, Ilam Road, Wilfrid Street and Barlow Street from Residential Suburban Zone to either Medium Density Residential Zone or Residential Suburban Density Transition Zone	
Guy Mortlock/32.2	Christchurch International Airport Limited/ #FS2052.123	Seek Amendment	Rezone the block bounded by Creyke Road, Ilam Road, Wilfrid Street and Barlow Street from Residential Suburban Zone to either Medium Density Residential Zone or Residential Suburban Density Transition Zone The Airport Noise qualifying matter is being given too much emphasis with the result that areas of Christchurch that should be available for higher density housing are inappropriately being excluded from such development. In particular the block bounded by Creyke Road, Ilam Road, Wilfrid Street and Barlow Street should be zoned either MRZ or RSdT. I work in an office on the corner of Ilam Road and Creyke Road and hardly ever hear airplanes. I also live in a property closer to the airport (on the boundary of the noise qualifying matter) and hardly ever hear airplanes - which suggests that the boundary is unnecessarily conservative. There is steady demand for all the rentals in this area (not only from University students but also University employees and visitors) and re-development with higher density would help fill that demand. I note that Ilam Road is going to have its speed limit reduced and cycle lanes installed making it a more pleasant residential area - so it makes sense to have as many people living in this area as possible (rather than living further away and having to commute to the University). Airplanes are getting quieter over time - but the airport noise zones are not getting smaller.	Oppose
Alana Harper/ #36.4		Support	Cashmere Estate in Cracroft should remain Residential Hills Zone or be Future Urban Zone.	
Shirley van Essen/ #54.6		Seek Amendment	The airport noise contour to be widened to include 34, 36A and 38 Kahu Road, and more properties west and south of Kahu Road between the two bridges over the Avon River. Properties within the amended noise contour to be zoned Residential Suburban.	
Shirley van Essen/54.6	Anne Dingwall/ #FS2037.91	Seek Amendment	The airport noise contour to be widened to include 34, 36A and 38 Kahu Road, and more properties west and south of Kahu Road between the two bridges over the Avon River. Properties within the amended noise contour to be zoned Residential Suburban. Flight approach path (provided attached) shows recent flight path activity that is outside of the noise contour. There are properties not within airport noise contour; however, planes fly over property leading to noise concerns. Contour should cover actual flight paths to include 34, 36A and 38 Kahu Road, and more properties west and south of Kahu Road between the two bridges over the Avon River. Properties like these and others under a wider airport noise contour to remain Residential Suburban.	Support
Shirley van Essen/ #54.8		Seek Amendment	[S]eek[s] that TC3 land (high liquification risk) should remain residential suburban.	
Shirley van Essen/54.8	David Mountfort/ #FS2070.6	Seek Amendment	[S]eek[s] that TC3 land (high liquification risk) should remain residential suburban. Tonkin and Taylor divided the city into TC1 TC2 and TC3 areas after the 2011 earthquake, TC3 being the least able to support the weight of buildings and the most at risk of subsidence and liquefaction. Accordingly it was recommended that buildings in TC3 areas be as lightweight as possible, at most 2 storeys high, and have a TC3 Ribraft	Oppose

			<p>foundation, consisting of 2 slabs of reinforced concrete, the upper slab being adjustable, in order to level the house after the next earthquake. The next earthquake will cause liquefaction and uneven settling of the loose alluvium.</p> <p>Densification will need considerable underground infrastructure investment by the Council to service a hugely increased local population. This investment is likely to be obliterated by liquefying and settling in TC3 locations in the next earthquake. TC3 land is absolutely unsuited to large heavy buildings covering most of the site. I submit that all TC3 land remain Residential Suburban.</p>

Oppose

Remove Residential Mixed Density Precinct – Redmund Spur and Residential Hills zoning, applying MDRS and NPS-UD, as applicable.

Support

Residential Hills Precinct, Residential Mixed Density Precinct – Redmund Spur, and Residential Hills Zone all serve to limit the permitted residential density in the wealthy and desirable suburbs of the northward Port Hills. In addition, Residential Suburban zoning remains in place for large parts of the city. These do not meet the density standards required by MDRS and NPS-UD, and should be removed from the proposed plan, or their rules changed such that their density limitations are no more than permitted by MDRS and NPS-UD rules.

As the density restrictions in Residential Hills Precinct, Residential Mixed Density Precinct – Redmund Spur, and Residential Hills Zone exceed the limits defined under MDRS, and are not attributed to any Qualifying Matter, they are not allowed by MDRS legislation and should be removed or revised.

In addition, Residential Suburban zoning is included in the proposed plan, despite those rules limiting permitted density in affected sites to below MDRS standards. In large part this zoning is not the effective limit to density, as in all cases council also propose an overlapping, equally restrictive Qualifying Matter. However, many of those proposed Qualifying Matters have tenuous evidence/rationale and should themselves be removed from the plan or substantially adjusted. If QMs are removed or adjusted, it is important to also re-zone the underlying sites to a more appropriate zone which complies with NPS-UD and MDRS, such as MRZ, HRZ, etc. to ensure that density restrictions exceeding MDRS and NPS-UD allowances are eliminated from the plan.

The sites in the predominantly north-facing Port Hills covered by the proposed Residential Hills Precinct, Residential Mixed Density Precinct – Redmund Spur, and Residential Hills Zone also enjoy excellent and unique amenity values – such as elevated views of the city, plains, mountains and ocean, and access to natural landscapes of the Port Hills above – reflected in their higher capital values (see Figure 12) compared to much of the rest of the city. These high values are evidence that these areas have “high demand for housing or for business land”. NPS-UD Objective 3c requires that “...district plans enable more people to live in...” such areas.

These same unique amenity values also create a somewhat isolated land and development sub-market compared to the rest of the city. The proposed zoning reduces the otherwise-plan-enabled housing capacity for this sub-market, inflating housing unit price despite theoretical surplus housing capacity existing elsewhere. NPS-UD makes clear – through Policy 1(a)(i): ...have or enable a variety of homes that...meet the needs, in terms of type, price, and location, of different households – that such unit price inflation due to council-imposed supply constraints does not represent a “well-functioning urban environment”. Therefore, these zones and precinct run counter to both Objectives 1 and 2 of the NPS-UD.

To conclude and re-iterate: the Residential Hills Precinct, Residential Mixed Density Precinct – Redmund Spur, Residential Hills Zone, and RS zone should be removed from the proposed plan, or their rules changed such that their density limitations are no more than permitted by MDRS and NPS-UD rules.

Te Mana Ora/Community and Public Health/145.17	Anne Dingwall/ #FS2037.208	Seek Amendment	<p>Te Mana Ora recommends that Christchurch City Council considers establishing new green spaces within housing intensification, to support the growing population of Ōtautahi Christchurch.</p> <p>The uneven distribution of urban green spaces is a significant concern in cities worldwide that have focused on intensifying development. Christchurch City Council has the opportunity to consider how to mitigate this problem before the intensification of development begins.</p>	Support

Maureen McGavin/ #156.4		Seek Amendment	[T]hat the boundary line for High Density Residential zoning [in Papanui] be along Harewood Road and Main North Road to the North and West, and the area to the South and East of this boundary line is zoned Residential Suburban.	
Susan Thomas/ #158.3		Seek Amendment	[Retain current zoning in Dallington]	
Marilyn Goulter/ #161.2		Seek Amendment	[Retain existing zones around Oakhampton Street in Hornby]	
Katie Newell/ #167.3		Seek Amendment	An amendment is sought for 76 Patten Street to be classed as a 'Medium Density Residential Zone' [as opposed to 'Residential Suburban'].	
Traci Mendiola/ #172.2		Seek Amendment	That the property located at 8 Gilders Grove, Heathcote, Christchurch to be rezoned [from Rural Urban Fringe zone to] Medium Density Residential Zone.	
Riccarton Bush - Kilmarnock Residents' Association/ #188.9		Seek Amendment	<p>[That all sites located within the Riccarton Bush Interface Area + the Kauri cluster (Kauri St, Rata St, Titoki St, and Rimu St + the north side of Rata Street and the west side of Rimu St extending to Straven Road) are zoned Residential Suburban instead of MRZ]</p>  <p>Figure 6 - Kauri Cluster areas appropriate to retain suburban density</p>	
Riccarton Bush - Kilmarnock Residents' Association/188.9	Tony Dale/ #FS2036.8	Seek Amendment	[That all sites located within the Riccarton Bush Interface Area + the Kauri cluster (Kauri St, Rata St, Titoki St, and Rimu St + the north side of Rata Street and the west side of Rimu St extending to Straven Road) are zoned Residential Suburban instead of MRZ]	Support

Figure 6 - Kauri Cluster areas appropriate to retain suburban density

In parts of the RBIA city council planners propose retaining the underlying RMD zoning, with its more liberal site coverage, recession plane and setback rules, effectively creating hybrid 2-storey medium density zones. These zones will still enable:

- Three dwellings on any site with more liberal recession planes
- A 1.5 metre setback from the footpath and only 1 metre on all other boundaries
- 50% site coverage
- Just 20% of the site as outdoor living space
- Just 20% glazing on street facing facades
- A mere 20% plant or tree coverage on the site

This side-steps WSP's recommendations. It stitches together different rules. It has not been assessed for environmental or social impacts and should not be applied. Mistakes and confusion related to these somewhat arbitrary and hastily cobbled-together zones, has implications in terms of the IHP hearings process which relies on unambiguous, accurate information being provided by the council in plenty of time.

The Kauri Cluster is an area of special importance to the community. The streets fall within what was part of the Deans Farm in the late 19th century.

The entire area around Riccarton Bush including the Kauri Cluster [Fig 10] forms part of a larger precinct that, during the Christchurch Replacement District Plan Review, the city council recommended should not be re-zoned for medium density. The 2015 IHP, chaired by Hon. Sir John Hansen, supported that view [quotes decision]. Unlike PC14,

the 2015 review was wide-ranging, intensively researched and widely consulted on. We submit that panel's decision should be considered relevant in this context. It was well-founded and should be respected.

[In 2007] the council undertook extensive works to renew and enhance the area's local and residential character. This community eschews association with the Riccarton commercial area and identifies strongly with the history and residential character influence of Pūtarīngamotu Riccarton Bush and its surroundings.

The proposed zoning for parts of this area, limiting heights while maintaining higher density, was a hasty desktop review intended as a compromise and its effects have not been adequately assessed.

			<p>By converting more land to residential use, we can help alleviate the density in Christchurch City Centre, leading to a potential reduction in traffic congestion.</p> <p>Releasing land for residential development can contribute to slowing down and stabilizing property prices. Increasing the housing supply can potentially meet the growing demand, reducing the risk of housing price fluctuations and making homeownership more accessible to a broader range of residents.</p> <p>The construction of new housing in this area would enhance the quality of living for residents. New builds often feature improved insulation for better heat and sound insulation, as well as enhanced structural bracing, ensuring increased comfort and safety for occupants</p>	
Russell Wills/ #216.3		Seek Amendment	[Retain current zoning in Hornby]

Luke Baker-Garters/ #344.19		Seek Amendment	Amend plan change 14 to zone all of the central city to mixed use zoning.	
Balmoral Limited / #386.2		Oppose	Rezone the sites at 336 and 340 Prestons Road and 427 and 435 Marshland Road Local Centre Zone (Prestons)	
M.I.I.G Limited/ #388.1		Seek Amendment	[That] the Rural Urban Fringe zoned land located between QEII Drive south and Prestons Local Centre north, and between Prestons to the east and Marshlands Road to the west, in particular Part Rural Section 1705, [is re-zoned to] Medium Density Residential Zone (Planning Maps 19, 25 and 26)	
Mike Singleton/ #390.5		Seek Amendment	[That the] old sale yard site [at Canterbury Agricultural Park is re-zoned to enable] high density/mixed commercial use and development.	
Justin Avi/ #402.3		Seek Amendment	Upzone the Future Urban Zone near the new North Halswell town centre to high density.	
James Thomas/ #419.3		Seek Amendment	Allow further intensification on the Port Hills	
James Thomas/419.3	Kāinga Ora/ #FS2082.306	Seek Amendment	Allow further intensification on the Port Hills Further intensification should be allowed on the current housing areas on the Port hills	Support
Tracey Berry/ #430.3		Oppose	[That all of Westall Lane, Avonhead is zoned to enable residential development instead of Rural Urban Fringe].	
Tracey Berry/430.3	Kāinga Ora/ #FS2082.311	Oppose	[That all of Westall Lane, Avonhead is zoned to enable residential development instead of Rural Urban Fringe]. The submitter lives on Westall Lane, has 3 acres (on town	Support

			water and sewage systems) and are surrounded by residential housing but are unable to develop, build units for renting out and otherwise utilize their land. At a little under 3kms from the airport and in an otherwise highly populated suburb, the submitter feels it very unjust for the airport to have such significant control over the use of land in the area, which is entirely inconsistent with other locations in New Zealand. This stance is entirely contrary to the government objectives for housing intensification.	
David Allan/ #437.3		Seek Amendment	[Retain current zoning outside the central city]	
Jeff Vesey/ #439.3		Seek Amendment	That the area proposed to be Residential Suburban Zone under the Airport Noise Influence Area in Avonhead/Ilam be zoned Medium Density Residential Zone in line with the surrounding area and the National Policy Statement for Urban Development.	
Jeff Vesey/439.3	Christchurch International Airport Limited/ #FS2052.127	Seek Amendment	<p>That the area proposed to be Residential Suburban Zone under the Airport Noise Influence Area in Avonhead/Ilam be zoned Medium Density Residential Zone in line with the surrounding area and the National Policy Statement for Urban Development.</p> <p>The Airport Noise Influence Area is intended to mitigate any noise effects on residents and effects on the airport. To leave the zoning for this area as Residential Suburban is in conflict with the National Policy Statement and does not take into account the large amount of sought after amenity that would support intensification in Ilam/Avonhead.</p> <p>The Airport Noise influence area is seldom an issue as the aircraft use this area for approaches to the airport only on very few days, likely less than 2 per month.</p> <p>The benefits of zoning Avonhead/Ilam Medium Density Residential are summarised below:</p> <ul style="list-style-type: none"> - Avonhead/Ilam amenities which make it ideal for intensification include parks, sports clubs, shopping and schools. The suburbs are also centrally located with good road and public transport links. - Avonhead and Ilam which largely make up this area are well established mature suburbs with a mixture of residents from young families attracted to the schooling and sporting opportunities to university students wanting to be close to class, and older people wanting to stay in the area they know and love and many domiciled since the suburbs were formed. - Much of this area was built in the 1960's and 1970's. While mostly permanent material and some fine examples of architecture from that era those houses are now 40 to 60 years old, many in need of major renovation, cold with minimal insulation if any and single glazing. - Upgrading and replacement housing is now due. There is a smattering of townhouse/units in this area. Most of these units were built 40 to 50 years ago and on cross lease sites and as such need updating. Allowing more town houses to be built would improve the housing stock and allow more people to live in this highly valued area for its amenities. <p>Summary</p> <p>This is a well located area with superb amenities and very good infrastructure it should be at the top of the list to comply with the National Policy Statement and allow well designed intensification. Noise issues are minimal given the very few days the airport uses this area for approaching aircraft. Qualifying matters for this area mitigate any noise nuisance. To suppress new housing in this area will continue the areas decline in warm modern housing for those wanting to live close to all the advantages of living in this area.</p>	Oppose
Summerset Group Holdings Limited/ #443.11		Seek Amendment	[Remove the Future Urban Zone at] Summerseton Cavendish village (147 Cavendish Road,Casebrook, Christchurch) , and legally described as Lot 1 DP 519380 (record of title 815809).

Liz Oliver/ #667.2		Seek Amendment	[Retain existing zoning in the outer suburbs] the boundaries for MRZ should be closer to the city centre	
Jack Gibbons/ #676.13		Seek Amendment	[That the existing zoning in the proposed Airport Noise Influence Areas be changed to MRZ or HRZ - relates to request to remove QM Airport Noise Influence Area]	
Jack Gibbons/676.13	Christchurch International Airport Limited/ #FS2052.64	Seek Amendment	[That the existing zoning in the proposed Airport Noise Influence Areas be changed to MRZ or HRZ - relates to request to remove QM Airport Noise Influence Area] The airport noise contour thrusts deep into the city covering a considerable amount of urban land. Council is proposing to prevent all zone changes in this area, exempting it from the MDRS / NPS-UD. The area is already urbanized, with plenty of existing residents, and is otherwise indistinguishable from elsewhere in the suburbs. It also covers some areas that should be HRZ. Other councils in New Zealand handle airport noise in areas like this by mandating improved noise insulation in the construction of new buildings, leaving the zoning as it otherwise would be. There is no just explanation why the council has chosen to suppress all construction over this option	Oppose
Andrew McCarthy/ #681.1		Seek Amendment	[That] the entire Residential Hills zone is re-zoned to the Medium Density Residential Zone (Residential Hills Precinct).	
Andrew McCarthy/681.1	Red Spur Ltd/ #FS2068.43	Seek Amendment	[That] the entire Residential Hills zone is re-zoned to the Medium Density Residential Zone (Residential Hills Precinct). - it is clear that the intention of the Act is to allow more dwellings per hectare than waspreviously allowed. - Council has failed to appropriately amend the District Plan to give effect to the RMAA on the hills suburbs. This is both true of the Residential Hills Zone, and in the small area in which intensificationis allowed, the Medium Density Residential Zone (Residential Hills Precinct).	Support
Andrew McCarthy/681.1	Rachel Sanders/ #FS2074.1	Seek Amendment	[That] the entire Residential Hills zone is re-zoned to the Medium Density Residential Zone (Residential Hills Precinct).	Oppose

			<p>- it is clear that the intention of the Act is to allow more dwellings per hectare than was previously allowed.</p> <p>- Council has failed to appropriately amend the District Plan to give effect to the RMAA on the hills suburbs. Ross Clarke/ #691.1		Seek Amendment	[Seeks that] the properties at 370, 390 & 432 Johns Road, Harewood should be rezoned Industrial General, accounting for the attributes of the land/locality and in order to meet the requirements of the NPS-UD.	
Ross Clarke/691.1	Christchurch International Airport Limited/ #FS2052.252	Seek Amendment	<p>[Seeks that] the properties at 370, 390 & 432 Johns Road, Harewood should be rezoned Industrial General, accounting for the attributes of the land/locality and in order to meet the requirements of the NPS-UD.</p> <p>We have recently undertaken an economic assessment of available Industrial General land within Christchurch City and specifically 370, 390 & 432 Johns Road, Harewood with the economic conclusion stated as 'Accordingly, I agree that there is likely to be a shortage of suitable/available industrial land (in the right locations), which the proposal of 370-432 Johns Road would directly address. Accordingly, I would be happy to support the proposal on economic grounds'</p> <p>Other commentary from industry insiders stated 'In terms of developed industrial properties there are very few vacancies that exist. Research shows Christchurch's total industrial vacancy decrease from 2.6% in June 2022 to 0.8% in December 2022. The largest reduction occurred in Grade A stock like Johns Road where vacancy dropped from 2.1% to 0.1% over the same period'</p> <p>Given the context described above, the current zoning of the land is ineffective, inefficient and inappropriate. Conversely, Industrial General (IG) zoning is the most appropriate zoning for the land, accounting for the current and likely future activities on the land and the directives in the NPS-UD, including policies 1, 2, 3 and 4. Accounting for the above, I consider that IG zoning is appropriate for the properties at 370, 390 & 432 Johns Road, Harewood and the planning maps should be amended accordingly.</p> <p>I wish to be heard in support of the submission. If others make a similar submission then I will consider presenting a joint case with them at hearing.</p>	Oppose
KI Commercial Limited/ #694.1		Seek Amendment	Amend the planning maps to rezone the entirety of the site at 51 Heberden Avenue (as shown in Figure 1 above) residential (either Residential Hills or Medium Density Residential) and the removal of all qualifying matters.

Carter Group Limited/ #814.242		Oppose	Amend the planning maps in respect of either side of Beachville Road, Redcliffs to rezone the land from RS to MRZ.	
Carter Group Limited/814.242	Kāinga Ora/ #FS2082.1072	Oppose	<p>Amend the planning maps in respect of either side of Beachville Road, Redcliffs to rezone the land from RS to MRZ.</p> <p>For the reasons expressed in the submissionabove, the submitter opposes the zoningand overlays applying to the land either sideof Beachville Road in Redcliffs (as indicatedin the figure included with this submissionpoint).Specifically, the submitter:</p> <p>d. Opposes Residential Suburbanzoning, on the basis that the landprovides an attractive and appropriate location for mediumdensity development. The attributesof the land are comparable to theMRZ adjacent to The Esplanade inSumner. Accordingly, the submitterseeks that the land be rezoned MRZ.</p>	Seek Amendment

				
Benrogan Estates Ltd/ #819.10		Seek Amendment	Rezoning 1.58ha at 376 Sparks Road from Rural Urban Fringe to Future Urban Zone.	
Benrogan Estates Ltd/ #819.11		Seek Amendment	Rezoning the residential portions of Lots 1 and 2 DP 82730 and Lot 302 DP 571794, being 376, 388 and 396 Sparks Road Halswell from Medium Density Residential to Future Urban Zone.	
Knights Stream Estates Ltd/ #820.6		Seek Amendment	Rezoning Lot 30 DP 571567 to Future Urban Zone.	
Athena Enterprises Limited and Josephine Enterprises Limited/ #821.4		Seek Amendment	[Seeks that the] properties at 9, 9A and 9B Sheffield Crescent (the site) [be rezoned to a commercial zone].	
Athena Enterprises Limited and Josephine Enterprises Limited/821.4	Christchurch International Airport Limited/ #FS2052.162	Seek Amendment	<p>[Seeks that the] properties at 9, 9A and 9B Sheffield Crescent (the site) [be rezoned to a commercial zone].</p> <p>The submitter's site is developed with commercial buildings, which the submitters lease to several different commercial organisations. The tenancies include office activities, which have been established since the Canterbury Earthquakes and prior to the current version of the Christchurch District Plan. The character of activity on the site is commercial.</p> <p>A commercial zone would more appropriately reflect the character of existing activity on the site. Office tenancies on the site have been long established but are not enabled or protected by the existing Industrial General zoning. The existing zoning does not reflect the high degree of established commercial and office activity on the site and in the surrounding area. The submitters consider that a commercial zoning would more appropriately reflect the existing environment.</p> <p>Rezoning the site to an appropriate commercial zone along with commensurate changes to the District Plan to provide for this submission and give effect to the NPS-UD will:</p> <p>(a) achieve the outcomes sought in PC14;</p> <p>(b) contribute to the social and economic well-being of communities and meet the reasonably foreseeable needs of future generations;</p> <p>(c) represent the most appropriate means of exercising the Council's functions, having regard to the efficiency and effectiveness of the provisions relative to other means;</p> <p>(d) give effect to the NPS-UD (notably Policy 3) and Canterbury Regional Policy Statement; and</p> <p>(e) promote the sustainable management of natural and physical resources, will be consistent with Part 2 of the Resource Management Act 1991 and ultimately achieve its purpose.</p>	Oppose

The Catholic Diocese of Christchurch / #823.205		Seek Amendment	Amend the planning maps by rezoning the land identified adjacent to Our Lady of the Assumption school in Sparks Road, Hoon Hay [pictured in the original submission, page 84] as SPS (with a consequential change to Appendix 13.6.6.2 made, to identify an underlying zoning of MRZ).	
The Catholic Diocese of Christchurch /823.205	Anne Dingwall/ #FS2037.1437	Seek Amendment	Amend the planning maps by rezoning the land identified adjacent to Our Lady of the Assumption school in Sparks Road, Hoon Hay [pictured in the original submission, page 84] as SPS (with a consequential change to Appendix 13.6.6.2 made, to identify an underlying zoning of MRZ). The Diocese has interests in land adjoining Our Lady of the Assumption school in Sparks Road, Hoon Hay. That school is subject to SPS zoning, but the adjacent land is zoned MRZ which limits the scope to establish school-related activity over these sites. Accounting for this, the Diocese seeks SPS zoning of the land.	Oppose
The Catholic Diocese of Christchurch /823.205	Carter Group Limited/ #FS2045.378	Seek Amendment	Amend the planning maps by rezoning the land identified adjacent to Our Lady of the Assumption school in Sparks Road, Hoon Hay [pictured in the original submission, page 84] as SPS (with a consequential change to Appendix 13.6.6.2 made, to identify an underlying zoning of MRZ). The Catholic Diocese of Christchurch / #823.206		Seek Amendment	Amend the planning maps to identify a Brownfield Precinct overlay, over the Industrial General zoned school site [2 Lydia Street, Papanui] ; and delete the Industrial Interface overlay for those properties with frontage to Northcote Road or Lydia Street.	
The Catholic Diocese of Christchurch /823.206	Anne Dingwall/ #FS2037.1438	Seek Amendment	Amend the planning maps to identify a Brownfield Precinct overlay, over the Industrial General zoned school site [2 Lydia Street, Papanui] ; and delete the Industrial Interface overlay for those properties with frontage to Northcote Road or Lydia Street. The Diocese has interests in land in and adjoining Lydia Street, Redwood. The majority of this land is being developed for the new Marian School campus, in accordance with a designation that applies to the land. However, the land remains subject to an IG zone under PC14, with this zoning reflecting the former use of the land. Due to the IG zoning, an Industrial Interface qualifying matter applies to the adjacent residential land on Lydia Street and Northcote Road. The Diocese consider that a Brownfield Precinct overlay should be applied to the land to recognise the attributes of the land and that any use of surplus school land may be appropriate for residential development. The Diocese also questions the appropriateness of the Industrial Interface overlay applying to those sites along Lydia Street and Northcote Road, given that they will be adjoining a school and supermarket (both under development) rather than industrial activities which the interface overlay is intended to address.	Oppose
The Catholic Diocese of Christchurch /823.206	Carter Group Limited/ #FS2045.379	Seek Amendment	Amend the planning maps to identify a Brownfield Precinct overlay, over the Industrial General zoned school site [2 Lydia Street, Papanui] ; and delete the Industrial Interface overlay for those properties with frontage to Northcote Road or Lydia Street. The majority of this land is being developed for the new Marian School campus, in accordance with a designation that applies to the land.</p> <p>However, the land remains subject to an IG zone under PC14, with this zoning reflecting the former use of the land. Due to the IG zoning, an Industrial Interface qualifying matter applies to the adjacent residential land on Lydia Street and Northcote Road.</p> <p>The Diocese consider that a Brownfield Precinct overlay should be applied to the land to recognise the attributes of the land and that any use of surplus school land may be appropriate for residential development.</p> <p>The Diocese also questions the appropriateness of the Industrial Interface overlay applying to those sites along Lydia Street and Northcote Road, given that they will be adjoining a school and supermarket (both under development) rather than industrial activities which the interface overlay is intended to address.</p>	Seek Amendment
The Catholic Diocese of Christchurch / #823.208		Support	Retain the SPS and CCMUZ zoning of the land at 136 Barbadoes Street [identified in original submission], but delete the heritage listing/outline from the planning maps.	
The Catholic Diocese of Christchurch /823.208	Anne Dingwall/ #FS2037.1440	Support	Retain the SPS and CCMUZ zoning of the land at 136 Barbadoes Street [identified in original submission], but delete the heritage listing/outline from the planning maps. The zoning of the land at 136 Barbadoes Street is supported. However, given PC13 proposes to remove the heritage listing for the Cathedral, it is no longer appropriate for any of the planning maps to show a heritage item on the site. The Diocese therefore seek that the heritage listing shown at 136 Barbadoes Street is removed from the electronic planning map.	Oppose
The Catholic Diocese of Christchurch /823.208	Carter Group Limited/ #FS2045.381	Support	Retain the SPS and CCMUZ zoning of the land at 136 Barbadoes Street [identified in original submission], but delete the heritage listing/outline from the planning maps. Amendment

Troy Lange/884.3	Christchurch International Airport Limited/ #FS2052.111	Seek Amendment	<p>Rezone 120, 100, 88, 76, 68, 66, 60, 46, 44, 42, 40 and 38 Hawthornden Road Future Urban Zone or Medium Density Residential.</p> <p>The land between the 50 and 55 dBA Ldn noise contours remains zoned Rural Urban Fringe with a minimum lot size of 4 ha for subdivision and a dwelling. The land is highly fragmented with existing lots generally 4 ha or smaller (due to historic planning regimes which enabled residential development on smaller lots where supported by, at that time, an economic horticultural use). The land is now almost exclusively used for rural lifestyle purposes, and is exempted from the National Policy Statement – Highly Productive Land (NPS-HPL) under Clause 3.5.7 ai) because the nearest equivalent zone is the Rural Lifestyle Zone.</p> <p>The inappropriateness of retaining the land between the current urban boundary and CIAL 50 dBA Ldn noise contour in rural zoning was recognized by the Commissioners for Change 1 to the Canterbury Regional Policy (CRPS). In their 2009 recommendation on submissions and further submissions, they identified Special Treatment Areas in their recommended Policy 12 below1 :</p> <p>Policy 12: Special Treatment Areas Specific analysis and planning shall be undertaken to achieve the sustainable management of the natural and physical resources of the following areas and to meet the stated expectations: (a) In Northwest Christchurch (STA1) to determine the medium and long-term sustainable future of the area affected by airport noise.</p> <p>Methods 12.1 Christchurch City Council shall undertake specific planning investigations in relation to the three Special Treatment Areas by 2012 in conjunction with landowners within the areas and other stakeholders...</p> <p>12.3 Christchurch City Council shall include appropriate zoning and/or other provisions with the district plan as a result of Method 12.1</p> <p>Subsequent planning processes were ‘overtaken’ by legislative changes and earthquake related processes which followed after the 2010/11 Canterbury earthquakes. The expedited Land Use Recovery Plan (LURP) processes replaced the Commissioners decision on Change 1 to the CRPS, and all appeals, including those in relation to the location of the airport noise constrained land, and the basis for the same, were extinguished. The CRPS has not been reviewed since, so that ‘untested’ approach to airport noise constraints (which is out of step with national and international standards) remains.</p> <p>Enabling urban development between the 50 and 55 dBA Ldn contour is consistent with and gives effect to the National Policy Statement – Urban Development (NPS-UD). It will free up land for urban development in a location ideally suited to meeting the Council’s obligations to provide at least sufficient development capacity to meet expected demand for land for housing and business and will contribute to a well functioning urban environment.</p>	Oppose
Jane Harrow/ #887.3		Seek Amendment	<p>Rezone land between the 50 and 55 Ldn CIAL airport noise contour for urban development, with no restrictions relating to airport noise, including 384, 388, 420, 422, 424, 426, 434 Sawyers Arms Road and 123 and 141 Gardiners Road as identified on the aerial photograph below. Waipuna Halswell- Hornby-Riccarton Community Board/ #902.30		Seek Amendment	<p>[That all sites within the Riccarton Bush Interface Area and on Matai Street] retain Suburban Density Zoning.</p> <p>[Note: Area includes sought extension to RBI: The southern side of Rata Street to Rimu Street and Kauri Street; Kahu Road opposite the entrance to Riccarton House; The Kauri Cluster, the precinct beside Riccarton House and Bush on the southern side; all [both sides of] Ngahere Street [and] Girvan Street; Houses adjoining the Avon e.g. 36a Kahu Road and adjoining houses; the larger area as indicated by the Riccarton Bush /Kilmarnock Residents' Association].</p>	
Waipuna Halswell- Hornby-Riccarton Community Board/902.30	Kāinga Ora/ #FS2082.1292	Seek Amendment	<p>[That all sites within the Riccarton Bush Interface Area and on Matai Street] retain Suburban Density Zoning.</p> <p>[Note: Area includes sought extension to RBI: The southern side of Rata Street to Rimu Street and Kauri Street; Kahu Road opposite the entrance to Riccarton House; The Kauri Cluster, the precinct beside Riccarton House and Bush on the southern side; all [both sides of] Ngahere Street [and] Girvan Street; Houses adjoining the Avon e.g. 36a Kahu Road and adjoining houses; the larger area as indicated by the Riccarton Bush /Kilmarnock Residents' Association].</p> <p>Matai Street has a Council tree-lined cycleway. The Board shares residents’ view that if housing was to go to six stories on both sides of the street this would be an uninviting and cold part of the current tree lined Central City/University cycleway. It is also some distance from the main commercial centre.</p> <p>[In] the area from Kauri Street to Matai Street, [t]echnical evidence on this area was submitted to the Independent Hearings Panel on the Christchurch Replacement District Plan chaired by Sir John Hansen in 2015, with the panel deciding to retain suburban density and residential suburban transitional density zoning, influenced by the need for particular care in ensuring appropriate residential design outcomes, especially given the established amenity values in the vicinity of Riccarton Bush, coupled with the concerns expressed by residents as to how Residential Medium Density zoning would impact on the amenity values of their neighbourhood.</p> <p>The Board notes that as the foundation borough of Christchurch Riccarton has many historical buildings. Many visitors visit these places and the Board contends that the whole ambience of the area would be affected by possible six storied buildings surrounding these historical buildings. It would be cold and uninviting.</p>	Oppose

			There does not appear to be any clear reason to put aside the mapping of WSP. There will be little parking available for the Riccarton House Farmers market, if the area is zoned medium density. If zoned medium density, Riccarton House and Bush will be diminished. The heritage of this area is possibly taken for granted, but will become more important in future years. With the current eight metre setback for suburban density most residents have flourishing front gardens.

Davie Lovell-Smith Ltd / #914.18		Seek Amendment	The waterbodies on the planning maps are to be identified as 'indicative location only' or alternatively to show them in their correct location or not at all.	
25 KBR Limited / #915.2		Seek Amendment	Retain the Future Urban Zone over the residential portion of 432 Spark Road.	
Milns Park Limited / #916.1		Support	Retain the Future Urban (FUZ) zoning for 25-51 Milns Road (Lot 600 DP 579587)	
Milns Park Limited / #916.2		Seek Amendment	Rezone Lot 500 DP 5795877 in Kearns Drive, Halswell to Future Urban Zone	
Milns Park Limited / #916.12		Seek Amendment	The waterbodies on the planning maps are to be identified as 'indicative location only' or alternatively to show them in their correct location or not at all.	
Milns Park Limited / #916.13		Support	"Retain the Future Urban (FUZ) zoning for 25-51 Milns Road (Lot 600 DP 579587)"	
Cyril Warren Price/ #1023.1		Seek Amendment	Seek that Paparoa Street, Papanui, Christchurch become part of a Residential Suburban Zone restricted to urban residential living.	
Elliot Sinclair / #2108.2		Seek Amendment	Retain Residential Hills zone at 22 Red Rock Lane and surrounding area but seek amendments to development provisions to allow more housing choice.	
Elliot Sinclair / 2108.2	Rachel Sanders/ #FS2110.1	Seek Amendment	Retain Residential Hills zone at 22 Red Rock Lane and surrounding area but seek amendments to development provisions to allow more housing choice. The submitter supports the zoning proposed under PC14 for 22 Red Rock Lane which to be Residential Hills ("RH") however, requests amendment of the RH zone to incorporate amended rules that would provide for some additional housing by inserting "Multi-unit" provisions into the RH zone, consistent with how they are applied elsewhere in the District. This would enable additional housing that is subject to a simpler resource consent process than would be currently provided for, that matches the appropriate built form standards and existing character of the RH zone. This is on the basis that intensification (additional housing) could be appropriate where a landowner is able to satisfactorily address the cultural significance qualifying matter overlay. The submitter understands the cultural significance qualifying matter overlay will replicate and adopts the existing district plan provisions for the existing Ngā Tūranga Tūpuna. This is shown in Figure 2. This currently relates to earthwork activities on the Port Hills, which allow cultural input into the resource consent applications where earthworks are proposed. The site is not in an existing silent file area.	Oppose

Tony Simons/ #2111.1		Seek Amendment	Submit that the entire area designated as part of the Riccarton Bush Interface Area Qualifying Matter remain zoned residential suburban, including the area known as the Kauri Cluster which sits between the bush/grounds and Riccarton Rd, and extends east to Straven Rd.
Tony Simons/ #2111.5		Seek Amendment	Further submit that the small area directly north of the bush and grounds, bounded by Ngahere St, Totara St, and Kahu Rd also remain zoned residential suburban for the same reasons
Tony Simons/ #2111.6		Seek Amendment	Further submit that the small area east and south-east of the bush and grounds, namely 1-33 Kahu Rd. also remain zoned residential suburban for the same reasons.

All of Plan

Submission Number	Further Submission No	Position	Decision Requested	FS Position
Richard Abey-Nesbit/ #3.3		Support	Support the current proposed change providing for intensification of the city.	
Colleen Borrie/ #10.1		Oppose	Oppose all of proposed plan change introducing greater intensification to Christchurch. Do not give effect to s77G of the Resource Management Act 1991.	
Cheryl Horrell/ #11.9		Oppose	<i>[Numerous statements within the submission indicate opposition to medium and high density residential development. Decision sought is not specified]</i>	
Patricia Dench/ #19.1		Seek Amendment	Resource consent should be required for any development that PC14 has considered.	
Les Drury/ #20.1		Seek Amendment	Resource consent should be required for any development related to PC14.	
John Hurley/ #24.2		Seek Amendment	Prioritise liveability over intensification.	
Steve Parkes/ #27.1		Seek Amendment	That resource consent should be required before ANY development can proceed.	
Susanne Trim/ #37.2		Support	[Supports] the general direction of the Council's proposals.	
Susanne Trim/37.2	Anne Dingwall/ #FS2037.61	Support	[Supports] the general direction of the Council's proposals. Much as I dislike the idea of intensification I see it is a must for the future and agree with the general direction of the Council's proposals.	Support
Shirley van Essen/ #54.3		Seek Amendment	Investigate the social effects and consequences of Plan Change 14.	
Shirley van Essen/54.3	Anne Dingwall/ #FS2037.88	Seek Amendment	<p>Investigate the social effects and consequences of Plan Change 14.</p> <p>I seek that the council delay the closure date for submissions until the requirements of the resource management act have been met - a minimum of six weeks is needed. Investigation into the social consequences and effects of Plan Change 14 should be performed and published. A minimum of six weeks is then needed before submissions close on all the aspects of the Plan Change including the social effects.</p> <p>I object to the notification of Plan Change 14 by the Christchurch City Council. The plan change goes against the wishes of many of the Residents and all of the Residents Associations in the city. The Councillors who voted to notify had been warned that if they did not agree to notify, something worse would be imposed by the Government. It is clear that the Councillors notified because they feared "something worse" and not because they believed that the Plan Change 14 was good for the city. The City Plan implemented after the 2011 quake allows for densification which does not adversely affect the character of the city, and that is the plan we should follow.</p> <p>I do not agree with the statements made about the future growth of Christchurch. New Zealand's birth rate is low, there is expectation that the world population is going to decrease in the next decades, so unless there is mass immigration, the population of Christchurch is not going to "double" anytime soon. I suggest that other more realistic "modelling" be undertaken.</p> <p>Investigate the social effects and consequences of Plan Change 14.</p>	Support

			<p>Agree to properly research and evaluate the effects of over-enabling housing development in a city such as Christchurch.</p> <p>Review and adjust the Plan in 10 years' time for the next decade's needs.</p> <p>Do not treat every central city area to be the same thereby removing housing choices for both existing and future residents, create areas that offer diversity of character and style rather than all central city suburbs being inflicted with the same ad hoc mash up proposed PC 14 enables. This is not delivering choice, it's restricting choice and character by making every city and every suburb the same.</p> <p>The consultation period is reset and given at least 9 months for the public to be able to provide submissions that the Council can use to enable well considered feedback, and for the voice of residents to be fairly and equitably represented.</p> <p>The public are given a team of full-time experts and access to specialists paid for by the Government that represent the people of Christchurch. This is to enable and ensure a meaningful, and most importantly balanced conversation is had between both parties. Currently the CCC can use ratepayer money to commission expert reports that favour the brief that Council have given and the outcome that the Government want.</p> <p>We want an independent social impact report where community representatives get to participate in the brief.</p> <p>We consider based on this background that it is important that PC14 does not over-enable intensification, particularly as we have seen no detailed evaluation of the potential adverse consequences of enabling substantially more intensification than is needed. We have undertaken some limited research in the time available (eg Leipzig overcapacity) but we consider this needs serious, extensive investigation to properly understand and evaluate the possible social, health, cultural, environmental, and financial effects.</p> <p>In the interim we recommend that PC14 enables only the extent of intensification needed to match the expected demands of the city, with an industry-recognised reasonable margin for unexpected additional growth.</p> <p>Limiting housing choice: the PC14 headline the Council uses is to give people "greater housing choice." However, consider this: if all NZ tier 1 cities and their suburbs have the same Rules applied and the same enablement applied then this in fact removes choice of where people can and want to live. People choose their place (city and suburb) to with their lifestage, lifestyle and the personal values that are most important to them. Every individual makes decisions based on what's important in their values set, vs what they can afford. The NPS-UD and subsequent PC14 in fact removes these choices as it treats all Central City Residential and all medium density suburbs the same thereby removing choice and applying a one size fits all to every suburb and every city. This removes people's choice and freedoms in choosing where to live.</p> <p>The public are not technically able to understand complex, specialised reports and to then meaningfully interpret what the proposed changes mean for them, therefore are not able to be in a position to provide solid feedback in the process of notifying PC14. The interactive map is used by Council as the key information for members of the public but this does not provide sufficient information for people to understand the impact on their economic, social and environmental wellbeing.</p> <p>There has not been enough time (6 weeks) for the public to be able to gather support and materials to suitably inform others of the implications of these proposed changes given the complexity and size of the reports provided by Council. There are well over a thousand pages to read and understand, and at times the information is conflicting, which requires technical expertise to fully comprehend. The timeframe of 6 weeks to be able to read, understand, gather input, synthesis and communicate to others is neither fair nor reasonable to be considered democratic.</p> <p>The public do not have a fair voice in the process of "consultation" that is in keeping with the social, economic and environmental wide-reaching impact that PC14 has on current residents' lives, wealth, and the broader community well-being, there are no independent reports that clearly articulates these impacts and advocate for the current residents of Christchurch (CHC).</p> <p>Developers are at significant advantage to be able to gather and respond appropriately to this proposed plan change PC14 vs members of the public, again demonstrating that the "consultation" process is unfairly weighted against the public, who also make up the vast majority of stakeholders affected in these proposed plan changes.</p>	
--	--	--	---	--

			<p>There is no social impact report available and no intention of undertaking one by Council. Not having this available for residents to be able to understand how these proposed plan changes will affect them is in polite terms enabling a lack of transparency. Council have gone to great efforts to provide economic reports on building heights to support their proposed plan but have not commissioned social impact reports claiming a lack of time. It's noted that an economic report can be commissioned in time but not a social impact report, and this economic report hinted that there are significant costs of enabling height which include increased crime, congestion and vagrancy.</p> <p>It is also indicated in the Council's commentary in Section 32 Appendix 34 Sunlight Qualifying Matter that access to sunlight is important for mental health, and yet for most residents PC14 will have a direct impact on access to sunlight unless existing recession plains are maintained. The public are unaware of the impact of these planning rule changes.</p>

Victoria Neighbourhood Association (VNA) / #61.46		Seek Amendment	Seek opportunities to enable more sunlight access where beneficial, and housing demand is still met	
Victoria Neighbourhood Association (VNA) /61.46	Anne Dingwall/ #FS2037.119	Seek Amendment	<p>Seek opportunities to enable more sunlight access where beneficial, and housing demand is still met</p> <p>We strongly support the application of a Sunlight Access Qualifying Matter to the MRZ and HRZ zones of Christchurch, for the reasons CCC have identified in the S77 evaluation within the Section 32 Evaluation Report, particularly identifying changes that are beneficial to the environment, energy efficiency, health, and affordability.</p> <p>We note the high level of over-enabling of intensification under PC14. Therefore, we see this as a win-win-win scenario which both reduces the over-enablement, still provides much more intensification than is needed to meet demand projections, and improves the quality and affordability of the outcome.</p>	Support

			<p>Where identified elsewhere, we challenge the writers of PC14 to consider the shading defined by the proposal in this QM as an upper limit, seeking opportunities to enable the advantages of even more sunlight access provided the capacity for intensification still remains sufficiently within the demand. This approach will maximise the positive impacts of PC14.</p> <p>Regarding exemptions:</p> <p>Section 32 Appendix 34 Sunlight Qualifying Matter also states that the average road frontage in HRZ is 19.8m, whilst this may be true as an average it doesn't reflect the actual reality of many central city sites. In the VNA area, many sections are less than 10m wide. The access to direct sunlight to heat homes and encourage efficient, sustainable energy sources will be significantly compromised if a one size fits all approach is taken to enabled build heights in central city areas like the VNA which has a high volume of narrow sections that run north to south. Size of section, aspect, street width, recession plains need to be considered in HRZ such as the streets covered by the VNA to ensure good urban planning and the economic, social, and environment benefits of further densification. Adding across the board higher density by enabling 4 storeys in already high density without considering each site on its own merits makes no sense.</p>

Size of section, aspect, street width, recession plains need to be considered in HRZ such as the streets covered by the VNA to ensure good urban planning and the economic, social, and environment benefits of further densification. Adding across the board higher density by enabling 4 storeys in already high density without considering each site on its own merits makes no sense.</p>	Oppose
Victoria Neighbourhood Association (VNA) /61.46	Kāinga Ora/ #FS2082.37	Seek Amendment	<p>Seek opportunities to enable more sunlight access where beneficial, and housing demand is still met</p> <p>We strongly support the application of a Sunlight Access Qualifying Matter to the MRZ and HRZ zones of Christchurch, for the reasons CCC have identified in the S77 evaluation within the Section 32 Evaluation Report, particularly identifying changes that are beneficial to the environment, energy efficiency, health, and affordability.</p> <p>We note the high level of over-enabling of intensification under PC14. Therefore, we see this as a win-win-win scenario which both reduces the over-enablement, still provides much more intensification than is needed to meet demand projections, and improves the quality and affordability of the outcome.</p> <p>Where identified elsewhere, we challenge the writers of PC14 to consider the shading defined by the proposal in this QM as an upper limit, seeking opportunities to enable the advantages of even more sunlight access provided the capacity for intensification still remains sufficiently within the demand. This approach will maximise the positive impacts of PC14.</p>	Oppose

			Regarding exemptions: Section 32 Appendix 34 Sunlight Qualifying Matter also states that the average road frontage in HRZ is 19.8m, whilst this may be true as an average it doesn't reflect the actual reality of many central city sites. In the VNA area, many sections are less than 10m wide. The access to direct sunlight to heat homes and encourage efficient, sustainable energy sources will be significantly compromised if a one size fits all approach is taken to enabled build heights in central city areas like the VNA which has a high volume of narrow sections that run north to south. Size of section, aspect, street width, recession plains need to be considered in HRZ such as the streets covered by the VNA to ensure good urban planning and the economic, social, and environment benefits of further densification. Adding across the board higher density by enabling 4 storeys in already high density without considering each site on its own merits makes no sense.	
Carl van Essen/ #64.1		Oppose	Oppose plan because it is unnecessary under current population growth levels.	
Paul Wing/ #70.1		Seek Amendment	Housing intensification should be better planned. Current plan will lead to bad design. Intensification should be done at the block level not at the section level. As a minimum all new builds should be built to passive house standards, we need more better design and planned house, not the unplanned low standard intensification of this Plan Change

Ian Tinkler/ #117.2		Support	It is important that Christchurch be developed in a sustainable way.	
Ian Tinkler/117.2	Anne Dingwall/ #FS2037.198	Support	It is important that Christchurch be developed in a sustainable way. It does appear that the population of greater Christchurch will continue to increase for the foreseeable future. The area covered by the plan is large. While the population will continue, there will not be a time when the residential property will be converted to having the full entitlement multistorey units as permitted in the plan. If that were the case, the population of Christchurch would be far larger than expected. It is far better that land currently used for housing provides more places to live, rather than increasing Christchurch into productive food-producing areas within the city and neighbouring district councils.	Support
Terry Blogg/ #134.1		Oppose	Reject the Plan Change in its entirety.	
Te Mana Ora/Community and Public Health/ #145.1		Support	While Te Mana Ora recognises that there has been controversy in applying the Medium-Density Residential Standards (MDRS) set out in the Resource Management (Enabling Housing and Other Matters) Amendment Act and the National Policy Statement on Urban Development (NPS-UD) 2020 in Ōtautahi Christchurch, Te Mana Ora supports this Government direction.	
Te Mana Ora/Community and Public Health/145.1	Anne Dingwall/ #FS2037.203	Support	<p>While Te Mana Ora recognises that there has been controversy in applying the Medium-Density Residential Standards (MDRS) set out in the Resource Management (Enabling Housing and Other Matters) Amendment Act and the National Policy Statement on Urban Development (NPS-UD) 2020 in Ōtautahi Christchurch, Te Mana Ora supports this Government direction.</p> <p>Te Mana Ora recognises the value of building up in existing commercial centres where there is already infrastructure and services in place. Increasing the density of housing, creating more compact urban environments and enabling more affordable housing, can have a positive influence on population health outcomes.</p>	Oppose

Robert J Manthei/ #200.9		Seek Amendment	<ol style="list-style-type: none"> 1. Begin now to establish a Street Running Large Spacing Busway system of public transport. 2. Reinstate the inner city Shuttle bus immediately. 	
Robert J Manthei/200.9	Anne Dingwall/ #FS2037.289	Seek Amendment	<ol style="list-style-type: none"> 1. Begin now to establish a Street Running Large Spacing Busway system of public transport. 2. Reinstate the inner city Shuttle bus immediately. <ol style="list-style-type: none"> 1. In the introduction to the City Spine Transport Corridor Planning document it says that “Planning is underway for Ōtautahi Christchurch to cater for a population of one million people, over the long term” and that the main spine of the City’s transport corridor will connect the north to the west and run through the City. This population ‘guesstimate’ is useless for planning when actual projections for Chch suggest Greater Chch [my emphasis] will have 621,00 people in 2038 and 653,000 in 2048 (from: Canterbury Well-Being Index: canterburywellbeing.org.nz/our.population/). There is no certainty that Chch will ever reach 1,000,000 residents given future uncertainties in relation to epidemics, an aging population, natural disaster, dropping fertility rates worldwide and other unforeseen events/factors, including climate change events. Therefore, future public transport planning should, in my opinion be more present and reality focussed. Planners need to adopt a ‘do-something-now’ mentality, choose a solution that is relatively low cost, and one that retains maximum flexibility to deal with changing needs, demands, residential solutions, etc. Prioritising Mass Rapid Transit (MRT) fails on all three of these counts. It is hugely expensive to build, involves a massive disruption to the environment to establish and results in a fixed-route solution to what will likely be a changing set of variables. The most sensible and affordable option for Christchurch would be to opt for either a bus system involving a large spacing busway, or a bus system utilizing a corridor running system. Both are described in Creating What Matters for the Future Generations. Greater Chch Public Transport Futures, MRT Interim Report –18 June 2021 (final). Of these two systems the set-up costs are vastly lower than those for MRT and significantly lower than for the large spacing busway. It would make sense for the City to pursue the ‘large spacing busway’ option and build on the work that has already gone into establishing a ‘city spine transport corridor’. The key is to build the cheapest, quickest, most flexible system and then incentivise people to use it. 2. In relation to ‘walkability’ and/or accessibility of services in the inner city, the CCC in consultation with ECAN should immediately restore/bring back the ‘Shuttle’ bus service (whether the service is free or ‘gold coin’ matters little). This service would help solve parking problems, traffic congestion by giving visitors and more people living within the 4- Aves an alternative to using their cars to move around the city, and it would extend the walkability distances described in PC14. Previously, the Shuttle was heavily and happily used by a variety of people and the same would occur now. Several months ago the CCC made an astonishing decision to spend \$50m on 5000 more seats for the new stadium, pushing the capacity to 25,000. Given that the stadium will be used for less than 26 occasions per year that in theory might seldom need anywhere near the stadium’s seating capacity, this expenditure was daft. The same amount of money could be used to fund the ‘Shuttle’ for almost 28 years (using an estimate of \$1.8m per year operating cost; two years ago, the estimate was \$1.5m per year). The Shuttle would be used daily by several thousand people, year around. Which expenditure is the most sensible and better facilitates the functioning of a successful, environmentally sound City 	Support
Robert J Manthei/ #200.10		Seek Amendment	Any future version of PlanChange 14 should incorporate regulations mandating ‘Sponge city’ concepts, no matter what the final density targets become. The CCC should set a sponginess rating of 35%, the same as Auckland’s.	
Robert J Manthei/200.10	Anne Dingwall/ #FS2037.290	Seek Amendment	Any future version of PlanChange 14 should incorporate regulations mandating ‘Sponge city’ concepts, no matter what the final density targets become. The CCC should set a sponginess rating of 35%, the same as Auckland’s. Water infrastructure capacity has been exceeded by demand (due to housing densification) in some parts of the city. A relatively simple, inexpensive and environmentally sustainable solution to this problem is to increase the city’s sponginess. This involves using ‘water sensitive urban design’ to incorporate such things as “green roofs, rain gardens and permeable pavements to absorb and filter water. In an international comparison of seven cities’ ‘sponginess’, Auckland “...came out top with a 35% sponge rating – largely thanks to its stormwater systems, many golf courses, green parks and good-sized residential gardens.” (from: Kim Harrisberg, What are ‘sponge cities’ and how can they prevent floods? https://climatechampions.unfccc.int/what-are-sponge-cities-and-how-can-they-prevent-floods/). Christchurch should set a sponginess rating target of 35% to match Auckland’s	Support

Deans Avenue Precinct Society Inc./ #222.1		Support	Support the broad goals of the urban intensification process, and do not think that Christchurch should be allowed to sprawl further across the plains. We need to take account of national priorities, not only with respect to land use, but with respect to energy efficiency and de-carbonisation.	
Deans Avenue Precinct Society Inc./222.1	Anne Dingwall/ #FS2037.305	Support	<p>Support the broad goals of the urban intensification process, and do not think that Christchurch should be allowed to sprawl further across the plains. We need to take account of national priorities, not only with respect to land use, but with respect to energy efficiency and de-carbonisation.</p> <p>The focus for HRZ development in Christchurch must continue to be on the centralcity for the next 5-10 years.</p> <p>We support HRZ for the 'Old Saleyards' area. This could be at least to 20m (6storeys) as presently allowed under 'higher height overlay'. We oppose mixedcommercial and residential use for this site.</p> <p>We support the height rules for HRZ with the 'Town Centre Precinct' for the 'GuestAccommodation' block (Deans/Kilmarnock/Darvel/Matai East).9.4 We support the proposed Qualifying Matter for Christchurch-specific recessionplane rules.</p> <p>We oppose any changes to the proposed recession plane rules that further reducesunlight on neighbouring properties.9.6 We oppose 'no public or limited notification' for applications that don't meetrecession plane rules. Adjacent landowners who are potentially adversely affectedshould have an input to the decision-making.</p> <p>We oppose the rest of the area changing from medium density to HRZ, until there isa more planned approach to 4-6 storey development amongst existing housing,much of it less than 20 years old. Provision must be made for green space andtrees (not just financial contributions or more trees in Hagley Park) and implicationsfor the major arterial (Deans Avenue) need to be determined. Otherwise there is arisk that the area could become a 'dormitory' area of small apartments, with alargely transient population.</p>	Support
Atlas Quarter Residents Group (22 owners) / #224.23		Support	The need for greater intensification is supported, but this does not require or justify the proposed increases in height limits as permitted activities.	
Atlas Quarter Residents Group (22 owners) /224.23	Hugh Nicholson/ #FS2007.1	Support	<p>The need for greater intensification is supported, but this does not require or justify the proposed increases in height limits as permitted activities.</p> <p>Who we are:</p> <p>This submission is made on behalf of the following persons, all of whom own units in the Atlas Quarter, 36 Welles Street, Christchurch Central:</p> <p>Richard Ball, Athena Ellis, Phil and Lynette Stenning, Max Lucas, Paul and Jeni Neilson, Jenny Jia and Zhongyang Yuan, Piers and Emma Bayley, Rachel and Tim Scanlan, Eileen and Vernon Payne, Bruce Fraser, Eléonore Dumaine, Peter and Faye Greenwood, Alan Steel, Gillian Smeith, Chelsea Kennedy, Deborah Bowker, Kate and Mike Peers, Peter Morris, Mathilde Vachon, Barbra Pullar, Martin Rumbold and Kirsty Stewart.</p> <p>Key points:</p> <p>We support well designed intensive residential and commercial development, integrated with sustainable transport options. We have already "put our money where our mouths are" by purchasing units in the Atlas Quarter, a large and successful inner-city development of 110 residential and three commercial units.</p> <p>We oppose the greatly increased height limits proposed by Plan Change 14. They are unnecessary and inappropriate for Christchurch.</p> <p>We support the inclusion of qualifying matters to enhance design quality and urban amenity across the City.</p>	Support

Relief sought:

1. That the permitted height limits within the existing District Plan (prior to PC14) are retained to the maximum extent possible.
2. Where Government legislation and regulations require increases to height limits, that these are kept to the minimum extent possible for compliance with the regulations.
3. The need for greater intensification is supported but this does not require or justify the proposed increases in height limits as permitted activities.
4. The inclusion of the qualifying criteria is supported, independent of height limits, as a means of promoting good design and ensuring new buildings do not adversely impact existing buildings designed and constructed within the current District Plan requirements.

Reasons:

Following the Christchurch earthquakes, a comprehensive design process was undertaken for the City, particularly for the central city. Deliberate and well-informed decisions were made create a liveable city, with intensified development in the central city and around suburban centres, but with lower central city height limits than previously existed. This has created a compact central city with increased densities compared to before the earthquakes, but without the height of some of the buildings that Christchurch had pre-earthquake . The consolidation has resulted in many vacant sites becoming available which are gradually being filled.

This model was developed by looking at best practice around the world, combined with local input from residents and experts, to create an attractive and vibrant City. It set ambitious goals for increasing densities for residential living, especially in the central city and around suburban centres. It was fully integrated with future transport options and climate resilience objectives.

It has widespread local support and was developed with considerable input and investment from Government (via CERA) and Christchurch City Council. It integrated land use and transport, seeking higher densities and more sustainable transport, as reflected in the Land Use Recovery Plan, Christchurch Central Recovery Plan and the Central City Transport Plan. It was embedded into the District Plan through an Independent Hearing Panel of experts hand-picked by the Government.

The greatly increased height limits proposed Plan Change 14 undermines the objectives and principles that underpin the vision of the 2015 Christchurch Central Recovery Plan:

“To become one of the best small cities in the world, Christchurch needs a city centre that is:

- *an inspiring place to live*
- *an attractive place to invest*
- *the best urban environment in New Zealand.”*

The decision to limit heights was a deliberate choice in achieving this vision. The proposed changes will undermine existing investments, entered into in good faith based on the Recovery Plans, while also reducing the central city’s design coherence and creating a less attractive City.

The many empty sites and carparks that still exist post-earthquake provide adequate future capacity for the foreseeable future, including the “competitive margin” required by Government regulations. The only apparent reason for increasing the height limits appears to be compliance with new Government regulations. If the height limits are to be increased, this change should be done to the minimum extent needed to comply with these ill-considered Government requirements. There is no other justification for the proposed rules.

The proposed rules allow new development to be concentrated in a small number of very tall buildings, with the negative impacts such as greater shading and wind tunnels, accompanied by a continuation of many empty and ugly lots in the central city. As the vacant sites are largely filled with cheap carparking, this further undermines the stated transport sustainability and climate resilience objectives.

The scale of the buildings permitted under PC14 is not consistent with the extensive post-earthquake developments that have already occurred. The post-quake developments have created a very attractive City which will be undermined by these proposals. Existing intensive residential developments, such as the Atlas Quarter, could be overshadowed by new buildings of nearly twice the height on the east and west, blocking sunlight. Others may be blocked to the north.

In short, the proposal for increased heights across the City are ill-considered solutions for problems that exist in Auckland, Wellington, and possibly other centres, but are not applicable to Christchurch. The geography and existing development of these other centres constrains

			<p>new development. Post-earthquake Christchurch is quite different from these other centres: it is not constrained for growth opportunities, as demonstrated by the far slower growth in property prices over recent years. Even before the earthquakes, Christchurch had far more stable (less volatile) prices than Auckland and Wellington – a trend that has persisted since at least the 1970’s. In Christchurch there is housing choice, particularly with substantial increases in the number of higher density residential apartments.</p> <p>Maximising the benefits of intensification needs to consider the dis-benefits. The proposed Plan identifies loss of tree cover as a disbenefit but does appear to put sufficient emphasis on other matters. Why does it propose financial contributions for loss of tree cover but not for loss of sunlight to others, wind tunnel effects or loss of amenity? In the Christchurch context, the widespread demolition of much of the central city, including most of the taller buildings, and consolidation of activities into more compact precincts, has created a much more attractive City with a visual appearance and aesthetic appropriate for the size of the City, reflected in the Central City Recovery Plan issued by CERA after extensive public and expert engagement. Both residents and visitors are commenting on the attractiveness of this new look. Re-introducing unnecessarily large buildings undermines this new and attractive look. Even with setbacks and other requirements, it has the potential to detract from the amenity and value of the very substantial public and private investment made for the City’s re-build and recovery.</p>	
Atlas Quarter Residents Group (22 owners) / #224.24		Support	The inclusion of the qualifying criteria is supported, independent of height limits.	
Michael Dore/ #225.1		Oppose	Opposes any residential development above 12 meters beyond the inner city.	
Michael Dore/225.1	Anne Dingwall/ #FS2037.312	Oppose	<p>Opposes any residential development above 12 meters beyond the inner city.</p> <p>Areas for development above 12 meters should not be intermingled in existing residential areas. They should be restricted to the inner city area or in blocks together where there is much unused land and where that development was originally planned following the Christchurch earthquakes. Tall buildings inter laced with traditional residential housing will always create disharmony distrust and break up communities who have often lived on one site for many years.anded approach is like hitting a tack with a sledgehammer.</p> <p>One size does not fit all. How can you compare Auckland or Wellington with Christchurch when the topography is so different. Allowing new buildings of the proposed heights will create shaded areas for existing houses which will affect people’s mental health and wellbeing.</p> <p>I strongly object to the intensification of residential land. The Governments heavy handed approach is already creating disharmony which will only get worse. One size does not fit all. How can you compare Auckland or Wellington with Christchurch when the topography is so different. Allowing new buildings of the proposed heights will create shaded areas for existing houses which will affect people’s mental health and wellbeing. It should not be too difficult to find sufficient pockets of land including in the central City itself to allow greater intensification to satisfy additional demands for housing and protect existing communities.</p>	Support
Graeme McNicholl/ #226.2		Seek Amendment	<p>As an alternative to intensifying the housing in the city, Council's should be looking at current inner-city large blocks of land, such as Princess Margaret Hospital site on Cashmere Road, the old Christchurch Women's Hospital site on Colombo Street, current empty tracks of land such as along Moorhouse Avenue, and rezone these areas for mixed use retail with apartment living above.</p> <p>Furthermore there are potentially other older commercial/industrial areas of Christchurch such as Addington, Sydenham and Phillipstown that should be rezoned as mixed use commercial with apartment living above.</p> <p>Furthermore, the future large green field developments should cater for the medium-density housing as proposed, in order to safe-guard prospective house owners with an understanding of what they are buying.</p>	
Graeme McNicholl/226.2	Christchurch International Airport Limited/ #FS2052.141	Seek Amendment	<p>As an alternative to intensifying the housing in the city, Council's should be looking at current inner-city large blocks of land, such as Princess Margaret Hospital site on Cashmere Road, the old Christchurch Women's Hospital site on Colombo Street, current empty tracks of land such as along Moorhouse Avenue, and rezone these areas for mixed use retail with apartment living above.</p> <p>Furthermore there are potentially other older commercial/industrial areas of Christchurch such as Addington, Sydenham and Phillipstown that should be rezoned as mixed use commercial with apartment living above.</p> <p>Furthermore, the future large green field developments should cater for the medium-density housing as proposed, in order to safe-guard prospective house owners with an understanding of what they are buying.</p>	Oppose

			<p>Rezoning Phillipston, Addington and Sydenham would allow for this old industrial area of town to be upgraded and change to allow high rise apartment living in an organic way over time. This helps to keep the city compact by not driving some home owners to the outer-lying districts and keeps people closer to the city centre, utilizing the new amenities such as the Metro Sports Centre, theatres, restaurants, bars and retail that are still under development. We need to give the city a chance to realize the vision that was set in the blue-print for the city following the earthquakes.</p> <p>Christchurch city, following the earthquakes, has recently had major residential plan changes under the earthquake legislation which has already allowed a lot of residential medium density housing to take place in Christchurch's older suburbs. The city should now be given a chance to bed-in these current changes and allow the city's new character to organically settle in place. Having a further upgrade imposed on the city will drastically alter it's current organic growth and therefore lose the city's character and charm. It is totally unfair that the government has forced the Christchurch City Council to make further changes so soon after major changes following the earthquake.</p> <p>While I support high-density housing as is currently designated throughout the city, I disagree with intensifying this further throughout the rest of the city. I believe that allowing a medium density environment throughout much of the city and imposing three and four story buildings, will have a negative impact on the value of surrounding properties, and will potentially alter the rate-payer base of the city, by way of driving some families to the outer lying districts to avoid this imposition. This will create gaps in society where particular home owners will feel not considered or catered for in this proposed housing environment.</p>	
Kurt Higgison/ #232.5		Oppose	Opposes developments in already built areas and seeks that new development areas grow into new areas,	
Kurt Higgison/ #232.7		Oppose	Opposes developments in already built areas and seeks that new development areas grow into new areas,	
Kurt Higgison/232.7	Brighton Observatory of Environment and Economics/ #FS2092.8	Oppose	<p>Opposes developments in already built areas and seeks that new development areas grow into new areas, We have extensive development in the outer areas of the city already. Yaldhurst, Halswell and the north west suburbs, providing enough development already. We do not need to give developers more scope than they already do to disrupt the quieter established streets.</p> <p>We need to make sure new areas grow into new areas, not encourage developers to bulldoze and disrupt established areas.</p>	Support
Susan Barrett/ #236.3		Oppose	That rather than wholesale non-consented High Density Residential Zone developments in Christchurch's existing suburbs, it would be preferable, more cost-effective, and quicker to apply these principles to forward-thinking, well-planned green field developments (with the right transport links)	
Susan Barrett/ #236.6		Oppose	That rather than wholesale non-consented High Density Residential Zone developments in Christchurch's existing suburbs, it would be preferable, more cost-effective, and quicker to apply these principles to forward-thinking, well-planned green field developments (with the right transport links)	
Marjorie Manthei/ #237.1		Seek Amendment	<p>That the level of intensification be re-visited, and that PC14 goes only as far as it must to satisfy the minimum requirements of NPS-UD and Enabling House legislation.</p> <ol style="list-style-type: none"> 1. Base decisions on the required 10-30 year period, not 50 years. 2. Reduce extent of walkable catchments 	
Marjorie Manthei/237.1	Anne Dingwall/ #FS2037.324	Seek Amendment	<p>That the level of intensification be re-visited, and that PC14 goes only as far as it must to satisfy the minimum requirements of NPS-UD and Enabling House legislation.</p> <ol style="list-style-type: none"> 1. Base decisions on the required 10-30 year period, not 50 years. 2. Reduce extent of walkable catchments <p>Density was achieved with a maximum height of 28m in the City Centre and 11-14m in Central City Residential Zones. The Rule requiring at least one dwelling for every 200m² within CCRZ significantly increased density. 5 The notified version of PC14 goes well beyond what is required by legislation, particularly in terms of height and walkable catchments. We are faced with the possibility of whopping 90m building/s in the City Centre and 32m buildings on very small sections in nearby HDRZs.</p> <p>Definition of long term: 'long-term' is defined as 10 – 30 years (NPS-UD document, Definitions). Most of Stats NZ and Infometrics data projections go to 2048. Referring to a 50-year period is another example of going further than legislation requires.</p> <p>Walkable catchment: The NPS-UD does not stipulate how 'walkable catchments' are defined, although it does refer to 400-800m as "typical". The notion of the '20 Minute City' is the time needed "to walk from home to a destination and back again" (s32, para 4.1.3), i.e., a 10-minute walk one way, equal to approximately 800m, or 20 minutes round trip. However, for PC14, the 'walkable catchment' was</p>	Support

			<p>extended to 1.2 – 1.5km or 15 minutes (a 30-minute round trip). The only rationale I could find was that Christchurch is flat, with good footpaths(para 4.1.2).</p> <p>I believe the rationale underpinning the notified version of PC14 overstates the level of intensification required by legislation. At the same time, it ignores or downplays what 'long term' means in this context (30-year period) and the implication of PC14's 10-year life span. The outcome of these deficiencies includes (i) a greater-than-required enabled height in the City Centre (ii) an expanded walkable catchment and (iii) flow-on effects of unwarranted heights on Victoria Street(45m), the former women's hospital site (32m) and between 20 - 32m heights in various parts of the HDRZ north of the City Centre.</p> <p>[References: Christchurch City Council submission on the National Policy Statement on Urban Development (cover letter, Mayor Lianne Dalziel, 2 October 2019) • Submission to the Select Committee on the Resource Management (Enabling Housing Supply and Other Matters) Amendment Bill (Mayor Dalziel, 18 November 2021) • Letter to Minister Parker after CCC voted not to notify PC14 (Mayor Dalziel, 20 September 2022) • Section 32: Part 1, Appendix 1 Christchurch City Council Updated Housing Capacity Assessment (February 2023) • National Policy Statement on Urban Development 2020 (July 2020) • Understanding and implementing intensification provisions for the National Policy Statement on Urban Development (September 2020) • Chapter 3 Strategic Directions (Notified version) • Section 32 Evaluation: Commercial and Industrial sub-chapters (Part 4) and associated documents, Issue 1 – Policy 3A (City Centre Zone intensification response) and Issue 2 – Policy 3c (ii) (Intensification response within a walkable catchment of edge of City Centre Zone, commercial zones) • Section 32 Appendix 1 Background to Central City Height and Density Controls Technical Report (18 July 2022)]</p>	
Ian Dyson/ #250.1		Seek Amendment	[A]gree with the goals of densification, but it needs to be done in a controlled manner by releasing designated areas for development. Other areas can then be released as requirements dictate.	
Ian Dyson/250.1	Anne Dingwall/ #FS2037.342	Seek Amendment	<p>[A]gree with the goals of densification, but it needs to be done in a controlled manner by releasing designated areas for development. Other areas can then be released as requirements dictate.</p> <p>It appears that the proposed changes to building height and density allowance has been done without the usual considered planning restrictions. Christchurch does not have a major issue with shortage of available land. Agree with the goals of densification, but it needs to be done in a controlled manner by releasing designated areas for development. Other areas can then be released as requirements dictate.</p> <p>The proposed plan will result in isolated developments that will be out of place and cause discontent with neighbors. The approach to focus development around bus routes is short sighted and is likely not to apply in future when small on-demand autonomous vehicles are likely to replace buses.</p>	Support

Ara Poutama Aotearoa/ #259.9		Support	Ara Poutama supports the overall intent of PC14	
Harley Peddie/ #263.13		Seek Amendment	Density is what this city needs, not ever increasing property values.	
Clare Marshall/ #268.14		Seek Amendment	Plans need to be made with climate change in mind.	
Caitriona Cameron/ #272.1		Seek Amendment	The proposal should provide protections for existing property rights. This could be achieved by setting a 'phase in' period (perhaps 5-10 years) for developments under the new regulations	
Caitriona Cameron/272.1	Anne Dingwall/ #FS2037.385	Seek Amendment	<p>The proposal should provide protections for existing property rights. This could be achieved by setting a 'phase in' period (perhaps 5-10 years) for developments under the new regulations</p> <p>To allow a transition period for those potentially negatively affected. Property owners on sites likely to be impacted could then have time to leave the property, or plan for modifications to their own property to mitigate any new developments. (Such a phase in time could be 'over-ridden' if neighbours consented to a development.)</p> <p>Many current residents will have their property values (both amenity and financial) significantly reduced (for example through losing sunlight through ground floor windows, solar panel installations becoming redundant) under the new recession planes and minimum plot sizes. Not only would property owners have no recompense for the loss, they would also have very little time to transition (either by selling the property or altering the building).</p>	Support

Caitriona Cameron/ #272.3		Seek Amendment	The proposal should facilitate coherent residential planning, rather than allow a solely market-driven approach (which risks 'lowest common denominator' development). Specifically et a phase-in period (as suggested in C1 [272.9]) would also ensure more coherent development. It is likely there would be more larger coherent developments, rather than piece-meal development.	
Caitriona Cameron/272.3	Anne Dingwall/ #FS2037.387	Seek Amendment	The proposal should facilitate coherent residential planning, rather than allow a solely market-driven approach (which risks 'lowest common denominator' development). Specifically et a phase-in period (as suggested in C1 [272.9]) would also ensure more coherent development. It is likely there would be more larger coherent developments, rather than piece-meal development. The current proposal marks a significant change in what is permitted and encouraged in residential areas. The proposal talks about meeting housing needs over a 30 year time frame. The vision for 30 years' time may be coherent but, without careful local planning and oversight, the streetscapes are likely to be unattractive and highly variable in the short to medium term, with piece-meal development leading to 'sawtooth' streetscapes. The 30 year time frame outlined in the proposal means there is time to do this well - there is no rush.	Support
Mark Nichols/ #287.1		Seek Amendment	Seek densification in a planned and staged way by staging the effective date of the zoning changes in for example rings coming out from the city centre and/or major shopping areas, so that the densification occurs in a structured way over time, rather than in a haphazard way across most of the city. This will allow for a more staged build out of the infrastructure required to support the densification.	
Mark Nichols/287.1	Anne Dingwall/ #FS2037.402	Seek Amendment	Seek densification in a planned and staged way by staging the effective date of the zoning changes in for example rings coming out from the city centre and/or major shopping areas, so that the densification occurs in a structured way over time, rather than in a haphazard way across most of the city. This will allow for a more staged build out of the infrastructure required to support the densification. I appreciate the need to add 40,000 houses over the next 30 years, but I am concerned that the approach proposed and being driven is both in-efficient and bad planning. In-efficient because allowing the densification randomly across the city will require additional services across the whole city instead of progressively in concentrated areas.	Support
Waipapa Papanui-Innes-Central Community Board/ #288.9		Seek Amendment	Thoroughly consider the economic and environmental impacts and the social and well-being consequences of the proposed intensification on the community.	
Waipapa Papanui-Innes-Central Community Board/288.9	Brighton Observatory of Environment and Economics/ #FS2092.15	Seek Amendment	Thoroughly consider the economic and environmental impacts and the social and well-being consequences of the proposed intensification on the community. The Board is concerned that high intensity development has the potential to lead to issues of anti-social behaviour thus increasing the impact on New Zealand Police, and mental health services resources that are already highly stressed. The Linwood-Central-Heathcote Community Board continually heard of issues from its Phillipstown residents who are experiencing high density in a low social-economic area. The Board notes that while economic and environmental impacts have been considered they do not feel that the social and well-being consequences have been considered as thoroughly.	Seek Amendment

			<p>If the housing is built first and the people have already arrived, then the Council is already too late in addressing the associated issues that come with this.</p> <p>There is a lot of intensification of housing going on (single houses on a lot being replaced with multistory townhouses), which is fine and necessary. I do not see any improvement to public transport. How are all of these people going to get around? We are already seeing a lot more cars on the roads, and without improved transport options this is only going to get worse. The Council needs to provide affordable, frequent and reliable public transport options as alternatives to cars. Cycleways are already superb, however buses as the only public transport option does not provide an appealing alternative to cars as if traffic worsens the buses will be stuck in the same traffic a car would be. It would also be good to see light rail as an option between Selwyn and Christchurch</p>

Mary-Louise Hoskins/ #670.7		Seek Amendment	Review how Christchurch is enacting the Enabling Housing Supply Amendment bill.	
Mary-Louise Hoskins/670.7	Cambridge 137 Limited/ #FS2042.55	Seek Amendment	Review how Christchurch is enacting the Enabling Housing Supply Amendment bill. A large part of the appeal of Christchurch is the vision theCouncil in full consultation with the citizens and ratepayers of Otutahi had developed after the catastrophic earthquakes – referredto as the blueprint. This set a vision of a low-rise city, designed to offer work-life balance and strength of community. That blueprinthead a 30+ year horizon for growth. The council now appears to have taken out the red pen and scrapped that blueprint – to a muchgreater extent than is dictated by the Enabling Housing Supply Amendment bill. We strongly feel that it is imperative thatChristchurch continue to set itself apart from the cities such as Auckland where there is little sole or community. Much better that weset out sights to be more akin to a European city such as Paris. There is much at risk, and the Council needs to step back from theprecipice they are standing before.	Support
Debra August-Jordan/ #672.1		Oppose	Opposes the intensification plan change and seeks that it not be approved.	
Tony Dale/ #679.12		Seek Amendment	Seek that a social impacts assessment of the city-wide intensification proposal be undertaken to the level of detail that corresponds to the scale and significance of the proposal.	
Environment Canterbury / Canterbury Regional Council/ #689.81		Seek Amendment	[That CCC consider restricting the installation of] solid fuel homeheating appliances in some areas [through] an overlay that identifies areas with poor air quality.	
Environment Canterbury / Canterbury Regional Council/689.81	Anne Dingwall/ #FS2037.1103	Seek Amendment	[That CCC consider restricting the installation of] solid fuel homeheating appliances in some areas [through] an overlay that identifies areas with poor air quality. While not related to specific provisions, CRC considers that careful assessment needs to be made of the effects of having more solid fuel homeheating appliances in some areas, and restrictions on their installation may need to be considered. CRC requests that consideration be given todeveloping an overlay that identifies areas with poor air quality, to be used to require that no more wood-burners are able to be installed thanare there currently. CRC understands that there is a balance to be struck between negatively impacting on air quality through intensification anda resulting larger number of wood-burners in a given area, and improved air quality as a result of lower emissions from motor vehicles asintensification decreases journey numbers and distances.	Support

WDL Enterprises Limited and Birchs Village Limited / #704.8		Support	[S]eeks to ensure that PC14 does not unnecessarily curb the intent of the Amendment Act and MDRS.	
WDL Enterprises Limited and Birchs Village Limited / #704.9		Support	[S]upports application of zoning and other provisions that recognise the need to provide housing capacity and enable this to occur in an efficient manner.	
NHL Properties Limited/ #706.2		Seek Amendment	Oppose any provisions or changes that will adversely affect the outcome of intensifying urban for to provide additional development capacity, particularly near the city and commercial centres.	
Mitchell Coll/ #720.47		Seek Amendment	That the Christchurch City Council take this opportunity when the District Plan is being rewritten to require buildings to calculate their lifetime carbon footprint and be required to not exceed a sinking lid maximum.	
Lower Cashmere Residents Association/ #741.5		Seek Amendment	The Opawaho Heathcote River corridor be designated as an area of special significance and area.	
Lower Cashmere Residents Association/741.5	Kāinga Ora/ #FS2082.495	Seek Amendment	The Opawaho Heathcote River corridor be designated as an area of special significance and area. It has a long history of significance to the Mana Whenua and European settlers in the whole catchment.	Oppose
Harang Kim/ #742.1		Oppose	Building more than 3 storey buildings will require much higher degree of infrastructure and town planning for sewer, stormwater, water, and traffic, etc. The high to medium density buildings will need elevators, heavier foundation, increase of traffic volume (as there is no public transport available other than bus service), and Christchurch is built on swamp. So it is not aligned with the national managed retreat plan.	
Harang Kim/ #742.3		Oppose	[Seek] ethical holistic development [for Christchurch] with balanced country development. It is an urban myth that high density will address housing issue and homelessness.	

Cliff Mason/ #744.2		Seek Amendment	[That] an assessment of the carrying capacity of the environment of Christchurch City and its immediate surrounding area [is undertaken]	
Cliff Mason/744.2	Anne Dingwall/ #FS2037.587	Seek Amendment	[That] an assessment of the carrying capacity of the environment of Christchurch City and its immediate surrounding area [is undertaken] Although the legislation assumes limitless growth and the Plan Changes also do not consider ultimate limits, I submit that an assessment of the carrying capacity of the environment of Christchurch City and its immediate surrounding area is a critical consideration that should inform all urban planning. Limits on the ability of the local environment to supply basic human needs and to assimilate waste are critical matters especially in the context of climate change, energy constraints and economic and political uncertainty.	Support
Richmond Residents and Business Association (We are Richmond)/ #745.2		Support	Retain plan change approach adopted arising from locally derived consultation; not one size-fits-all approach.	
Kay and Megan Mintrom and Pearce/ #757.2		Oppose	Oppose higher density development in quiet suburban areas	
Tosh Prodanov/ #758.3		Seek Amendment	[Include affordability and reduce regulation]	
Mark Thompson/ #761.2		Oppose	[Seeks] that: <ul style="list-style-type: none"> <li style="text-align: right;">- Intensification of [the] area south of Bealey Avenue, central city is scrapped. <li style="text-align: right;">- The following actions taken by Council: a) A - [that] Plan Change 14 be scrapped in [its] entirety and referendum for the people of Christchurch so they can decide if that want this level of intensification. b) Commission a social impact assessment that can articulate the impact and costs of intensification across different parts of Christchurch. 	
New Zealand Institute of Architects Canterbury Branch/ #762.1		Support	[Supports] [l]ocating and enabling density to develop around centres and transport corridors as per industry best practice.	
New Zealand Institute of Architects Canterbury Branch/762.1	Anne Dingwall/ #FS2037.766	Support	[Supports] [l]ocating and enabling density to develop around centres and transport corridors as per industry best practice.	Support
New Zealand Institute of Architects Canterbury Branch/ #762.2		Support	[Supports] [t]he introduction of provisions that aim to achieve development that produces a high-quality perimeter block typology.	
New Zealand Institute of Architects Canterbury Branch/762.2	Anne Dingwall/ #FS2037.767	Support	[Supports] [t]he introduction of provisions that aim to achieve development that produces a high-quality perimeter block typology. The NZIA Branch considers that there is significant potential for perimeter block development to lead to higher quality urban form both for the public and private realms of our city.	Support
New Zealand Institute of Architects Canterbury Branch/ #762.38		Seek Amendment	That a plant list similar to 16.8.3.ii is also introduced to other development areas / front boundary strips as a means of guidance.	
New Zealand Institute of Architects Canterbury Branch/762.38	Anne Dingwall/ #FS2037.803	Seek Amendment	That a plant list similar to 16.8.3.ii is also introduced to other development areas / front boundary strips as a means of guidance.	Support
New Zealand Institute of Architects Canterbury Branch/ #762.42		Seek Amendment	Implement a requirement to have residential units which are attached (touching in some way) to be subdivided under Unit Title and not Fee Simple.	
New Zealand Institute of Architects Canterbury Branch/762.42	Anne Dingwall/ #FS2037.807	Seek Amendment	Implement a requirement to have residential units which are attached (touching in some way) to be subdivided under Unit Title and not Fee Simple. It has been noted by our members that currently there are many units being built on good commercial land which, over time, will become dilapidated. At this stage there is no mechanism for all owners to come together to sell a property as a whole for further development. This will mean it will be very difficult, if not impossible, for the site to be developed at the density and use required by the city in the future. This will seriously hamper Christchurch's growth in the mid to long-term future. Moreover, individual ownership of attached dwellings leads to a slow degradation in the maintenance and upkeep, and therefore the quality, of these types of dwellings. One recommendation would be to Implement a requirement to have residential units which are attached (touching in some way) to be subdivided under Unit Title and not Fee Simple. This will enforce an entity (the body corporate) to oversee the maintenance of all units as a whole and be a single point of contact for managing the property's future use. We ask that the council explore ways to address this issue.	Support

Christina Stachurski/ #763.1		Seek Amendment	the Council must insist on getting Geotechnical Investigation Reports for all of the suburbs affected before the new 'law' can take effect here. And get those investigations done by 'independent' engineers.	
Kerri Jones/ #766.1		Oppose	Oppose all of Plan Change 14.	
Elanor James/ #767.1		Support	Supports Plan Change 14 and increased density provisions.	
Karilyn Breed/ #782.1		Oppose	The council reject acceptance of the government's directives around intensification; Medium Density Residential Standards, timelines for notifications and decision-making, level of technical information and minimum evidence, and the ISPP – Intensified Streamlined Planning Process.	
Marta Scott/ #786.2		Seek Amendment	[Seeks that] medium density gradually grow[s], starting with areas within 500 m of bus stops. Once a certain density is reached in those areas planning for further higher density areas and new bus routes could commence.	
Marie Dysart/ #791.1		Support	to support in principle the rules that central government has directed (allowing upto three dwellings of three storeys high) on most sections, subject to the impositionof limitations by allowing for "Qualifying Matters" as proposed by the ChristchurchCity Council (CCC) in Plan Change 14 ("PC 14") to the Christchurch City Plan.	
Fiona Bennetts/ #793.5		Seek Amendment	Please ensurethere are more parks/gardens/walkways between medium- and high- density builds. . Please re-wild some parts of the city that flood everytime we get heavy rainfall.	
Fiona Bennetts/793.5	Anne Dingwall/ #FS2037.736	Seek Amendment	Please ensurethere are more parks/gardens/walkways between medium- and high- density builds. . Please re-wild some parts of the city that flood everytime we get heavy rainfall. We need more wetlands and plants to absorb the water	Support
Fiona Bennetts/ #793.6		Seek Amendment	[Improve transport systems]	
Fiona Bennetts/793.6	Anne Dingwall/ #FS2037.737	Seek Amendment	<p>[Improve transport systems]</p> <p>We need to make sure the transport options align with the increase in density of living situations.Micro-mobility (e.g. cycleways) and public transport (trains, trams, buses) need to come a long wayto support higher density car-free living.</p> <p>Imagine avibrant city where everything you need is a 15 minute walk or cycle away, or a short bus/train rideaway on a frequent service so you didn't need to rely on timetables. Now make it happen by makingbold decisions now that enable the transformation that we need.</p>	Support
Fred Coughlan/ #798.1		Seek Amendment	Accept the provisions of PC14 that implement or go beyond the MDRS.	
Fred Coughlan/798.1	Kāinga Ora/ #FS2082.572	Seek Amendment	Accept the provisions of PC14 that implement or go beyond the MDRS. Wolfbrook strongly supports the implementation of housing intensificationdirection in the National Policy Statement on Urban Development 2020 (NPS-UD)and the Medium Density Residential	Support

			Standards (MDRS)2. These statutory tools intend (among other things) to enable the efficient use of land for affordable housing choice and variation, to reframe amenity effects towards anticipated development, and to provide for well-functioning future urban environments.	
Fred Coughlan/ #798.6		Seek Amendment	redraft the residential activity notification preclusions and the rules framework in PC14 to implement Schedule 3A, clause 5 of the RMA.	
Fred Coughlan/798.6	Kāinga Ora/ #FS2082.577	Seek Amendment	redraft the residential activity notification preclusions and the rules framework in PC14 to implement Schedule 3A, clause 5 of the RMA. The above rules in PC14 conflict with implementing the notification preclusions in Schedule 3A, clause 5 of the RMA. This conflated by: (a) Built form (density) standards that go beyond the MDRS (less enabling); and (b) Linking density standards to permitted and restricted discretionary residential rules (e.g. High Density Rule P1 and RD2 residential activities).	Support
Fred Coughlan/ #798.19		Seek Amendment	The Plan should be amended to use clear and concise language.	
Fred Coughlan/798.19	Kāinga Ora/ #FS2082.590	Seek Amendment	The Plan should be amended to use clear and concise language. Using clear and concise language and is easy to use is embedded in the statement of expectations provided by the Minister for Environment for the Christchurch District Plan review and the strategic direction in Chapter 3, Objective 3.3.2. There are many parts of the plan we found hard to follow and inconsistencies. This is more of a flag, unfortunately we have not had time to provide any detailed list.	Support
Fred Coughlan/ #798.20		Seek Amendment	Seeks that council apply to the Environment Court for the MDRS permitted activity rules to have immediate legal effect as provided for by section 86D of the RMA, excluding Qualifying Matter areas, other than the Sunlight Access and Public Transport Accessibility Restriction Qualifying Matters (which have no statutory or evidential merit). The relief sought above is consistent with Objective 6 of the NPS-UD regarding strategic and responsive planning and will ensure that Christchurch is on a level playing field with all other Tier 1 councils.	
Fred Coughlan/798.20	Kāinga Ora/ #FS2082.591	Seek Amendment	<p>Seeks that council apply to the Environment Court for the MDRS permitted activity rules to have immediate legal effect as provided for by section 86D of the RMA, excluding Qualifying Matter areas, other than the Sunlight Access and Public Transport Accessibility Restriction Qualifying Matters (which have no statutory or evidential merit). The relief sought above is consistent with Objective 6 of the NPS-UD regarding strategic and responsive planning and will ensure that Christchurch is on a level playing field with all other Tier 1 councils.</p> <p>Council failed in its statutory duty to notify the IPI in August 2022, creating an equitable situation. Developers in all Tier 1 metropolitan areas (with the sole exception of Christchurch) have the benefit of transitional arrangements with new MDRS rules in effect. However, the Christchurch development community will effectively be deprived of 1-2 years of realising greater development potential.</p> <p>The current subdued housing market provides some relief, but this inequality will bite when interest rates, labour and supply chain issues settle, and confidence returns.</p> <p>Since the potential for litigation is high, notably with the sunlight access overlay, and the IPI ministerial decision-making process may draw out with no certainty over timeframes, Wolfbrook submits that it would be unfair and disproportionate to continue operating under the current planning rules for the next few years.</p> <p>The MDRS for the most part should have immediate legal effect. It is suggested that the Independent Hearings Panel tasked with evaluating PC14 will not be prejudiced because PC14 has in essence notified the MDRS – it is the creative additions and workarounds that are in contention. In the improbable event that the Independent Hearings Panel prefers the PC14 drafting as is, a gold rush of development over the next 1-2 years is unlikely given current and foreseeable conditions, and in any event, this would not compromise intensification outcomes.</p>	Support
Benjamin Love/ #799.3		Seek Amendment	[That intensification is enabled in] more of the wider city	
Benjamin Love/799.3	Kāinga Ora/ #FS2082.594	Seek Amendment	[That intensification is enabled in] more of the wider city Though I agree with the proposed zones for intensification listed in PC14, I feel it does not go far enough in the long term. I see the proposed zones as a strategic starting point to allow for proper well-planned growth, however over time more of the wider city needs to be intensified. Crucial needs for intensification to work include walkability, mixed-use zoning, rail based public transport, transit-oriented development (TOD), well planned/high quality urban environments, and to move away from car centric design. PC14 does not do enough to address these.	Support
Benjamin Love/ #799.7		Seek Amendment	Transit Orientated Development should be implemented at every station across the entire [transit corridor proposed by the Greater Christchurch Partnership].	
Benjamin Love/799.7	Anne Dingwall/ #FS2037.718	Seek Amendment	Transit Orientated Development should be implemented at every station across the entire [transit corridor proposed by the Greater Christchurch Partnership].	Support

			<p>Transit-Oriented Development (TOD) is a very sensible form of urban planning and development. Focusing large dense commercial areas around public transportation/rail stations, then surrounding that with dense residential. This optimizes the value capture of public transportation, significantly reduces car-dependency/usage, and provides huge benefits to businesses (often from higher foot traffic), as well as the local economy. Increased density around public transportation typically leads to higher ridership. Increasing the walkability of TODs leads to higher ridership and benefits to the community.</p> <p>Walkability also has many social benefits, as close access to stores/facilities is linked to increased happiness, livability, more disposable income, and a healthier more active lifestyle.</p>	
Benjamin Love/799.7	Kāinga Ora/ #FS2082.598	Seek Amendment	<p>Transit Orientated Development should be implemented at every station across the entire [transit corridor proposed by the Greater Christchurch Partnership].</p> <p>Transit-Oriented Development (TOD) is a very sensible form of urban planning and development. Anne Dingwall/ #908.4		Seek Amendment	[Seeks that council take] a water sensitive design (sponge city) approach for catchment-wide flood risk management.	
Anne Dingwall/908.4	Anne Dingwall/ #FS2037.673	Seek Amendment	[Seeks that council take] a water sensitive design (sponge city) approach for catchment-wide flood risk management.	Support

CCT notes that Auckland has been given a one year reprieve by the Minister for the Environment, David Parker, to allow it to undertake natural hazard and flooding investigations work and formulate a planning response. Taking cognizance of a water sensitive design (sponge city) approach for catchment-wide flood risk management, is not only sensible but necessary. The concept applies to other Tier 1 cities including Christchurch.

The sponge concept should not just be confined to public open space. It should also apply to private property. Discharge of water from increasingly occurring climate-related intense rain events, has still to be satisfactorily addressed by most councils in NZ. Reduced building setbacks from boundaries and minimum size requirements for outdoor living spaces have the adverse effect of reducing natural porous soakage areas and flow-paths, protected and relied on by the Council as a natural method of managing stormwater.

Minister Parker is also recommending the Auckland council consider the findings of the Parliamentary Commissioner for the Environment report 'Are we building harder, hotter cities?' He has made it clear Auckland would need to intensify with plenty of green spaces. "I concur with the concerns raised about the amount and quality of reserve and open spaces being provided in both existing urban areas and greenfield developments."

<https://www.newsroom.co.nz/auckland-wins12-month-housing-density-reprieve>

The Local Government Magazine (3 February 2023) has posed the following question: Is there a risk in the future that the NPS-UD will result in increased urban flooding and massive insurance claims, followed by litigation by affected property owners who were once protected by local bylaws? Infrastructure – the elephant in the urban intensification room 3 February 2023

<https://localgovernmentmag.co.nz/auckland-floods-2023/>

The insurance issue is not trivial. With the bulk of claims assessments now completed, Tower estimates that the average claims cost for this event (2023 Auckland and Upper North Island Weather Event) will be around double that of other recent large weather events. This is due to deeper flood waters in high density areas causing substantially more damage, contamination, and landslides. (emphasis added)

<https://www.nzx.com/announcements/410997> Tower Updates Guidance, Provides Update on Large Events 8 May 2023

Tim Grafton, Chief Executive of NZ Insurance Council, has said...while there is always an element of risk from the weather, the losses are often more than just financial for communities. "These extreme weather events bring devastation to local economies, social disruption, and environmental damage. So there are very good reasons why we need to take a long view and ask ourselves 'what are we doing to reduce those risks?'"

<https://www.insurancebusinessmag.com/nz/news/catastrophe/insurance-expert-urges-nz-insurers-to-take-floods-as-seriously-as-earthquakes-436926.aspx>

In Christchurch, NIWA hydrodynamic scientist Dr Emily Lane is leading a team digitally mapping flood risk, the first attempt to do it across the country rather than local body by local body. "You need to know where are the places that flooding hazard and risk are really bad, and what's it going to look like under climate change, and we don't have that initial picture at the moment, to be able to make the right decisions," she says. Once completed, the map can be updated and adapted to changes in weather. It could still be a couple of years away.

			<p>Strategic decisions will be challenging even with the best information. Where and how do we build in a climate-changed world? And if some areas are off limit, who pays compensation?</p> <p>https://www.stuff.co.nz/business/300809902/rebuilding-fromgabrielle-cheapest-is-not-always-best--do-the-goddamn-thingproperly</p>	
Anne Dingwall/ #908.5		Seek Amendment	[Seeks that council ensures] [p]lanning instruments reflect the realities of climate change.	
Anne Dingwall/908.5	Anne Dingwall/ #FS2037.674	Seek Amendment	<p>[Seeks that council ensures] [p]lanning instruments reflect the realities of climate change.</p> <p>Forcing Plan Change 14 does not encourage cooperation and consensus-building on the pathway ahead. It is not wise planning to build residential housing before essential services are provided, especially as those essential services are required to achieve a range of policy objectives besides meeting housing needs.</p> <p>It is not wise planning to allow further housing intensification in areas that are highly susceptible to flooding, the more so if protection works would involve unreasonable costs, and/or the technical hurdles to be overcome are extreme. The Dutch nation needed to construct polders to enable developments below sea level. New Zealand need not follow that example.</p> <p>Adverse effects of housing intensification on the stormwater infrastructure, compounded by the ever-increasing effects of climate change.</p> <p>Dealing with highly flood-prone areas must become a priority, with action plans not waiting for pressure from the insurance industry to raise premiums or remove cover completely. EQC is not resourced to meet the demand.</p> <p>Only after the Council's notification of PC14 on 17 March 2023 and invitation for public submissions released was the staff report Citywide Surface Water Flooding Update publicly released on the Agenda (Item 17) for the 5 April Council meeting.</p> <p>[Refer to attachment]</p> <p>How does this approach accommodate the housing intensification, mandated by the government for Christchurch? It is clear that Central Government did not consider these constraining details with respect to flooding in its determination to force Tier 1 cities to expand and intensify diverse housing stock.</p> <p>The lack of detailed consultation during the drafting of the relevant legislation, between those who propose and those who must dispose, is highly regrettable. There is an onus on Central Government to provide financial assistance in order to overcome these serious impediments to achieving the desired national objectives. Again, the expectations are far in excess of the Council's planned approach through annual plans and long-term plans. Centralised planning should be accompanied by central funding as local government's resource base is insufficient to achieve the objectives, either short-term or long-term.</p> <p>The spatial plan for Greater Christchurch has to acknowledge that some existing areas of housing will never escape flooding, despite a combination of all the tools the Council has at its disposal. Relocation similar to the earthquake red-zoning of properties is one drastic approach that would require specifically targeted emergency legislation. (Past emergency legislation applied to Christchurch was not well received and was applied to projects beyond what was urgent for Christchurch's recovery.) Suitable land for intensification within the existing urban boundaries may not be available. The pressure to expand on to prime agricultural land will be intensified. Any confining green belt will suffer the fate of historical green belts.</p> <p>CCT agrees with CCC, We need to provide for the growth of housing... in the best locations, to help address issues such as climate change... Consultation document Page 5</p> <p>Building any significant structure on surfaces with high water table and vulnerability to flooding now, only likely to be exacerbated in the future by sea level rise, makes Christchurch's issues with drainage and waste waters all the more problematic and costly to control.</p> <p>Yet streets have been included in PC14 for proposed housing intensification, notwithstanding their listing by the Council as being among those with the worst history of surface flooding.</p>	Support

			<p>Christchurch suffered from severe earthquake damage. That was sudden. It modified topography instantly. The governmental response was to declare red zones and to assist residents to relocate.</p> <p>The impact of climate change and sea level rise is not instantaneous. Yet the frequency and severity of weather events and their consequences are plain to see with many residents and land-owners suffering from recurring damage to their properties.</p> <p>Planned withdrawal from these areas and their conversion to public green space should be facilitated. Tree planting may assist to mitigate loss of tree canopy caused by nearby residential intensification and also provide localised recreational green space.</p>	
Anne Dingwall/ #908.8		Seek Amendment	Decision Sought: Seeks PC14 to be amended to consider Christchurch local factors and purposes of RMA and potential legislation when shifting to intensification. The unique history of the city should be considered while allowing innovative approaches that are sustainable, equitable, and efficient.	
Anne Dingwall/908.8	Anne Dingwall/ #FS2037.677	Seek Amendment	<p>Decision Sought: Seeks PC14 to be amended to consider Christchurch local factors and purposes of RMA and potential legislation when shifting to intensification. The unique history of the city should be considered while allowing innovative approaches that are sustainable, equitable, and efficient. It is not just a matter of how much and where additional development should be enabled. It is also a matter of when.</p> <p>Christchurch has a long history of matching supply and demand for land for residential development. It was the first NZ city to have a Master Transportation Plan, released by the Regional Planning Authority in 1962. It has not shirked its responsibilities to apply sensible planning principles over long periods including protection for Christchurch International Airport. Notably, CIAL is the main civilian alternative airport for Auckland and must retain 24/7 operational capability. Otherwise aviation operational costs would soar because of the fuel implications.</p> <p>The option central government is promoting in its legislation is to allow individual property owners and developers to intensify on an ad hoc basis when it suits them and for whatever end use may eventuate. Furthermore, there is an assumption that either the existing infrastructure can absorb higher density living, or that the city (ratepayers) will increase the capacity of vital systems in response to the added pressure. Central government funds need to be directed to support the infrastructure needed in order to achieve their policy objectives.</p> <p>Retrofitting increased capacity is a disruptive activity. Much of the post-earthquake replacement infrastructure has been to replace existing systems without regard for the suddenly imposed housing intensification it is to service.</p> <p>One obvious means of channeling such support is in the retroprovision of high quality public transport that would operate in an integrated way between road and rail, at high frequency obviating the need for timetables. Improving public transport is generally acknowledged as a means to address climate change.</p> <p>CCT wishes Christchurch to lead by example and be free of insensitive centrally-imposed constraints that do not take into account the fact that the purpose of the RMA and replacement legislation can be achieved in a bespoke intensification plan for Christchurch. A revised District Plan under PC 14 must remain sensitive to the City's unique history, yet open to innovation, as there are many ways to achieve agreed objectives, with some of those ways being more sustainable, equitable, and efficient. It is not just a matter of how much and where additional development should be enabled. It is also a matter of when.</p> <p>Christchurch has a long history of matching supply and demand for land for residential development. Geoff Mahan/ #1039.1		Oppose	Oppose all of plan change.	
Elizabeth Harris/ #1061.5		Seek Amendment	The submitter seeks amendments for any other additional or consequential relief to the District Plan, including but not limited to, the maps, issues, objectives, policies, rules, controls/discretions, assessment criteria and explanation that will fully give effect to the matters raised in the submission and the relevant planning legislation.	
Richmond Residents and Business Association (We are Richmond)/ #1066.1		Seek Amendment	Support the efforts of the Council to convince the Government that a "one glove fits all" approach is not appropriate as far as this Act is concerned, and thank them for their efforts to achieve some acceptance within the Act that locality based modifications were necessary	
Richmond Residents and Business Association (We are Richmond)/1066.1	Anne Dingwall/ #FS2037.669	Seek Amendment	<p>Support the efforts of the Council to convince the Government that a "one glove fits all" approach is not appropriate as far as this Act is concerned, and thank them for their efforts to achieve some acceptance within the Act that locality based modifications were necessary</p> <ul style="list-style-type: none"> ● Increased intensification with infill housing without due regard to the effect on the overall amenity of the district. This is particularly relevant in South Richmond where, we feel, intensification has reached a critical level. ● Loss of vegetation as sections are cleared before the construction of multiple housing units. As intensification increases there is a corresponding decrease in the amount of vegetation on private land. Council initiatives to plant two trees for every one lost on public land are to be commended but only have a moderate effect on the overall loss. ● The perceived threat to existing SAMS Special Amenity Areas/Suburban Character Areas currently in Christchurch. There must be continued efforts to preserve these areas, if only partly to acknowledge the work already done by private citizens as they work through the post-earthquake restoration phase. ● Council's inability to maintain the current infrastructure to an acceptable standard across the city. Along with more intensive development there is a need to establish sustainable practices which secure and improve current infrastructure installation and maintenance. ● Growth of social housing creates an imbalance in the ratio compared to other areas of the city. Further to those identified trends the proposed plan changes and the overall tenure of the Resource Management Act raises other issues. We submitted these thoughts in an 	Support

			<p>earlier submission in the Bill Consultation Process but we consider them to be equally relevant at this stage of the Bill's process and implementation. Therefore we think it worthy to repeat them:</p> <ul style="list-style-type: none"> • The Bill is heavily focussed on the lack of housing while ignoring the 'ripple effect' on infrastructure: utilities, roading, transport systems, social effects, and physical environment. This is particularly relevant in Christchurch where a lack of Governmental support and financial commitment for alternative transport models exists. The concept of a 15 minute city is not realised simply by building houses. It requires a holistic overview and planning if we are to avoid the housing estate catastrophes witnessed in other countries <p>The governance of such a bill implies a heavily oriented 'top down' approach ignoring the fact that there are successful town planning outcomes which are derived from an established consultation process with local residents. It does not appear to offer an avenue to work with and support local Councils who have established successful community planning environments. On the local scene, many residents in Richmond have already suffered from the frustrations of being victims of a top down approach as they sought to repair or rebuild their houses and negotiate the corridors of bureaucracy and its inability to make decisions over the ten years following the earthquakes. Property owners are still in the process of rebuilding and repairing. They have suffered inordinate amounts of stress and do not deserve to be put in a similar situation again</p>

Christian Jordan/ #1086.1		Oppose	Oppose intensification proposed by PC14	
Daphne Robinson/ #2002.3		Oppose	Oppose intensification in leafy suburbs such as Strowan.	
Christchurch Casinos Limited / #2077.3		Oppose	[Opposes] any provisions or changes that will adversely affect the outcome of Policy 3(a) of the NPS-UD - [the submitter supports the intensification of urban form to provide for additional development capacity, particularly near the city and commercial centres, and supports any provisions or changes to the District Plan that will achieve this outcome]	
Christchurch Casinos Limited /2077.3	Kainga Ora - Homes and Communities/ #FS2099.74	Oppose	<p>[Opposes] any provisions or changes that will adversely affect the outcome of Policy 3(a) of the NPS-UD - [the submitter supports the intensification of urban form to provide for additional development capacity, particularly near the city and commercial centres, and supports any provisions or changes to the District Plan that will achieve this outcome] The submitter has an interest in the plan change as a whole and therefore this submission relates to all provisions and zonings of the plan change. The submitter has a specific interest in all provisions and zoning that relate to the site [73 Salsbury Street, 373 Durham Street North, and 51 Peterborough Street]. The submitter is a major Central City business, providing employment for over 260 people, and hosting over 1,400 guests on an average day. The submitter's business is an attraction that adds to the vibrancy and viability of the Central City, as many businesses are supported by the Casino. directly and indirectly, such as accommodation providers, local employment, local businesses, the hospitality and event sector, and so on. The land in question has been subject to a number of master planning exercises by the submitter since the Christchurch earthquakes of 2010/11. The mixture of commercial business and residential zoning has made this exercise challenging to the point that redevelopment has not been advanced with the land currently being used for car parking. Having a large Central City development block with two 'firm' commercial and residential zones within it has not been conducive to allowing the mix and distribution of residential and commercial activity across the site that is needed. This current zoning is directive of two development outcomes across the development block: one being residential and the other being commercial. The submitter has intentions to undertake a comprehensive redevelopment of the entire site, which would ideally comprise a mix of commercial and residential activities. The site is located on a prominent Central City corner site with frontage to a Central City local distributor road and a main distributor road. The character of the area is transitory between more commercial land uses to the south and residential areas to the north of Salisbury Street. Sites to the immediate south of the site are zoned City Centre Zone with sites to the south-east zoned Central City Mixed Use. An appropriate outcome for the submitter's property would be to provide for a combination of housing and business uses and enabling greater building heights and densities. In this regard, Policy 3 of the NPS-UD is of direct relevance, whereby at sub clause (a) it directs that the district plan is to enable building heights and density of urban form to realise as much development capacity as possible, to maximise benefits of intensification in city centre zones. "Development Capacity" is a defined term in the NPS-UD and means the capacity of land to be developed for housing or for business use, based on the zoning, objectives, policies, rules, and overlays that apply in the relevant proposed and operative RMA planning documents; and the provision of adequate development infrastructure to support the development of land for housing or business use. Rezoning that part of the site that is proposed under PC14 to be High Density Residential, along with commensurate changes to the District Plan to provide for this submission and give effect to the NPS-UD, will: provide for an appropriate mixed-use development on the site, including commercial activity in an appropriate location, being a corner site adjacent to existing CCZ and opposite CCMU zoned land; provide greater scope for a development on the site to suitably emphasize the street corner; maintains support for the primacy of commercial centres, supporting the economic growth of the District, and therefore the economic well-being of communities; not have any discernible effects on the amenity of adjoining residential zones, or undermine the residential coherence of residential neighbourhoods; maintain a sufficient supply of housing in the district; contribute to the social and economic well-being of communities and meet the reasonably foreseeable needs of future generations; represent the most appropriate means of exercising the Council's functions, having regard to the efficiency and effectiveness of the provisions relative to other</p>	Support

			means; give effect to the NPS-UD (notably Policy 3) and Canterbury Regional Policy Statement; and promote the sustainable management of natural and physical resources, will be consistent with Part 2 of the Resource Management Act 1991 and ultimately achieve its purpose.	
Christchurch Casinos Limited / #2077.8		Support	[Seeks to support] any other additional or consequential relief to the District Plan, including but not limited to, the maps, issues, objectives, policies, rules, controls/discretions, assessment criteria and explanations that will give effect to the matters raised in this submission and the relevant planning legislation.	
Jim and Janeen Nolan/ #2079.2		Oppose	Oppose the application of NPS-UD through plan change 14.

Consider offering once in a lifetime at the time of taking up land or building ownership a one-off per site one-month-rate-holiday to an appropriate recipient.</p>	
Dew & Associates (Academic Publishers) PO Box 10-110 Phillipstown Chch 8145/470.1	Anne Dingwall/ #FS2037.494	Not Stated	<p>Provision:Subdivision, Development and Earthworks</p> <p>Decision Sought:For Chapter 8 and generally in relation to the RMA (and its successors), I recommend CCC impose an obligation on developers to either retain trees and similar oxygenators or provide them as part of the build permit. AND prosper all land-owners or users to institute a planting or shrub placement regime . Consider offering once in a lifetime at the time of taking up land or building ownership a one-off per site one-month-rate-holiday to an appropriate recipient. It is observed that current residential developments site by site result in the loss of any trees on each plot. Around 7 trees are needed to produce the 740kg of oxygen a human absorbs each year. NB: Trees produce surplus oxygen during the day but take it back again during hours of darkness: however, they still provide a surplus: thus the need for 7 in each relevant location. Beech, Maple, Spruce, Douglas-Fir trees are leading oxygenators. A potted Mother-in-law's tongue shrub [Snake Plant] (maximum height one metre) is amongst the leading 24-hour-a-day oxygenators (it does not require watering etc) and can be strategically positioned at entrance doorways etc. NB: I am not a botanist just a concerned environmentalist: however, I can suggest a fellow academic who is.</p>	Support
