Heritage New Zealand Pouhere Taonga (HNZPT) /193.12	Carter Group Limited/ #FS2045.143	Oppose	Remov[e] P8 HNZPT recommends the proposed activity P8 be amended to a restricted discretionary activity, with Council's discretion limited to the effects on the heritage item or its setting. We consider that the buildings, structures or features in a heritage setting have the potential to contribute to the heritage values of the item, and their alteration through being a permitted activity could have adverse effects on the item. In lieu of all important elements of a setting being clearly identified in the Statement of Significance, which they currently are not, then P8 has the potential to allow inappropriate alterations.	Oppose
Heritage New Zealand Pouhere Taonga (HNZPT) /193.12	Daresbury Limited/ #FS2053.2	Oppose	Remov[e] P8 HNZPT recommends the proposed activity P8 be amended to a restricted discretionary activity, with Council's discretion limited to the effects on the heritage item or its setting. Regarding P2:

Fire and Emergency seek clarity as to whether an intrusive building within a residential heritage area would be subject to the activity specific standards set out in permitted activity rule 9.3.4.1.1.

Fire and Emergency request that the boundaries of RHA 2 are reduced to exclude the Fire and Emergency City Station site at 91 Chester Street East as shown in Figure 2 below.

Oppose

Figure 2: Requested relief to remove 91 Chester Street East from RHA 2.

The site at 91 Chester Street East is held in the same Record of Title as the Christchurch City Fire Station (accessed via Kilmore Street) and is an integral part of the wider site. The site is currently occupied by portacom buildings which are used by Fire and Emergency. The site is intended to be developed into district offices and a resource garage which has been a longstanding proposal and integral to the functioning of the wider site.

Fire and Emergency seek clarity as to whether an intrusive building within a residential heritage area would be subject to the activity specific standards set out in permitted activity rule 9.3.4.1.1. This would result in unnecessary cost and time delays for Fire and Emergency to repair a building that is not of heritage value.

Notwithstanding this, Fire and Emergency has sought in section 1.2 of this submission, that 91 Chester Street East be removed from RHA 2.

Fire and Emergency/ #842.74	Oppose	Regarding P3: Ensure that 91 Chester Street East is not subject to this control; remove site from RHA.
Fire and Emergency/ #842.75	Oppose	Regarding P12: Ensure that 91 Chester Street East is not subject to this rule; remove site from RHA.
Fire and Emergency/ #842.76	Oppose	Regarding P13: Ensure that 91 Chester Street East is not subject to this rule; remove site from RHA.

Hilary Talbot/ #700.7		Seek Amendment	the drafting of these rules should be reviewed to see if a more nuanced approach to buildings in heritage areas is appropriate.	
Hilary Talbot/700.7	Anne Dingwall/ #FS2037.552	Seek Amendment	<p>the drafting of these rules should be reviewed to see if a more nuanced approach to buildings in heritage areas is appropriate.</p> <p>The Council's website states:</p> <p>"We're proposing that, within the identified RHAs, resource consent would be needed for new buildings, additions or alterations to buildings, new fences and walls higher than 1.5 metres, and to demolish or relocate those buildings considered most significant (called "defining" or "contributory" buildings). We'll assess all development proposals on how they affect the heritage values of the area."</p> <p>In the rules the permitted activities are a narrow category of maintenance and repairs (subject to council oversight).</p> <p>Other activities appear to be regulated as resource consents. Some of these activities may be quite minor and many if not most out of sight of the road. This is wider than the word development I have bolded above. I assume the rules do not apply to the interiors of buildings in heritage areas unless they are listed as heritage items but this is not</p> <p>The reason I have focused on this is from experience. In the area I lived in Wellington we were subject to two broad rules - demolition of buildings constructed before 1930 and window alterations would require resource consents.</p> <p>At some juncture the Wellington council issued a draft proposal to have more detailed regulation including restricting satellite dishes (very useful when you live against a hill) and skylights. This caused quite a back-lash. Time shows attachments like satellite dishes, however ugly, don't affect houses permanently. Skylights facing the road can be inappropriate but there are more discrete sites for their placement. But it was unfair as many houses already had them in place. These examples show that achieving the right balance can be challenging.</p>	Support

			<p>The proposed rule appears to make any new buildings and alterations to any building exteriors (whether it is to the defining building or to another building on the site, such as a garage) restricted discretionary activities (noting the exclusions in clause c. It is not clear if the rule is restricted only to the dwellings themselves, or if it covers all buildings on the site).</p> <p>I note the dwellings themselves are not listed, and neither are the settings, so it seems onerous that a new building (which could include a 7m2 garden shed) requires resource consent (unless located to the rear of the dwelling and less than 5m in height).</p> <p>Any alterations to any building exteriors, which could include minor works such as installing a cat door to the defining building or a side door on a detached garage, would appear to require resource consent. This is onerous and has the practical effect of listing the dwelling and any other existing buildings, and also listing the setting. This is excessive as the dwelling itself is not a listed heritage item and neither are any other existing buildings on the site.</p> <p>Assuming these are captured, installing a cat door to the main dwelling or a side door to a garage will have no impact on the residential heritage area which has been identified on the basis of a consistent dwelling style (bungalow) and building period (interwar). Alterations would have to be significant before the identified values of the St Albans Residential Heritage Area could be undermined. This rule is therefore inefficient. It is noted that RD6 is similar to RD 1 for alterations to buildings, yet RD1 is appropriate as the rule applies to listed heritage buildings which have specific identified heritage fabric, whereas buildings in a residential heritage area are not individually listed because of their heritage fabric but rather the contribution they make to the wider heritage area. It is not appropriate to have the same alterations rule applying to non-listed buildings in a residential heritage area.</p>

Historic Places Canterbury/ #835.23		Seek Amendment	The submitter notes where a High Density Residential Zone or a Residential VisitorAccommodation Zone adjoins a Residential Heritage Area, provision has been made to assess theimpact of a proposed building's location, design, scale and form on heritage values or whether itwould visually dominate or reduce the visibility of the site from a road or other public space. However, it is unclear from the wording whether the emphasis is on the fact of a site sharing aboundary or the zone sharing the boundary. It appears from the s. 32 report that it refers to a sitesharing a boundary and that sites separated by a road are not captured by this rule because such sites“will generally have reduced dominance effects due to their separation distance”. The submitter considers thatthis assumption is questionable and suggests these rules need refinement.	
Historic Places Canterbury/835.23	Anne Dingwall/ #FS2037.610	Seek Amendment	The submitter notes where a High Density Residential Zone or a Residential VisitorAccommodation Zone adjoins a Residential Heritage Area, provision has been made to assess theimpact of a proposed building's location, design, scale and form on heritage values or whether itwould visually dominate or reduce the visibility of the site from a road or other public space. However, it is unclear from the wording whether the emphasis is on the fact of a site sharing aboundary or the zone sharing the boundary. It appears from the s. 32 report that it refers to a sitesharing a boundary and that sites separated by a road are not captured by this rule because such sites“will generally have reduced dominance effects due to their separation distance”. The submitter considers thatthis assumption is questionable and suggests these rules need refinement. The potential for visual dominance will be affected both by the width of the carriageway and also by the relationship between relative heights of adjoining zones. Furthermore, if High Density Residential sites are considered to have the potential for causing significant visual dominance effects, then this must hold even more true between a Residential Heritage Area and the Central City Zone with an allowable height of 90m. This zone adjoins part of the Inner City West Residential Heritage area and though they do not “share a boundary” at any point because the two zones are separated by Montreal Street, there can be little doubt that the width of the street would not give sufficient separation to avoid visual domination of a 90m building over an 11m building.	Support

Church Property Trustees / #825.6		Seek Amendment	Delete Heritage Item 465 and Heritage Setting 220 regarding 65 Riccarton Road from Appendix 9.3.7.2.	
Church Property Trustees /825.6	Anne Dingwall/ #FS2037.1230	Seek Amendment	<p>Delete Heritage Item 465 and Heritage Setting 220 regarding 65 Riccarton Road from Appendix 9.3.7.2.</p> <p>The Church was badly damaged during the Canterbury earthquakes and was listed as an Earthquake Prone Building having an NBS of less than 20% on 27 May 2019. The Church is currently in an extremely poor state of repair, and lacks the structural integrity required for its safe usage.</p> <p>the Riccarton parish merged with the Spreydon parish a number of years ago. The Diocese therefore has no use for the Church, the Site itself is redundant and surplus to the Diocese's uses.</p> <p>CPT have investigated in depth the feasibility of reinstating the Church, however, none of the options are economically viable for the Diocese. The Diocese has also investigated the sale of the Site to developers who might otherwise wish to reinstate the Church themselves. CPT's resounding feedback from these market enquiries was that purchasers were reluctant to take on the risk of an extremely low NBS building, and the uncertainty around future use and potential cost of repair.</p>	Oppose
Historic Places Canterbury/ #835.24		Support	The submitter supports the proposed addition of sites and interiors to the heritage schedule, including the upgrading of some listings. The submitter commends the commitment of the Council to providing interior protection for scheduled buildings and recognises that this is an ongoing process. It is pleasing that 26 interiors are proposed to be added to the schedule in this plan change.	
Historic Places Canterbury/835.24	Anne Dingwall/ #FS2037.611	Support	The submitter supports the proposed addition of sites and interiors to the heritage schedule, including the upgrading of some listings. The submitter commends the commitment of the Council to providing interior protection for scheduled buildings and recognises that this is an ongoing process. It is pleasing that 26 interiors are proposed to be added to the schedule in this plan change. The submitter is pleased to note that their recommended additional listings have now been included in the proposed change. They also note that others are under investigation but have not been included because of time constraints in completing the necessary investigations. They acknowledge that thorough investigation is essential and support the continuation of this work. They hope, in due course, to see listing of the Barnett Avenue Pensioner Cottages, the Upper Riccarton War Memorial Library, The Princess Margaret Hospital and the former High Court, for all of which they previously submitted supporting information. Susanne and Janice Antill/ #893.14		Seek Amendment	[Revise the heritage protections in PC14 to better ensure that intensification enabled by the plan change does not erode heritage values of Christchurch]	
Waipuna Halswell-Hornby-Riccarton Community Board/ #902.33		Seek Amendment	[That the] war memorial statue on Jane Deans Close Cul -de- Sac [is] recognised as a Heritage Item.	
Waipuna Halswell-Hornby-Riccarton Community Board/902.33	Kāinga Ora/ #FS2082.1295	Seek Amendment	<p>[That the] war memorial statue on Jane Deans Close Cul -de- Sac [is] recognised as a Heritage Item.</p> <p>Jane Deans Close Cul -de- Sac was formed and developed in the late 1990s. All of the houses are two storied with substantial gardens, some of them award-winning. There is a war memorial statue, erected soon after the street was formed post 1997, replacing the original 1948 memorial. The statue recognises the soldiers of the 20th Infantry Battalion and Armoured Regiment who lost their lives in Greece, Crete, North Africa from 1939 to 1945. An Anzac Day commemoration is held there every year to which the Board sends a representative. The Board requests this memorial be recognised as a Heritage Item and has included this in its submission on Plan Change 13.</p>	Oppose
John Hardie/ #1012.2		Seek Amendment	47 Rue Balguerie Akaroa should be removed from the heritage schedule.	
Julie Florkowski/ #1019.1		Support	Supports the Residential Heritage Areas of Otautahi, Christchurch (specifically, Alpha Avenue).	
Chris Florkowski/ #1020.1		Support	Support the 16 Papanui War Memorial Avenues including Alpha Avenue have been accorded 'highly significant' status;	
Matty Lovell/ #1021.2		Support		
Ben Hay-Smith/ #1035.2		Oppose	Oppose the heritage protection overlays for 9 Ford Road, Opawa, 129 High Street, Christchurch, 159 Manchester Street, 35 Rata Street, Riccarton, and the 25 baches at Taylor's Mistake.	
Ben Hay-Smith/ #1035.4		Support	Supports the intent of these provisions for preserving cemeteries and publicly used bridges.	
justin avi/ #1037.2		Seek Amendment	Remove Antonio Hall (265 Riccarton Road) from the heritage list.	
Peter Earl/ #1038.2		Oppose	The submitter opposes the scheduling of heritage buildings in Plan Change 14.	
Cameron Parsonson/ #1043.2		Seek Amendment	Remove 471 ferry road from the schedule of designated heritage buildings.	
Cameron Parsonson/1043.2	Heritage New Zealand Pouhere Taonga/ #FS2051.97	Seek Amendment	<p>Remove 471 ferry road from the schedule of designated heritage buildings.</p> <p>I make application to remove 471 ferry road from the schedule of designated heritage buildings for the following reasons:</p>	Oppose

			<p>Original method of construction means that it is not possible to economically disassemble and rebuild the structure.</p> <p>Engineering a rebuild of this stacked rubble-stone building would be expensive and require near full disassembly of the structure in order to rebuild it, putting it beyond feasibility.</p> <p>There is little community interest in the asset being restored. Its construction material is its most novel endearing feature, but if restored would offer little economic or commercial interest to the owner or the community.</p> <p>Any rebuild would likely require significant local government heritage grants if it was to be pursued.</p> <p>The building is landlocked; access is via an easement over another property from the rear and new traffic islands and the pedestrian crossing configuration mean that it's Ferry road frontage is unusable.</p>	
Papanui Heritage Group/ #1050.2		Support	Support the scheduling of the sixteen (we believe fifteen Papanui Memorial Avenues, plus Tillman Avenue), to the District Plan's Schedule of Significant Historic Heritage for protection.	
The Rannerdale Trust/ #1055.1		Seek Amendment	Seek change the extent of the heritage area surrounding Stevenholm House (also known as Rannerdale House and Kauri House) to reflect the recent subdivision of the wider property (RMA20223600)	
The Rannerdale Trust/ #1055.2		Seek Amendment	Seek removal of the vehicle access from Suva Street, driveway and parking areas from within the heritage setting boundary;	
The Canterbury Jockey Club/ #1059.3		Support	Retain the deletion of Heritage Item 453 from Appendix 9.3.7.2 Schedule of Significant Historic Heritage Items as notified.	
Graham Robinson/ #1065.1		Seek Amendment	The submitter requests that the Teddington Lockup (153 Governor's Bay-Teddington Road) should be scheduled as a heritage item in the District Plan, for its high heritage values.	
Catherine Elvidge/ #1067.1		Seek Amendment	<p>The submitter seeks that the 16 Papanui War Memorial Avenues not be listed as a heritage item in Appendix 9.3.7.2. Alternatively they seek that:</p> <ul style="list-style-type: none"> - The listing be amended to include the specific aspects of the streets which comprise the item. - The plaques not be included in the listing. - A street-by-street assessment of each street be undertaken and only trees from the original memorial planting or others of significant landscape value be listed. - The trees be included in sub-chapter 9.4 Significant and other trees, rule 9.4.1.1 P6 and P12, instead of sub-chapter 9.3 Historic heritage. 	
Danny Whiting/ #1070.1		Seek Amendment	Reduce the spatial extent of the heritage setting 423 (for heritage item 209 at 27 Glandovey Road) so as to exclude 7 and 9 Thornycroft Street.	
Richard and Suzanne Peebles/ #1072.2		Seek Amendment	Reduce the spatial extent of the heritage setting 423 (for heritage item 209 at 27 Glandovey Road) so as to exclude 7 and 9 Thornycroft Street.	
James David Bundy/ #1074.1		Seek Amendment	<p>The submitter requests the following buildings be added to the heritage schedule:</p> <ul style="list-style-type: none"> - Burnside Stable at 79 Bamfords Road, Allandale - Lockup at Allandale on Council reserve.

			<p>Supports the inclusion of the following properties to the Heritage Schedule:</p> <ul style="list-style-type: none"> - The Tuberculosis Sanatorium Shelter Hut in Coronation Reserve, Huntsbury - The modernist dwelling on Ford Rd, Opawa - Sydenham Cemetery on Roker St, Somerfield - Somerfield War Memorial Community Centre and Setting, on Studholme St, Somerfield - 25 baches at Taylors Mistake and their settings <p>The Waihoru Spreydon-Cashmere Community Board (The Board) appreciates the opportunity to make a submission to the Christchurch City Council on the Proposed Draft Heritage Plan Change (PC13), and thanks staff for the work done on this matter.</p> <p>The Board's statutory role is, "to represent, and act as an advocate for, the interests of its community" and "to prepare an annual submission to the territorial authority for expenditure within the community" (Local Government Act 2002, section 52). The Board provides this submission in its capacity as a representative of the communities in the Spreydon-Cashmere-Heathcote area.</p> <p>Our Community Board Plan's vision is that Spreydon-Cashmere-Heathcote is a place where people are actively engaged and contribute to thriving communities and environments, where they feel they belong and are safe and connected with each other.</p> <p>The Board understands the need for increased intensification to address a range of issues, not least of which is climate change mitigation. The Board's concern is that intensification does not occur in an ad hoc fashion, but instead takes into account all the social and environmental factors that enables people to continue to enjoy and thrive in their local settings, and considers the proposed plan changes as a key tool for creating a cohesive approach.</p>	
Mike Percasky/ #1085.2		Oppose	Retain the existing spatial extent of the heritage item and setting for the Duncan's Buildings as shown on Aerial map reference 693, Heritage item number 1432, heritage setting number 604.	
Christian Jordan/ #1086.2		Oppose	[Oppose] this plan review to be used to remove any Historic Sites from the register even if the site is damaged or destroyed.	
Christian Jordan/1086.2	Kainga Ora - Homes and Communities/ #FS2099.5	Oppose	<p>[Oppose] this plan review to be used to remove any Historic Sites from the register even if the site is damaged or destroyed.</p> <p>Heritage tells the story of our past. It is also a gift from past generations to our future. Memories of place are important for a sense of belonging and community. Actively discouraging developers who do not value heritage buildings by requiring them to do additional assessment before demolition consent is granted (irrespective of a building's heritage status), will create opportunities for other buyers to develop and restore these buildings in a way that respects their heritage values.</p> <p>Often it is only a marginal decision whether a building can be saved or demolished and encouraging development of later (and now often dilapidated) 'tract' or 'housing company' 1950s and 60s homes sitting on large sites but still within close proximity of suburban centres is a better outcome for the city.</p> <p>High quality houses with heritage value often sit on slightly larger sections which in a rapidly rising market through late 2020 to early 2022, led to decisions to demolish being made purely on the economics at that moment in time, rather than on the long view of the intrinsic value that a heritage building may have.</p> <p>As there are irreversible losses, and the value of workmanship on these buildings generally well exceeds the current market value of the improvements, real care is needed to ensure potential value for future generations is not being discarded on the basis of artificial economics.</p> <p>Artificially constraining zonings outside areas of pre 1940 homes while liberalising zoning in areas containing significant numbers of pre 1940 homes, creates artificial economic rationale for heritage demolition.</p> <p>The solutions for the city should also be read in context of my submission on PC14.</p>	Oppose

Faye Collins/ #1090.5		Seek Amendment	Seeks that the war memorial, sites in Jane Deans Close is added to the heritage list.	
Faye Collins/1090.5	Anne Dingwall/ #FS2037.650	Seek Amendment	Seeks that the war memorial, sites in Jane Deans Close is added to the heritage list. The Board recommends inclusion of a war memorial, sited in Jane Deans Close, in honour of those who died in the 20th Battalion in World War 2. The 20th Battalion left from this area and served in Greece, Crete and North Africa from 1940 to 1945. A well-attended Anzac service is held at the memorial every year	Support
Cambridge 137 Limited/ #1092.2		Oppose	Delete within Appendix 9.3.7.2 'Schedule of Significant Historic Heritage' reference to the Heritage Listing (Building and Setting) for 137 Cambridge Terrace 'Commercial Building and Setting, Harley Chambers' Item No 78 and Setting No 309.	
Cambridge 137 Limited/1092.2	Anne Dingwall/ #FS2037.645	Oppose	Delete within Appendix 9.3.7.2 'Schedule of Significant Historic Heritage' reference to the Heritage Listing (Building and Setting) for 137 Cambridge Terrace 'Commercial Building and Setting, Harley Chambers' Item No 78 and Setting No 309. The basis for opposition is that the respective Statement of Significance for Harley Chambers bears no reality to: a. the condition of the building, b. its seismic risk, and that c. any endeavours to provide any purpose or function would be both financially unworkable and result in the removal of residual heritage fabric to the extent that the building would not warrant scheduling.5. Accordingly, the retention of 137 Cambridge Terrace within Appendix 9.3.7.2 is not the most appropriate way to achieve Objective 9.3.2.1.1 and Policy 9.3.2.2.1, and in particular Policy 9.3.2.2.1(c)(i) and (ii) as these relate to significance, integrity, engineering and financial reasonableness. Peter Beck/ #22.1		Seek Amendment	Extend the Chester Street East Residential Heritage Areas to cover the entire street.	
Peter Beck/22.1	Anne Dingwall/ #FS2037.55	Seek Amendment	<p>Extend the Chester Street East Residential Heritage Areas to cover the entire street.</p> <p>As the owner of 6/173 Chester Street East it is clear that the consultant who provided his/her recommendation is completely mistaken in that the argument against including the whole of the street used a percentage-of-historic-dwelling calculation system that counted the seven historic units at 1 73 only as 'one' building. In fact they are and have always been each under separate title. Astonishingly the consultant states that 'because it has been partly rebuilt, its heritage values are compromised'. On the basis of this logic then such buildings as the Cathedral in the square [of which I was Dean from 2002 to 2012] clearly has its heritage value compromised!!</p> <p>The consultant clearly did not realise that historically [and currently] these units were mixed-use commercial and residential from their construction. It is simply wrong to state that they are simply 'a non-residential building converted to residential use.' This incorrect analysis has resulted in the belief that the high standard required by the legislation has not been reached in our street. In fact this is because of the underestimation of both the numbers and the historical nature of the buildings. This result of this mistaken analysis is that already two buildings over 100 years old have already been demolished. It is my view that this should not be allowed to continue.</p> <p>I respectfully ask the City Council to include the whole of Chester Street East in preserving and enhancing areas of special heritage and character and so leave a legacy for current and future generations.</p>	Support
Logan Brunner/ #191.1		Oppose	[That proposed Residential Heritage Areas are removed]	
Logan Brunner/191.1	Anne Dingwall/ #FS2037.264	Oppose	<p>[That proposed Residential Heritage Areas are removed]</p> <p>We oppose all changes to heritage areas. The PC13 changes represent a considerable expansion in number and area heritage precincts. These heavily restrict people from building more housing and are often located in parts of the city with the best street grids for livable intensification. The council claims that the number of properties is low, but this is concealing the large lots and large land area these areas consume, and proximity to amenities. The council should consider keeping the amount of heritage area fixed, adding more if they please, but removing other areas deemed to be of the lowest value.</p> <p>Heritage or character value should not be used as a reason to protect housing that is not up to standard. These designations are often removed from the reality of the value that these houses actually provide to their residents. The aesthetic value of these houses should not trump the need of residents to live in comfortable, safe, and healthy homes. What is the point of housing if not to provide those qualities?</p>	Oppose
Heritage New Zealand Pouhere Taonga (HNZPT) / #193.18		Support	Retain as proposed.

Marie Byrne/ #1063.1		Seek Amendment	Include existing Medium Density Residential area in Phillipstown Cashel Street to Ferry Road, Bordesley Street to Nursery Road to a Qualifying matter - heritage area.	
Keri Whaitiri/ #1069.1		Seek Amendment	Seek that the 'defining' and 'contributory' categories in Residential Heritage Areas are removed completely from the proposed new Policy Changes.	
Keri Whaitiri/1069.1	Susan Wall/ #FS2015.2	Seek Amendment	<p>Seek that the 'defining' and 'contributory' categories in Residential Heritage Areas are removed completely from the proposed new Policy Changes.</p> <p>The Heritage Team of CCC have, yet again, sought to take advantage of their position and impose self-serving policy on owners of old houses in old suburbs.</p> <p>The proposed CCC Heritage Policy Changes 13 and 14 seek to not only sidestep the requirements of the National Policy Statement Urban Development by applying 'Qualifying Matters' to proposed new 'Residential Heritage Areas', they also seek to bring in categorisation of non-heritage listed properties by including them as 'contributory' or 'defining'. This new heritage categorisation effectively extends the pool of heritage properties that sit under the discretion and authority of the CCC Heritage Team, thereby further substantiating their own existence. This categorisation is unnecessary and contrary to the purpose of the NPS-UD.</p>	Support

			<p>The fact that these 'contributory' or 'defining' properties are only shown in 'hard-copy' Policy Change documents, but not in online interactive digital maps, is highly misleading. It is an indicator of policy that has been poorly considered. It could result in a number of property owners not being aware of the effect the proposed Policy Changes might have on their non-listed property. Owners that this applies to have not been properly consulted, notified nor given the courtesy of actually knowing that their property is affected within PC13 and PC14, if they have relied on the interactive digital maps to inform them.</p> <p>There is little indication of the difference between the proposed new 'Residential Heritage Areas' and existing 'Residential Character Areas'. Nor is there clear information of the purpose of the new moniker and the actual regulatory requirements that all property owners within it will be subject to. The purpose and effects of PC13 and PC14 have been poorly communicated.</p> <p>Furthermore, the elevation of colonial heritage values in this day and age comes from a position of privilege and bias. It undermines the intended bicultural roots of NZ society and perpetuates one ideological system that has been enshrined in physical fabric, over intangible values that have been subjugated and erased over the past 170 years.</p> <p>The NPS-UD 2020 serves a particular purpose - it is to secure sufficient development capacity for new housing. This is to counteract the housing crisis and open up opportunity for more people to have the benefit of living close to urban amenities, making 'good' areas for living more accessible to a larger part of society.</p> <p>One could argue that in perpetuating the notion of 'Residential Heritage Areas' based on colonial heritage values that a Local Government Authority is limiting opportunities for future expression with building stock that departs from the colonial status quo. The idea that existing Heritage Items are subject to current restrictions, regulatory requirements and protections is valid. The notion that new categorisations of 'contributory' and 'defining' properties is an appropriate response to the NPS-UD is not valid. The purpose of the wording change from 'Residential Character Area' to 'Residential Heritage Area' is unclear. One would hope that the proposed Policy Changes were a useful step in tipping the balance of housing affordability (an aspiration that is increasingly beyond the grasp of most young NZers) as opposed to protecting the privilege of older generations.</p> <p>By applying 'Qualifying Matters' to proposed new 'Residential Heritage Areas' CCC subverts a National Policy that is aimed at greater access to housing stock and proposes changes that seem to effectively increase colonial heritage protection and restrictions on development. This is in conflict with the intention of the National Policy Statement Urban Development 2020.</p>	
181 High Limited / #1073.1		Seek Amendment	Reduce the spatial extent of the heritagesetting 555 as proposed on Aerial mapreference 693, for Heritage item number 1313so that it is coincidental to the extent of the heritage item.

Anne Dingwall/ #1089.6		Seek Amendment	Include Daresbury House in the Schedule of Heritage buildings	
Anne Dingwall/1089.6	Anne Dingwall/ #FS2037.657	Seek Amendment	Include Daresbury House in the Schedule of Heritage buildings This is one of the nation's great domestic buildings, a Hurst Seager masterpiece, residence of the Governor-General (1940 -1950). Daresbury received the Christchurch Civic Trust Supreme Award for restoration and refurbishment in November 2010. If it is removed from the Schedule, this heritage taonga will be completely open to demolition, with no protection whatsoever because a resource consent to demolish will not be required. Furthermore, although it was built after 1900, its potential protection under an archaeological authority, which may pertain to the site, gives no guarantee of protection for the building itself. CCT considers it essential that Daresbury remains as a Highly Significant building on the CCC Heritage Schedule. Include Daresbury House in the Schedule of Heritage buildings This is one of the nation's great domestic buildings, a Hurst Seager masterpiece, residence of the Governor-General (1940 -1950). Greg Partridge/ #794.6		Oppose	The submitter opposes the reduction in Christchurch's tree canopy cover by housing intensification. The Council should seek an immediate amendment to the Enabling Housing Supply and Other Matters Act to be implemented in order for regulations to be introduced that protect the city's tree canopy from being decimated by property developers.	

Greg Partridge/794.6	Anne Dingwall/ #FS2037.729	Oppose	<p>The submitter opposes the reduction in Christchurch's tree canopy cover by housing intensification. The Council should seek an immediate amendment to the Enabling Housing Supply and Other Matters Act to be implemented in order for regulations to be introduced that protect the city's tree canopy from being decimated by property developers.</p> <p>The submitter has concerns regarding the loss of the city's tree canopy from housing intensification and lack of effort by Council to protect trees or increase the tree canopy. The submitter provides the following analysis on the importance of protecting and enhancing the tree canopy:</p> <ul style="list-style-type: none"> - The tree canopy coverage of our city is essential, and as green infrastructure it should be viewed by the City Council and Council policy as a “Priority #1 Must Have” rather than a “Nice to Have.” - Disappointingly however, since declaring a Climate and Ecological Emergency four years ago in May 2019, the Christchurch City Council have not added any additional trees the list of protected trees in our city in spite of the fact the City Council has been advised through academic reports and assessments that the percentage of tree canopy coverage has diminished across Christchurch and significant trees have been lost from our landscape. - A mapping report commissioned by the City Council through the University of Canterbury provided the Council with a snapshot of the tree canopy cover in Christchurch between 2018 and 2019. It revealed that since the previous mapping was completed in 2015 and 2016 tree canopy coverage had dropped from 15.59% down to 13.56% in less than three years. That 2-percentage point reduction equates to a 13.02% decrease in the overall tree canopy coverage of our city. - In a city that has declared a Climate and Ecological Emergency, that should set off alarm bells, however given the fact again there appears to be no mention of the retention of our cities existing established trees in the Growing Christchurch Plan, it would appear the Council are either very much asleep at the wheel, disinterested or are disingenuous in terms of the declaration in spite of all the rhetoric. - The Council's Head of Parks Andrew Ruttledge has said trees are going to play an increasingly vital role in carbon sequestration as the Council tries to achieve its goal of becoming carbon neutral by 2045, and yet in the Ōtautahi Urban Forest Plan the Council have only set a target to increase the tree canopy coverage of Christchurch to 20%, and not until 2070 – that’s 47 years away. When compared to neighbouring cities in Australia, the aims of our City Council are lacking. - Not only should it be retained, but the tree canopy coverage of our entire city must be enhanced in order for the Council’s declaration of a Climate and Ecological Emergency to be given any tangible meaning, and not just in the public parks of our city, but throughout every suburb and residential street of Christchurch. - Over recent years, thousands of well-established trees have been clear felled by property developers who operate with no environmental code of ethics in their business. Their primary focus is on making money, which is understandable, however the commercial interests and short-term financial gains of a limited few should not be given preference over the long-term environmental gains of the masses, nor should it compromise the environment that will be inherited by generations of today’s citizens, nor those of the future. - The Council's declaration of a Climate and Ecological Emergency was a call to action, but four years have passed and nothing has been done to protect and guarantee that the existing established trees of our city and suburbs are retained. - Elected members of the Council and Staff have given the excuse that due to government legislation it is very difficult to protect trees. Auckland Council however have managed to increase its number of protected trees over the same four years. - If the city is to grow and is to be a healthy sustainable city that functions well, a city that puts the wellbeing of its citizens, visitors and environment first, it must be well planned and well considered rather than blindly adhering to the edict and directives of political parties who have a vested interest in gaining political support. - The commercial gains and wants of a limited few should not be put first and enabled at the expense and wellbeing of those who live here, nor should the environment be compromised. The Riccarton Bush Trust/ #44.7		Seek Amendment	Amend 9.4.4.1.1 to permit earthworks within 10 metres of the base of any tree in the Riccarton Bush Significant Trees area.	
The Riccarton Bush Trust/44.7	Anne Dingwall/ #FS2037.72	Seek Amendment	<p>Amend 9.4.4.1.1 to permit earthworks within 10 metres of the base of any tree in the Riccarton Bush Significant Trees area.</p> <p>The apparent error</p> <p>The amendments proposed to the District Plan at 9.4.4.1 include the introduction of a tree protection zone based on individual trees. This is an unnecessary change to the status quo, introduced under Plan Change 44 (PC44) to remove the very issue that the current amendment will re-introduce. Namely that tree protection based on buffer of (at least 10m) from the base of the predator proof fence that indicated the “significant tree area” is superior as it protects all the trees within the area including saplings and other smaller (or thinner) trees.</p> <p>In contrast PC14 has introduced the ‘Tree protection zone radius’ which is defined as meaning:</p> <p><i>...the protection area around a scheduled tree, which is equivalent to 15 times the trunk diameter at 1.4m, where activities and development are managed to prevent damage to a scheduled tree. The maximum extent of a tree protection zone radius is restricted to 15m.</i></p> <p>The rationale for the change is that:</p> <ul style="list-style-type: none"> Existing rules refer to works within the first 10 metres of the base of any tree within the Riccarton Bush Significant Tree area. However, instead of an arbitrary 10m, PC14 has introduced the above concept to ensure that the setback is relative to the scale of trees – up to a maximum of 15m. <p>As noted above, the 10m distance was not arbitrary but deliberate. It was chosen for a purpose. It was also arrived at in the course of PC44, and agreed to by neighbours involved in that process.</p> <p>Further enquiries with CCC indicated that this appeared to be an administrative error and CCC staff are aware of the unworkability of the changes. The officer contacted by the Board commented:</p> <p><i>“I have enquired further about this rule to better understand its genesis and reasoning. The phrasing proposed for RD6 appears to have been an oversight, for the simple reason that there is no ability to measure a tree trunk when the rule specifies that the trunk is the predator-proof fence. The original rule deliberately used the predator-proof fence as the base for measurement to make the measurement easier and uniform, and apply to mature trees as well as saplings that,</i></p>	Support

			<p><i>without disturbance or damage will eventually grow and mature contributing to the sustainability of Putaringamotu. Another reason for using the predator-proof fence as a “base of a tree” within the old City Plan rules was that Riccarton Bush is logically treated as one entity, rather than a collection of individual trees within, and is shown as such on the maps.</i></p> <p><i>In this respect, a more appropriate control may simply be retaining the current controls due to the unique circumstances under which the Bush is protected in the Plan. I would encourage you to make a submission on this particular part of the proposal.”</i></p> <p>This submission is therefore made requesting that the status quo be restored in relation to the buffer area.</p>

Submission Number	Further Submission No	Position	Decision Requested	FS Position
The Riccarton Bush Trust/ #44.4		Seek Amendment	Amend 9.4.4.1.3 - Restricted discretionary activities to provide for notification of resource consents to the The Riccarton Bush Trust Board.	
The Riccarton Bush Trust/44.4	Anne Dingwall/ #FS2037.69	Seek Amendment	<p>Amend 9.4.4.1.3 - Restricted discretionary activities to provide for notification of resource consents to the The Riccarton Bush Trust Board.</p> <p>There appears to be an inadvertent error in the rules at 9.4 Significant and Other Trees. The Board believes the discretionary protections also maintained from the current Plan settings, would be strengthened by enabling the Board’s input on resource consent applications within the interface area. Meaning that the Board should be notified when resource consents are applied for in this area.</p> <p>The apparent error</p> <p>The amendments proposed to the District Plan at 9.4.4.1 include the introduction of a tree protection zone based on individual trees. This is an unnecessary change to the status quo, introduced under Plan Change 44 (PC44) to remove the very issue that the current amendment will re-introduce. Namely that tree protection based on buffer of (at least 10m) from the base of the predator proof fence that indicated the “significant tree area” is superior as it protects all the trees within the area including saplings and other smaller (or thinner) trees.</p> <p>In contrast PC14 has introduced the ‘Tree protection zone radius’ which is defined as meaning:</p> <p><i>...the protection area around a scheduled tree, which is equivalent to 15 times the trunk diameter at 1.4m, where activities and development are managed to prevent damage to a scheduled tree. The maximum extent of a tree protection zone radius is restricted to 15m.</i></p>	Support

The rationale for the change is that:

- Existing rules refer to works within the first 10 metres of the base of any tree within the Riccarton Bush Significant Tree area. However, instead of an arbitrary 10m, PC14 has introduced the above concept to ensure that the setback is relative to the scale of trees – up to a maximum of 15m.

As noted above, the 10m distance was not arbitrary but deliberate. It was chosen for a purpose. It was also arrived at in the course of PC44, and agreed to by neighbours involved in that process.

Further enquiries with CCC indicated that this appeared to be an administrative error and CCC staff are aware of the unworkability of the changes. The officer contacted by the Board commented:

“I have enquired further about this rule to better understand its genesis and reasoning. The phrasing proposed for RD6 appears to have been an oversight, for the simple reason that there is no ability to measure a tree trunk when the rule specifies that the trunk is the predator-proof fence. The original rule deliberately used the predator-proof fence as the base for measurement to make the measurement easier and uniform, and apply to mature trees as well as saplings that, without disturbance or damage will eventually grow and mature contributing to the sustainability of Putaringamotu. Another reason for using the predator-proof fence as a “base of a tree” within the old City Plan rules was that Riccarton Bush is logically treated as one entity, rather than a collection of individual trees within, and is shown as such on the maps.

In this respect, a more appropriate control may simply be retaining the current controls due to the unique circumstances under which the Bush is protected in the Plan. I would encourage you to make a submission on this particular part of the proposal.”

This submission is therefore made requesting that the status quo be restored in relation to the buffer area.

Further concern

Of further and particular concern to the Board is 9.4.4.1.3 RD6 that details:

Any application for this activity shall not be limited or publicly notified.

Consequently, there is no ability for a resource consent application to be notified to potentially affected parties and Council would apply its discretion to consider the effects associated with such an application. The Board, particularly given its statutory role in protecting the Bush, believes this is provision inadequate.

It means that the Board would not have the ability to formally comment on or have input regarding the listed matters of discretion, which remain as follows:

9.4.6 Rules – Matters of discretion

...

Riccarton Bush

I. For the lowland kahikatea forest remnant at 16 Kahu Road, which forms part of the greater Riccarton Bush and House Reserve, and is defined by a ‘Protected Trees Area’ symbol identified as a ‘Significant Trees Area’ on Planning Map 38B, the Council shall additionally have regard to the following matters:

- i. The effects of any building, including the type of foundation used, and/or shading by the building on the existing trees and the supporting ecosystem of the forest remnant, including the juvenile regenerating trees;
- ii. The effects of any works on the extensive surface and sub-surface root systems of the kahikatea trees; 20
- iii. The effects of any impervious surfaces on the health and viability of the trees and the supporting ecosystem including soil aeration and hydrological balance; and
- iv. Whether constructing a building in close proximity to the forest remnant is likely to give rise to reverse sensitivity regarding shading, branch overhang, encroaching tree roots or windthrow;

			<p>So, while there are no planned changes to these matters under PC 14 it remains uncertain as to how the regard to be had to them is managed. This includes who determines the impact and how, or whether, the Board can provide any feedback.</p> <p>The Board considers that even if wider notification of resource consent applications within the Riccarton Bush Interface is not to occur (including further limited notification), the proper management of the matters of discretion should involve notification on the Board. This does not mean that the Board will need to be involved in every resource consent application, especially if the effects (if any) on Pūtarīngamotu are negligible. But the Board should be made aware and given the option of submitting any concerns where necessary.</p>

Whether constructing a building in close proximity to the forest remnant is likely to give rise to reverse sensitivity regarding shading, branch overhang, encroaching tree roots or windthrow;</p> <p>So, while there are no planned changes to these matters under PC 14 it remains uncertain as to how the regard to be had to them is managed. This includes who determines the impact and how, or whether, the Board can provide any feedback.</p> <p>The Board considers that even if wider notification of resource consent applications within the Riccarton Bush Interface is not to occur (including further limited notification), the proper management of the matters of discretion should involve notification on the Board. This does not mean that the Board will need to be involved in every resource consent application, especially if the effects (if any) on Pūtaringamotu are negligible. But the Board should be made aware and given the option of submitting any concerns where necessary.</p>	
The Riccarton Bush Trust/44.4	Kāinga Ora/ #FS2082.14	Seek Amendment	<p>Amend 9.4.4.1.3 - Restricted discretionary activities to provide for notification of resource consents to the The Riccarton Bush Trust Board.</p> <p>There appears to be an inadvertent error in the rules at 9.4 Significant and Other Trees. The Board believes the discretionary protections also maintained from the current Plan settings, would be strengthened by enabling the Board's input on resource consent applications within the interface area. Meaning that the Board should be notified when resource consents are applied for in this area.</p> <p>The apparent error</p> <p>The amendments proposed to the District Plan at 9.4.4.1 include the introduction of a tree protection zone based on individual trees. This is an unnecessary change to the status quo, introduced under Plan Change 44 (PC44) to remove the very issue that the current amendment will re-introduce. Namely that tree protection based on buffer of (at least 10m) from the base of the predator proof fence that indicated the "significant tree area" is superior as it protects all the trees within the area including saplings and other smaller (or thinner) trees.</p> <p>In contrast PC14 has introduced the 'Tree protection zone radius' which is defined as meaning:</p> <p><i>...the protection area around a scheduled tree, which is equivalent to 15 times the trunk diameter at 1.4m, where activities and development are managed to prevent damage to a scheduled tree. The maximum extent of a tree protection zone radius is restricted to 15m.</i></p> <p>The rationale for the change is that:</p> <ul style="list-style-type: none"> Existing rules refer to works within the first 10 metres of the base of any tree within the Riccarton Bush Significant Tree area. However, instead of an arbitrary 10m, PC14 has introduced the above concept to ensure that the setback is relative to the scale of trees – up to a maximum of 15m. <p>As noted above, the 10m distance was not arbitrary but deliberate. It was chosen for a purpose. It was also arrived at in the course of PC44, and agreed to by neighbours involved in that process.</p> <p>Further enquiries with CCC indicated that this appeared to be an administrative error and CCC staff are aware of the unworkability of the changes. The officer contacted by the Board commented:</p> <p><i>"I have enquired further about this rule to better understand its genesis and reasoning. The phrasing proposed for RD6 appears to have been an oversight, for the simple reason that there is no ability to measure a tree trunk when the rule specifies that the trunk is the predator-proof fence. The original rule deliberately used the predator-proof fence as the base for measurement to make the measurement easier and uniform, and apply to mature trees as well as saplings that, without disturbance or damage will eventually grow and mature contributing to the sustainability of Putaringamotu. Another reason for using the predator-proof fence as a "base of a tree" within the old City Plan rules was that Riccarton Bush is logically treated as one entity, rather than a collection of individual trees within, and is shown as such on the maps.</i></p> <p><i>In this respect, a more appropriate control may simply be retaining the current controls due to the unique circumstances under which the Bush is protected in the Plan. I would encourage you to make a submission on this particular part of the proposal."</i></p> <p>This submission is therefore made requesting that the status quo be restored in relation to the buffer area.</p>	Oppose

			<p>Further concern</p> <p>Of further and particular concern to the Board is 9.4.4.1.3 RD6 that details:</p> <p><i>Any application for this activity shall not be limited or publicly notified.</i></p> <p>Consequently, there is no ability for a resource consent application to be notified to potentially affected parties and Council would apply <i>its</i> discretion to consider the effects associated with such an application. The Board, particularly given its statutory role in protecting the Bush, believes this is provision inadequate.</p> <p>It means that the Board would not have the ability to formally comment on or have input regarding the listed matters of discretion, which remain as follows:</p> <p>9.4.6 Rules – Matters of discretion</p> <p>...</p> <p>Riccarton Bush</p> <p>I. For the lowland kahikatea forest remnant at 16 Kahu Road, which forms part of the greater Riccarton Bush and House Reserve, and is defined by a 'Protected Trees Area' symbol identified as a 'Significant Trees Area' on Planning Map 38B, the Council shall additionally have regard to the following matters:</p> <p>i. The effects of any building, including the type of foundation used, and/or shading by the building on the existing trees and the supporting ecosystem of the forest remnant, including the juvenile regenerating trees;</p> <p>ii. The effects of any works on the extensive surface and sub-surface root systems of the kahikatea trees; 20</p> <p>iii. The effects of any impervious surfaces on the health and viability of the trees and the supporting ecosystem including soil aeration and hydrological balance; and</p> <p>iv. Whether constructing a building in close proximity to the forest remnant is likely to give rise to reverse sensitivity regarding shading, branch overhang, encroaching tree roots or windthrow;</p> <p>So, while there are no planned changes to these matters under PC 14it remains uncertain as to how the regard to be had to them is managed. This includes who determines the impact and how, or whether, the Board can provide any feedback.</p> <p>The Board considers that even if wider notification of resource consent applications within the Riccarton Bush Interface is not to occur (including further limited notification), the proper management of the matters of discretion should involve notification on the Board. This does not mean that the Board will need to be involved in every resource consent application, especially if the effects (if any) on Pūtaringamotu are negligible. But the Board should be made aware and given the option of submitting any concerns where necessary.</p>

John Hardie / #1011.1		Oppose		
John Hardie / #1011.1	The Riccarton Bush Trust / #FS2085.48	Oppose	<p>The JG & JL Hardie Family Trust (the Trust) is the owner of the property at 48 Rata Street, Riccarton, Christchurch. Riccarton bush abuts two sides of the property. The property is rectangular in shape, and one of those sides is obviously much longer and I refer to that as the south side. The other side is shorter in length and is at the back of the property and I refer to this as the west side.</p> <p>In 2010 – 11 the Council promulgated plan change 44 which sought to bring about setback controls on the Trust property relating to those parts which abutted Riccarton Bush. Those controls sort a 10 m setback restricting development on the property, but the 10 m setback was measured from a predator proof fence situated 4 m inside the Bush property. Thus the setback on the Trust property was 6 m. It was opposed by the Trust, and expert evidence was called to say that the controls were not warranted.</p> <p>Those controls were predicated upon a desire to protect a particularly important tree in the Bush area, that being the kahikatea tree. That is because the roots of that tree extend outwards from the trunk or than other trees. The Trust expert identified existing kahikatea trees inside the bush and gave evidence that none of those trees could be affected by any development on the Trust property. Number close to the boundary of the property. Nevertheless, the hearing Commissioner Mr Lawn asked if the Trust is a compromise would accept the setback on the shorter West side of the property, and the Trust agreed in conjunction with the submitter the Riccarton Bush Trust, on the understanding that there would be no controls on the south side. That was referred to in the decision of the Commissioner and became embedded in the rule which allowed the setback.</p> <p>The Council has now proposed a completely different basis of determining a setback based on a distance calculated based on the diameter of all trees in the bush. This is opposed. It is unworkable. It appears to apply to all trees are not just the kahikatea tree. It would require all trees in the bush to be measured on a continuing basis because of a change in trunk diameter. The Trust would accept a continuation of the rule that existed in the Plan prior to the introduction of the proposed new rule, and if that is not done by agreement, it opposes all restrictions on the boundary of its property. The Trust is agreeable to acting in good faith to uphold its agreement made during PC 44, despite the fact that it called expert evidence to say that no controls were necessary in relation to its property.</p> <p>This submission makes no reference to the proposed new rule because it cannot be readily found. It incorporates it by reference to the submission which outlines the nature of the problem and its proposed solution(s)</p>	Oppose

The Riccarton Bush Trust/44.6	Chapman Tripp/ #FS2063.2	Seek Amendment	Amend 9.4.4.1.3 - Restricted discretionary activities to provide for notification of resource consents to the The Riccarton Bush Trust Board.	Oppose

There appears to be an inadvertent error in the rules at **9.4 Significant and Other Trees**. The Board believes the discretionary protections also maintained from the current Plan settings, would be strengthened by enabling the Board's input on resource consent applications within the interface area. Meaning that the Board should be notified when resource consents are applied for in this area.

The apparent error

The amendments proposed to the District Plan at 9.4.4.1 include the introduction of a tree protection zone based on individual trees. This is an unnecessary change to the status quo, introduced under Plan Change 44 (PC44) to remove the very issue that the current amendment will re-introduce. Namely that tree protection based on buffer of (at least 10m) from the base of the predator proof fence that indicated the "significant tree area" is superior as it protects all the trees within the area including saplings and other smaller (or thinner) trees.

In contrast PC14 has introduced the 'Tree protection zone radius' which is defined as meaning:

...the protection area around a scheduled tree, which is equivalent to 15 times the trunk diameter at 1.4m, where activities and development are managed to prevent damage to a scheduled tree. The maximum extent of a tree protection zone radius is restricted to 15m.

The rationale for the change is that:

- Existing rules refer to works within the first 10 metres of the base of any tree within the Riccarton Bush Significant Tree area. However, instead of an arbitrary 10m, PC14 has introduced the above concept to ensure that the setback is relative to the scale of trees – up to a maximum of 15m.

As noted above, the 10m distance was not arbitrary but deliberate. It was chosen for a purpose. It was also arrived at in the course of PC44, and agreed to by neighbours involved in that process.

Further enquiries with CCC indicated that this appeared to be an administrative error and CCC staff are aware of the unworkability of the changes. The officer contacted by the Board commented:

"I have enquired further about this rule to better understand its genesis and reasoning. The phrasing proposed for RD6 appears to have been an oversight, for the simple reason that there is no ability to measure a tree trunk when the rule specifies that the trunk is the predator-proof fence. The original rule deliberately used the predator-proof fence as the base for measurement to make the measurement easier and uniform, and apply to mature trees as well as saplings that, without disturbance or damage will eventually grow and mature contributing to the sustainability of Putaringamotu. Another reason for using the predator-proof fence as a "base of a tree" within the old City Plan rules was that Riccarton Bush is logically treated as one entity, rather than a collection of individual trees within, and is shown as such on the maps.

In this respect, a more appropriate control may simply be retaining the current controls due to the unique circumstances under which the Bush is protected in the Plan. I would encourage you to make a submission on this particular part of the proposal."

This submission is therefore made requesting that the status quo be restored in relation to the buffer area.

Further concern

Of further and particular concern to the Board is 9.4.4.1.3 RD6 that details:

Any application for this activity shall not be limited or publicly notified.

Consequently, there is no ability for a resource consent application to be notified to potentially affected parties and Council would apply its discretion to consider the effects associated with such an application. The Board, particularly given its statutory role in protecting the Bush, believes this is provision inadequate.

It means that the Board would not have the ability to formally comment on or have input regarding the listed matters of discretion, which remain as follows:

9.4.6 Rules – Matters of discretion

...

			<p>Riccarton Bush</p> <p>I. For the lowland kahikatea forest remnant at 16 Kahu Road, which forms part of the greater Riccarton Bush and House Reserve, and is defined by a 'Protected Trees Area' symbol identified as a 'Significant Trees Area' on Planning Map 38B, the Council shall additionally have regard to the following matters:</p> <p>i. The amendments proposed to the District Plan at 9.4.4.1 include the introduction of a tree protection zone based on individual trees. This is an unnecessary change to the status quo, introduced under Plan Change 44 (PC44) to remove the very issue that the current amendment will re-introduce. Namely that tree protection based on buffer of (at least 10m) from the base of the predator proof fence that indicated the “significant tree area” is superior as it protects all the trees within the area including saplings and other smaller (or thinner) trees.

In contrast PC14 has introduced the ‘Tree protection zone radius’ which is defined as meaning:

...the protection area around a scheduled tree, which is equivalent to 15 times the trunk diameter at 1.4m, where activities and development are managed to prevent damage to a scheduled tree. The maximum extent of a tree protection zone radius is restricted to 15m.

The rationale for the change is that:

- Existing rules refer to works within the first 10 metres of the base of any tree within the Riccarton Bush Significant Tree area. However, instead of an arbitrary 10m, PC14 has introduced the above concept to ensure that the setback is relative to the scale of trees – up to a maximum of 15m.

As noted above, the 10m distance was not arbitrary but deliberate. It was chosen for a purpose. It was also arrived at in the course of PC44, and agreed to by neighbours involved in that process.

Further enquiries with CCC indicated that this appeared to be an administrative error and CCC staff are aware of the unworkability of the changes. The officer contacted by the Board commented:

“I have enquired further about this rule to better understand its genesis and reasoning. The phrasing proposed for RD6 appears to have been an oversight, for the simple reason that there is no ability to measure a tree trunk when the rule specifies that the trunk is the predator-proof fence. The original rule deliberately used the predator-proof fence as the base for measurement to make the measurement easier and uniform, and apply to mature trees as well as saplings that, without disturbance or damage will eventually grow and mature contributing to the sustainability of Putaringamotu. Another reason for using the predator-proof fence as a “base of a tree” within the old City Plan rules was that Riccarton Bush is logically treated as one entity, rather than a collection of individual trees within, and is shown as such on the maps.

In this respect, a more appropriate control may simply be retaining the current controls due to the unique circumstances under which the Bush is protected in the Plan. I would encourage you to make a submission on this particular part of the proposal.”

This submission is therefore made requesting that the status quo be restored in relation to the buffer area.

Further concern

Of further and particular concern to the Board is 9.4.4.1.3 RD6 that details:

Any application for this activity shall not be limited or publicly notified.

Consequently, there is no ability for a resource consent application to be notified to potentially affected parties and Council would apply *its* discretion to consider the effects associated with such an application. The Board, particularly given its statutory role in protecting the Bush, believes this is provision inadequate.

It means that the Board would not have the ability to formally comment on or have input regarding the listed matters of discretion, which remain as follows:

9.4.6 Rules – Matters of discretion

...

Riccarton Bush

I. For the lowland kahikatea forest remnant at 16 Kahu Road, which forms part of the greater Riccarton Bush and House Reserve, and is defined by a ‘Protected Trees Area’ symbol identified as a ‘Significant Trees Area’ on Planning Map 38B, the Council shall additionally have regard to the following matters:

		<p>i. The effects of any building, including the type of foundation used, and/or shading by the building on the existing trees and the supporting ecosystem of the forest remnant, including the juvenile regenerating trees;</p> <p>ii. The effects of any works on the extensive surface and sub-surface root systems of the kahikatea trees; 20</p> <p>iii. The effects of any impervious surfaces on the health and viability of the trees and the supporting ecosystem including soil aeration and hydrological balance; and</p> <p>iv. Whether constructing a building in close proximity to the forest remnant is likely to give rise to reverse sensitivity regarding shading, branch overhang, encroaching tree roots or windthrow;</p> <p>So, while there are no planned changes to these matters under PC 14 it remains uncertain as to how the regard to be had to them is managed. This includes who determines the impact and how, or whether, the Board can provide any feedback.</p> <p>The Board considers that even if wider notification of resource consent applications within the Riccarton Bush Interface is not to occur (including further limited notification), the proper management of the matters of discretion should involve notification on the Board. This does not mean that the Board will need to be involved in every resource consent application, especially if the effects (if any) on Pūtarangamotu are negligible. But the Board should be made aware and given the option of submitting any concerns where necessary.</p>

Carter Group Limited/ #814.115		Seek Amendment	Amend Appendix 9.4.7.1, so as to delete the scheduling of the common lime and variegated sycamore trees at 32 Armagh Street.	
Carter Group Limited/814.115	Kāinga Ora/ #FS2082.945	Seek Amendment	Amend Appendix 9.4.7.1, so as to delete the scheduling of the common lime and variegated sycamore trees at 32 Armagh Street. Two scheduled trees are identified for the property at 32 Armagh Street. The submitted does not agree that the trees are of such significance as to warrant their listing and protection, particularly given that their retention significantly constrain the development capacity of the site. In the submitter's views, these significant costs outweigh any benefits of scheduling. For these reasons, the listing of the 2 scheduled trees at 32 Armagh Street is inappropriate and should be deleted.	Seek Amendment
Alan and Robyn Ogle/ #876.21		Support	Support the provisions for tree canopy and financial contributions, noting: <ol style="list-style-type: none"> 1. Protections for trees, and incentives for planting more trees, should be part of the changes proposed in PC14. 2. Any financial contributions made to compensate for tree removal should be required to be spent in the area where trees are removed to, at least, replace what was there with equivalent planting.

Victoria Neighbourhood Association (VNA) / #61.16		Support	Retain provisions 13.5.4.2.4 - 4m Building setback and 13.5.4.2.4.c - Maximum 14m building height.	
Victoria Neighbourhood Association (VNA) /61.16	Anne Dingwall/ #FS2037.104	Support	<p>Retain provisions 13.5.4.2.4 - 4m Building setback and 13.5.4.2.4.c - Maximum 14m building height.</p> <p>We accept that the general revised recession planes shown in Appendix 14.15.2 D are a compromise between the MDRS standards proposed nationally (which have been adapted by CCC for the increased shading due to Christchurch latitude) and the lower recession plane starting height and angles currently applied to this site.</p> <p>Our preference remains to maintain the current Plan’s lower recession plane requirements (current Appendix 14.16.2 Diagram C), given that many recently-constructed homes, post-earthquakes, in the HRZ area and elsewhere have been constructed based on the level of shading resulting from those setbacks. The effects on those new homes would be compromised for a very long time by even the revised recession planes. We have yet to see any evaluation within the section 32 report assessing those adverse effects relative to the current Plan.</p> <p>We are concerned that there is a restricted discretionary allowance to increase the maximum height from 14m to 32m, just 10m from internal boundaries and without any recession plane applying to the height increase. In terms of shading neighbouring properties, that would almost entirely negate the purpose of the recession plane within 10m of the boundary, and dramatically impact neighbouring properties. It appears to be very much inconsistent with 13.5.5.2 (x) and could be easily rectified by deleting clause 13.5.4.2.4 Standard (d) (ii). We have seen no Section 32 evaluation of this effect.</p> <p>However, this CWH site is so large that it would still be possible to construct a 32m high building 25m from the southern boundary and 17m from the northern boundary within the diagram D recession planes. (The typical north/south site depth is over 91m, allowing a building width of 49m at 32m high).</p> <p>In summary, for the reasons above, we would support buildings on this site being up to 14m high from 4m to 10m from internal boundaries, and whilst our preference is a discretionary height limit of 20m, would consider a discretionary build up to</p>	Support

			32m high provided it was at least 25m from internal boundaries, and subject to all building being within the diagram C (current) recession planes starting 2.3m above those boundaries.	
Victoria Neighbourhood Association (VNA) / #61.58		Oppose	Maintain the operative recession planes taken at 2.3m.

Carter Group Limited/ #814.119		Oppose	Delete 13.6.4.2(a).	
Carter Group Limited/814.119	Kāinga Ora/ #FS2082.949	Oppose	Delete 13.6.4.2(a). This rule states that built form standards do not apply to those parts of school sites occupied by heritage items and settings, with development otherwise controlled by Chapter 9.3 Historic Heritage. The submitter considers that the built form standards remain a relevant basis for establishing permitted built form, given that the heritage provisions in chapter 9.3 will otherwise provide a framework for determining whether that built form is appropriate in the context of relevant heritage values. In the absence of built form standards applying (as is proposed), users of the Plan will have considerable uncertainty as to what built form may or may not be appropriate to the site and locality generally. Specific Purpose Zones > Specific Purpose (School) Zone > Rules - Specific Purpose (School) Zone > Built form standards > Water supply for firefighting

Submission Number	Further Submission No	Position	Decision Requested	FS Position
Fire and Emergency/ #842.22		Not Stated	Retain as notified.	
Fire and Emergency/842.22	Lydia Shirley/ #FS2010.8	Not Stated	Retain as notified. Fire and Emergency support activities within the Specific Purpose (School) Zone being subject to 13.6.4.2.7. This is further supported by existing matter of discretion 13.6.5.3 Water supply for firefighting which requires consideration of whether sufficient firefighting water supply is available to ensure the safety of people and property in the zone, as well as neighbouring properties, in the event of fire. Fire and Emergency acknowledge that the requirement to limited notify the 'New Zealand Fire Service Commission' (now Fire and Emergency New Zealand) has been removed. Fire and Emergency recognise that this does not remove the requirement to comply with the performance standard and therefore is not opposed to the removal of 13.6.4.2.7.	Support

Submission Number	Further Submission No	Position	Decision Requested	FS Position
-------------------	-----------------------	----------	--------------------	-------------

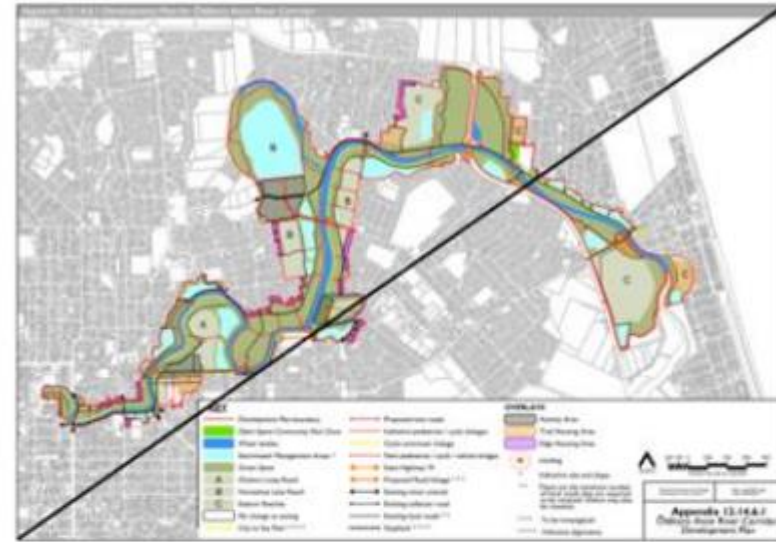

The Glenara Family Trust/ #91.1		Seek Amendment	Add to Rule 13.14.4.3 [Sic - 13.14.4.1.3], a Restricted Discretionary Activity status for the construction of residential activities on a site listed in Appendix 13.14.6.2 that do not comply in all respects with the applicable activity and built form standards, along with the appropriate matters of discretion. Such provisions could be modelled on Rule 14.5.1.3 RD15-31 for similar proposals in the Medium Density Residential Zone (MRZ).	
The Glenara Family Trust/ #91.2		Seek Amendment	As an alternative, a provision could be made in Rule 13.14.4.1.3 for a single omnibus Restricted Discretionary Activity (RDA) that cross-refers to Rule 14.5.1.3 RD15-RD31. The Trust does not oppose a limitation of building height to 3 storeys or less on its land, so it does not seek the inclusion of RD14 from the list in Rule 14.5.1.3.

Joshua Wight/ #199.9		Seek Amendment	<p>[Re: 14.5.2.6.a and 14.6.2.2.a]</p> <p>Amend the sunlight access QM to previously proposed levels or oppose entirely.</p>	
Joshua Wight/199.9	Anne Dingwall/ #FS2037.283	Seek Amendment	<p>[Re: 14.5.2.6.a and 14.6.2.2.a]</p> <p>Amend the sunlight access QM to previously proposed levels or oppose entirely. The council's claim that 96% of housing capacity is retained under the Sunlight Access QM is misleading. CCC's Impact Assessment on the Sunlight Access QM only includes the effect on RS zones transitioning to MRZ. This ignores the impact on areas zoned as RMD that are transitioning to MRZ, or areas zoned HRZ. RMD and HRZ sites are more impacted by recession planes than RS, given they tend to be smaller. The example RS site, that is used to demonstrate the supposed loss in capacity, is 750 m². More than 50% of RMD sites and 2/3 of HRZ sites are less than 700 m². This means that the impact of applying recession planes is much more severe than for RS sites. Using an RS site as an example hides a much greater loss in housing capacity. We [The</p>	Oppose

			submitter] oppose the Sunlight Access QM on this basis, given it will result in a much greater loss in housing capacity than anticipated. We [The submitter] think that the broad application of the Sunlight Access QM across the city is disappointing and counterproductive. This broad application contradicts the intention of the MDRS, which was to allow 3-storey, 3-unit development across all urban areas in New Zealand. We [The submitter] also believe[s] that amenities other than sunlight should have been considered. NPS-UD Policy 6(b)(ii) states that the significant changes to built form required "... may detract from amenity values appreciated by some people but improve amenity values appreciated by other people, communities, and future generations, including by providing increased and varied housing densities and type". This perspective should have been considered by the council when implementing the Sunlight Access QM. If increased sunlight access results in decreased housing affordability, as well as decreased access to employment, services, and amenities, is it really worth it? The council's claim that 96% of housing capacity is retained under the Sunlight Access QM is misleading. CCC's Impact Assessment on the Sunlight Access QM only includes the effect on RS zones transitioning to MRZ. This ignores the impact on areas zoned as RMD that are transitioning to MRZ, or areas zoned HRZ. RMD and HRZ sites are more impacted by recession planes than RS, given they tend to be smaller. The example RS site, that is used to demonstrate the supposed loss in capacity, is 750 m ² . More than 50% of RMD sites and 2/3 of HRZ sites are less than 700 m ² . This means that the impact of applying recession planes is much more severe than for RS sites. Using an RS site as an example hides a much greater loss in housing capacity. We [The submitter] oppose the Sunlight Access QM on this basis, given it will result in a much greater loss in housing capacity than anticipated. We [The submitter] think that the broad application of the Sunlight Access QM across the city is disappointing and counterproductive. This broad application contradicts the intention of the MDRS, which was to allow 3-storey, 3-unit development across all urban areas in New Zealand. We [The submitter] also believe[s] that amenities other than sunlight should have been considered. NPS-UD Policy 6(b)(ii) states that the significant changes to built form required "... may detract from amenity values appreciated by some people but improve amenity values appreciated by other people, communities, and future generations, including by providing increased and varied housing densities and type". Mitchell Cocking/ #207.3		Oppose	Reject the plan change	
David Lough/ #223.1		Oppose	Retain existing planning provisions in Merivale.	
Michael Dore/ #225.9		Oppose	The History, Character and Heritage of our City of Christchurch should be protected at all costs	
Michael Dore/225.9	Anne Dingwall/ #FS2037.320	Oppose	The History, Character and Heritage of our City of Christchurch should be protected at all costs If we allow the government to adopt their one size fits all greater intensification strategy we will have let down our future generations. It seems the easiest option to adopt and most importantly fails to consider and respect the lives and the health of the people and the investment they have made who already live in the areas most affected. The heavy-handed approach is like hitting a tack with a sledgehammer.	Support
Stephen Bryant/ #258.6		Seek Amendment	Require privacy issues and outlook, particularly with respect to acceptable window sizes overlooking neighbouring living areas, to be part of the assessment process for ALL developments.	
Stephen Bryant/258.6	Anne Dingwall/ #FS2037.348	Seek Amendment	Require privacy issues and outlook, particularly with respect to acceptable window sizes overlooking neighbouring living areas, to be part of the assessment process for ALL developments. Privacy/Overshadowing The current District Plan has some specific protections for privacy in terms of setbacks, living area outlooks and window sizes. Such protections are really important because some developers have a liking for floor to ceiling windows overlooking the living area of neighbouring properties. These protections are now gone until the property requires a consent (ie. more than 14m high in the HRZ) and are quite vague. It is imperative that privacy issues are considered for all developments. The town planners do not know where the living area of the neighbouring houses are unless the affected party is part of the discussions. Where the developer, affected resident and town planner work together small changes that mitigate privacy issues can be achieved whilst not impairing the intensification objective. To do this privacy issues and outlook, particularly with respect to acceptable window sizes overlooking neighbouring living areas, must be part of the assessment process for ALL developments.	Support

Thomas Harrison/ #275.1		Seek Amendment	For CCC to add more controls to stop negative impacts on neighboring properties.	
Mark Nichols/ #287.4		Seek Amendment	Seek densification in a planned and staged way by staging the effective date of the zoning changes in for example rings coming out from the city centre and/or major shopping areas, so that the densification occurs in a structured way over time, rather than in a haphazard way across most of the city. This will allow for a more staged build out of the infrastructure required to support the densification.	
Julie Farrant/ #292.3		Seek Amendment	[Amend to enable] separate living quarters where their individual family units can reside separately. Currently; the consent process is very limited for this type of dwelling	
Denis Morgan/ #315.3		Support	I have no objection to high(er) density housing. I have no objection to high(er) density in my neighbourhood.	
Kirsten Templeton/ #340.1		Seek Amendment	[T]hat neighbours [must] be consulted if a site [is proposed to be] developed in a manner that was reasonably different to the current layout/style/size of a property.	
Annette Prior/ #348.3		Seek Amendment	[Seeks that] new builds and high rise [dwellings] are building in new subdivisions.	
Stephen Deed/ #349.1		Seek Amendment	[Seeks that] [i]n Suburban Residential areas a height limit of 2 stories should apply regardless of how close to Suburban Shopping areas.	
Max Stewart/ #401.1		Support	[Retain all provisions as proposed] - No amendments	
Andrew Congalton/ #461.1		Seek Amendment	Seek amendment to the application of residential zones which increase density.	
Heather Tate/ #474.2		Oppose	To not add more on to height gains for commercial and residential	
Di Noble/ #477.1		Oppose	Oppose PC14 changes to the Residential zones in general. Requests Council to stop allowing 2 and 3 story units or restrict areas in which they are permitted.	
Brian Reynolds/ #486.1		Oppose	Retain existing height limits and reduce infill housing in residential zones.	
Geoffrey Rice/ #509.1		Oppose	Abandon the HRZ designation along Papanui Road.	
Harrison McEvoy/ #512.6		Oppose	[Regarding the Low Public Transport Accessibility Qualifying Matter] seek[s] that the council drop this qualifying matter.	
Harrison McEvoy/512.6	Rachel Sanders/ #FS2098.58	Oppose	[Regarding the Low Public Transport Accessibility Qualifying Matter] seek[s] that the council drop this qualifying matter. I believe that the public transport layout and network will need changes to prepare and accommodate future growth. We should not define future growth in Christchurch based on these routes. This would also artificially limit future housing in our city. The council plans to restrict housing in some areas of the city because they are poorly serviced by the lack of current high frequency public transport routes. Some areas solely designated with this qualifying matter such as in Casebrook and Styx are close to rail corridors, existing commercial areas and are serviced by low frequency routes. In the future, these areas could see a boost in service by more buses on current routes or introduction of a commuter rail service.	Seek Amendment

Tales Azevedo Alves/ #513.2		Seek Amendment	The Council enable 6-10 storey residential buildings near commercial centres.	
PRUDENCE MORRALL/ #535.1		Seek Amendment	Seek amendment to the MRZ area - Exclude Therese Street.	
Peter Beswick/ #557.5		Oppose	Oppose the Low Public Transport Accessibility Area Qualifying Matter and seek that the council drop this qualifying matter.	
Peter Beswick/557.5	Rachel Sanders/ #FS2074.62	Oppose	Oppose the Low Public Transport Accessibility Area Qualifying Matter and seek that the council drop this qualifying matter. I oppose the Low Public Transport Accessibility Area Qualifying Matter as I believe that the public transport layout and network will need changes to prepare and accommodate future growth. We should not define future growth in Christchurch based on these routes. This would also artificially limit future housing in our city.	Oppose
Peter Beswick/557.5	Rachel Sanders/ #FS2098.71	Oppose	Oppose the Low Public Transport Accessibility Area Qualifying Matter and seek that the council drop this qualifying matter. I oppose the Low Public Transport Accessibility Area Qualifying Matter as I believe that the public transport layout and network will need changes to prepare and accommodate future growth. We should not define future growth in Christchurch based on these routes. This would also artificially limit future housing in our city.	Seek Amendment
Bruce Chen/ #566.1		Support	Support high-density housing near the city and commercial centres. Seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
James Robinson/ #577.1		Support		
Hao Ning Tan/ #594.1		Oppose	Seeks that the Council drops the Low Public Transport Accessibility Qualifying Matter.	
Hao Ning Tan/594.1	Rachel Sanders/ #FS2074.75	Oppose	Seeks that the Council drops the Low Public Transport Accessibility Qualifying Matter. Ian McChesney/701.2	Christchurch International Airport Limited/ #FS2052.256	Seek Amendment	[Seeks that Council consider developer incentives to aggregate adjoining properties (based on fair market prices) so density can be achieved in a well designed, coherent manner without adversely affecting neighbouring properties. Such incentives should go hand in hand with those to achieve better environmental standards e.g. reduced building embodied CO2.	Support
Mitchell Coll/ #720.1		Seek Amendment	Submission seeks additional two rules to improve visual interest in buildings: <ol style="list-style-type: none"> 1. Add a rule requiring that at least every 6m width of a street facing façade have a minimum 400mm step in the building line. 2. Add a rule requiring that each street facing frontage, a minimum area of the facade to protrude must intrude by a at least 200mm. 	
Mitchell Coll/720.1	Anne Dingwall/ #FS2037.583	Seek Amendment	Submission seeks additional two rules to improve visual interest in buildings: <ol style="list-style-type: none"> 1. Add a rule requiring that at least every 6m width of a street facing façade have a minimum 400mm step in the building line. 2. Add a rule requiring that each street facing frontage, a minimum area of the facade to protrude must intrude by a at least 200mm. <p>Chapter 14.5 - Medium Density Residential Zone</p> <p>Street Facing Facades</p> <p>Good urban design results in buildings that are articulated well from a street perspective, providing interest and a diverse cityscape.</p> <p>andnbsp;</p> <p>The current proposed rules will allow tall, blank street facades.</p>	Support
Mitchell Coll/ #720.48		Seek Amendment	Seeks an additional built form rule that includes minimum garage dimensions to ensure at least a 85th percentile vehicle can park inside the garage.	
Mitchell Coll/ #720.49		Seek Amendment	Seeks amendment so that Residential Design Principles are assessed as part of a resource consent application whenever a resource consent is triggered.	
Mitchell Coll/720.49	Chapman Tripp/ #FS2063.85	Seek Amendment	Seeks amendment so that Residential Design Principles are assessed as part of a resource consent application whenever a resource consent is triggered. <p>Currently the Residential Design Principles are only required to be considered when there are more than three or four units.</p>	Oppose
Mitchell Coll/720.49	Chapman Tripp/ #FS2064.82	Seek Amendment	Seeks amendment so that Residential Design Principles are assessed as part of a resource consent application whenever a resource consent is triggered.	Oppose

			Currently the Residential Design Principles are only required to be considered when there are more than three or four units.	
Mitchell Coll/ #720.50		Seek Amendment	Seek amendment to add a subclause (b) to read, "Unless c. applies, buildings must not exceed 12 metres in height above ground level, except that 50% of a building's roof in elevation, measured vertically from the junction between wall and roof, may exceed this height by 1 metre, where the entire roof slopes 30° or more, as shown on the following diagram:."	
Michael Hall/ #733.1		Support	Supports the plan change for intensification	
Michael Hall/733.1	Anne Dingwall/ #FS2037.969	Support	Supports the plan change for intensification Housing is a human right that has been denied to multiple generations. Build as many as possible until everyone is housed. Deciding what someone else does with their land is not a property right. Allow (and encourage) apartments, mixed use; build public transport.	Support
Mark Darbyshire/ #768.8		Seek Amendment	That the Council drops the Low Public Transport Accessibility Area Qualifying Matter. That the Council enables high-density housing near commercial centres as proposed.	
Mark Darbyshire/768.8	Rachel Sanders/ #FS2098.14	Seek Amendment	That the Council drops the Low Public Transport Accessibility Area Qualifying Matter. That the Council enables high-density housing near commercial centres as proposed. Higher-density housing should not be constrained to areas that currently have good public transport. Areas with potential for better public transport in the future should also allow higher-density housing. High-density housing is a crucial part of making our city climate-friendly, affordable, inclusive, and accessible. I therefore support the general approach taken.	Seek Amendment
Robert Braithwaite/ #772.2		Seek Amendment	3. Apply Lower density rules for the residential areas outside of the 'Four Avenues' to reflect that they are NOT part of the Central City but local small-scale residential neighbourhoods unsuited to high rise development.	
Mary O'Connor/ #778.2		Seek Amendment	Consider making the earthquake damage risk to dwellings a Qualifying Matter.	
Jessica Adams/ #784.7		Oppose	[Seeks that] the Council notifies residents where subdivision development and consent for construction is applied for, by notifying applications and developing processes that residents can follow if they are adversely affected by development.	
Finn Jackson/ #832.14		Seek Amendment	Seek amendments to residential zoning to make some or all corner sites in residential areas rezoned to a new residential mixed use zone.	
Kāinga Ora – Homes and Communities / #834.119		Oppose	Rules 14.4.2.– 14.11.2 –Residential Built FormStandards. Delete Section 6.10A and all associatedprovisions.	
Kāinga Ora – Homes and Communities /834.119	Anne Dingwall/ #FS2037.13	Oppose	Rules 14.4.2.– 14.11.2 –Residential Built FormStandards. Delete Section 6.10A and all associatedprovisions. Kāinga Ora welcomes the Council's recognition of trees as a key element in successful urban environments. Kāinga Ora strongly support the Council increasing its prioritisation of the need to renew streetscapes, especially in areas where intensification has and will continue to occur. Such renewals should include kerb and channel replacement, undergrounding of overhead wires, and street tree planting. Kāinga Ora has substantial concerns with the 20% tree canopy cover target and considers it fundamentally unachievable in medium and high density environments on private land. Kāinga Ora consider the requirements to achieve 20% tree canopy cover is inconsistent with the spatial outcome requirements set out in the NPS-UD, and the Medium Density Residential Standard (MDRS) provisions of the Housing Supply Act. Kāinga Ora considers that the proposed financial contribution calculator is complicated and flawed, a simpler formula would be to require 1 tree to be planted per 100m2 of site area, as an easier compliance threshold than a trigger of 10% of future canopy cover. It also has concerns with the reliance on Financial Contributions. Given that Council already own extensive areas of park and open space land (including several thousand hectares of land on the Port Hills and Red Zone), in addition to extensive road reserve and local park areas, and given that Council takes Development Contributions for new parkland as part of any new development, the need for the land component to form part of the financial contributions appears to be particularly hard to justify. The need to provide rapid canopy cover potentially creates a perverse incentive to plant faster growing exotic species rather than natives. The proposed Financial Contribution could therefore result in a decline in biodiversity by driving developers to plant exotics over natives, with attendant adverse biodiversity outcomes, which is contrary of the desire in the Urban Forest Plan to seek diversity in tree species.	Oppose

Te Mana Ora/Community and Public Health/ #145.21		Seek Amendment	New Policy proposed - Universal design standards should also be applied to new streetscapes and buildings so that they are accessible for all people.	
Te Mana Ora/Community and Public Health/145.21	Anne Dingwall/ #FS2037.212	Seek Amendment	<p>New Policy proposed - Universal design standards should also be applied to new streetscapes and buildings so that they are accessible for all people.</p> <p>A universal design approach to housing design makes housing accessible for people at any stage of life and with different abilities. Universal design standards accommodate people who use wheelchairs or other mobility aids, people with impaired vision and people who are elderly or very young. Housing that incorporates universal design features will be less likely to need to be modified to suit people with different needs, and therefore can be marketed to a wider audience. While the need for universal design</p>	Support

			<p>could be added to Policy 14.2.2.6 – Provision of housing for aging population, it is applicable to a much wider range of people.</p> <p>Disabled people on the waitlist for public housing in Aotearoa New Zealand who are looking for accessible housing wait 90 days longer than non-disabled people (Shivas, S. (2023). People who need modified public housing have to wait three-months longer than non-disabled, MSD data reveals. Stuff. Accessed from: https://www.stuff.co.nz/life-style/homed/houses/131850774/people-who-need-modified-public-housing-have-to-wait-threemonths-longer-than-nondisabled-msd-data-reveals).</p> <p>The average wait time for people who have requested a modified house is 434 days. This confirms the need for more housing following universal design standards. Te Mana Ora recommends that Christchurch City Council considers how to ensure that new housing is both accessible and affordable.</p>	
Plain and Simple Ltd/ #627.3		Seek Amendment	[T]hatthe objectives within PC 14 are amended to explicitly include recognition ofthe role of housing in fostering social cohesion and a sense of communitybelonging.	
Retirement Villages Association of New Zealand Inc/ #811.46		Seek Amendment	<p>Insert new Policy</p> <p>Changing communities: To provide for the diverse and changing residential needs of communities, recognise that the existing character and amenity of the Medium Density Residential Zone will change over time to enable a variety of housing types with a mix of densities.</p>	
Retirement Villages Association of New Zealand Inc/811.46	Summerset Group Holdings Limited/ #FS2097.41	Seek Amendment	<p>Insert new Policy</p> <p>Changing communities: To provide for the diverse and changing residential needs of communities, recognise that the existing character and amenity of the Medium Density Residential Zone will change over time to enable a variety of housing types with a mix of densities.</p> <p>It is anticipated that this policy will be applied to all relevant residential zones. The RVA considers that a new policy is required to give effect to the direction under the NPSUD that acknowledges amenity values evolve over time, and that expectations for existing amenity must also evolve in order to enable necessary housing.</p>	Support
Retirement Villages Association of New Zealand Inc/ #811.47		Seek Amendment	<p>Insert a new policy is inserted in the relevant residential zones[:]</p> <p>New Policy Role of density standards: Enable the density standards to be utilised as a baseline for the assessment of the effects of developments other than in areas where the Plan provides location-specific density standards.</p>	

Retirement Villages Association of New Zealand Inc/811.47	Summerset Group Holdings Limited/ #FS2097.42	Seek Amendment	<p>Insert a new policy is inserted in the relevant residential zones[:]</p> <p>New Policy Role of density standards: Enable the density standards to be utilised as a baseline for the assessment of the effects of developments other than in areas where the Plan provides location-specific density standards. The RVA considers that it is appropriate to enable the density standards to be utilised as a baseline for the assessment of the effects of developments as noted in the submission above.</p> <p>It is anticipated that this policy will be applied to all relevant residential zones. The RVA notes the deletion of Policy 14.2.8.2 Amenity standards and considers that while the deletion of that policy is appropriate this new policy appropriately aligns with the direction of the NPSUD to enable density and to enable development that meets the relevant Density standards.</p>	Support

Te Mana Ora/Community and Public Health/ #145.20		Support	Te Mana Ora supports the inclusion of the conditions for managed consents for increased heights beyond those enabled within medium and high-density zoned area (14.2.3.7), including that provision for “a greater variety of housing types, price points and sizes when compared to what is provided in the surrounding area” (14.2.3.7 i), and encourages Christchurch City Council to investigate ways to apply these to enabled development as well. Indoor air quality should also be considered in housing design.	
Te Mana Ora/Community and Public Health/145.20	Anne Dingwall/ #FS2037.211	Support	Te Mana Ora supports the inclusion of the conditions for managed consents for increased heights beyond those enabled within medium and high-density zoned area (14.2.3.7), including that provision for “a greater variety of housing types, price points and sizes when compared to what is provided in the surrounding area” (14.2.3.7 i), and encourages Christchurch City Council to investigate ways to apply these to enabled development as well. Indoor air quality should also be considered in housing design. Poor ventilation in building design increases the likelihood of airborne disease transmission, especially in overcrowded environments. Building houses that have good ventilation can improve indoor air quality and protect health, such as by reducing transmission of respiratory illnesses including COVID-19, influenza and tuberculosis (Bennett, J., Shorter, C., Kvalsvig, A., Barnard, L. T., Wilson, N., Crane, J., ... & Howden-Chapman, P. (2022). Indoor air quality, largely neglected and in urgent need of a refresh. The New Zealand Medical Journal (Online), 135(1559), 136-139). Good ventilation protects against build-up of harmful substances such as carbon dioxide. This is a health issue which has not been adequately considered in residential buildings till now.	Support
BP Oil New Zealand Ltd, Z Energy Limited and Mobil Oil New Zealand Ltd (referred to as The Fuel Companies) / #212.7		Seek Amendment	Amend Policy 14.2.3.7 as follows: a. Within medium and high density zoned areas, only provide for increased building heights beyond those enabled in the zone or precinct where the following is achieved: i. the development provides for a greater variety of housing types, price points, and sizes, when compared to what is provided in the surrounding area; ii. the development is consistent with the built form outcomes anticipated by the underlying zone or precinct; iii. the site is located within walking distance of public or active transport corridors; community facilities or commercial activities; and public open space; iv. building design features are used to reduce: A. significant shading, dominance and privacy effects caused by increased height on adjacent residential properties and public spaces; and B. the effects of dominance and shading on historic heritage, significant trees, or character areas; C. reverse sensitivity effects on existing non-residential activities. v. When considering height increases within 1.2km from the city centre, the economic impacts on the city centre from an increase in height.

Kāinga Ora – Homes and Communities / #834.146		Oppose	<p>Policy 14.2.3.7 – management of increased building heights</p> <p>Delete the policy and replace it with: Within medium and high density zoned areas, increased building heights are anticipated where:</p> <p>i. The site has good accessibility to public and active transport corridors, public open space, and a town or local commercial centre; and</p> <p>ii. The design of the building appropriately manages potential shading, privacy, and visual dominance effects on the surrounding environment.</p>	
Kāinga Ora – Homes and Communities /834.146	Clare Dale/ #FS2029.5	Oppose	<p>Policy 14.2.3.7 – management of increased building heights</p> <p>Delete the policy and replace it with: Within medium and high density zoned areas, increased building heights are anticipated where:</p> <p>i. The site has good accessibility to public and active transport corridors, public open space, and a town or local commercial centre; and</p> <p>ii. The design of the building appropriately manages potential shading, privacy, and visual dominance effects on the surrounding environment.</p> <p>The MDRS has the height rules as a restricted dictionary activity. MDRS Policy 5 explicitly seeks to 'provide for developments not meeting permitted activity status, while encouraging high quality developments'. Taller buildings are therefore anticipated as being potentially appropriate subject to a site specific assessment of effects. The policy needs to properly reflect that taller buildings are anticipated in appropriate locations and where the specific design properly manages the effects generated by the increase in height. As written this policy directly conflicts with Policy 5 of Sub clause 6 of Schedule 3A RMA. Taller residential buildings within 1.2km of the central city can only have a positive economic impact on the CBD by enabling more people to live within walking distance of the town centre. Given the large size of Christchurch, additional enablement of residential opportunities within 1.2km facilitates more people living near the centre i.e. it draws people in, rather than resulting in existing (or potential) CBD residents shifting out.</p>	Support

Kāinga Ora – Homes and Communities / #834.147		Seek Amendment	Amend the objective as follows: High Good quality, sustainable, residential neighbourhoods which are well designed, have a high level of amenity, enhance local character and reflect to reflect the planned urban character and the Ngāi Tahu heritage of Ōtautahi	
Kāinga Ora – Homes and Communities /834.147	Amy Beran/ #FS2030.29	Seek Amendment	Amend the objective as follows: High Good quality, sustainable, residential neighbourhoods which are well designed, have a high level of amenity, enhance local character and reflect to reflect the planned urban character and the Ngāi Tahu heritage of Ōtautahi Support the amendments to reference the planned urban character. References to ‘high’ quality in the title and the start of the objective will not always be appropriate or realistic. Use of language around ‘high standard’, ‘high level of amenity’, ‘spacious and attractive pedestrian circulation’, ‘high levels of glazing’ can be used to set a bar that can be unrealistically high (or at least is very subjective). Kāinga Ora support high quality outcomes, however such language is subjective and is an easy stick that can be used by NIMBY opponents to higher density. Invariably multi-unit development involves the balancing of competing design outcomes (which are all perfectly valid), and it comes down to how these are balanced and prioritised – it often isn’t possible to tick the optimal outcome across every matter.	Oppose

Retirement Villages Association of New Zealand Inc/ #811.33		Seek Amendment	[S]eeks either to exclude retirement villages from Policy 14.2.5.1, or amend for consistency with the MDRS and remove provisions that have the potential to refine / limit the intensification provisions of the Enabling Housing Act.	
Retirement Villages Association of New Zealand Inc/811.33	Summerset Group Holdings Limited/ #FS2097.28	Seek Amendment	[S]eeks either to exclude retirement villages from Policy 14.2.5.1, or amend for consistency with the MDRS and remove provisions that have the potential to refine / limit the intensification provisions of the Enabling Housing Act. The RVA considers that the proposed Policy 14.2.5.1 does not give effect to the NPSUD or the Enabling Housing Act. The detailed policy direction on planting areas, design features and glazing is not enabling of residential development. The proposed management of form and design of development is also inconsistent with the MDRS.	Support

			Further, these controls are not appropriate for developments such as retirement villages. As set out above, retirement villages have functional and operational needs that make standard residential building design controls inappropriate.

Te Mana Ora/Community and Public Health/ #145.22		Seek Amendment	Te Mana Ora recommends that accessibility plans be required to support quality large scale developments (Policy 14.2.5.3) and other high-density developments or neighbourhoods so that local accessibility needs are understood and provided for.	
Te Mana Ora/Community and Public Health/145.22	Kāinga Ora/ #FS2082.63	Seek Amendment	<p>Te Mana Ora recommends that accessibility plans be required to support quality large scale developments (Policy 14.2.5.3) and other high-density developments or neighbourhoods so that local accessibility needs are understood and provided for.</p> <p>A universal design approach to housing design makes housing accessible for people at any stage of life and with different abilities. Universal design standards accommodate people who use wheelchairs or other mobility aids, people with impaired vision and people who are elderly or very young. Housing that incorporates universal design features will be less likely to need to be modified to suit people with different needs, and therefore can be marketed to a wider audience. While the need for universal design could be added to Policy 14.2.2.6 – Provision of housing for aging population, it is applicable to a much wider range of people.</p> <p>Disabled people on the waitlist for public housing in Aotearoa New Zealand who are looking for accessible housing wait 90 days longer than non-disabled people (Shivas, S. (2023). People who need modified public housing have to wait three-months longer than non-disabled, MSD data reveals. Stuff. Accessed from: https://www.stuff.co.nz/life-style/homed/houses/131850774/people-who-need-modified-public-housing-have-to-wait-threemonths-longer-than-nondisabled-msd-data-reveals).</p> <p>The average wait time for people who have requested a modified house is 434 days. This confirms the need for more housing following universal design standards. Te Mana Ora</p>	Oppose

			recommends that Christchurch City Council considers how to ensure that new housing is both accessible and affordable.	
Te Mana Ora/Community and Public Health/ #145.24		Seek Amendment	Te Mana Ora recommends that accessibility plans be required to support quality large scale developments (Policy 14.2.5.3) and other high-density developments or neighbourhoods so that local accessibility needs are understood and provided for.	
Te Mana Ora/Community and Public Health/145.24	Chapman Tripp/ #FS2063.16	Seek Amendment	<p>Te Mana Ora recommends that accessibility plans be required to support quality large scale developments (Policy 14.2.5.3) and other high-density developments or neighbourhoods so that local accessibility needs are understood and provided for.</p> <p>Living in housing that provides visual and physical connectivity to streets and spaces helps people feel present and part of a community. Te Mana Ora notes the proposed controls for street-facing glazing and recommend including a requirement for a percentage of new housing to orientate living spaces to streets and public or shared open space as a rule not only as matter of discretion.</p> <p>Alongside community connectedness, Te Mana Ora notes the importance of a sense of privacy in household design for residents' health and wellbeing. Privacy at home allows space for important personal, cultural and religious practices, as well as space to connect with loved ones and family members (Willems, S., De Smet, H., & Heylighen, A. (2020). Seeking a balance between privacy and connectedness in housing for refugees. <i>Journal of Housing and the Built Environment</i>, 35(1), 45-64. https://doi.org/10.1007/s10901-020-09727-7).</p> <p>Privacy means that home can be a place of retreat and relaxation, whereas a lack of privacy can mean a home environment does not feel safe or secure (Easthope, H. (2004). A place called home. <i>Housing, Theory, and Society</i>, 21(3), 128-138. https://doi.org/10.1080/14036090410021360).</p> <p>Additionally, it is important to consider how housing developments can support crime prevention. There are a number of Crime Prevention Through Environmental Design (CPTED) principles that can be included in housing design, such as ensuring that windows and doorways look out on public spaces and the street, making sure trees and shrubs do not block the street view, and ensuring there is appropriate lighting on the street and footpaths (Canterbury Safety Working Party. (2004). <i>Safer Canterbury: Creating Safer Communities</i>. Accessed from: https://www.ccc.govt.nz/assets/Documents/Culture-Community/Community-Safety/CPTEDFull-docs.pdf).</p> <p>A universal design approach to housing design makes housing accessible for people at any stage of life and with different abilities. While the need for universal design could be added to Policy 14.2.2.6 – Provision of housing for aging population, it is applicable to a much wider range of people.</p> <p>Disabled people on the waitlist for public housing in Aotearoa New Zealand who are looking for accessible housing wait 90 days longer than non-disabled people (Shivas, S. (2023). People who need modified public housing have to wait three-months longer than non-disabled, MSD data reveals. Stuff. Accessed from: https://www.stuff.co.nz/life-style/homed/houses/131850774/people-who-need-modified-public-housing-have-to-wait-threemonths-longer-than-nondisabled-msd-data-reveals).</p> <p>The average wait time for people who have requested a modified house is 434 days. This confirms the need for more housing following universal design standards. Te Mana Ora recommends that Christchurch City Council considers how to ensure that new housing is both accessible and affordable.</p>	
Te Mana Ora/Community and Public Health/145.24	Kāinga Ora/ #FS2082.64	Seek Amendment	<p>Te Mana Ora recommends that accessibility plans be required to support quality large scale developments (Policy 14.2.5.3) and other high-density developments or neighbourhoods so that local accessibility needs are understood and provided for.</p> <p>Living in housing that provides visual and physical connectivity to streets and spaces helps people feel present and part of a community. Te Mana Ora notes the proposed controls for street-facing glazing and recommend including a requirement for a percentage of new housing to orientate living spaces to streets and public or shared open space as a rule not only as matter of discretion.</p> <p>Alongside community connectedness, Te Mana Ora notes the importance of a sense of privacy in household design for residents' health and wellbeing. Privacy at home allows space for important personal, cultural and religious practices, as well as space to connect with loved ones and family members (Willems, S., De Smet, H., & Heylighen, A. (2020). Seeking a balance between privacy and connectedness in housing for refugees. Journal of Housing and the Built Environment, 35(1), 45-64. https://doi.org/10.1007/s10901-020-09727-7).</p> <p>Privacy means that home can be a place of retreat and relaxation, whereas a lack of privacy can mean a home environment does not feel</p>	Oppose

			<p>safe or secure (Easthope, H. (2004). A place called home. Housing, Theory, and Society, 21(3), 128-138. https://doi.org/10.1080/14036090410021360).</p> <p>Additionally, it is important to consider how housing developments can support crime prevention. There are a number of Crime Prevention Through Environmental Design (CPTED) principles that can be included in housing design, such as ensuring that windows and doorways look out on public spaces and the street, making sure trees and shrubs do not block the street view, and ensuring there is appropriate lighting on the street and footpaths (Canterbury Safety Working Party. (2004). Safer Canterbury: Creating Safer Communities. Accessed from: https://www.ccc.govt.nz/assets/Documents/Culture-Community/Community-Safety/CPTEDFull-docs.pdf).</p> <p>A universal design approach to housing design makes housing accessible for people at any stage of life and with different abilities. Universal design standards accommodate people who use wheelchairs or other mobility aids, people with impaired vision and people who are elderly or very young. Housing that incorporates universal design features will be less likely to need to be modified to suit people with different needs, and therefore can be marketed to a wider audience. While the need for universal design could be added to Policy 14.2.2.6 – Provision of housing for aging population, it is applicable to a much wider range of people.</p> <p>Disabled people on the waitlist for public housing in Aotearoa New Zealand who are looking for accessible housing wait 90 days longer than non-disabled people (Shivas, S. All of these policy matters relate to the assurance of a well-functioning urban environment. As building scale, height and density is increased so too are the potential adverse impacts on users of public space and private development, and on the natural environment. Key urban design matters are addressed that create more comfortable, walkable, safe environments, with consideration given to reducing the impacts of climate change through the policy direction. The specificity of the policies provides direction and ultimately ensures a balance between certainty, and more qualitative aspects that are key to creating high quality urban environments that people want to live in, and they thrive in. Fundamental matters such as storage and servicing are not only important to ensuring a functional living environment, but can be a key detractor when managed badly from ensuring a safe and comfortable environment. 			<p>Moving towards suburban areas where denser housing is the norm, provided by a range of different house types such as townhouses or low-rise apartments, will have beneficial effects on our urban environments. There are numerous benefits that come with denser suburban housing, particularly reduced housing costs, reduced urban emissions, decreased infrastructure costs, and improved community connectivity/safety. These benefits are further explained in the 'Benefits of Density' document.</p>	
Matt Edwards/ #189.1		Support	Support the proposal to introduce this objective.	
Matt Edwards/189.1	Heritage New Zealand Pouhere Taonga/ #FS2051.124	Support	<p>Support the proposal to introduce this objective.</p> <p>Affordability: Increasing housing density, both in the city centre and suburbs, would increase the overall housing stock. Reduced housing supply is one of the main drivers of housing unaffordability[1]. This is a major issue in New Zealand, where housing construction rates have been declining since the building boom of the 1960s and 70s[2]. This has coincided with an explosion in house prices across the country, which have increased 425% over the past 20 years[3]. Christchurch is not immune to these issues. While its housing cost to household income ratio of 6.9 in Q2 2022 was lower than other major centres[4] this is still well above 5 which is when a market is considered 'severely unaffordable' [5]. Christchurch also has the second highest rent to income ratio amongst all major centres in Aotearoa[6].</p> <p>Restrictive zoning laws, which force people to build low-density houses, artificially slow down the supply of homes. This lack of supply leads to price increases[7]. There is clear demand in Christchurch for denser housing, as evidenced by the boom in townhouse construction, so CCC should take advantage of this as a means of improving housing affordability.</p> <p>Sustainability: Denser housing leads to decreased household emissions[8]. Road transport emissions are the single biggest factor in Christchurch's overall emissions profile, and so the council has made a decrease in transport emissions a key part of their emissions reduction plan[9]. Building denser housing, close to key public transport routes, would help to achieve this reduction. With people living closer to employment, services, and amenities, they are more likely to use public or active transport. This would also have health and wellbeing benefits: active transport use can improve physical health, while reduced commutes would mean that people can spend more time socialising, exercising, and partaking in hobbies.</p> <p>Community: Urban density is associated with improved safety and increased economic vibrancy. Increased number and diversity of people means that streets and amenities are used throughout the day, rather than just in distinct time periods. This increases the demand and resources for amenities as well as increases the safety of our streets and neighbourhoods, with more people being out and about. This array of people is also associated with increased community cohesion due to regular interactions in shared spaces.</p> <p>Economics: By increasing the number of units within the city, intensification provides new revenue streams for infrastructure improvements. Chronic under-investment in assets is further perpetuated by low-density greenfield development that requires investment in new infrastructure. This takes money away from upgrading existing infrastructure that benefits existing communities. These benefits include flood mitigation measures and other improvements. Increased urban sprawl is linked to increased operational costs for local authorities[10], as services such as rubbish collection and sewage treatment are more expensive to maintain per person in low-density areas[11].</p> <p>[1] <i>Housing Affordability. Tom Logan/ #187.2		Support	<i>Retain as notified</i>	
Tom Logan/187.2	Kāinga Ora/ #FS2082.85	Support	<i>Retain as notified</i> This will result in more homes, more economic activity, more vibrant communities, and more economical public transport and otherinfrastructure upgrades. These benefits are further explained in the ‘Benefits of Density’ document.	Support
Matt Edwards/ #189.2		Support	Support the introduction of this objective as proposed.	

Marjorie Manthei/ #237.21		Support	[Retain Objective 14.2.7]	
Benjamin Wilton/ #605.6		Support	Limit intensification as described to only within a 1.2km radius of the Christchurch CBD.	
Benjamin Wilton/605.6	Anne Dingwall/ #FS2037.1217	Support	Limit intensification as described to only within a 1.2km radius of the Christchurch CBD. I support intensification as described but only within a 1.2km radius of the Christchurch CBD. Definitely NOT all centers.	Support
Environment Canterbury / Canterbury Regional Council/ #689.42		Support	[Retain Objective as notified]	
Environment Canterbury / Canterbury Regional Council/689.42	Anne Dingwall/ #FS2037.1064	Support	[Retain Objective as notified] [Itis] consistent with the CRPS and give[s] effect to national direction.	Support
David Murison/ #692.7		Seek Amendment	[Regarding objective 14.2.7 and policy 14.2.7.2] Clearly the part of Strowan proposed as HRZ does not meet these criteria as it is not located near or adjacent to a commercial centre.	
David Murison/692.7	Kāinga Ora/ #FS2082.440	Seek Amendment	<p>[Regarding objective 14.2.7 and policy 14.2.7.2] Clearly the part of Strowan proposed as HRZ does not meet these criteria as it is not located near or adjacent to a commercial centre.</p> <p>Relevant PC14 clause references and extracts are given in RED itallics following</p> <p><i>Section 14.2.7 Objective – High Density Residential Zone</i></p> <p><i>a High density residential development near larger commercial centres, commensurate with the expected demand for housing in these areas and the nature and scale of commercial activities, community facilities, and multimodal transport networks planned or provided in the commercial centres</i></p> <p><i>Section 14.2.7.2 Policy – High density location</i></p> <p><i>a Enable high density residential development within walking catchments of the:</i></p> <p><i>i. City centre zone;</i></p> <p><i>ii. Town Centre zones of Riccarton, Papanui, and Hornby; and</i></p> <p><i>iii. Other larger commercial centres zoned as Town Centres and Local Centres; to a degree that responds to the planned scale and nature of each centre group and the range of activities planned or provided there.</i></p> <p>Clearly the part of Strowan proposed as HRZ does not meet these criteria as it is not located near or adjacent to a commercial centre.</p> <p>In requesting a change in PC14 as proposed, I would highlight the following anomaly. I have studied ‘The proposed zones’ (on page 9 of the Consultation document) and my analysis has been confirmed by relevant Council staff, that the specific intention is to have a proposed ‘Larger Town Centre’ zone in the vicinity of the Merivale commercial centre with an associated HRZ stretching as far north as Heaton Street/Innes Road. In a similar manner, it is clear that a proposed ‘Larger Town Centre’ zone be created in the vicinity of the Papanui commercial centre with an associated HRZ stretching as far south as Blighs Road. But the planning maps contradict this and show these HRZ areas as joined or continuous along the spine of Papanui Road.</p> <p>I suggest therefore that the significant infrastructure pressure and other issues which I have highlighted in this submission, which are already impacting the Strowan community particularly in the vicinity of St Andrews’ College, could be mitigated by Council following the approach which they themselves have outlined in the Consultation document. That is, by limiting the HRZ as detailed (north from the Merivale commercial centre</p>	Oppose

			to Heaton Street/Innes Road and south from the Papanui commercial centre to Blighs Road) and not extending the HRZ along this stretch of Papanui Road through the Strowan community. {Please refer to attachment for full submission}	
Henri Murison/ #693.7		Seek Amendment	[Regarding objective 14.2.7 and policy 14.2.7.2] the part of Strowan proposed as HRZ does not meet these criteria as it is not located near or adjacent to a commercial centre.

Fire and Emergency/ #842.27		Seek Amendment	Add new policy: 14.2.7.7 Policy – Reverse sensitivity: a. Within High Density Residential areas: i. enable the ongoing operation, use and redevelopment of existing emergency service facilities.	
Fire and Emergency/842.27	Kāinga Ora/ #FS2082.765	Seek Amendment	Add new policy: 14.2.7.7 Policy – Reverse sensitivity: a. Within High Density Residential areas:	Support

			<p>i. enable the ongoing operation, use and redevelopment of existing emergency service facilities.</p> <p>Fire and Emergency seeks new policies in relation to the development in medium density residential zone, high density residential zone and the future urban zone. These zones will enable extensive new development around existing fire stations. Fire and Emergency are seeking that the policies recognise the existing potential effects from an emergency service facility and that their effects are not considered to constitute an adverse effect where subsequent housing intensification has occurred on neighbouring sites. This could be achieved by a no complaints covenant on the neighbouring titles or a performance standard which the permitted activities need to be subject to.</p>

Waka Kotahi (NZ Transport Agency) / #805.37		Seek Amendment	Increase the walkable catchment to 1500m.	
Waka Kotahi (NZ Transport Agency) /805.37	Ivan Thomson/ #FS2047.3	Seek Amendment	<p>Increase the walkable catchment to 1500m.</p> <p>Waka Kotahi supports the use of walkable catchments around key commercial areas and the associated upzoning of these areas. However, the 1200m city centre walkable catchment as proposed is not supported does not reflect the walkable catchment of the city centre or realises the development capacity required by the NPS-UD. It is considered that the extent of the city centre walkable catchment should be at least 1500m for the following reasons:</p> <ul style="list-style-type: none"> • This reflects the s32 Walkability Assessment that outlines that people are generally comfortable to walk for 20min, which relates to approximately 1500m. • Christchurch is flat and relatively central to many residential neighbourhoods where people would typically use active modes of transport to get to the City Centre rather than travelling by private vehicle, which increases the walkability of the city. • As many centres as possible should be up-zoned to the fullest extent possible to provide for local services for people who will be living in the walkable catchments. Enabling additional densities in these areas will also support provision of public transport and active transport infrastructure in the future by concentrating population– Council should take a long term view approach to enabling increased density. • This achieves the objectives of the NPS-UD in creating well-functioning urban environments. 	Oppose

Kāinga Ora – Homes and Communities / #834.160		Oppose	Delete this policy.	
Kāinga Ora – Homes and Communities /834.160	LMM Investments 2012 Limited/ #FS2049.76	Oppose	Delete this policy. The requirement that sites be atleast two stories in height maynot be appropriate in a range ofcircumstances and is unnecessarily complex – thereis significant theoreticalcapacity in these areas somaintaining design flexibility ismore important thanmaintaining capacity. Whilst sites can beamalgamated, there is norequirement for amalgamation.It can be quite appropriate tolocate building height and massaway from the road edge inhigh density environments,depending on site shape, size,orientation, and building design	Support

Robert J Manthei/ #200.13		Seek Amendment	Stop enabling greenfield developments	
Robert J Manthei/200.13	Anne Dingwall/ #FS2037.291	Seek Amendment	Stop enabling greenfield developments little is being done to stop the outward spread of large, resourceexpensive housing developments on the fringes of Christchurch. These two initiatives(densification within the City and the proliferation of greenfield developments on thefringes) work against one another, with the second	Support

			<p>cancelling out many of the assumed social, economic and infrastructure benefits accruing from the first. This situation does not make any planning sense.</p> <p>Based on market evidence, there is good reason to stop the 'developer-driven gravy train' of greenfield developments: "...the suburbs that are located closer to the city with good amenity are currently experiencing medium density infill development." (From: New Medium Density Residential Standards (MDRS) Assessment of Housing Enabled, January, 2022, p.37). This assessment reported that MDRS "...will become enabled in the majority of the cities residential areas, creating an estimated 'plan enabled' capacity of 222,478 medium density dwellings". These dwellings will occur particularly "...in those catchments that are generally one suburb back from the city in areas with good accessibility and amenity. (Ibid, p.39) In other words, there is no 'need' for more greenfield developments under the densification initiative. Figure 14 shows the areas in Christchurch with good accessibility ratings and their potential for development. Note, in particular, areas marked by purple (outstanding development potential), red (excellent potential), and tan (very good potential) dots and their location in relation to the City's outer boundaries. (Ibid, p.39).</p>

Retain the 14.2.8 section as it provides useful direction on how the build-out of greenfield residentially zoned areas is to occur.</p> <p>3. Amend the objective as follows:</p> <p>14.2.8 Objective – Development of greenfield areas Future Urban Zone Co-ordinated, sustainable and efficient use and development is enabled in the Future Urban Zone greenfield growth areas.</p> <p>See comments elsewhere regarding zone labelling. The FUZ label has not been appropriately applied to existing greenfield urban zoned locations – existing urban zoned but unbuilt residential land are sought to be MRZ (unless appropriately justified QM apply). An example of just such an approach is the correct application of a HRZ around the emerging Halswell commercial centre where already zoned RNN land is yet to be built, but has a proposed HRZ applied. In the same way the balance of this RNN area is to have a MRZ applied rather than FUZ. Taking a consistent national view in the application of National Planning Standards, the FUZ zone label is only used in other District Plans for areas that are yet to have an operative urban zone. A FUZ is a ‘holding zone’ that identifies where medium to long term urban growth is anticipated. The FUZ zone provisions are focussed on preventing rural activities from occurring that could prejudice future urbanisation e.g. quarries or intensive farming or lifestyle block subdivision. Invariably the plan frameworks require a further plan change process to be undertaken to activate or ‘live zone’ a residential zone that can then be developed. The associated policies that guide the build-out of greenfield areas remain appropriate.</p>	Support

			operative urban zone. A FUZ is a 'holding zone' that identifies where medium to long term urban growth is anticipated. The FUZ zone provisions are focussed on preventing rural activities from occurring that could prejudice future urbanisation e.g. quarries or intensive farming or lifestyle block subdivision. Invariably the plan frameworks require a further plan change process to be undertaken to activate or 'live zone' a residential zone that can then be developed. The associated policies that guide the build-out of greenfield areas remain appropriate.	
Fire and Emergency/ #842.28		Seek Amendment	Add new policy: 14.2.8.8 Policy – Reverse sensitivity a. Within Future Urban areas: i. enable the ongoing operation, use and redevelopment of existing emergency service facilities.	
Fire and Emergency/842.28	Kāinga Ora/ #FS2082.766	Seek Amendment	Add new policy: 14.2.8.8 Policy – Reverse sensitivity a. Within Future Urban areas: i. enable the ongoing operation, use and redevelopment of existing emergency service facilities. Fire and Emergency seeks new policies in relation to the development in medium density residential zone, high density residential zone and the future urban zone. These zones will enable extensive new development around existing fire stations. Fire and Emergency are seeking that the policies recognise the existing potential effects from an emergency service facility and that their effects are not considered to constitute an adverse effect where subsequent housing intensification has occurred on neighbouring sites. This could be achieved by a no complaints covenant on the neighbouring titles or a performance standard which the permitted activities need to be subject to.	Oppose

Seek that this change be made by way of 'Area limited by Qualifying Matters' or other appropriate means	
David Murison/692.1	Kāinga Ora/ #FS2082.434	Seek Amendment	<p>Seeks that Council identify the area of Strowan, particularly those blocks in the vicinity of St Andrews College, as worthy of definition as an area which warrants zoning as Medium Density Residential Zone not High Density Residential Zone. Seek that this change be made by way of 'Area limited by Qualifying Matters' or other appropriate means</p> <p>Relevant PC14 clause references and extracts are given in RED italics following</p>	Oppose

			<p><i>Section 14.2.8.5 Policy – Infrastructure servicing for developments</i></p> <p><i>a Ensure that developments are serviced with all required infrastructure in an effective and efficient manner</i></p> <p><i>Section 14.2.8.6 Policy – Integration and connectivity</i></p> <p><i>c Avoid significant adverse effects and remedy or mitigate other adverse effects on existing businesses, rural activities or infrastructure</i></p> <p>I suggest that it is universally accepted that 'infrastructure' includes adequate carparking and a safe and effective transport network which does not contribute to traffic congestion. and a functioning and effective stormwater and wastewater network.</p> <p>My specific concerns in relation to the impact of the proposed changes on this infrastructure in particular in my community of Strowan are as follows:</p> <ul style="list-style-type: none"> the supply of on-street carparking spaces currently cannot keep-up with the demand for carparking, resulting in the very recent expansion of time-based (two hour maximum) parking restrictions on most surrounding streets. The presence of St Andrews' College, which defines the southeast limit of Strowan, a Year 1-13 school and preschool, is the most significant contributor. The school has a roll of 1700 students and around 250 teachers and staff with only minimal on-site parking provided. Day students who hold a driver's licence drive from all parts of greater Christchurch to attend the College. St Andrews' College, established in 1917, has effectively become a 'destination, independent school of choice' as it is the only co-educational, preschool, primary and secondary school in the South Island. The school is growing with a large waiting list for entry. The presence of the Waimairi Tennis Club in the neighbourhood also contributes to the overall pressure on on-street carparking. Any increase in housing density in the Strowan community (that is either MRZ or HRZ) will magnify this existing, significant on-street carparking problem as new housing developments are no longer required to provide any on-site carparking. Of particular concern is that the PC14 propose to enable HRZ along Papanui Road and one block either side of Papanui Road which is obviously at a higher level of intensification than even MRZ. As there is little on-street carparking permitted on Papanui Road (none for five hours on weekdays due to the presence of priority bus lanes), and no on-site carparking required for new residential developments, carparking associated with ALL of this intensification will further exacerbate the carparking issues in the Strowan community; <p>the existing traffic management issues associated with St Andrews' College also pose a significant health and safety issue – from morning and afternoon congestion in Normans Road and surrounding streets at school drop-off and pick-up times, drivers double parking and parking over broken yellow lines and 'rat running' around the Strowan streets to seek to avoid congestion, causing delays and congestion at intersections linking with surrounding primary roads including Papanui Road and Strowan Road. All of these issues will be exacerbated by the proposed intensification of residential development in the community but especially by the proposed HRZ over many blocks</p> <p>[Please refer to attachment for full submission]</p>	
Henri Murison/ #693.1		Seek Amendment	[Regarding policies 14.2.8.5 and 14.2.8.6] suggest that it is universally accepted that 'infrastructure' includes adequate carparking and a safe and effective transport network which does not contribute to traffic congestion. and a functioning and effective stormwater and wastewater network.

BP Oil New Zealand Ltd, Z Energy Limited and Mobil Oil New Zealand Ltd (referred to as The Fuel Companies) / #212.10		Seek Amendment	<p>Replace 14.2.12 Objective as follows:</p> <p>New residential development is not adversely affected by noise generated from industrial activities and the development does not affect the operation of industrial activities within industrial zones.</p> <p>New residential development is compatible with existing lawfully established industrial activities.</p>	
Ravensdown Limited/ #243.3		Seek Amendment	Amend proposed Objective 14.2.12 so that it recognises the full suite of potential effects from industrial activities on new residential development, not just noise.	
Ravensdown Limited/243.3	Kāinga Ora/ #FS2082.203	Seek Amendment	<p>Amend proposed Objective 14.2.12 so that it recognises the full suite of potential effects from industrial activities on new residential development, not just noise.</p> <p>Rezoning of the land to the southwest and south of the Christchurch Works (as outlined in red in Figure 2 of this submission) is not consistent with SD Objective 3.3.14 (now 3.3.15 under PC14) of the District Plan, nor does it align with the policy framework of the IHZ which acknowledges the potential for both reverse sensitivity issues and a range of potential effects on more sensitive activities adjoining such sites. For this reason, Ravensdown considers that the area of land, which is of concern, should be rezoned MRZ. This zoning is consistent with the proposed rezoning of the land to the south and east of the land which is generally located to the south of the Christchurch Works.</p> <p>In recognition of the nature of the IHZ, and the activities that lawfully can occur in that zone, retain a restriction on development of the MRZ land, where it adjoins industrially zoned land, whereby permitted residential development must be the lesser of 7m or 2-storeys. This restriction could be applied by way of the proposed RII-QM, or alternatively by way of a rule that specifies this requirement if residential development is being sought within a specified buffer area, as discussed below, of an industrial zone.</p> <p>If the restriction proposed above is to be by way of a rule, given that the proposed PC14 RII-QM was developed on the basis of potential noise effects on residential development, then a rule requiring acoustic installation to be installed in all residential developments, within the specified buffer area from industrial zones, should also be included in the District Plan.</p> <p>In the absence of any specific technical evidence from Council that addresses the potential effects, not just noise effects, from industrial activities in an IHZ (rather than just an IGZ), and where an IGZ does not buffer an IHZ from a residential zone, Ravensdown proposes that the 'buffer area' restriction that applies at the IHZ /residential interface should extend for 240m from the zone boundary. This proposed buffer accommodates PC14's proposed 40m noise related IGZ / residential zone 'buffer', plus provision of an additional 200m to reflect the approximate depth of part of the IGZ in Hornby where it adjoins an IHZ (i.e., to the northwest and north of Ravensdown's site). Thus, this approach incorporates a IGZ buffer between IHZ and residential zones that seems to have been envisaged in the s32 Evaluation. Also,</p>	Oppose

			this extent of buffer generally reflects the extent of off-site locations where Ravensdown carries out monitoring and survey work under Consent CRC080001, and where windows of residential dwellings has been replaced, as required by the conditions of Consent CRC080001, due to etching of glass.

Kāinga Ora – Homes and Communities / #834.166		Oppose	Delete Objective 14.2.12 and Policy 14.2.12.1 and the Industrial Interface Qualifying Matter and all associated provisions.	
Kāinga Ora – Homes and Communities /834.166	LMM Investments 2012 Limited/ #FS2049.82	Oppose	Delete Objective 14.2.12 and Policy 14.2.12.1 and the Industrial Interface Qualifying Matter and all associated provisions. Kāinga Ora considers that at the interface of industrial and residential zones the onus for managing effects rest primarily with the industrial activity. The interfaces are already existing, with the Operative Plan having long zoned industrial areas adjacent to residential zones for light industrial activities. Invariably industry is required to meet residential zone standards relating to matters such as noise or glare at the zone boundary. Given the existing requirements to comply with residential standards at the zone interface, combined with the General Industrial zone standards that limit heavy industry in these buffer locations, the QM setback is not considered to be appropriate with the benefits of the QM not outweighing the costs.	Support

Transpower New Zealand Limited / #878.18		Support	Retain 14.3 How to interpret and apply the rules as notified.	

Residential > Rules - Residential Suburban Zone and Residential Suburban Density Transition Zone

Submission Number	Further Submission No	Position	Decision Requested	FS Position
Heather Woods/ #107.6		Seek Amendment	<i>Amend 14.4.1.1 Permitted activities To include Transportable Homes as of right in any location, and in whichever way is going to contribute to the CCC objectives of intensifying housing in greater Christchurch.</i>	
Heather Woods/ #107.8		Seek Amendment	Amend 14.13.1.1 For CCC to permit Qualifying Sites to be located in ANY Residential Suburban zone, not just the transitional residential suburban zone.	
Heather Woods/ #107.9		Seek Amendment	Apply 14.13.1.2 and 14.13.1.3 to tiny house development in all Residential Suburban and Medium Density Zones.	
Sandra Caldwell/ #120.3		Oppose	Rezoning Paparoa Street from High Density Residential and Medium Density Residential to Residential Suburban.	
Rohan A Collett/ #147.5		Oppose	Oppose the inclusion of provisions - Qualifying Matters - restricting MDRS within the existing residential areas under the Airport Noise Corridor.	
Rohan A Collett/147.5	Christchurch International Airport Limited/ #FS2052.67	Oppose	Oppose the inclusion of provisions - Qualifying Matters - restricting MDRS within the existing residential areas under the Airport Noise Corridor. The Airport Noise Corridor (which runs between Fendalton/Riccarton to the airport) is not a Qualifying Matter as planes only use this path when the wind direction is north-west or south-east, which according to NIWA records is less than 3% of the time. Omitting this large area of land from MDRS because of detrimental effects from planes flying overhead for 3% of the time seems ridiculous.	Oppose
Jorge Rodriguez/ #178.3		Seek Amendment	I S trongly oppose the proposed zoning of 5B Frome Place as a Residential Suburban Zone and urge the Christchurch City Council to rezone the property and the St Albans area in general as a Residential Medium Density Zone.	
Brooke McKenzie/ #183.3		Oppose	Oppose the Low Density Residential Airport Noise Influence Zone that reduces residential density. Support this to be MDRZ.	
Brooke McKenzie/183.3	Christchurch International Airport Limited/ #FS2052.82	Oppose	Oppose the Low Density Residential Airport Noise Influence Zone that reduces residential density. Support this to be MDRZ. 50000 houses will have to be built within Christchurch city boundaries within the next 30 years. Since the earthquakes we have lost an incredible number of ratepayers to Selwyn and Waimak because of very unwise decisions by council and the minister using the LURP act to rezone land in the Halswell area which apart from being very expensive TC2 and 3 to develop, was totally unsuitable and has led to storm water problems semi rectified by swales and other flood diversion actions. The expensive development costs of subsequent sections and builds led many homeowners to venture outside Christchurch to buy equivalent or better for substantially less \$, with change. These unwise decisions made to protect airport contours have cost this city dearly. The Halswell land continues to be developed on a flood plateau that is the catchment tributary for the Heathcote and Avon rivers. With climate change and the insanity of the council and minister's decision will be rewarded with continuous flooding. Still subdivisions get approved into these totally unsuitable areas because there are currently few alternatives. This city needs land for subdivision and it has been widely agreed for 30 plus years that the most suitable TC1 land has been the western fringe out to the airport. There has never been any argument about this fact. The impediment has been protection of the airport and the powers that be	Oppose

			persuaded that an outer control boundary (OCB) of 50dbn was the limit for residential and other development. This was determined by a very persuasive airport company and their consultants that development within this band was detrimental to health and may lead to the airport being curfewed. No one wants the airport to be curfewed and the remedy proposed will ensure their protection. However every other airport in New Zealand including Auckland (UNCURFEWED) has accepted the 1992 standard NZ6805 with an OCB of 55dbn.	
Ruth Parker/ #411.1		Support	Supports retaining Residential Suburban Zoning	
Karelia Levin/ #479.3		Support	Approve PC14 in respect of the Airport Noise Influence Area.	
Deidre Rance/ #561.6		Seek Amendment	[Retain existing zones in the Strowan area]	
Larissa Lilley/ #671.4		Support	Support high density in New Brighton.	
Kāinga Ora – Homes and Communities / #834.58		Oppose	14.4.1 – 14.4.4, 14.13, 14.14 Low Density Residential Airport Influence Zone and Airport Influence Density Precinct. Delete this qualifying matter and all proposed provisions	
Kāinga Ora – Homes and Communities / #834.58	Kauri Lodge Rest Home 2008 Limited/ #FS2059.29	Oppose	14.4.1 – 14.4.4, 14.13, 14.14 Low Density Residential Airport Influence Zone and Airport Influence Density Precinct. Delete this qualifying matter and all proposed provisions Kāinga Ora seeks that the Airport Noise Influence Area qualifying matter be deleted thus allowing all existing residential zoned land within the Airport Noise Influence Area to be zoned Medium Density Residential as per the direction in the Act. While Kāinga Ora agrees that it is appropriate to protect strategic infrastructure (including Christchurch International Airport) from reverse sensitivity effects, it does not consider that restricting density under the Airport Noise Influence Area is necessary to avoid reverse sensitivity effects. Further, Kāinga Ora considers that the health, safety and amenity of existing and future residents living within the Airport Noise Influence Area would be appropriately maintained if the land was zoned Medium Density Residential. Any new buildings and additions to existing buildings located within the 55 dB Ldn air noise contour or the 55 dB Ldn engine testing contour would continue to be subject to the acoustic insulation standards set out at Rule 6.1.7.2.2 (Activities near Christchurch Airport) in the District Plan as required by Policy 6.1.2.1.5 b. ii. (Airport noise).	Support
Kāinga Ora – Homes and Communities / #834.58	New Zealand Airports Association/ #FS2071.11	Oppose	14.4.1 – 14.4.4, 14.13, 14.14 Low Density Residential Airport Influence Zone and Airport Influence Density Precinct. Delete this qualifying matter and all proposed provisions Kāinga Ora seeks that the Airport Noise Influence Area qualifying matter be deleted thus allowing all existing residential zoned land within the Airport Noise Influence Area to be zoned Medium Density Residential as per the direction in the Act. Any activity that does not meet the activity specific standard under PX.</p> <p>b. Any application arising from this rule shall not be publicly notified and shall be limited notified only to Orion New Zealand Limited (absent its written approval).</p> <p>Orion seeks a new rule be inserted to the listed zones to include an electricity servicing standard. Orion's experience is that in some cases developers do not approach Orion to discuss servicing matters until after the plans for a development are fixed, and often a resource consent has been granted. Consequently, developers often fail to set aside or include sufficient space on site for the necessary infrastructure. Similarly, Orion encounters resistance from corridor managers and Council when seeking to locate new/upgraded infrastructure within the berm or a local reserve. These existing issues are likely to be exacerbated by PC14.</p> <p>The land area required for on-site electricity servicing is highly site specific however Orion has proposed a 4m² land area. This standard is proposed to ensure that there is engagement with developers at the initial planning stages of land use intensification.</p> <p><i>[FULL ATTACHMENT AVAILABLE]</i></p>	Oppose

Heather Woods/ #107.18		Seek Amendment	Seek a decrease of the net floor area requirements of homes such as minor dwellings.	
Heather Woods/ #107.19		Seek Amendment	Enable the option for outdoor living spaces to be shared or partially shared with neighbouring dwellings. Or at least a portion of outdoor living spaces should be able to be satisfied by shared greenspaces.	
Heather Woods/ #107.20		Seek Amendment	Amend 14.4.2.1. To increase the number of dwellings per 450sqm site from 2 (1x residential unit and 1x minor dwelling) to 3 as a permitted activity, as long as they are only 1 storey (or limited to 4-5m high).	
Ara Poutama Aotearoa/ #259.11		Seek Amendment	Seeks to amend the residential definitions in the CDP to ensure housing which provides for diverse needs of the community is provided for.	
Ara Poutama Aotearoa/259.11	Brighton Observatory of Environment and Economics/ #FS2092.12	Seek Amendment	Seeks to amend the residential definitions in the CDP to ensure housing which provides for diverse needs of the community is provided for. Ara Poutama considers there is no meaningful effects basis for distinguishing residential activities which include supervision, care, and support from any other residential activity. The decision to accommodate those persons within the community has already been made by the Courts or the Parole Board through sentencing or release decisions. The CDP should not afford Council the opportunity to frustrate the statutory requirements under the Sentencing Act, Parole Act and Corrections Act. Imposing unnecessary consenting requirements on those activities, particularly when there is no material effects-based differential, risks undermining the operation of the justice system and Ara Poutama's ability to fulfil its statutory obligations.	Seek Amendment
Environment Canterbury / Canterbury Regional Council/ #689.80		Seek Amendment	[T]hat instances in the permitted activities table (specifically P10, P11 and P12) of 'the tsunami inundation area as set out in Environment Canterbury report number R12/38 4 "Modelling coastal inundation in Christchurch and Kaiapoi from a South American Tsunami using topography from after the 2011 February Earthquake (2012), NIWA"; as shown in Appendix 14.16.5' be replaced with 'the Tsunami Management Area', to reflect the updated area.

Graham Townsend/ #314.4		Seek Amendment	[New built form standards to require roofing colours with low reflectivity and] roof-runoff rainwater storage.	
Graham Townsend/314.4	Kāinga Ora/ #FS2082.265	Seek Amendment	[New built form standards to require roofing colours with low reflectivity and] roof-runoff rainwater storage. The current fashion for black or dark grey roofing will exacerbate the urban heat-island effect. In view of climbing global temperatures, it is therefore a form of collective self-harm. I do not know whether it falls within the Council's power to influence this fashion, but we should be using surfaces with a much higher albedo to reflect as much incoming solar radiation back into space as we can. Given the likely ramping up of la Nina/El Nino cyclicity and hence the likelihood of more severe droughts, new suburban housing should include mandatory roof-runoff rainwater storage.	Oppose

Summerset Group Holdings Limited/ #443.2		Seek Amendment	amend 14.4.2.2 as follows: ... b. For single and/or multi residential unit developments, other than multi-unit residential complexes and social housing complexes, excluding retirement villages a minimum tree canopy cover of 20% of the development site area must be provided in accordance with the Chapter 6.10A rules. The tree canopy cover planting area may be combined with the landscaping area in whole or in part, may be located on any part of the development site, and does not have to be associated with each residential unit.....	
Summerset Group Holdings Limited/443.2	Kāinga Ora/ #FS2082.313	Seek Amendment	amend 14.4.2.2 as follows: ... b. For single and/or multi residential unit developments, other than multi-unit residential complexes and social housing complexes, excluding retirement villages a minimum tree canopy cover of 20% of the development site area must be provided in accordance with the Chapter 6.10A rules. The tree canopy cover planting area may be combined with the landscaping area in whole or in part, may be located on any part of the development site, and does not have to be associated with each residential unit.....	Oppose

			<p>Summerset provides an extensive amount of landscape treatment, including substantial tree planting, as part of its developments. . The Plan contains specific assessment matters for retirement villages which include consideration of matters relating to site design, visual amenity and landscape treatment. These provisions further ensure that adequate landscaping and tree planting is incorporated into retirement village design.</p> <p>To avoid confusion associated with terminology and applicability of provisions, Summerset considers that the proposed tree canopy provisions relating to retirement villages are adequately provided for by other provisions in the Plan and requests that these be deleted. The requirements for non-residential activities, together with the retirement village specific assessment, would be sufficient to ensure landscape and tree provision.</p>

Kāinga Ora – Homes and Communities / #834.170		Oppose	Delete the proposed amendments and retain the Operative Plan rule	
Kāinga Ora – Homes and Communities /834.170	LMM Investments 2012 Limited/ #FS2049.86	Oppose	Delete the proposed amendments and retain the Operative Plan rule The proposed amendments to this rule duplicate and confuse the regulatory framework with the tree FC rule – essentially it introduces two rules to control the same matter. Kāinga Ora oppose the tree FC rule and this rule amendment for the reasons given in the submission on the tree FC rule. In the event that the tree FC rule is retained, this rule is sought to simply have an advice note directing Plan users to the FC rule and the additional tree canopy outcomes sought in that separate rule.	Support
Historic Places Canterbury/ #835.9		Support	The submitter supports all efforts to incentivise tree planting, including the canopy cover requirements relating to development and subdivision consents.	
Historic Places Canterbury/835.9	Anne Dingwall/ #FS2037.596	Support	The submitter supports all efforts to incentivise tree planting, including the canopy cover requirements relating to development and subdivision consents. Even where mature trees are retained, it is vital to ensure that this will not just be for long enough to obtain the desired resource consent, only to have the trees die or require removal a few years down the track. All too often around the city large trees are seen to be dying back because they have suffered unsustainable root damage during construction nearby. While the rules make provision for providing sufficient soil volume and tree root dimensions for the tree's requirements and provide for maintenance of the trees or removal and replacement of any that are damaged, it is not clear how this will, in practice, be monitored.	Support

Submission Number	Further Submission No	Position	Decision Requested	FS Position
Greg Olive/ #2.10		Oppose	Qualifying Matter Residential Industrial Interface is removed from 419 Halswell Junction Road	
Andrea Heath/ #16.2		Oppose	Remove the ability to construct buildings of up to 14m without resource consent.	
Grant McGirr/ #21.1		Oppose	That no changes to rules lessen the amount of sunlight that any property (house and land) currently receives.	
The Riccarton Bush Trust/ #44.2		Support	Support[s] the proposed 8m height limit within the Riccarton Bush Interface Area.	
The Riccarton Bush Trust/44.2	Anne Dingwall/ #FS2037.68	Support	<p>Support[s] the proposed 8m height limit within the Riccarton Bush Interface Area.</p> <p>The Riccarton Bush Act 1914 details that the Mayor of Christchurch accepted the gift of Riccarton Bush to the people of Canterbury, with inter alia, the condition that the said property shall be used and kept for all time for the preservation and cultivation of trees and plants indigenous to New Zealand.</p> <p>There is simply no other similar combination of indigenous trees and shrubs on the face of the earth; let alone anything similar in New Zealand. It is the largest remnant of alluvial podocarp forest on the lower Canterbury Plains and Banks Peninsula, a forest type that today only covers a tiny fraction of its former extent. It is a key mahinga kai site for Ngāi Tūāhuriri, and the place of first permanent European settlement in Ōtautahi. The Riccarton Bush Board was established in 1914 and one of its key roles is to Protect and enhance the indigenous flora, fauna and ecology of Pūtaringamotu /Riccarton Bush, including mahinga kai and taonga species.</p> <p>Pūtaringamotu/Riccarton Bush has exceptionally high ecological and cultural values that housing intensification has the likelihood to adversely impact. These values are clearly recognised through the site being protected by its own Act of Parliament, the site meeting Section 6(b), 6(c) and 6(e) criteria in the RMA and by the site being mapped as a Site of Ecological Significance in the Christchurch District Plan.</p>	Support

			<p>The Riccarton Bush Trust (Board) acknowledges the work that the Council has done on proposing a Riccarton Bush Protection Zone that covers approximately 180 properties surrounding the Riccarton Bush Property. The Council commissioned reports from Manu Whenua and from Heritage Landscape expert, Dr Wendy Hodinott to inform its decision. It is disappointing that no consideration was given to any report on the impact of intensification on the health and longevity of the Bush, which is of great concern to the Board.</p> <p>While any housing intensification will not take place within Pūtaringamotu, the scale and extent of such intensification, in such close proximity, continues to raise the following concerns:</p> <p>1.1 Ground disturbance associated with building adjacent to Pūtaringamotu. Construction of buildings will require foundations which have the potential to impact Pūtaringamotu by:</p> <p>a) Affecting mature tree root systems, both structurally and in terms of the volume of soil from which they are able to absorb nutrients and water, leading to tree ill-health and potentially dieback in Pūtaringamotu.</p> <p>b) Affecting soil hydrology and particularly the lateral movement of water through the soil, which will lead to reduced water available for native vegetation within Pūtaringamotu.</p> <p>1.2 Loss of greenspace adjacent to Pūtaringamotu through increasing site coverage and reducing the minimum site size. With intensification it is proposed to increase site coverage from a maximum of 35% to 50% (in the MRZ), and to reduce minimum lots sizes from 450 m2 to 400 m2. In addition, the intensification rules suggest that the area of green space only needs to be 20% of the site. In total this will have adverse impacts on Pūtaringamotu including in the following ways:</p> <p>a) It will reduce the amount of habitat (especially trees) for native fauna, especially as corridors for bird movement. This will have significant impacts on mobile fauna such as kereru, korimako and tui which require areas larger than Pūtaringamotu for viable populations.</p> <p>b) Further affect soil hydrology by reducing the amount of soft/green permeable surfaces through which rainfall can percolate into the ground, with a much greater area of water being lost via hard surfaces into the storm water system. This will lead to reduced water available for native vegetation within Pūtaringamotu.</p> <p>1.3 Increased intensification adjacent to Pūtaringamotu altering local microclimates. This will have direct impacts on the vegetation and hence habitat quality for fauna proportional to the height of structures by:</p> <p>a) Shading parts of the bush, thereby reducing photosynthesis.</p> <p>b) Creating potentially strong wind funnelling effects that can cause increased transpiration from foliage and potentially cause physical damage.</p> <p>c) Leading to increased air temperatures due to urban heat island effects. This again can affect plant photosynthesis and respiration in the bush.</p> <p>d) Increased light pollution from taller buildings impacting bird, gecko and insect behaviour within the bush.</p> <p>1.4 Reverse sensitivity effects towards Pūtaringamotu. Caused by people living close to the bush perceiving the bush as having adverse effects on them resulting in:</p> <p>a) Residents placing pressure on the Council to have trees trimmed, thinned or even removed because they cast shade on their apartments, thus reducing the values of Pūtaringamotu.</p> <p>b) Residents placing pressure on the Council to prune roots or have trees removed for their perceived or actual damage to infrastructure (below ground utilities, paved areas, fence and building foundations)</p>	
Heather Woods/ #107.21		Seek Amendment	Amend 14.3.3.3. to reduce building height to a max of 5m IF there are 3 dwellings per 450sqm site.

Russell Fish/ #116.3		Oppose	Review the 'Industrial Interface' Qualifying Matter, with a view to remove the designation where it is not already an historically established principle.	
Matt Edwards/ #189.8		Seek Amendment	14.4.2.3.iv - Reduce the area of the Ric Bush interface back to the current level of 40 sites.	

Matt Edwards/189.8	Christchurch International Airport Limited/ #FS2052.246	Seek Amendment	<p>14.4.2.3.iv - Reduce the area of the Ric Bush interface back to the current level of 40 sites.</p> <p>We disagree with the extension of the Riccarton Bush interface. Allowing more houses in the Riccarton Bush area does not reduce the amenity but shares it. The danger of including this QM is that it solely benefits existing wealthy homeowners who can afford to live in the area by keeping house prices close to the Bush at unobtainable levels. The extension of the interface is justified by a desire to maintain views of the Bush from streets in the area. This mostly amounts to views of distant treetops, largely indistinguishable from the various street-trees and private plantings. The true amenity of the Bush is in its accessibility from the surrounding area, especially given it is intersected by the Uni-Cycle MCR. This accessibility would only be increased if more people were permitted to live within the general vicinity of the Bush, and as such the amenity provided by the Bush would increase.</p> <p>The application of the Riccarton Bush interface is at odds with the NPS-UD. NPS-UD allows for QM to restrict development in “open space provided for public use, but only in relation to the land that is open space” (NPS-UD 2020 3.32 1 (d)) or “an area subject to a designation or heritage order but only in relation to the land that is subject to the designation or heritage order” (NPS-UD 2020 3.32 1 (e)). This QM is applying density control to sites not included in the protected extent of either Riccarton Bush, nor the surrounding grounds of Riccarton House, nor land zoned as open space. The Section 32 report mentions that solely limiting the interface to adjoining sites (rather than the much greater area proposed in the QM) would have the effect of “...ensuring that Riccarton Bush is protected from the effects of medium density development” and that “the values of Riccarton Bush itself would not be degraded”, and “this approach is effective at addressing the issue” . This option should have been implemented in the QM, rather than the expansive area that is currently proposed.</p>	Oppose

Atlas Quarter Residents Group (22 owners) / #224.1		Oppose	That the permitted height limits within the existing District Plan (prior to PC14) are retained to the maximum extent possible	
Atlas Quarter Residents Group (22 owners) /224.1	Kāinga Ora/ #FS2082.165	Oppose	<p>That the permitted height limits within the existing District Plan (prior to PC14) are retained to the maximum extent possible</p> <p>Who we are:</p> <p>This submission is made on behalf of the following persons, all of whom own units in the Atlas Quarter, 36 Welles Street, Christchurch Central:</p> <p>Richard Ball, Athena Ellis, Phil and Lynette Stenning, Max Lucas, Paul and Jeni Neilson, Jenny Jia and Zhongyang Yuan, Piers and Emma Bayley, Rachel and Tim Scanlan, Eileen and Vernon Payne, Bruce Fraser, Eléonore Dumaine, Peter and Faye Greenwood, Alan Steel, Gillian Smeith, Chelsea Kennedy, Deborah Bowker, Kate and Mike Peers, Peter Morris, Mathilde Vachon, Barbra Pullar, Martin Rumbold and Kirsty Stewart.</p>	Oppose

Key points:

We support well designed intensive residential and commercial development, integrated with sustainable transport options. We have already “put our money where our mouths are” by purchasing units in the Atlas Quarter, a large and successful inner-city development of 110 residential and three commercial units.

We oppose the greatly increased height limits proposed by Plan Change 14. They are unnecessary and inappropriate for Christchurch.

We support the inclusion of qualifying matters to enhance design quality and urban amenity across the City.

Relief sought:

1. That the permitted height limits within the existing District Plan (prior to PC14) are retained to the maximum extent possible.
2. Where Government legislation and regulations require increases to height limits, that these are kept to the minimum extent possible for compliance with the regulations.
3. The need for greater intensification is supported but this does not require or justify the proposed increases in height limits as permitted activities.
4. The inclusion of the qualifying criteria is supported, independent of height limits, as a means of promoting good design and ensuring new buildings do not adversely impact existing buildings designed and constructed within the current District Plan requirements.

Reasons:

Following the Christchurch earthquakes, a comprehensive design process was undertaken for the City, particularly for the central city. Deliberate and well-informed decisions were made create a liveable city, with intensified development in the central city and around suburban centres, but with lower central city height limits than previously existed. This has created a compact central city with increased densities compared to before the earthquakes, but without the height of some of the buildings that Christchurch had pre-earthquake . The consolidation has resulted in many vacant sites becoming available which are gradually being filled.

This model was developed by looking at best practice around the world, combined with local input from residents and experts, to create an attractive and vibrant City. It set ambitious goals for increasing densities for residential living, especially in the central city and around suburban centres. It was fully integrated with future transport options and climate resilience objectives.

It has widespread local support and was developed with considerable input and investment from Government (via CERA) and Christchurch City Council. It integrated land use and transport, seeking higher densities and more sustainable transport, as reflected in the Land Use Recovery Plan, Christchurch Central Recovery Plan and the Central City Transport Plan. It was embedded into the District Plan through an Independent Hearing Panel of experts hand-picked by the Government.

The greatly increased height limits proposed Plan Change 14 undermines the objectives and principles that underpin the vision of the 2015 Christchurch Central Recovery Plan:

“To become one of the best small cities in the world, Christchurch needs a city centre that is:

- *an inspiring place to live*
- *an attractive place to invest*
- *the best urban environment in New Zealand.”*

The decision to limit heights was a deliberate choice in achieving this vision. The proposed changes will undermine existing investments, entered into in good faith based on the Recovery Plans, while also reducing the central city’s design coherence and creating a less attractive City.

The many empty sites and carparks that still exist post-earthquake provide adequate future capacity for the foreseeable future, including the “competitive margin” required by Government regulations. The only apparent reason for increasing the height limits appears to be compliance with new Government regulations. If the height limits are to be increased, this change should be done to the minimum extent needed to comply with these ill-considered Government requirements. There is no other justification for the proposed rules.

			<p>The proposed rules allow new development to be concentrated in a small number of very tall buildings, with the negative impacts such as greater shading and wind tunnels, accompanied by a continuation of many empty and ugly lots in the central city. As the vacant sites are largely filled with cheap carparking, this further undermines the stated transport sustainability and climate resilience objectives.</p> <p>The scale of the buildings permitted under PC14 is not consistent with the extensive post-earthquake developments that have already occurred. The post-quake developments have created a very attractive City which will be undermined by these proposals. Existing intensive residential developments, such as the Atlas Quarter, could be overshadowed by new buildings of nearly twice the height on the east and west, blocking sunlight. Others may be blocked to the north.</p> <p>In short, the proposal for increased heights across the City are ill-considered solutions for problems that exist in Auckland, Wellington, and possibly other centres, but are not applicable to Christchurch. The geography and existing development of these other centres constrains new development. Post-earthquake Christchurch is quite different from these other centres: it is not constrained for growth opportunities, as demonstrated by the far slower growth in property prices over recent years. Even before the earthquakes, Christchurch had far more stable (less volatile) prices than Auckland and Wellington – a trend that has persisted since at least the 1970's. In Christchurch there is housing choice, particularly with substantial increases in the number of higher density residential apartments.</p> <p>Maximising the benefits of intensification needs to consider the dis-benefits. The proposed Plan identifies loss of tree cover as a disbenefit but does appear to put sufficient emphasis on other matters. Why does it propose financial contributions for loss of tree cover but not for loss of sunlight to others, wind tunnel effects or loss of amenity? In the Christchurch context, the widespread demolition of much of the central city, including most of the taller buildings, and consolidation of activities into more compact precincts, has created a much more attractive City with a visual appearance and aesthetic appropriate for the size of the City, reflected in the Central City Recovery Plan issued by CERA after extensive public and expert engagement. Both residents and visitors are commenting on the attractiveness of this new look. Re-introducing unnecessarily large buildings undermines this new and attractive look. Even with setbacks and other requirements, it has the potential to detract from the amenity and value of the very substantial public and private investment made for the City's re-build and recovery.</p>	
Michael Dore/ #225.4		Support	Support protections for Riccarton House and Bush.	
Michael Dore/225.4	Anne Dingwall/ #FS2037.315	Support	Support protections for Riccarton House and Bush. Riccarton House and Bush is the oldest area of Christchurch and interlaced with so much of the city's history. The Bush area is already designated a heritage site. To provide further protection to this historical asset a buffer zone of surrounding streets should qualify as low density with height restrictions in current and future planning and resource consents should remain mandatory. It is vital and very necessary to respect and acknowledge the area as important to the heritage of Christchurch.	Support

Kāinga Ora – Homes and Communities /834.171	The Riccarton Bush Trust/ #FS2085.33	Oppose	<p>1. Delete 8m Riccarton Bush height limit.</p> <p>2. Delete 7m height rule in the Industrial Interface Qualifying matter area and apply relevant MRZ or HRZ heights.</p> <p>This rule introduces an 8m height limit if you're in the Riccarton Bush QM and under the Airport Noise Influence Area (which is why it has a RS zoning rather than MRZ). Kāinga Ora have opposed before the extent of the Airport Noise Influence Area and the Riccarton Bush QM and have sought the area around Riccarton Bush is MRZ to the north and HRZ to the south, as such there is no need for an 8m height limit in the RS zone. Separately the height rule also introduces a 7m height limit in the industrial interface QM – which given that this is a rule being applied to the RS and RSDT zones this duplicates an existing situation. Kāinga Ora supports the deletion of this rule and application of relevant MRZ or HRZ zones and heights.</p>	Oppose
Fire and Emergency/ #842.29		Seek Amendment	<p>Amend as follows: 14.4.2.3 Building height</p> <p>a. The maximum height of any building shall be: ...</p> <p>Advice note:</p> <ol style="list-style-type: none"> 1. See the permitted height exceptions contained within the definition of height 2. Emergency service facilities, emergency service towers and communication poles are exempt from this rule.

The Riccarton Bush Trust/ #44.5		Support	Support[s] the retention of the 35% site coverage rule for the RS zone within the Riccarton Bush interface area.	
The Riccarton Bush Trust/44.5	Anne Dingwall/ #FS2037.70	Support	<p>Support[s] the retention of the 35% site coverage rule for the RS zone within the Riccarton Bush interface area. The Riccarton Bush Act 1914 details that the Mayor of Christchurch accepted the gift of Riccarton Bush to the people of Canterbury, with inter alia, the condition that the said property shall be used and kept for all time for the preservation and cultivation of trees and plants indigenous to New Zealand.</p> <p>There is simply no other similar combination of indigenous trees and shrubs on the face of the earth; let alone anything similar in New Zealand. It is the largest remnant of alluvial podocarp forest on the lower Canterbury Plains and Banks Peninsula, a forest type that today only covers a tiny fraction of its former extent. It is a key mahinga kai site for Ngāi Tūāhuriri, and the place of first permanent European settlement in Ōtautahi. The Riccarton Bush Board was established in 1914 and one of its key roles is to Protect and enhance the indigenous flora, fauna and ecology of Pūtaringamotu /Riccarton Bush, including mahinga kai and taonga species.</p> <p>Pūtaringamotu/Riccarton Bush has exceptionally high ecological and cultural values that housing intensification has the likelihood to adversely impact. These values are clearly recognised through the site being protected by its own Act of Parliament, the site meeting Section 6(b), 6(c) and 6(e) criteria in the RMA and by the site being mapped as a Site of Ecological Significance in the Christchurch District Plan.</p> <p>The Riccarton Bush Trust (Board) acknowledges the work that the Council has done on proposing a Riccarton Bush Protection Zone that covers approximately 180 properties surrounding the Riccarton Bush Property. The Council commissioned reports from Manu Whenua and from Heritage Landscape expert, Dr Wendy Hodinott to inform its decision. It is disappointing that no consideration was given to any report on the impact of intensification on the health and longevity of the Bush, which is of great concern to the Board.</p> <p>While any housing intensification will not take place within Pūtaringamotu, the scale and extent of such intensification, in such close proximity, continues to raise the following concerns:</p> <p>1.1 Ground disturbance associated with building adjacent to Pūtaringamotu. Construction of buildings will require foundations which have the potential to impact Pūtaringamotu by:</p> <p>a) Affecting mature tree root systems, both structurally and in terms of the volume of soil from which they are able to absorb nutrients and water, leading to tree ill-health and potentially dieback in Pūtaringamotu.</p> <p>b) Affecting soil hydrology and particularly the lateral movement of water through the soil, which will lead to reduced water available for native vegetation within Pūtaringamotu.</p> <p>1.2 Loss of greenspace adjacent to Pūtaringamotu through increasing site coverage and reducing the minimum site size. With intensification it is proposed to increase site coverage from a maximum of 35% to 50% (in the MRZ), and to reduce minimum lots sizes from 450 m² to 400 m². In addition, the intensification rules suggest that the area of green space only needs to be 20% of the site. In total this will have adverse impacts on Pūtaringamotu including in the following ways:</p> <p>a) It will reduce the amount of habitat (especially trees) for native fauna, especially as corridors for bird movement. This will have significant impacts on mobile fauna such as kereru, korimako and tui which require areas larger than Pūtaringamotu for viable populations.</p> <p>b) Further affect soil hydrology by reducing the amount of soft/green permeable surfaces through which rainfall can percolate into the ground, with a much greater area of water being lost via hard surfaces into the storm water system. This will lead to reduced water available for native vegetation within Pūtaringamotu.</p> <p>1.3 Increased intensification adjacent to Pūtaringamotu altering local microclimates. This</p>	Support

			<p>will have direct impacts on the vegetation and hence habitat quality for fauna proportional to the height of structures by:</p> <p>a) Shading parts of the bush, thereby reducing photosynthesis.</p> <p>b) Creating potentially strong wind funnelling effects that can cause increased transpiration from foliage and potentially cause physical damage.</p> <p>c) Leading to increased air temperatures due to urban heat island effects. This again can affect plant photosynthesis and respiration in the bush.</p> <p>d) Increased light pollution from taller buildings impacting bird, gecko and insect behaviour within the bush.</p> <p>1.4 Reverse sensitivity effects towards Pūtaringamotu. Caused by people living close to the bush perceiving the bush as having adverse effects on them resulting in:</p> <p>a) Residents placing pressure on the Council to have trees trimmed, thinned or even removed because they cast shade on their apartments, thus reducing the values of Pūtaringamotu.</p> <p>b) Residents placing pressure on the Council to prune roots or have trees removed for their perceived or actual damage to infrastructure (below ground utilities, paved areas, fence and building foundations)</p>

Addington Neighbourhood Association / #205.28		Support	Encourage intensification while considering the potential loss of amenity for existing house owners.	
Addington Neighbourhood Association /205.28	Kāinga Ora/ #FS2082.148	Support	Encourage intensification while considering the potential loss of amenity for existing house owners.	Oppose

			Existing amenity should be protected at the same time as intensification is encouraged. Loss of sunlight and warmth from the sun on a property, through being overshadowed by a larger building being built next door, is akin to a seat being reclined by the passenger in front of you on a plane. There is a sense of loss of something you believed you were entitled to have. With a long term plan, people will know to consider the intensification potential of their neighbours' properties when they buy a property, they can vote with their feet, by buying in an area which has the right sunlight availability for them	
Steve Burns/ #276.2		Support	[Retain sunlight access provisions]	
Steve Burns/276.2	Pavel Milkin/ #FS2023.1	Support	[Retain sunlight access provisions] Reasons - Sun/shading, wind, and firefighting ability. If all the square mile in the centre of town was 5 stories there would be little need for other development for years. Nice to have development along main transport routes, but you will need in the plan to make provision for widening those routes to enable access. No good having more density and inadequate transport facilities (public and private)	Seek Amendment

Jono de Wit/ #351.8		Seek Amendment	Seek to reduce the Sunlight Gain Qualifying Matter along Riccarton Road where there are dedicated bus lanes and would like the Sunlight Access QM overlay to have the same boundaries as the transport access QM.	
Jono de Wit/351.8	Kāinga Ora/ #FS2082.285	Seek Amendment	Seek to reduce the Sunlight Gain Qualifying Matter along Riccarton Road where there are dedicated bus lanes and would like the Sunlight Access QM overlay to have the same boundaries as the transport access QM. I do not support the sunlight QM because it will delay the MDRS and the tree financial contributions from taking effect and will likely result in a worse built form especially in the six storey zones due to the setbacks and recession planes required. I would support a sunlight QM if it had the same boundaries as the transport access QM so that it did not delay the MDRS in the most important areas and does not reduce the density able to be built in the six storey zones. The area north of Riccarton road and west of Straven Road should be HRZ not MRZ because limiting density near a main public transport route that is so close to Riccarton central and on a planned MRT route does not make sense. This should be where apartments are allowed to be built! I think the area of Riccarton road between Riccarton and Church Corner town centres should be included in the six storey zone. This will be an MRT route and it needs to be allowed to build apartments close to it.	Support

			<ul style="list-style-type: none"> re-zone sites within the Airport Noise Contour to a Medium Residential Zone, High Residential Zone or any other zone that would otherwise apply, and amend those zone's rules to require any permitted activity within the Airport Noise Contour to meet the indoor design sound levels already specified in the operative Christchurch District Plan <p>Aside from the option of limiting residential density in the affected area, inadequate assessment is given to any other means to "manage the specific characteristics" as required by NPS-UD [3.33], i.e., mitigate the sound exposure.</p> <p>In the current District Plan, the effects of aircraft noise are not managed via density restrictions affecting the baseline of the zone, but by ensuring dwellings at densities exceeding a zone's baseline are subject to indoor design sound level limits specified in Christchurch District Plan Appendix 14.16.4. Curiously, this existing mechanism does not protect residents from high sound exposure if their dwelling is compliant with the permitted activities within the operative Residential Suburban zone i.e., is low-density (2 dwellings per site, 8m / 2 storey building height limit), and could therefore be considered ineffective at present at protecting residents from high sound exposure. It does, however, limit the number of dwellings (to below MDRS standards), and therefore limits the number of residents in the affected area, likely reducing the 'reverse-sensitivity' effects on the airport.</p> <p>In either of the above cases, we could instead require "any bedroom to be designed and constructed to achieve an external to internal noise reduction of not less than 35 dB" or some other suitable fixed-attenuation, similar to residential activities within commercial and mixed-use zones [Proposed Housing and Business Choice Plan Change (PC14) Chapter 15 Commercial, 15.4.1.1 Permitted activities P12, P21; 15.5.1.1 Permitted activities P12, P21; 15.10.1.1 Permitted activities P27].</p> <p>Not only would either of these protect residents and users of all new occupied buildings from exposure to high sound levels without excessively limiting the density in the area, in-so-doing they would also limit the reverse-sensitivity effects on the airport. They would maintain some consistency with the current district plan but extend the protection from high sound exposure to residents of low-density dwellings. Sites within the ANC could then be zoned such that they were consistent with MDRS and NPS-UD, enabling greater housing capacity in an area of Riccarton/Fendalton which the TPG report highlights as central to the locations of feasible medium density development (refer to Figure 8 and Figure 9).</p>

Katie Newell/ #167.1		Seek Amendment	An amendment is sought for 76 Patten Street to be classed as a 'Medium Density Residential Zone' [as opposed to 'Residential Suburban'].	
Sean Walsh/ #179.1		Oppose	Request that Cashmere View Street (including #13 Cashmere View Street) be a suburban charter area/street. Request that resource consent be required before any development can proceed.	
Jill Young/ #181.2		Oppose	Oppose MDRZ for Brodie Street, Ilam (Planning Map 30), and retain RS zone in the current District Plan.	
Brooke McKenzie/ #183.4		Seek Amendment	Land within the 54 dbn and 57 dbn be a 'Soft FringeBuffer Zone' to with 1 arce lots	
Brooke McKenzie/183.4	Christchurch International Airport Limited/ #FS2052.83	Seek Amendment	<p>Land within the 54 dbn and 57 dbn be a 'Soft FringeBuffer Zone' to with 1 arce lots</p> <p>The Government has recently instructed new rules for intensification of housing. This in effect is offering one type of development in apartment type buildings. The way Christchurch has fought back and determined such development to certain areas is in my opinion the correct one. We require, and will continue to require, a diverse range of housing types. Small to larger apartments will suit a sector of the homeowner but others with families will continue to want the "quarter acres section" whilst the small holdings of 1-10 acres will always be in demand. That is what diversity means and people must always have a choice to suit their circumstances and desires.</p> <p>The airport needs a buffer zone between higher density housing by creating a SOFT FRINGE of lower density housing made up of 1 acre lots creating a protective band around the airport which will stop long term future conflict. For example a 10 acre block split into 8 sections would have a single water supply and sewage disposal placed strategically to eventually link into the city system when such infrastructure reaches such developments. The fact is that such large land parcels will attract substantial homes and be extremely well treed and landscaped well before more intensive development reaches the boundary. This soft fringe buffer zone should commence at 54 and cease at 57 inclusive. Many landowners on current 10 acre blocks in this SOFT FRINGE will have no intentions of splitting their land thus maintaining desirability of close in lifestyle blocks. There's one point that's relevant. We live in a world of noise. Inner city, main city roads, motorways, in our cars and in our houses at much higher NOISE levels than close proximity to our airport. With diversity of development people have a choice and know the advantages and disadvantages pertaining to their decision. That choice is lost if councils elect to restrict variation.</p> <p>The safe TC1 land commencing at 54 dbn and ceasing at 57dbn inclusive be determined as a low density SOFT FRINGE BUFFER ZONE to future protect the city from intensification infringement and airport from further OCB extension. This SOFT FRINGE to include all suitable land within the Christchurch City boundaries with approval for subdivision into a minimum of 1 acre plots.</p> <p>I further seek a decision from the council that it be recognised that there are many and varied operations that by merit should determine they are suitable within contours inside and outside what is decided the OCB for SOFT FRINGE.</p>	Oppose
Brooke McKenzie/ #183.5		Oppose	Oppose the Low Density Residential Airport Noise Influence Zone that reduces residential density. Support this to be MDRZ.	
Brooke McKenzie/183.5	Christchurch International Airport Limited/ #FS2052.84	Oppose	<p>Oppose the Low Density Residential Airport Noise Influence Zone that reduces residential density. Support this to be MDRZ.</p> <p>50000 houses will have to be built within Christchurch city boundaries within the next 30 years. Since the earthquakes we have lost an incredible number of ratepayers to Selwyn and Waimak because of very unwise decisions by council and the minister using the LURP act to rezone land in the Halswell area which apart from being very expensive TC2 and 3 to develop, was totally unsuitable and has led to storm water problems semi rectified by swales and other flood diversion actions.</p> <p>The expensive development costs of subsequent sections and builds led many homeowners to venture outside Christchurch to buy equivalent or better for substantially less \$, with change. These unwise decisions made to protect airport contours have cost this city dearly. The Halswell land continues to be developed on a flood plateau that is the catchment tributary for the Heathcote and Avon rivers. With climate change and the insanity of the council and minister's decision will be rewarded with continuous flooding. Still subdivisions get approved into these totally unsuitable areas because there are currently few alternatives.</p> <p>This city needs land for subdivision and it has been widely agreed for 30 plus years that the most suitable TC1 land has been the western fringe out to the airport. There has never been any argument about this fact. The impediment has been protection of the airport and the powers that be persuaded that an outer control boundary (OCB) of 50dbn was the limit for residential and other development. This was determined by a very persuasive airport company and their consultants that development within this band was detrimental to health and</p>	Oppose

			may lead to the airport being curfewed. No one wants the airport to be curfewed and the remedy proposed will ensure their protection. However every other airport in New Zealand including Auckland (UNCURFEWED) has accepted the 1992 standard NZ6805 with an OCB of 55dbn.	
Trevor Wilson/ #202.2		Support	Request the proposed Medium Density Residential Zone be extended to incorporate parts of Hollis & Bowenvale Aves. and Lansdowne Tce. including Roseneath Place that are within walking distance, or 1km, of Centaurus Rd. and access to the Orbiter bus route.	
Trevor Wilson/202.2	Kāinga Ora/ #FS2082.118	Support	Request the proposed Medium Density Residential Zone be extended to incorporate parts of Hollis & Bowenvale Aves. and Lansdowne Tce. including Roseneath Place that are within walking distance, or 1km, of Centaurus Rd. and access to the Orbiter bus route. The writers of PC14 have been inconsistent with their proposed change to Medium Residential Zone (MRZ) and in particular to the lower slopes of Cashmere Hills. The proposed planning map shows areas around Hollis & Bowenvale Aves and Lansdowne Tce remain zoned Residential Hills (RH) because of apparent limited availability to public transport, when areas around Dyers Pass Rd. have the same, if not greater, public transport limits but are being re-zoned MRZ.	Support
Steve Petty/ #203.5		Oppose	Opposes building heights of 3 storeys that impact privacy, noise, housing, animals, people, green spaces and parking.

David Hood/ #356.2		Oppose	[Seeks to oppose medium density residential development in existing residential environments]	
David Hood/356.2	Malcolm Hollis/ #FS2040.3	Oppose	<p>[Seeks to oppose medium density residential development in existing residential environments]</p> <p>We are asked to make our environment more liveable, our houses warm and dry for the health of its occupant, and the community safe and suitable for us all. Yet the changes to the rules are going to impinge on doing much of the above laudable goals.</p> <p>Height of buildings along with the density of living are suitable IF they were done as a new development - arguably. When done to an existing living environment, the benefit (if any) erodes or removes the quality for those already in the environment, and that have HAD to comply over the years or decades, to that environment. Changes to the location of boundary distance, saw houses allowed to be built closer together than they once were - with issue then arising from recession planes and the 'blue sky' and sunlight on those on the southern Shaded) side of boundary. Couple that (or is that now removed) with the height of new buildings, means not only is the blue sky and shading issue being ignored, but made exponentially worse.</p> <p>Then add the privacy issue - losing any sense of that - with multiple story building literally right looking into, not simply your once tranquil and private property, but having the added densification means the removal respite sought by many people from the hub bub of the noise of the city. IF I wanted that, or found it not an issue, I would have already bought in a city environment. As society gets 'busier' and the wide open spaces we once deliberately sought, by buying the 'quarter acre' sections, the less able we are to have the space to have a wee bit of respite to the increased urbanization of our cities AND life.</p> <p>My existing rights to a healthy home, safe home, enjoyable home, is being eroded - quickly, by these changes. NO, I am not being selfish. I am aware that there is a need for more housing - affordable preferably. Where you give help to one person BUT take away from another is - diluting the quality of life for us all, not improving it. Soon enough, once people in these denser living units grow as people/couples and</p>	Support

			perhaps start having a family, they will then require a larger home - and possibly a bit of lawn on their property. Where will that new home be? Probably not next door to them, where once there was a nice tranquil home, as that too has possibly been 'developed' into a multi unit housing building, with the owner having driven out.	
Alexandra Free/ #357.2		Support	Support the provisions as notified	
John Bennett/ #367.4		Seek Amendment	Re-write the MDRS rules to require that all medium and high density developments need to go through an Urban design approval process (like the Urban design Panel) to achieve outcomes that will benefit the communities within Christchurch.	
John Bennett/367.4	Anne Dingwall/ #FS2037.465	Seek Amendment	Re-write the MDRS rules to require that all medium and high density developments need to go through an Urban design approval process (like the Urban design Panel) to achieve outcomes that will benefit the communities within Christchurch. The proposed rules do not encourage a comprehensive development approach to increasing density, but instead encourage an ad hoc approach with each site considered individually and not collectively.	Support
John Bennett/ #367.8		Seek Amendment	require all developments to be assessed by a professionally qualified urban design panel.	
John Bennett/367.8	Chapman Tripp/ #FS2063.41	Seek Amendment	require all developments to be assessed by a professionally qualified urban design panel. The approach taken by Government and the CCC is a sledge hammer approach and there are little in the way of Design controls to help ensure a well designed City for the present and future residents of Christchurch is achieved.	Oppose
John Bennett/367.8	Chapman Tripp/ #FS2064.40	Seek Amendment	require all developments to be assessed by a professionally qualified urban design panel. The approach taken by Government and the CCC is a sledge hammer approach and there are little in the way of Design controls to help ensure a well designed City for the present and future residents of Christchurch is achieved.	Oppose

Northwood Residents' Association/ #592.3		Oppose	To not proceed with the rezoning of part of Northwood subdivision [from Residential Suburban to Medium Density Residential].	
Northwood Residents' Association/592.3	Chapman Tripp/ #FS2063.53	Oppose	To not proceed with the rezoning of part of Northwood subdivision [from Residential Suburban to Medium Density Residential].	Oppose

			<p>NRA strongly opposes the planned rezoning of a significant part of Northwood from Residential Suburban (RS) to Medium Density Residential Zone (MRZ).</p> <p>We understand that the proposed change is arising from a change in legislation and are aware of the housing challenges that New Zealand is facing, including the need for more housing. However, we believe that Northwood is not suited for the proposed rezoning, and we have serious concerns about the negative impacts potentially resulting from it. In this submission, we have included our main concerns. In particular, the proposed rezoning raises concerns regarding its impact on the existing plan and the liveability of the subdivision, the environment, and the accrued risks of stormwater management issues:</p> <ol style="list-style-type: none"> 1. The Northwood subdivision was designed in its entirety with a view to accommodate a community within it that would have a mixture of housing density and land areas. These areas were well defined and co-exist well with each other within the subdivision. Northwood already contains significant areas of medium and high-density housing under its current plan. Northwood is an area of excellent town planning and, arguably, of great liveability, as demonstrated by the pride of its residents and the well looked-after subdivision. The plan introduces MRZ in a single contiguous block incorporating all sections within a certain distance to the Main North Road. While the proposed change may allow more sections to become available for intensification, it completely ignores the merits of the existing plan. NRA strongly opposes the use of unplanned rezoning in Northwood. The proposed MRZ swathe includes amongst other things, Northwood Villas, an over 55's entity with its own covenants. One of the features that defines the character of Northwood, is the layout of the current buildings on their sections. In general, the owners of the sections facing the road frontage have maintained the original guidelines of space and openness in keeping with the original covenants applied by the subdivision developer, RD Hughes. We argue that Northwood's current plan supports the ambience of our place. 2. Christchurch City Council recently opened a consultation process on its proposed Urban Forest Plan. As outlined in the proposed plan, Northwood stands out with its higher canopy cover (15%) than all bordering areas. The NRA believes that the Northwood canopy cover should be protected. In addition to being a significant loss to the environment and the character of the area, the proposed change will be an impediment to CCC achieving its goals of growing its urban forest canopy (Goal 1) and of protecting urban trees by looking after them as "critical infrastructure (Goal 3). 3. Furthermore, the NRA raised concerns in the past about ongoing flooding issues in the Northwood subdivision. Part of the Northwood subdivision is predicted to be within the extent of a 1 in 50-year flood event. The NRA doesn't support the rezoning as we believe it would only accentuate the issue and will potentially pose a health and safety risk to the Northwood residents. 4. Lastly, we would like to highlight that significant developments are already happening in the area, with a large development across the Main North Road. We believe that it would be inappropriate to proceed with the proposed rezoning until the impacts of this major development on horizontal infrastructure, road usage and traffic are well understood. <p>We urge the Council to work collaboratively with the Northwood Residents' Association to ensure that any proposed changes are in the best interests of the Northwood residents and the broader Christchurch community. We hope that you will consider our concerns and take appropriate action to protect the unique character and environment of Northwood and to protect its residents.</p> <p>[Please refer to attachment for full submission]</p>	
Northwood Residents' Association/592.3	Chapman Tripp/ #FS2064.52	Oppose	<p>To not proceed with the rezoning of part of Northwood subdivision [from Residential Suburban to Medium Density Residential].</p> <p>NRA strongly opposes the planned rezoning of a significant part of Northwood from Residential Suburban (RS) to Medium Density Residential Zone (MRZ).</p> <p>We understand that the proposed change is arising from a change in legislation and are aware of the housing challenges that New Zealand is facing, including the need for more housing. However, we believe that Northwood is not suited for the proposed rezoning, and we have serious concerns about the negative impacts potentially resulting from it. In this submission, we have included our main concerns. In particular, the proposed rezoning raises concerns regarding its impact on the existing plan and the liveability of the subdivision, the environment, and the accrued risks of stormwater management issues:</p>	Oppose

			<p>1. The Northwood subdivision was designed in its entirety with a view to accommodate a community within it that would have a mixture of housing density and land areas. These areas were well defined and co-exist well with each other within the subdivision. Northwood already contains significant areas of medium and high-density housing under its current plan. Northwood is an area of excellent town planning and, arguably, of great liveability, as demonstrated by the pride of its residents and the well looked-after subdivision. The plan introduces MRZ in a single contiguous block incorporating all sections within a certain distance to the Main North Road. While the proposed change may allow more sections to become available for intensification, it completely ignores the merits of the existing plan. NRA strongly opposes the use of unplanned rezoning in Northwood. The proposed MRZ swathe includes amongst other things, Northwood Villas, an over 55's entity with its own covenants. One of the features that defines the character of Northwood, is the layout of the current buildings on their sections. In general, the owners of the sections facing the road frontage have maintained the original guidelines of space and openness in keeping with the original covenants applied by the subdivision developer, RD Hughes. We argue that Northwood's current plan supports the ambience of our place.</p> <p>2. Christchurch City Council recently opened a consultation process on its proposed Urban Forest Plan. As outlined in the proposed plan, Northwood stands out with its higher canopy cover (15%) than all bordering areas. The NRA believes that the Northwood canopy cover should be protected. In addition to being a significant loss to the environment and the character of the area, the proposed change will be an impediment to CCC achieving its goals of growing its urban forest canopy (Goal 1) and of protecting urban trees by looking after them as "critical infrastructure (Goal 3).</p> <p>3. Furthermore, the NRA raised concerns in the past about ongoing flooding issues in the Northwood subdivision. Part of the Northwood subdivision is predicted to be within the extent of a 1 in 50-year flood event. The NRA doesn't support the rezoning as we believe it would only accentuate the issue and will potentially pose a health and safety risk to the Northwood residents.</p> <p>4. Lastly, we would like to highlight that significant developments are already happening in the area, with a large development across the Main North Road. We believe that it would be inappropriate to proceed with the proposed rezoning until the impacts of this major development on horizontal infrastructure, road usage and traffic are well understood.</p> <p>We urge the Council to work collaboratively with the Northwood Residents' Association to ensure that any proposed changes are in the best interests of the Northwood residents and the broader Christchurch community. We hope that you will consider our concerns and take appropriate action to protect the unique character and environment of Northwood and to protect its residents.</p> <p>[Please refer to attachment for full submission]</p>	
Fay Brorens/ #644.3		Seek Amendment	<p>The submitter makes the following suggestions on density:</p> <ul style="list-style-type: none"> - precaution around Natural Hazards including, flooding, liquefaction and sea level rise. - Warm, dry and suitable homes are required. For the new dwelling a 'sunshine factor', is like a 'quality factor' or an 'outlook factor'. - If an existing home adjoining a new development site was to not have sunshine for 5 months of the year a one off payment could be made by the developer. - developments should consider infrastructure, especially sewer. - quality development in places such as Casebrook and South Halswell could provide better outcomes as Christchurch transitions to more localised communities and neighbourhoods. 	
David McLauchlan/ #653.8		Seek Amendment	Set a minimum net site area standard for developments [e.g., 2,000m ²] that allows for permanent and larger green space areas.	
Dot Fahey/ #683.3		Seek Amendment	Amend zone to a transitional medium density zone.	
Helen Wilson/ #702.1		Oppose	Decline the proposal to rezone sites to allow 2 or 3 storey townhouses.	
Lauren Gibson/ #708.2		Oppose	[Opposes intensification plan change and in particular for 19a Russell Street]	

Wigram Lodge (2001) Limited/ #716.1		Support	[Seeks that] the NPS-UD is properly and fully given effect to through the provisions and zoning of PC14 through the intensification of development.	
Brookfield Limited/ #723.1		Support	Enable full zoning of MDZ to be enabled throughout city	
Brookfield Limited/723.1	Kāinga Ora/ #FS2082.475	Support	Enable full zoning of MDZ to be enabled throughout city the NPS-UD is properly and fully given effect to through the provisions and zoning of PC14 through the intensification of development through enabling plan provisions and an increase in development capacity for residential and business use across the district	Support
Sophie Burt/ #725.3		Seek Amendment	Precincts within the Medium-Density Residential Zone should each have a Regeneration Framework Plan and have regulatory, comprehensive community engagement.	
Sophie Burt/725.3	Christchurch International Airport Limited/ #FS2052.155	Seek Amendment	<p>Precincts within the Medium-Density Residential Zone should each have a Regeneration Framework Plan and have regulatory, comprehensive community engagement.</p> <p>Precincts within the Medium-Density Residential Zone are important components of the city. They will serve their local and surrounding community and need to be fit for purpose, but also retain, integrate and celebrate their unique physical, environmental, social and cultural features.</p> <p>Precincts should each have a Regeneration Framework Plans to ensure the desired regeneration outcomes for those Precincts are understood, designed, funded and delivered through the Annual and Long-Term Plans.</p> <p>Precinct Regeneration Framework Plans should be required to have regulatory, comprehensive community engagement to understand the needs and desires of the community and to ensure they are a part of delivering the intensification required and anticipated. Collaborative planning and placemaking processes are well used internationally, but not in New Zealand.</p>	Oppose
Marie Byrne/ #734.2		Oppose	[Seeks] Medium Density Residential area in Phillipstown Cashel Street to Ferry Road, Bordesley Street to Nursery Road be considered for a heritage area and subsequently a qualifying matter.	
Mary O'Connor/ #778.8		Seek Amendment	There could be an option residents could choose to reduce intensification in return for narrowing their street width to allow street trees to be planted. This could only be achieved by less intensification.	
Glenda Duffell/ #779.2		Oppose	Do not zone medium density zone for small cul de sacs and narrow streets.	
Josie Schroder/ #780.16		Support	Retain the rules in 14.5 as notified.	
Josie Schroder/780.16	Anne Dingwall/ #FS2037.754	Support	<p>Retain the rules in 14.5 as notified.</p> <p>The proposed provisions are appropriate and necessary to achieve a well-functioning urban environment, with activity status and thresholds for assessment appropriate to the activities outlined, particularly where they impact upon public space environments.</p> <p>The balance provided between the certainty of standards and qualitative assessment, including residential design principles, is appropriate to achieving a well-functioning urban environment including high quality urban design, creating safer, more walkable environments, and promoting climate change initiatives including the provision of tree canopy and landscaping.</p>	Support
Roman Shmakov/ #783.5		Seek Amendment	[S]eek[s] that 100% of the Medium Density Residential Standard is enabled in all areas of the city (except those covered by other qualifying matters we do not oppose).	
Benjamin Love/ #799.4		Support	[That provisions enabling intensification are retained]	
Benjamin Love/799.4	Kāinga Ora/ #FS2082.595	Support	<p>[That provisions enabling intensification are retained]</p> <p>Intensification is often linked to increased housing affordability, as it can quickly and cost effectively increase supply to the market, thus zoning reform is needed to allow for it. It is more affordable to build multi-unit dwellings/apartments than single-detached houses, as they require less land, materials, and labour to build per unit, as well as have lower operating costs.</p> <p>Many choose to live in intensified areas for the improved lifestyle. People like the proximity of stores, services, schools, parks, public transport, and other facilities/amenities within walking distance. Denser areas can also provide a better sense of community, as well as a more active lifestyle.</p>	Support

			Increased affordability and access to amenities can increase the attractiveness of neighbourhoods and cities. This includes attracting new residents/immigrants from other costs can also increase disposable income and expenditure in other sectors of the local economy	
Regulus Property Investments Limited/ #810.5		Support	[Retain provisions that] support the intensification of urban form to provide for additional development capacity, particularly near the city and commercial centres

With the activity reverting to Restricted Discretionary Activity if the relevant performance standards cannot be met.</p>	
Summerset Group Holdings Limited/443.9	Kāinga Ora/ #FS2082.320	Seek Amendment	<p>Amend the rules in relation to retirement villages and delete rule RD2, replacing this instead with a new controlled activity status provision (C3). Amend all references to matters of control for retirement village within the zone to 14.15.10. With the activity reverting to Restricted Discretionary Activity if the relevant performance standards cannot be met.</p> <p>As a result of the proposed change of the zoning, the activity status for retirement villages (assuming the relevant performance standards are met) for these sites is proposed to alter from a controlled activity to a restricted discretionary activity. The matters over which the Council proposed to exercise control are identical to those over which the Council currently exercise control (noting that there is a numbering error in the proposed provisions).</p> <p>Unnecessary consent requirements and costs should be avoided. Further, this change of activity status could hinder or limit future potential development rights. There does not appear to be any clear reasoning for the activity status to become more restrictive or any analysis of the costs or benefits of this impact. The nature and location of the zones does not change and increasing the level of restriction on development of retirement villages appears to be counter intuitive to the provision of more housing and particularly increased choice in housing options.</p> <p>It is further noted that retirement villages within the Residential Suburban zone are provided for as a permitted activity, and it does not appear consistent to apply a more restrictive activity status within zones that anticipate a higher density of development.</p>	Oppose
Kāinga Ora – Homes and Communities / #834.174		Support	P1 Retain rule as proposed.	
Kāinga Ora – Homes and Communities /834.174	LMM Investments 2012 Limited/ #FS2049.90	Support	P1 Retain rule as proposed. The proposed amendment to P1 to delete the limit on units with more than 6 bedrooms is supported. The definition of 'residential activity' includes emergency and refuge housing, and sheltered housing and so the amendment better enables such facilities to be established in the MRZ as a	Support

			permitted activity where they provide accommodation for more than 6 residents. It is noted that boardinghouses, student hostels, and retirement villages are separately defined and managed through separate rules.	
Kāinga Ora – Homes and Communities / #834.175		Seek Amendment	14.5.1(P3) – Elderly Persons Housing Either: 1. Reinstate P3 so there is a clear permitted pathway; or 2. Include an advice note under P1 as follows: Conversion of existing Elderly Persons Housing is permitted under P1.	
Kāinga Ora – Homes and Communities / #834.175	LMM Investments 2012 Limited / #FS2049.91	Seek Amendment	14.5.1(P3) – Elderly Persons Housing Either: 1. Reinstate P3 so there is a clear permitted pathway; or 2. Include an advice note under P1 as follows: Conversion of existing Elderly Persons Housing is permitted under P1. Need to clarify – the Operative Plan P3 provides a permitted pathway for the conversion of Elderly Persons Housing to general tenure as a permitted activity. The provision of such a pathway is supported. PC14 proposes to delete this pathway. The PC14 amendment is ambiguous as to whether the deletion of P3 means that conversion of EPH is no longer permitted, OR is it proposed to be deleted because there is now no such thing as an EPH because MDRS now enables multi-units so it is now implicit that you can convert existing EPH as such conversion would simply fall within the ambit of P1? Given the number of EPH in the City it is important that there is an unambiguous position on how their conversion is to be treated.	Support

Vivien Binney / #81.5		Seek Amendment	Amend proposed provisions for areas set for intensification in suburban areas by limiting them to two units per site.	
Vivien Binney / 81.5	Stantec / #FS2032.26	Seek Amendment	Amend proposed provisions for areas set for intensification in suburban areas by limiting them to two units per site. The scale of planned dwelling intensification is far too large. Your plan can result in all Christchurch's leafy suburbs losing the very environment we enjoy Christchurch for. Our current population is approximately 390,000. With the changes proposed, this population could easily be doubled in the same area. Traffic congestion, impossible parking requirements will result as at least one vehicle per dwelling will swamp the streets. Loss of gardens, trees and berms - result is an unpleasant environment not fit for children and with significantly increased rain run off and flooding risk to add to our climate change problems. Slum dwellings. The submitter has personally seen and also discussed with builders the rapidly and poorly built units crammed onto sections for maximal profit. No underground parking and usually no garage. There appears little incentive for developers to do otherwise. Make the areas set for intensified dwellings outside the inner city Four Avenues limited to three stories and three units per section. For the remaining suburban areas, limit the number of units per section to two, not three and two stories only. Developing your infrastructure for this will be easier. In another 50-60 years time you will be planning to move the city further inland as the sea level rise becomes all too obvious.	Oppose

Stantec/ #184.5		Support	Retain rule as proposed (P1)	
Logan Brunner/ #191.4		Support	[Retain P1 provision permitting three homes per site]	
Logan Brunner/191.4	Stantec/ #FS2032.24	Support	[Retain P1 provision permitting three homes per site] More homes, with 3-storey, 3-homes per site the new norm (however, we oppose it being subject to Sunlight QM). Moving towards suburban areas where denser housing is the norm, provided by a range of different house types such as townhouses or low-rise apartments, will have beneficial effects on our urban environments. There are numerous benefits that come with denser suburban housing, particularly reduced housing costs, reduced urban emissions, decreased infrastructure costs, and improved community connectivity/safety. These benefits are further explained in the attached 'Benefits of Density' document.	Support
Ara Poutama Aotearoa/ #259.10		Seek Amendment	Seeks to amend the residential definitions in the CDP to ensure housing which provides for diverse needs of the community is provided for.	
Ara Poutama Aotearoa/259.10	Kāinga Ora/ #FS2082.218	Seek Amendment	Seeks to amend the residential definitions in the CDP to ensure housing which provides for diverse needs of the community is provided for. Ara Poutama considers there is no meaningful effects basis for distinguishing residential activities which include supervision, care, and support from any other residential activity. The decision to accommodate those persons within the community has already been made by the Courts or the Parole Board through sentencing or release decisions. The CDP should not afford Council the opportunity to frustrate the statutory requirements under the Sentencing Act, Parole Act and Corrections Act. Imposing unnecessary consenting requirements on those activities, particularly when there is no material effects-based differential, risks undermining the operation of the justice system and Ara Poutama's ability to fulfil its statutory obligations.	Oppose

Kirsten Templeton/ #340.2		Oppose	[Opposes allowance for three units as a permitted activity]	
Kirsten Templeton/340.2	Stantec/ #FS2032.28	Oppose	[Opposes allowance for three units as a permitted activity] I oppose the proposed change from residential area to medium density area which allows for the building of several 3 storey units on a current site with no consultation with neighbours. I feel this would have a detrimental effect on the feel of a neighbourhood, property prices and the environment enjoyed by current homeowners.	Oppose
Kate Gregg/ #381.9		Seek Amendment	Amend provision 14.5.1.1 in such that the interior conversion of an existing residential unit into two residential units within any Character Area is permitted. For activities outside the Character Area there should be no equivalent rule and density limit.	
Claire Williams/ #385.5		Seek Amendment	[Seeks that] privacy issues should be considered for all developments not just when a consent is required	
David Krauth / #403.2		Oppose	Oppose constructing new residential units complying with rules in the plan change to be permitted activities,	
David Krauth /403.2	Stantec/ #FS2032.27	Oppose	Oppose constructing new residential units complying with rules in the plan change to be permitted activities, These changes will result in a lack of privacy, reduced sunlight, increased traffic and a general reduction to our existing quality of life.	Oppose
Michelle Warburton / #427.4		Seek Amendment	[Amend P1.c. to a] Maximum of two dwellings per site in areas where neighbours are currently only one or two stories.	
Michelle Warburton /427.4	Stantec/ #FS2032.32	Seek Amendment	[Amend P1.c. to a] Maximum of two dwellings per site in areas where neighbours are currently only one or two stories. Unethical to change an area around peoples homes, very detrimental to their physical and mental health. We are the 'garden city' let's keep houses with gardens. Be sympathetic to the area. Two old villas then multiple three story townhouses next door is visually appalling. Let's not look like Auckland,	Oppose

			save us from their mistakes. In the city where whole areas have been redeveloped with townhouses are looking great. But please not on individual sections	
Sam Newton/ #451.2		Oppose	[O]ppose[s] the decision to allow 'medium density areas' to have multiple buildings built up to 12m on empty sections where once a single storey house existed.	
Sam Newton/451.2	Stantec/ #FS2032.29	Oppose	[O]ppose[s] the decision to allow 'medium density areas' to have multiple buildings built up to 12m on empty sections where once a single storey house existed. If a neighbouring property did not have to apply for resource consent to build what will become mini ghettos, this will also have a huge financial impact on the worth of neighbouring properties. These multiple dwelling properties are appearing all over the city, and it's not as if you can argue they are affordable housing for people. They are being sold for the same price as the single house that were there before. Already we are seeing a huge impact with increased traffic on the roads, with the already higher population in Christchurch. I would say the infrastructure needs to amended first before allowing more denser living rules.	Oppose
Terence Sissons/ #696.4		Support	Provide for 3 level dwellings as of right in MDRZs.	
Terence Sissons/696.4	Stantec/ #FS2032.25	Support	<p>Provide for 3 level dwellings as of right in MDRZs.</p> <p>Limit the HDRZ to the central city area and provide for MDRZs around the suburban shopping centres</p> <p>Provide for 3 level dwellings as of right in MDRZs.</p> <p>Require independent geo-tech advice as a precondition to any development over 10 metres.</p> <p>Delete the waiver of QM re sunlight access for buildings over 12m.</p> <p>The projected population growth of about 50,000 between now and 2048 (389,200 to 448,000) should not require 40,000 additional homes as advised in the consultation document.</p> <p>According to the Council's LT Plan, on average, there are 2.5 people per household, which suggests that only 20,000 additional dwellings will be required.</p> <p>If the council limited the HDRZ to the central city area and provided for MDRZs around the suburban shopping centres it should easily satisfy the need for additional housing.</p> <p>The NPS-UD contemplates 3 level dwellings in MDRZs which is what the council should adopt instead of 4 levels.</p> <p>Following the 2011/12 earthquakes the city resolved to limit redevelopment to 3 levels, which became the norm for residential and commercial/office development in the city.</p> <p>The risk of earthquake has not gone away and must surely be considered before any proposed changes are implemented.</p> <p>According to the council's latest annual plan, by 2051, 24% of the population are expected to be over the age of 65 years and 10% of the population are expected to be over 80. This cohort is unlikely to be attracted to living in high-rise apartment blocks.</p> <p>Much of the land within the proposed HDRZs is not suitable for intensive high-rise development. Independent geo-tech advice should be a precondition to any development over 10 metres.</p> <p>I agree in principle with the council's sunlight access proposals but cannot understand the rationale for, nor agree with, the proposal that no QM re sunlight access applies to buildings over 12 m if set back 8 metres the boundary.</p> <p>A building that is 30 metres high will have a significant impact on the neighbour's access to sunlight and should not be allowed in residential areas.</p>	Support
Mitchell Coll/ #720.9		Seek Amendment	1. The Residential Design Principles should be considered when any breach of the Permitted Activity standards requires a Restricted Discretionary Resource Consent.

Without Council actively managing this opportunity for residential development as they did for the East frame, Developers will continue to do small infill developments based on yield alone, which will not deliver the right outcomes for the city and its residents in relation to urban planning. Refer to Figures 2 & 3 which clearly show that the CHC central city is very clearly unbalanced with all the residential on one side (north) and all the services on the opposite side (south). You can't shift the amenity, but you can develop houses, which is what the Gov't is asking for. 	
Thomas Calder/ #62.4		Support	Support for limited notification not being precluded for non-compliances relating to height or height in relation to boundary	
Vivien Binney/ #81.6		Seek Amendment	Amend proposed provisions for areas set for intensification in suburban areas by limiting them to two units per site.	
Melissa and Scott Alman/ #86.4		Support	Support that limited notification is not precluded for for non-compliances that relate to height and height in relation to boundary	
Andrew Evans/ #89.4		Oppose	Delete proposed residential design principles in 14.15.1.3a (RD1)	
Andrew Evans/89.4	Anne Dingwall/ #FS2037.160	Oppose	<p>Delete proposed residential design principles in 14.15.1.3a (RD1)</p> <p>This just doesn't work, you cannot design on principles because there is no objective standard to base the design – the council urban design department is already out of control, members there are ruling by arbitrary decree and making designers lives a misery they cannot be given this kind of open ended power, any development more than 3 units, ie: the majority cannot rely on woolly principles like 'Building bulk and dominance effects on surrounding properties' - that means nothing, an Architect cannot do a design he or she believes complies with this principle, but it's entirely at the opinion of the council, so hours of time and thousands of dollars can be spent doing the design, then hours & \$\$\$ arguing about the design and the hours & \$\$\$ redesigning, this is the regime we live with currently. Finding a solution to this terrible quandary that I can see apart from getting really prescriptive (which in some ways might be worse) would be to have an independent person or committee that is not appointed by the council who would have the ability to rein in some of the more zealous member of the council's urban design team when they go too far. The council planners are supposed to balance this but they tend to get captured by the urban design department.</p> <p>If the design principles don't get deleted maybe increase the number of units from 4 or more units to say more than 6 or more units as smaller developments have less effect than larger ones.</p>	Oppose
Andrew Laurie/ #92.2		Seek Amendment	The area near and including Ashgrove Tce, Fairview St and Cashmere View St should be a Heritage Value Residential Character zone, and a resource consent should be required before any development can proceed.	
Andrew Laurie/92.2	Anne Dingwall/ #FS2037.166	Seek Amendment	The area near and including Ashgrove Tce, Fairview St and Cashmere View St should be a Heritage Value Residential Character zone, and a resource consent should be required before any development can proceed. The area near and including Ashgrove Tce, Fairview St and Cashmere View St should be designated a Heritage Value Residential Character zone, because the character and style of houses in this area are of value and enhance the aesthetic of the neighbourhood, which would be compromised by the type of buildings permissible under the MRZ rules.	Support
Aaron Jaggar/ #141.3		Seek Amendment	Allow consented developments, but not the Government's proposed medium density housing without consent.	
James and Adriana Baddeley/ #164.6		Support	Retain ability to notify neighbours along the southern boundary, of consent applications that relate to non-compliances with the building height or height in relation to boundary built form standards	
Catherine & Peter Baddeley/ #165.6		Support	[Retain ability to notify neighbours along the southern boundary, of consent applications that relate to non-compliances with the building height or height in relation to boundary built form standards]	
Andrea Floyd/ #239.4		Support	[Retain limited notification] - neighbours should be consulted when multi story units are going in next to them.	
Kate Z/ #297.3		Seek Amendment	That resource consent to be required for buildings greater than two stories and all subdivisions.	

Vickie Hearnshaw/ #305.3		Seek Amendment	[S]upport[s] the idea of developing a new town plan. [Seeks more appropriate design outcomes for higher density housing]	
Colin Gregg/ #376.5		Support	[Retain the ability to notify] neighbours along the southern boundaries of any proposed developments that involve non-compliances with height or access to sunlight rules	
Colin Gregg/376.5	Anne Dingwall/ #FS2037.488	Support	[Retain the ability to notify] neighbours along the southern boundaries of any proposed developments that involve non-compliances with height or access to sunlight rules	Oppose
Colin Gregg/376.5	Patricia Harte/ #FS2069.6	Support	[Retain the ability to notify] neighbours along the southern boundaries of any proposed developments that involve non-compliances with height or access to sunlight rules	Support
Kate Gregg/ #381.8		Seek Amendment	If Helmores Lane, Desmond Street and Rhodes Street (to Rossall Street) are not included as a Residential Character Area, that the Area be zoned Medium Density Residential: and, that sunlight access be better protected by further amending the medium/high density southern boundary recession plane to 45° from 3m at the boundary: and that neighbours along the southern boundaries of any proposed developments that involve non-compliances with height or access to sunlight rules can be notified of the required resource consents and to make submissions.	
Kate Gregg/ #381.11		Seek Amendment	Amend provision 14.5.1.3 to the following: Residential units in Character Areas that do not meet Rule 14.5.3.2.7 – Number of residential units per site – maximum of 2 residential units per site. In addition, no density limits should be restricted discretionary activities outside Character Areas.	
Kate Gregg/ #381.12		Seek Amendment	Amend provision 14.5.1.3 to the following: Within a Character Area Overlay: a. The demolition or removal of a building greater than 30m2 on the site, relocation of a building onto the site, erection of new buildings and alterations or additions to existing buildings, accessory buildings, fences and walls associated with that development. b. This rule does not apply: i. where 14.5.3.1.2 C1 applies. ii. to fences that meet the applicable built form standard 14.5.3.2.12 for that Character Area; iii. to accessory buildings that are less than 30m2 and located to the rear of the main residential unit on the site and are less than 5 metres in height; iv. to fences that are located on a side or rear boundary of the site, except where that boundary is adjacent to a public space. c. Activities that do not meet Built Form standard 14.5.3.2.6. d. Any application arising from this rule shall not be limited or publicly notified.	
Kate Gregg/ #381.13		Seek Amendment	Include building height controls in provision 14.5.1.3 dependent on the area, but the current Character Areas have 7m and 5.5 height limits proposed. In areas outside Character Areas, building height controls should be set to 11 meters in most places.	
Kate Gregg/ #381.15		Seek Amendment	That Character Areas have a range of other special limits on built form, dependent on the values of that particular Character Area, including: - the width of building frontages - landscaping - setbacks (larger than typical) - building coverage - outdoor living space requirements - minimum glazing facing the street - fencing	

			<p>- garaging and car ports</p> <p>- building separation</p> <p>Generally the built form requirements are stricter than the underlying zoning would otherwise allow. If these rules are not met, resource consent is needed (restricted discretionary activity status).</p>	
Jan Mitchell/ #398.6		Seek Amendment	Where existing properties are to be subdivided /redeveloped/ intensified the affected neighbouring properties must have the right to decline consent.	
Alex Lowings/ #447.12		Seek Amendment	All planning applications to be subject to review by all residents impacted by the applications (e.g. neighbours), with all statements of objection or support to be included in the planning application process.	
Golden Section Property/ #460.5		Seek Amendment	No change to the notification of neighbours for residential areas.	
Claudia M Staudt/ #584.4		Support	RD14 and RD 16: That neighbours along the southern boundaries of any proposed developments that involve non-compliance with height or access to sunlight rules can be notified of the required resource consents and to make submissions.	
Helen Jacka/ #591.12		Support	Seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Canterbury / Westland Branch of Architectural Designers NZ/ #685.32		Seek Amendment	[That] The Residential Design Principles [matter of discretion is applied] when any breach of the Permitted Activity standards requires a Restricted Discretionary Resource Consent.

modulation and materiality addresses visual dominance effects associated with building length. 5. The matters in 14.2.1.6, 14.2.3.1, 14.2.3.2, 14.2.3.3, 14.2.3.4, 14.2.3.5, 14.2.3.6, 14.2.3.7, 14.2.5.1, 14.2.5.2, 14.2.5.3, 14.2.5.4, 14.2.6.1, 14.2.7.1, 14.2.7.6, 14.2.8.3 and the proposed new policies as inserted.

6. The extent to which service, storage and waste management spaces are provided for on site;

7. The positive effects of the construction, development and use of the retirement village.

For clarity, no other rules or matters of discretion relating to the effects of density apply to buildings for a retirement village. Notification:

An application for resource consent associated with a retirement village made in respect of Rule 14.5.1.3 (RD2) is precluded from being publicly notified.

An application for resource consent associated with a retirement village made in respect of Rule 14.5.1.3 (RD2) that complies with the relevant external amenity standards is precluded from being limited notified. While the RVA supports the inclusion of a retirement village specific rule, it considers that amendments to the retirement village rule are required to give effect to the MDRS and the NPSUD, as discussed in greater detail in the submission above. The changes will also address the experience of operators implementing the prior regime which relied on general rule 14.5.1.3. This rule is insufficiently clear and does not enable positive effects to be considered in consent assessments. In particular, the direction to consider whether a retirement village "...development, while bringing change to existing environments, is appropriate to its context" has caused significant interpretation challenges (eg Ryman Park Terrace), leading to delays and uncertainty in consenting processes The RVA considers only the construction of buildings for retirement villages that should be a restricted discretionary activity. The use of land for a retirement villages should be a permitted activity as these are low -

impact residential activities that provide substantial benefit in residential zones including enabling older people to remain in familiar community environments for longer (close to family and support networks), whilst also freeing up a number of dwellings located in surrounding suburbs. Further, the RVA considers that the construction of retirement villages should

			<p>have their own set of focused matters of discretion (so to provide for and acknowledge the differences that retirement villages have from other residential activities).</p> <p>The RVA considers the matters of discretion applicable to retirement villages need to appropriately provide for / support the efficient use of larger sites for retirement villages, and the functional and operational needs of the retirement village.</p> <p>Furthermore, it is considered that the establishment of, or addition/external alteration to an accessory building to a retirement village should be provided for under the same rule (with the retirement village specific matters of discretion applying).</p> <p>The RVA considers that applications for the construction of a retirement village activities should be precluded from being publicly notified in the Medium Density Residential Zone, as the activity is anticipated in this zone. The RVA also considers that, in accordance with Schedule 3A (5)(2) of the Enabling Housing Act, a retirement village that is compliant with the relevant standards should also be precluded from limited notification.</p> <p>This approach aligns with the MDRS which precludes public and limited notification for residential developments that comply with relevant standards.</p>			
Kiwi Rail/ #829.4		Support	Retain the identification of the NZ Rail Network as a qualifying matter.

Fred Coughlan/ #798.4		Seek Amendment	Residential development is either a permitted or restricted discretionary activity. Not Discretionary.	
Fred Coughlan/798.4	Kāinga Ora/ #FS2082.575	Seek Amendment	Residential development is either a permitted or restricted discretionary activity. Not Discretionary. Permitted Activities (e.g. High Density Rule P1 for residential activities) leap to a Discretionary Activity where permitted standards not met (this includes the PC14 standards that are less enabling and non-MDRS residential standards mentioned earlier). Restricted Discretionary Activity Rule RD2 (4 or more units) also staircases. It is submitted that there is no opportunity for residential discretionary activities, since it is precluded by Schedule 3A, clause 4 of the RMA – a relevant residential zone must provide for as a restricted discretionary activity the construction and use of 1 or more residential units on a site if they do not comply with the building density standards in the district plan (once incorporated as required by section 77G).	Support
Kāinga Ora – Homes and Communities / #834.179		Oppose	D11 – industrial interface QM Delete the Industrial Interface Qualifying Matter and all associated provisions.	
Kāinga Ora – Homes and Communities /834.179	LMM Investments 2012 Limited/ #FS2049.95	Oppose	D11 – industrial interface QM Delete the Industrial Interface Qualifying Matter and all associated provisions. Kāinga Ora considers that at the interface of industrial and residential zones the onus for managing effects rest primarily with the industrial activity. The interfaces are already existing, with the Operative Plan having long zoned industrial areas adjacent to residential zones for light industrial activities. Invariably industry is required to meet residential zone standards relating to matters such as noise or glare at the zone boundary. Given the existing requirements to comply with residential standards at the zone interface, combined with the General Industrial zone standards that limit heavy industry in these buffer locations, the QM setback is not considered to be appropriate with the benefits of the QM not outweighing the costs.	Support

Te Mana Ora/Community and Public Health/ #145.6		Seek Amendment	Te Mana Ora recommends that Christchurch City Council considers how housing developments can be designed in a way that encourages social interaction. For example, shared spaces, such as green spaces, paths and bike sheds, can facilitate social interaction in housing developments.	
Te Mana Ora/Community and Public Health/145.6	Anne Dingwall/ #FS2037.205	Seek Amendment	Te Mana Ora recommends that Christchurch City Council considers how housing developments can be designed in a way that encourages social interaction. For example, shared spaces, such as green spaces, paths and bike sheds, can facilitate social interaction in housing developments. Te Mana Ora recognises the need to plan for and build housing and neighbourhoods that facilitate a sense of community and social connection. Spaces that encourage positive socio-cultural passive or active activity are good for the wellbeing of individuals and for community cohesion. Equally, it is important to consider the need for privacy in housing design and development. Privacy, safety and access to services are all effects that Christchurch City Council can influence through the Housing and Business Choice Plan Change. Housing developments, such as high-rise apartment buildings, can contribute to feelings of social isolation and anonymity (Nguyen, L., van den Berg, P., Kemperman, A., & Mohammadi, M. (2020). Where do people interact in high-rise	Support

Anne Dingwall/ #908.7		Seek Amendment	[Seeks that council take] a water sensitive design (sponge city) approach for catchment-wide flood risk management.	
Anne Dingwall/908.7	Anne Dingwall/ #FS2037.676	Seek Amendment	<p>[Seeks that council take] a water sensitive design (sponge city) approach for catchment-wide flood risk management.</p> <p>CCT notes that Auckland has been given a one year reprieve by the Minister for the Environment, David Parker, to allow it to undertake natural hazard and flooding investigations work and formulate a planning response. Taking cognizance of a water sensitive design (sponge city) approach for catchment-wide flood risk management, is not only sensible but necessary. The concept applies to other Tier 1 cities including Christchurch.</p> <p>The sponge concept should not just be confined to public open space. It should also apply to private property. Discharge of water from increasingly occurring climate-related intense rain events, has still to be satisfactorily addressed by most councils in NZ. Reduced building setbacks from boundaries and minimum size requirements for outdoor living spaces have the adverse effect of reducing natural porous soakage areas and flow-paths, protected and relied on by the Council as a natural method of managing stormwater.</p> <p>Minister Parker is also recommending the Auckland council consider the findings of the Parliamentary Commissioner for the Environment report 'Are we building harder, hotter cities?' He has made it clear Auckland would need to intensify with plenty of green spaces. "I concur with the concerns raised about the amount and quality of reserve and open spaces being provided in both existing urban areas and greenfield developments."</p> <p>https://www.newsroom.co.nz/auckland-wins12-month-housing-density-reprieve</p>	Support

			<p>The Local Government Magazine (3 February 2023) has posed the following question: Is there a risk in the future that the NPS-UD will result in increased urban flooding and massive insurance claims, followed by litigation by affected property owners who were once protected by local bylaws? Infrastructure – the elephant in the urban intensification room 3 February 2023</p> <p>https://localgovernmentmag.co.nz/auckland-floods-2023/</p> <p>The insurance issue is not trivial. With the bulk of claims assessments now completed, Tower estimates that the average claims cost for this event (2023 Auckland and Upper North Island Weather Event) will be around double that of other recent large weather events. This is due to deeper flood waters in high density areas causing substantially more damage, contamination, and landslides. (emphasis added)</p> <p>https://www.nzx.com/announcements/410997 Tower Updates Guidance, Provides Update on Large Events 8 May 2023</p> <p>Tim Grafton, Chief Executive of NZ Insurance Council, has said...while there is always an element of risk from the weather, the losses are often more than just financial for communities. "These extreme weather events bring devastation to local economies, social disruption, and environmental damage. So there are very good reasons why we need to take a long view and ask ourselves 'what are we doing to reduce those risks?'"</p> <p>https://www.insurancebusinessmag.com/nz/news/catastrophe/insurance-expert-urges-nz-insurers-to-take-floods-as-seriously-as-earthquakes-436926.aspx</p> <p>In Christchurch, NIWA hydrodynamic scientist Dr Emily Lane is leading a team digitally mapping flood risk, the first attempt to do it across the country rather than local body by local body. "You need to know where are the places that flooding hazard and risk are really bad, and what's it going to look like under climate change, and we don't have that initial picture at the moment, to be able to make the right decisions," she says. Once completed, the map can be updated and adapted to changes in weather. It could still be a couple of years away. Strategic decisions will be challenging even with the best information. Where and how do we build in a climate-changed world? And if some areas are off limit, who pays compensation?</p> <p>https://www.stuff.co.nz/business/300809902/rebuilding-from-gabrielle-cheapest-is-not-always-best--do-the-goddamn-thing-properly</p>

Residential > Rules - Medium Density Residential Zone > Built form standards > Site density and servicing

Submission Number	Further Submission No	Position	Decision Requested	FS Position
Ian Tinkler/ #117.3		Seek Amendment	In areas that are excluded due to infrastructure (like Shirley, as a result of the sewerage system), indicate the cost of mitigation by replacing the inadequate system to allow greater use of that land. Consider migration paths for flooding,.	
Stantec/ #184.6		Seek Amendment	Support with amendment to the standard (Advice note - There is no site density standard in the RMDRZ) to align with theMDRS. Consequentially, this would resolve theidentified reference issue with Rule8.5.1.2 (C9).	
Steve Smith/ #197.6		Seek Amendment	[Impose more density controls]	
Steve Smith/197.6	Stantec/ #FS2032.33	Seek Amendment	[Impose more density controls] the increased density of housing proposed will result in loss of trees and green/open spaces	Oppose
Tricia Ede/ #284.3		Oppose	Seeks three houses on one property be disallowed.	
Mason Plato/ #298.3		Oppose	Seek to remove Medium Density Residential Zone.	
Mason Plato/298.3	Stantec/ #FS2032.34	Oppose	Seek to remove Medium Density Residential Zone. We oppose the proposed medium density zones which would allow increased building heights and population intensity. Reasons for opposition - increased pressure on infrastructure, loss of sunlight due to increased building heights, the idea of random high buildings amongst established single story buildings is unfair and unsettling because my neighbour could sell up to make a quick buck and in the process devalue my house value, I would expect rates would have to rise as well to cope with the added pressure on infrastructure.	Oppose
Julia Mallett/ #304.2		Seek Amendment	Increase planting requirements by reducing density/height limits in MDZ.	
Julia Mallett/304.2	Kāinga Ora/ #FS2082.242	Seek Amendment	Increase planting requirements by reducing density/height limits in MDZ. Introduce a qualifying matter to reduced the MDZ around suburban schools, to reduce strain on families priced out of these areas by development, to find a middle ground consisting of vibrant inner city density together with retention of the traditional kiwi neighbourhood a short commute from the city. Increase planting requirements by reducing density/height limits in MDZ. Require development to be in keeping with the style and sensibility of the existing neighbourhood. Understanding that not all suburbs can be legitimately captured by heritage orders, but nonetheless each have an ""era"" they are drawn from, and new developments should compliment these. I oppose the new Medium Density Zone being put in place in so much of suburban Christchurch. - high and medium density zoning is appropriate in the inner suburbs (Edgware, Sydenham, Phillipstown, Riccarton, inner City, and similar) to promote a vibrant city, and around shopping areas with close proximity to public transport hubs. HDZ and MDZ absolutely have their place. - The large numbers of families moving to the Selwyn and Waimakariri Districts, and to suburbs such as Northwood and Halswell, indicate that families would rather add to their commute to secure more affordable bungalow-style homes. -MDZ/HDZ are supported by those who believe that higher density is better for the environment, however, the large amount of commuter traffic would suggest that this is not the case. Families are by and large not choosing to shift their behaviour to living in townhouses, instead opting to move to outer suburbs that are not yet supported by frequent and reliable public transport. - Families are being priced out of their local areas by developers, even under the current rules. Increase density will not ease this, in fact the opposite. - free form development is often unattractive and not in keeping with the style of the area. There are some pockets of thoughtful development, but largely they are plain boxes that do not add to the visual landscape. This is not in keeping with our beautiful city. - Although there are requirements to have planting in the proposed plan, it does not go far enough. We are continuing to pave and cover our land, which will adversely impact the city during extreme weather events, which are becoming more frequent. -Largely townhouse developments already only come with a single (or no) garage per home. We hope that behaviour is changing and people are eschewing car ownership. However, again, the volume of traffic on the roads and cars parked on the	Oppose

			roadside would suggest this behaviour change is very far away. Increasing the density with 3 homes of three stories, but presumably only one off-road carpark each, will further degrade the landscape of our suburban neighbourhoods.	
Robin Watson/ #441.1		Seek Amendment	Oppose changes to the Medium Density Residential Zone, retain the existing density standards.	
Robin Watson/441.1	Stantec/ #FS2032.35	Seek Amendment	Oppose changes to the Medium Density Residential Zone, retain the existing density standards. If the revised district plan encourages developers to construct tall/denser buildings nearby, then this could affect the value of the property, and my enjoyment of it. E.g. through reduced privacy, greater traffic and population, crime risk etc. Also, I plan to install solar panels in the near future and would not want to lose any of the available sunlight. Thanks.	Oppose
Logan Simpson/ #442.2		Oppose	Oppose the plan change, housing density needs to reduce.	
Logan Simpson/442.2	Stantec/ #FS2032.36	Oppose	Oppose the plan change, housing density needs to reduce. High density needs to reduce. Who is going to pay for the infrastructure to support the increase in housing density.	Support
Alison Dockery/ #445.2		Seek Amendment	Seek that density is restricted to three units per site.	
Jillian Schofield/ #467.3		Oppose	[O]ppose[s] the change in height restrictions that have been proposed and the number of buildings per section in Hornby and surrounding areas [such as] Hei Hei.	
David Fisher/ #468.1		Seek Amendment	Oppose increasing building height and density... amend rule to allow 2 houses per section where the section is small and maybe 3 houses on a larger section.	
David Fisher/468.1	Stantec/ #FS2032.37	Seek Amendment	Oppose increasing building height and density... amend rule to allow 2 houses per section where the section is small and maybe 3 houses on a larger section. Support increased development and understand that it is necessary, but allowing 3 storey housing where there is predominantly single storey dwellings reduces privacy and sunlight access, adds extra traffic, noise, and parking issues, and puts pressure on already stressed underground services and increased pressure on schools.	Support
Kem Wah Tan/ #471.3		Seek Amendment	Allow only a maximum of 2 stories buildings and less density per suburb.	
Kem Wah Tan/471.3	Stantec/ #FS2032.38	Seek Amendment	Allow only a maximum of 2 stories buildings and less density per suburb. Residence suburb 8053 Aorangi Road are mainly single and some double stories houses with lot of trees and gardens. This made up the image of a garden city Christchurch. The proposal to have 20 meters height and 3 stories houses will drastically change the garden image to a concrete jungle of buildings. Tall buildings are suitable in town area and on main roads with commercial business. Let all keep in that image of Christchurch.	Oppose
Ian McChesney/ #701.3		Seek Amendment	Increase minimum plot sizes for plots with 3+ storey residential buildings.

Douglas Corbett/ #864.4		Seek Amendment	Oppose MRZ in Hornby. Seeks to have this retained at single level housing	
Daphne Robson/ #2078.3		Oppose	Oppose tiny high [rise] developments. Seek that 10 or more contiguous sections be designed as a precinct.	
Daphne Robson/2078.3	Kainga Ora - Homes and Communities/ #FS2099.77	Oppose	Oppose tiny high [rise] developments. Seek that 10 or more contiguous sections be designed as a precinct. . Would you like three 3-storey buildings on the north side of your suburban house? Tiny high developments like this should not be allowed. Instead, 10 or more contiguous sections should be designed as a precinct as described above. We also make the following points about them: a. Many people grow fruit and vegetables on suburban gardens. b. New Zealand underground services (water, storm water, sewage, power) will not cope with additional loads. For example, a new housing development for 12 people on our shared driveway in Riccarton, Christchurch is connecting to the existing storm water pipes which already flood.	Oppose

Gavin Keats/ #52.8		Seek Amendment	Amend 14.5.2.2 to require that the 20 sq m of planting/outdoor living per section needs to be a usable shaped area, eg not a long narrow strip.	
Gavin Keats/52.8	Anne Dingwall/ #FS2037.84	Seek Amendment	Amend 14.5.2.2 to require that the 20 sq m of planting/outdoor living per section needs to be a usable shaped area, eg not a long narrow strip. I am pleased that CCC is trying really hard to improve things for Christchurch. As the rebuild progresses we have such a lovely liveable, walkable, and bikeable city, it is such a shame if government rules mean developers can push the council into approving poor housing design.	Support
Ali McGregor/ #65.2		Seek Amendment	Encourage retention of tree canopy and green space on residential sites.	

Ali McGregor/65.2	Anne Dingwall/ #FS2037.131	Seek Amendment	<p>Encourage retention of tree canopy and green space on residential sites.</p> <p>Since the earthquakes, every time a house is demolished [Bishop Street area] up to 5 units are built on the section.</p> <p>This also has the effect of removing all the trees from sections. Where once there was about 50% of a section which was 'green' it is now all concrete. My personal experience is that two of my boundaries which were tree lined are now bare of those mature trees and I have neighbours so close that I can hear their conversations.</p> <p>This has a detrimental effect on the physical environment. The loss of greenery also has a negative impact on the mental and emotional health of the residents.</p> <p>Apart from that, the increase in sealed areas means more run-off and makes the area more prone to flooding. Climate change has seen heavier rainfall and therefore more frequent flooding events already, so if this trend is to continue it will only lead to more problems.</p>	Support
Te Mana Ora/Community and Public Health/ #145.12		Support	Te Mana Ora supports the different proposals to support tree cover in the Housing and Business Choice Plan Change Consultation Document, including to update tree setbacks to better protect individual trees and to incentivise more tree planting, Financial Contributions, and the Schedule of Significant and Other Trees becoming a Qualifying matter.	
Te Mana Ora/Community and Public Health/145.12	Anne Dingwall/ #FS2037.207	Support	<p>Te Mana Ora supports the different proposals to support tree cover in the Housing and Business Choice Plan Change Consultation Document, including to update tree setbacks to better protect individual trees and to incentivise more tree planting, Financial Contributions, and the Schedule of Significant and Other Trees becoming a Qualifying matter.</p> <p>Climate resilient communities need access to green spaces to reduce the urban heat island effect, to enable biodiversity, support urban tree cover and provide spaces that encourage community connection and physical activity.</p> <p>Results from the Huihui Mai Engagement showed that many people in Greater Christchurch are open to high density living but that access to green spaces, gardens and green neighbourhoods was a key consideration (Greater Christchurch Partnership. (2023). Huihui Mai: Coming together to make a plan. Accessed from: https://greaterchristchurch.org.nz/assets/Documents/greaterchristchurch-/Huihui-Mai-Engagement-Summary.pdf).</p> <p>Trees are important for climate change mitigation, because trees remove carbon dioxide from the atmosphere, and for climate change adaptation because trees can lower temperatures and can reduce the impacts of stormwater. It is critical that the benefit of trees and green spaces are considered in conjunction with the need for high and medium density housing.</p> <p>Trees, especially old trees, are similar to cultural and heritage sites, they are symbolic of a sense of place, connection, and identifying features of a place. Additionally, access to trees and green spaces has significant impact on a community's wellbeing, their behaviours, and relationship with nature. A recent study showed that residents living in areas with greater tree cover, were much more likely to spend time in public green spaces. Furthermore, trees provide shade and protection from the sun, which is a Healthy Street Indicator.</p> <p>Some neighbourhoods and areas of Ōtautahi Christchurch are already comparatively lacking in tree cover and accessible public green spaces, for example, the tree cover in Linwood is around 8.9% compared with Fendalton which has 19% tree cover (Law, T. (2022). Time running out to save</p>	Support

			Christchurch's trees from housing intensification. Stuff News: https://www.stuff.co.nz/the-press/news/127846951/time-running-out-to-save-christchurchs-trees-from-housing-intensification). Te Mana Ora strongly supports the draft Urban Forest Plan and recommends that Christchurch City Council considers the areas where trees need to be particularly protected, and also which areas need to be replanted to ensure more equitable access and connections with the environment throughout the city.	
Julie Kidd/ #146.2		Support	[S]upport[s] as much being done as possible to maintain tree canopy cover.	
Julie Kidd/146.2	Anne Dingwall/ #FS2037.214	Support	[S]upport[s] as much being done as possible to maintain tree canopy cover. I do support the principle of increased urban density of housing stock to allow people to live closer to transport and amenities, but not at the expense of other aspects of health and wellbeing. For this reason, I also support as much being done as possible to maintain tree canopy cover.	Support

Caitriona Cameron/ #272.8		Seek Amendment	"The proposal should increase minimum protection of green space and canopy cover. o All developments should include whatever green space is considered to be the minimum (i.e. no 'buying out'). o The CCC should provide, and consult on, a detailed plan about how greenspace will be provided, particularly in High Densitiy Residential zones, before any changes are made to residential planning regulations."	
Caitriona Cameron/272.8	Anne Dingwall/ #FS2037.390	Seek Amendment	"The proposal should increase minimum protection of green space and canopy cover. o All developments should include whatever green space is considered to be the minimum (i.e. no 'buying out'). o The CCC should provide, and consult on, a detailed plan about how greenspace will be provided, particularly in High Densitiy Residential zones, before any changes are made to residential planning regulations." The proposal to allow developers to 'buy out' of providing 20% tree canopy cover islikely to significantly reduce the green space amenity in neighbourhoods. Suchreduction in planting and green space, along with increased density, will have anegative impact on liveability. Reduction of permeable surfaces will also furtherstrain drainage infrastructure at a time when it is clear more extreme rainfall is nowthe norm.The proposal acknowledges the need for green space but states only that "We'reworking on ways – both through this plan change and in other non-regulatory ways –to ensure that green spaces and tree canopy can be retained as much as possible, while enabling more housing choice for our residents" (Housing and Business Choice,p.19). The PC14 proposal has extensive repercussions; in such a case, it is notacceptable to fail to present a detailed plan to counteract the impacts of green spacereduction.	Support

James Carr/ #519.27		Seek Amendment	It would be good to have a limit on hard site coverage (and enforce it).	
James Carr/519.27	Anne Dingwall/ #FS2037.525	Seek Amendment	It would be good to have a limit on hard site coverage (and enforce it). It looks like the hard site coverage rule effectively allows up to 80% to be sealed, which is far too much, and there are suburban sections in this city which are almost entirely paved. If we want greenery we are probably going to have to cut back on how much paved area we allow. Hard surface affects runoff too, maybe more than say 20% impervious paving might attract higher rates. Greg Partridge/ #794.4		Oppose	The submitter opposes the reduction in Christchurch's tree canopy cover by housing intensification. The Council should seek an immediate amendment to the Enabling Housing Supply and Other Matters Act to be implemented in order for regulations to be introduced that protect the city's tree canopy from being decimated by property developers.	

Greg Partridge/794.4	Anne Dingwall/ #FS2037.727	Oppose	<p>The submitter opposes the reduction in Christchurch's tree canopy cover by housing intensification. The Council should seek an immediate amendment to the Enabling Housing Supply and Other Matters Act to be implemented in order for regulations to be introduced that protect the city's tree canopy from being decimated by property developers.</p> <p>The submitter has concerns regarding the loss of the city's tree canopy from housing intensification and lack of effort by Council to protect trees or increase the tree canopy. The submitter provides the following analysis on the importance of protecting and enhancing the tree canopy:</p> <ul style="list-style-type: none"> - The tree canopy coverage of our city is essential, and as green infrastructure it should be viewed by the City Council and Council policy as a "Priority #1 Must Have" rather than a "Nice to Have." - Disappointingly however, since declaring a Climate and Ecological Emergency four years ago in May 2019, the Christchurch City Council have not added any additional trees to the list of protected trees in our city in spite of the fact the City Council has been advised through academic reports and assessments that the percentage of tree canopy coverage has diminished across Christchurch and significant trees have been lost from our landscape. - A mapping report commissioned by the City Council through the University of Canterbury provided the Council with a snapshot of the tree canopy cover in Christchurch between 2018 and 2019. It revealed that since the previous mapping was completed in 2015 and 2016 tree canopy coverage had dropped from 15.59% down to 13.56% in less than three years. That 2-percentage point reduction equates to a 13.02% decrease in the overall tree canopy coverage of our city. - In a city that has declared a Climate and Ecological Emergency, that should set off alarm bells, however given the fact again there appears to be no mention of the retention of our city's existing established trees in the Growing Christchurch Plan, it would appear the Council are either very much asleep at the wheel, disinterested or are disingenuous in terms of the declaration in spite of all the rhetoric. - The Council's Head of Parks Andrew Ruttledge has said trees are going to play an increasingly vital role in carbon sequestration as the Council tries to achieve its goal of becoming carbon neutral by 2045, and yet in the Ōtautahi Urban Forest Plan the Council have only set a target to increase the tree canopy coverage of Christchurch to 20%, and not until 2070 – that's 47 years away. When compared to neighbouring cities in Australia, the aims of our City Council are lacking. - Not only should it be retained, but the tree canopy coverage of our entire city must be enhanced in order for the Council's declaration of a Climate and Ecological Emergency to be given any tangible meaning, and not just in the public parks of our city, but throughout every suburb and residential street of Christchurch. - Over recent years, thousands of well-established trees have been clear felled by property developers who operate with no environmental code of ethics in their business. Their primary focus is on making money, which is understandable, however the commercial interests and short-term financial gains of a limited few should not be given preference over the long-term environmental gains of the masses, nor should it compromise the environment that will be inherited by generations of today's citizens, nor those of the future. - The Council's declaration of a Climate and Ecological Emergency was a call to action, but four years have passed and nothing has been done to protect and guarantee that the existing established trees of our city and suburbs are retained. - Elected members of the Council and Staff have given the excuse that due to government legislation it is very difficult to protect trees. Auckland Council however have managed to increase its number of protected trees over the same four years. - If the city is to grow and is to be a healthy sustainable city that functions well, a city that puts the wellbeing of its citizens, visitors and environment first, it must be well planned and well considered rather than blindly adhering to the edicts and directives of political parties who have vested interest in gaining political support. - The commercial gains and wants of a limited few should not be put first and enabled at the expense and wellbeing of those who live here, nor should the environment be compromised. 			An additional clause is proposed for non-residential activities that aligns with the MDRS outcomes. [Please see attachment]	
Geoff Banks/ #918.2		Support	[S]eek[s] that the council retains the tree canopy requirement and contributions plan.	
Dylan Lange/ #1049.2		Support	[S]eek[s] that the council retains the tree canopy requirement and contributions plan.	

Residential > Rules - Medium Density Residential Zone > Built form standards > Building height and maximum number of storeys

Submission Number	Further Submission No	Position	Decision Requested	FS Position
Greg Olive/ #2.11		Oppose	Qualifying Matter Residential Industrial Interface is removed from 419 Halswell Junction Road	
Mary-Anne Thomson/ #9.1		Oppose	Delete max building height rule 14.5.2.3 allowing buildings up to 12m in height.	
Andrea Heath/ #16.3		Oppose	Remove the ability to construct buildings of up to 14m without resource consent.	
Grant McGirr/ #21.2		Oppose	That no changes to rules lessen the amount of sunlight that any property (house and land) currently receives.	
Linda Barnes/ #23.3		Seek Amendment	Decrease heights allowed for new builds	
Rosemary Fraser/ #26.1		Seek Amendment	Opposes change to height limits. Make sure that wind and winter conditions are taken into consideration when considering building height controls.	
Rosemary Fraser/26.1	Anne Dingwall/ #FS2037.56	Seek Amendment	Opposes change to height limits. Make sure that wind and winter conditions are taken into consideration when considering building height controls. Wind tunnels occur between taller buildings as happens on Colombo Street between the library and Te Pai. As Christchurch experiences strong winds and is flat, it could create dangerous situations if there are tall buildings on both side of street. Even with appropriate foundations they would still sway terrifying people on the higher floors. Also, the taller the building the more difficult it would be to escape if there was a fire. Also, with increased shading, there is likely to be for ice on paths for longer in winter.	Support
Rosemary Fraser/26.1	Cambridge 137 Limited/ #FS2042.1	Seek Amendment	Opposes change to height limits. Make sure that wind and winter conditions are taken into consideration when considering building height controls. Wind tunnels occur between taller buildings as happens on Colombo Street between the library and Te Pai. Alastair Grigg/ #28.2		Seek Amendment	Retain an 11m height limit for this new Medium Density Residential zone, as per the limit in the current Residential Medium Density zone.	
Mike Currie/ #31.2		Seek Amendment	[Regarding building height and recession planes] if the reference height at the boundary is increased, the Southern boundary angle must be decreased accordingly to give the same sunlight access as provided for above.	
The Riccarton Bush Trust/ #44.3		Support	Support[s] the proposed 8m height limit within the Riccarton Bush Interface Area.	
Rachel Best/ #46.1		Seek Amendment	Oppose built form standards that reduce sunlight access to neighbouring homes.	
Russell Vaughan/ #48.1		Seek Amendment	Amend Rule 14.5.2.3 - Building height and maximum number of storeys to reduce the maximum building height in the Medium Density Residential Zone.	
Tobias Meyer/ #55.10		Support	Support provisions as notified.	
Tobias Meyer/55.10	Christchurch International Airport Limited/ #FS2052.173	Support	<p>Support provisions as notified.</p> <p>In suburban contexts 3 floors is enough, but the current MRZ makes 3 floors difficult orinconvenient and incentivises developers to cover most of the lot with odd shaped buildingsand driveways.</p> <p>The current developments in Wigram and Rolleston use a large portion ofland for small numbers of people. Higher density buildings allow for more green space.</p> <p>For good density and walkability more than 3 floors best- 4-8 floors. With lift requirements itis expensive to build for 4: which is the current standard in many of the best places in thecurrent plan. It's better to allow more if people are building accessible apartments.</p>	Oppose
Victoria Neighbourhood Association (VNA) / #61.49		Seek Amendment	Amend 14.5.2.3 by limiting the building height of new developments to 14m.	
Victoria Neighbourhood Association (VNA) /61.49	Anne Dingwall/ #FS2037.122	Seek Amendment	<p>Amend 14.5.2.3 by limiting the building height of new developments to 14m.</p> <p>The current central city residential area in Christchurch consists of old streets and old sites(originally for small workers cottages), many residential sites in within the 4 Avenues are therefore very small (often less than 300 sq m). It is inappropriate to enable 4-6 storey high buildings in areas without ruining the economic, social and cultural aspects of the existing community including loss of sunlight, privacy, noise pollution, inability to efficiently use passive heating, inability to grow own fruit and vegetables parking congestion, loss of value in their property and negative impacts on mental wellbeing to name some of the obvious costs.</p> <p>These are all costs that will be borne by both the existing and future residential communities living in current central city residential zones. It seems not equal consideration to all peoples' social and cultural needs are being treated with equal consideration in PC14, as it favours the needs of a selected future resident in a new building that may never come, and whose who now and in future occupy existing homes and whose needs could be quite different to what is being enabled.</p> <ul style="list-style-type: none"> • There is plenty of opportunity to enable new HRZ housing within the CHC central city without only focusing on going higher and intensifying even more in the existing residential areas. <p>For example: the VNA neighbourhood currently has a density of 150 households per hectare and with an average section size of 400-300m sq. There exists at least 7 hectares of land on the south side of the city that has zero households per hectare and which is zoned for mixed use. This land could be enabled for HRZ if the CCC were to think more strategically about how to actively encourage more housing the in central city AND meet the needs of the demand without over enabling, thereby also meeting the needs of the existing community AND have an excellent outcome in urban planning. The development of the South Frame in the CCRP has not moved forward in any way to make the South side of the city an attractive place to live, work and play all within 500m of the CBD.</p>	Support

			<ul style="list-style-type: none"> • There could easily be over 2,000 households enabled within this CCRP central city area if development for residential were to be actively encouraged by rezoning, or offering incentives, and actively discourage further density development in existing central city residential already densely developed. By doing this CCC would be proactively and meaningfully participating in the role of urban planning and signalling that the south side is where they want development. Without Council actively managing this opportunity for residential development as they did for the East frame, Developers will continue to do small infill developments based on yield alone, which will not deliver the right outcomes for the city and its residents in relation to urban planning. Refer to Figures 2 & 3 which clearly show that the CHC central city is very clearly unbalanced with all the residential on one side (north) and all the services on the opposite side (south). You can't shift the amenity, but you can develop houses, which is what the Gov't is asking for.

Rachel Davies/ #67.9		Seek Amendment	Rigid controls should be in place for access to sunlight and privacy along with how much land coverage dwellings can take up on a plot of land	
Vivien Binney/ #81.4		Seek Amendment	Amend proposed provisions for areas set for intensification in suburban areas by limiting them to two stories.	
Peter Evans/ #88.2		Oppose	Amend heights to operative Residential Suburban Heights of 8m.	
Russell Fish/ #116.4		Oppose	Review the 'Industrial Interface' Qualifying Matter, with a view to remove the designation where it is not already an historically established principle.	
Cameron Matthews/ #121.16		Oppose	Request removal of the Riccarton Bush Interface Qualifying Matter.	
Cameron Matthews/121.16	Christchurch International Airport Limited/ #FS2052.206	Oppose	<p>Request removal of the Riccarton Bush Interface Qualifying Matter.</p> <p>SEE IMAGES IN SUBMISSION</p> <p>Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022 - used by CCC to provide rationale for the QM - asserts that “Views of Pūtaringamotu from neighbouring streets”, “Visual connectivity between Pūtaringamotu and other planted elements”, “an element across the skyline”, “View of distinctive tall podocarp trees”, and “Views to Pūtaringamotu for residents and passers-by” all would be negatively affected by implementation of NPS-UD and MDRS, and that limiting building heights in the affected area to 2 storeys equates [Appendix 43 Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022, section 5.3] to “protection of outstanding natural features” and “historic heritage” from inappropriate subdivision, use and development under RMA Section 6 (b) and (f). If views from neighbouring and distant sites are indeed significantly impacted as suggested, there remains no evidence that this constitutes any use, subdivision, or development of the outstanding natural feature or historic heritage, and can therefore not be “inappropriate subdivision, use and development” of said natural feature or historic heritage.</p> <p>I would also contest the idea that views – of what are in most cases the top metre or so of distant podocarp trees poking up behind the rooflines of existing houses, largely indistinct from various street- trees and private plantings – constitutes some ‘outstanding natural feature’ in of itself. Riccarton Bush proper, yes, and the heritage items within the heritage-protected setting of Riccarton Grounds, such as Riccarton House and significant trees, but the limited, indistinct, interrupted and generally unimpressive views of distant treetops “currently available down driveways” are not in themselves the outstanding feature here. And since Riccarton Bush, House, and significant individual trees are protected from development by designation and council-ownership, permitting medium or high-density housing in nearby sites is not a degradation of any amenity value provided by the open space, outstanding natural features, or heritage items.</p> <p>The Riccarton Bush Interface Area Qualifying Matter should be removed from the proposal, as the true amenity of Riccarton Bush and Grounds is unaffected by increased residential density.</p> <p>NPS-UD allows for QMs to restrict development in some locations, such as “open space provided for public use, but only in relation to the land that is open space” (NPS-UD 2020 3.32 1 (d)), or “an area subject to a designation or heritage order, but only in relation to the land that is subject to the designation or heritage order” (NPS-UD 2020 3.32 1 (e)). Yet the Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022 5.3, used to justify implementation of this proposed QM over the proposed spatial extent, cites reasons such as “loss of greenspace adjacent to Pūtaringamotu”; with the proposed QM then specifically applying a density control to sites not included in the protected extent</p>	Oppose

		<p>of either Riccarton Bush, nor the surrounding grounds of Riccarton House, nor land zoned as open space.</p> <p>Furthermore, CCC state in their Section 32 report that another option that would limit the extent of the proposed QM to only those sites immediately adjoining Riccarton Bush (instead of the multi-block-coverage QM proposed), would have the effect of “...ensuring that Riccarton Bush is protected from the effects of medium density development” and that “the values of Riccarton Bush itself would not be degraded”, and “this approach is effective at addressing the issue”. This options assessment shows plainly that least one option is available to better “achieve the greatest heights and densities directed by Policy 3, while maintaining the specific characteristics” of the area, as required by NPS-UD (3.33 3biii).</p> <p>Even if we are to accept (though I don’t think we should) that these views are somehow worth sacrificing homes for, in many cases the proposed QM does no more to protect them than without the QM. For example, from Riccarton Road even the existing District Plan allows for construction obscuring all visible parts of the distant and indistinct Riccarton Bush. Meanwhile on Kahu Road, the roadway divides the residential sections from Riccarton Grounds. Any views of Riccarton Bush or House or Grounds are unaffected by increased residential density here, aside from being shared more widely with more residents.</p> <p>Other reasons cited in Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022 as “affecting an area of significant indigenous flora and fauna” include ground disturbance associated with construction damaging root systems, changes to soil hydrology, reduced habitat and corridors for birds, less permeable surfaces, and alteration of microclimates. Few of these reasons are particular to housing of a specific density. For example, most root systems will predominantly exist in the upper-most layers of soil, which would be equally affected by construction of a single-storey house as they would a multi-storey one. Regarding habitat and corridors for birds, tree canopy requirements proposed for MRZ and HRZ zoning would apply here, if not for the proposed QM, so tree loss in the sites adjacent to Riccarton Bush would be protected against without resorting to density constraints. The MRZ or HRZ rules would actually offer more protection for trees and landscaping than is currently provided by the Residential Suburban (RS) zoning proposed to remain in effect around Riccarton Bush under the proposed QM, with RS zoning excluding planting requirements from single-unit sites. With respect to permeable surfaces replenishing ground aquifers, both proposed MRZ and HRZ zoning rules require 20% or more of the site provided for landscaping, with buildings not exceeding 50% of the site area. Neither ruleset have specific requirements for surface permeability, though either could without applying density constraints which exceed maxima allowed by MDRS and NPS-UD. Lastly, while I’m not an expert on the differential effects of structures of differing heights on soil hydrology, nor the effects of buildings on microclimates, I suspect these effects are manageable without density constraints, and that the spatial extent of the proposed QM makes no reference to the hydrological catchment of Riccarton Bush.</p> <p>Regarding impact, at least 1220 units are prevented by application of this QM in terms of plan-enabled capacity, though this doesn’t consider the considerable overlap of this proposed QM with the similarly restrictive proposal for the Airport Noise Contour QM, so is likely to be greater if that QM is excluded.</p> <p>What isn’t evident from this impact assessment is the desirability of this location. Riccarton’s commercial area is a Large Town Centre – Key Activity Centre with huge commercial and retail activity. Riccarton Road (which the proposed QM area adjoins) plays host to 3 of our 5 most frequent Core public transport services (#3, #5, and Orbiter) and is poised to upgrade to a Bus Rapid Transit (BRT) or Light Rail Transit (LRT) corridor in the medium term, denoted in the proposed plan by the City Spine Transport Corridor. There is a Major Cycle Route (Uni-Cycle MCR) running through Riccarton Grounds, connecting the nearby University of Canterbury with Riccarton, Hagley Park, and the central city. According to The Property Group’s New Medium Density Residential Standards (MDRS) - Assessment of Housing Enabled in Christchurch City 2022 (Section 32 report Part 2 Appendix 3) much of the feasible development enabled under PC14 is concentrated in Riccarton Central, due to the significant accessibility values of the area.</p> <p>Aside from the high amenity value of the area in general, the identification of the spatial extent of the proposed QM is over-zealous. For example, on Kauri St’s West side, sites as many as 8-deep (1 Kauri St) are proposed for these density restrictions. On Hinau St, not only are the proposed sites not adjacent to Riccarton Bush, but they are on an entirely different block, with Totara St (and any underground services) in between. For example, 67 Hinau St is over 160m from the nearest part of the bush, with as many as 7 other sites plus a road in between.</p> <p>In summary, the unique characteristics of this area are contained within the existing reserve, not the proposed ‘interface area’, with public walkways and cycleways permitting extensive access to the public to experience Riccarton Bush, House, and Grounds to experience them from within. Any other alleged amenity value provided to the adjacent sites in terms of obscure and indistinct views of trees are overstated. The true amenity value of these sites is in their proximity to – not their views of – the bush, the commercial centre of Riccarton, the University campus, desirable school zones, Hagley Park, and the City Centre. These amenity and accessibility values are better shared than hoarded and are not diminished with higher enabled density.</p>	
--	--	--	--

			<p>Any reduction in amenity value within Riccarton Bush, House, Grounds, or to any significant individual trees or heritage items (which have their own standalone protections) that might occur because of applying MRZ or HRZ zoning to within proposed RBI QM area is negligible, and the proposed QM is, as demonstrated by CCC’s own options analysis, not consistent with NPS-UD requirements to “achieve the greatest heights and densities directed by Policy 3, while managing the specific characteristics”. It is desirable and strategic to increase the number of permitted homes in this area – to a level commensurate with the nearby Riccarton commercial centre and proportionate to the available and planned Public and Active Transport infrastructure. The proposed Riccarton Bush Interface Area QM should therefore be removed or limited to only those specific sites (such as those directly adjoining the Bush) where development at commensurate density may have strong evidence that it would significantly negatively impact the natural or heritage value within the open space zones themselves.</p>	
Cameron Matthews/121.16	The Riccarton Bush Trust/ #FS2085.13	Oppose	<p>Request removal of the Riccarton Bush Interface Qualifying Matter.</p> <p>SEE IMAGES IN SUBMISSION</p> <p>Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022 - used by CCC to provide rationale for the QM - asserts that “Views of Pūtaringamotu from neighbouring streets”, “Visual connectivity between Pūtaringamotu and other planted elements”, “an element across the skyline”, “View of distinctive tall podocarp trees”, and “Views to Pūtaringamotu for residents and passers-by” all would be negatively affected by implementation of NPS-UD and MDRS, and that limiting building heights in the affected area to 2 storeys equates [Appendix 43 Pūtaringamotu Riccarton Bush Heritage Landscape Review 2022, section 5.3] to “protection of outstanding natural features” and “historic heritage” from inappropriate subdivision, use and development under RMA Section 6 (b) and (f). If views from neighbouring and distant sites are indeed significantly impacted as suggested, there remains no evidence that this constitutes any use, subdivision, or development of the outstanding natural feature or historic heritage, and can therefore not be “inappropriate subdivision, use and development” of said natural feature or historic heritage.</p> <p>I would also contest the idea that views – of what are in most cases the top metre or so of distant podocarp trees poking up behind the rooflines of existing houses, largely indistinct from various street- trees and private plantings – constitutes some ‘outstanding natural feature’ in of itself. Riccarton Road (which the proposed QM area adjoins) plays host to 3 of our 5 most frequent Core public transport services (#3, #5, and Orbiter) and is poised to upgrade to a Bus Rapid Transit (BRT) or Light Rail Transit (LRT) corridor in the medium term, denoted in the proposed plan by the City Spine Transport Corridor. There is a Major Cycle Route (Uni-Cycle MCR) running through Riccarton Grounds, connecting the nearby University of Canterbury with Riccarton, Hagley Park, and the central city. According to The Property Group’s New Medium Density Residential Standards (MDRS) - Assessment of Housing Enabled in Christchurch City 2022 (Section 32 report Part 2 Appendix 3) much of the feasible development enabled under PC14 is concentrated in Riccarton Central, due to the significant accessibility values of the area.</p> <p>Aside from the high amenity value of the area in general, the identification of the spatial extent of the proposed QM is over-zealous. For example, on Kauri St’s West side, sites as many as 8-deep (1 Kauri St) are proposed for these density restrictions. On Hinau St, not only are the proposed sites not adjacent to Riccarton Bush, but they are on an entirely different block, with Totara St (and any underground services) in between. For example, 67 Hinau St is over 160m from the nearest part of the bush, with as many as 7 other sites plus a road in between.</p> <p>In summary, the unique characteristics of this area are contained within the existing reserve, not the proposed ‘interface area’, with public walkways and cycleways permitting extensive access to the public to experience Riccarton Bush, House, and Grounds to experience them from within. Any other alleged amenity value provided to the adjacent sites in terms of obscure and indistinct views of trees are overstated. The true amenity value of these sites is in their proximity to – not their views of – the bush, the commercial centre of Riccarton, the University campus, desirable school zones, Hagley Park, and the City Centre. These amenity and accessibility values are better shared than hoarded and are not diminished with higher enabled density. Any reduction in amenity value within Riccarton Bush, House, Grounds, or to any significant individual trees or heritage items (which have their own standalone protections) that might occur because of applying MRZ or HRZ zoning to within proposed RBI QM area is negligible, and the proposed QM is, as demonstrated by CCC’s own options analysis, not consistent with NPS-UD requirements to “achieve the greatest heights and densities directed by Policy 3, while managing the specific characteristics”. It is desirable and strategic to increase the number of permitted homes in this area – to a level commensurate with the nearby Riccarton commercial centre and proportionate to the available and planned Public and Active Transport infrastructure. The proposed Riccarton Bush Interface Area QM should therefore be removed or limited to only those specific sites (such as those directly adjoining the Bush) where development at commensurate density may have strong evidence that it would significantly negatively impact the natural or heritage value within the open space zones themselves.</p>	
Paul McNoe/ #171.1		Seek Amendment	[Reduce permitted building height] That the permitted height limits within the existing District Plan (prior to PC14) are retained to the maximum extent possible	
Matt Edwards/ #189.7		Seek Amendment	14.5.2.3.v - Reduce the area of the Ric Bush interface back to the current level of 40 sites.	

Matt Edwards/189.7	Christchurch International Airport Limited/ #FS2052.245	Seek Amendment	<p>14.5.2.3.v - Reduce the area of the Ric Bush interface back to the current level of 40 sites.</p> <p>We disagree with the extension of the Riccarton Bush interface. Allowing more houses in the Riccarton Bush area does not reduce the amenity but shares it. The danger of including this QM is that it solely benefits existing wealthy homeowners who can afford to live in the area by keeping house prices close to the Bush at unobtainable levels. The extension of the interface is justified by a desire to maintain views of the Bush from streets in the area. This mostly amounts to views of distant treetops, largely indistinguishable from the various street-trees and private plantings. The true amenity of the Bush is in its accessibility from the surrounding area, especially given it is intersected by the Uni-Cycle MCR. This accessibility would only be increased if more people were permitted to live within the general vicinity of the Bush, and as such the amenity provided by the Bush would increase.</p> <p>The application of the Riccarton Bush interface is at odds with the NPS-UD. NPS-UD allows for QM to restrict development in “open space provided for public use, but only in relation to the land that is open space” (NPS-UD 2020 3.32 1 (d)) or “an area subject to a designation or heritage order but only in relation to the land that is subject to the designation or heritage order” (NPS-UD 2020 3.32 1 (e)). This QM is applying density control to sites not included in the protected extent of either Riccarton Bush, nor the surrounding grounds of Riccarton House, nor land zoned as open space. The Section 32 report mentions that solely limiting the interface to adjoining sites (rather than the much greater area proposed in the QM) would have the effect of “...ensuring that Riccarton Bush is protected from the effects of medium density development” and that “the values of Riccarton Bush itself would not be degraded”, and “this approach is effective at addressing the issue” . This option should have been implemented in the QM, rather than the expansive area that is currently proposed.</p>	Oppose
Matt Edwards/189.7	The Riccarton Bush Trust/ #FS2085.19	Seek Amendment	<p>14.5.2.3.v - Reduce the area of the Ric Bush interface back to the current level of 40 sites.</p> <p>We disagree with the extension of the Riccarton Bush interface. Atlas Quarter Residents Group (22 owners) / #224.2		Oppose	That the permitted height limits within the existing District Plan (prior to PC14) are retained to the maximum extent possible	
Atlas Quarter Residents Group (22 owners) /224.2	Kāinga Ora/ #FS2082.166	Oppose	<p>That the permitted height limits within the existing District Plan (prior to PC14) are retained to the maximum extent possible</p> <p>Who we are:</p> <p>This submission is made on behalf of the following persons, all of whom own units in the Atlas Quarter, 36 Welles Street, Christchurch Central:</p> <p>Richard Ball, Athena Ellis, Phil and Lynette Stenning, Max Lucas, Paul and Jeni Neilson, Jenny Jia and Zhongyang Yuan, Piers and Emma Bayley, Rachel and Tim Scanlan, Eileen and Vernon Payne, Bruce Fraser, Eléonore Dumaine, Peter and Faye Greenwood, Alan Steel, Gillian Smeith, Chelsea Kennedy, Deborah Bowker, Kate and Mike Peers, Peter Morris, Mathilde Vachon, Barbra Pullar, Martin Rumbold and Kirsty Stewart.</p>	Oppose

Key points:

We support well designed intensive residential and commercial development, integrated with sustainable transport options. We have already “put our money where our mouths are” by purchasing units in the Atlas Quarter, a large and successful inner-city development of 110 residential and three commercial units.

We oppose the greatly increased height limits proposed by Plan Change 14. They are unnecessary and inappropriate for Christchurch.

We support the inclusion of qualifying matters to enhance design quality and urban amenity across the City.

Relief sought:

1. That the permitted height limits within the existing District Plan (prior to PC14) are retained to the maximum extent possible.
2. Where Government legislation and regulations require increases to height limits, that these are kept to the minimum extent possible for compliance with the regulations.
3. The need for greater intensification is supported but this does not require or justify the proposed increases in height limits as permitted activities.
4. The inclusion of the qualifying criteria is supported, independent of height limits, as a means of promoting good design and ensuring new buildings do not adversely impact existing buildings designed and constructed within the current District Plan requirements.

Reasons:

Following the Christchurch earthquakes, a comprehensive design process was undertaken for the City, particularly for the central city. Deliberate and well-informed decisions were made create a liveable city, with intensified development in the central city and around suburban centres, but with lower central city height limits than previously existed. This has created a compact central city with increased densities compared to before the earthquakes, but without the height of some of the buildings that Christchurch had pre-earthquake . The consolidation has resulted in many vacant sites becoming available which are gradually being filled.

This model was developed by looking at best practice around the world, combined with local input from residents and experts, to create an attractive and vibrant City. It set ambitious goals for increasing densities for residential living, especially in the central city and around suburban centres. It was fully integrated with future transport options and climate resilience objectives.

It has widespread local support and was developed with considerable input and investment from Government (via CERA) and Christchurch City Council. It integrated land use and transport, seeking higher densities and more sustainable transport, as reflected in the Land Use Recovery Plan, Christchurch Central Recovery Plan and the Central City Transport Plan. It was embedded into the District Plan through an Independent Hearing Panel of experts hand-picked by the Government.

The greatly increased height limits proposed Plan Change 14 undermines the objectives and principles that underpin the vision of the 2015 Christchurch Central Recovery Plan:

“To become one of the best small cities in the world, Christchurch needs a city centre that is:

- *an inspiring place to live*
- *an attractive place to invest*
- *the best urban environment in New Zealand.”*

The decision to limit heights was a deliberate choice in achieving this vision. The proposed changes will undermine existing investments, entered into in good faith based on the Recovery Plans, while also reducing the central city’s design coherence and creating a less attractive City.

The many empty sites and carparks that still exist post-earthquake provide adequate future capacity for the foreseeable future, including the “competitive margin” required by Government regulations. The only apparent reason for increasing the height limits appears to be compliance with new Government regulations. If the height limits are to be increased, this change should be done to the minimum extent needed to comply with these ill-considered Government requirements. There is no other justification for the proposed rules.

			<p>The proposed rules allow new development to be concentrated in a small number of very tall buildings, with the negative impacts such as greater shading and wind tunnels, accompanied by a continuation of many empty and ugly lots in the central city. As the vacant sites are largely filled with cheap carparking, this further undermines the stated transport sustainability and climate resilience objectives.</p> <p>The scale of the buildings permitted under PC14 is not consistent with the extensive post-earthquake developments that have already occurred. The post-quake developments have created a very attractive City which will be undermined by these proposals. Existing intensive residential developments, such as the Atlas Quarter, could be overshadowed by new buildings of nearly twice the height on the east and west, blocking sunlight. Others may be blocked to the north.</p> <p>In short, the proposal for increased heights across the City are ill-considered solutions for problems that exist in Auckland, Wellington, and possibly other centres, but are not applicable to Christchurch. The geography and existing development of these other centres constrains new development. Post-earthquake Christchurch is quite different from these other centres: it is not constrained for growth opportunities, as demonstrated by the far slower growth in property prices over recent years. Even before the earthquakes, Christchurch had far more stable (less volatile) prices than Auckland and Wellington – a trend that has persisted since at least the 1970's. In Christchurch there is housing choice, particularly with substantial increases in the number of higher density residential apartments.</p> <p>Maximising the benefits of intensification needs to consider the dis-benefits. The proposed Plan identifies loss of tree cover as a disbenefit but does appear to put sufficient emphasis on other matters. Why does it propose financial contributions for loss of tree cover but not for loss of sunlight to others, wind tunnel effects or loss of amenity? In the Christchurch context, the widespread demolition of much of the central city, including most of the taller buildings, and consolidation of activities into more compact precincts, has created a much more attractive City with a visual appearance and aesthetic appropriate for the size of the City, reflected in the Central City Recovery Plan issued by CERA after extensive public and expert engagement. Both residents and visitors are commenting on the attractiveness of this new look. Re-introducing unnecessarily large buildings undermines this new and attractive look. Even with setbacks and other requirements, it has the potential to detract from the amenity and value of the very substantial public and private investment made for the City's re-build and recovery.</p>	
Michael Dore/ #225.3		Support	Support protections for Riccarton House and Bush.	
Michael Dore/225.3	Anne Dingwall/ #FS2037.314	Support	Support protections for Riccarton House and Bush. Riccarton House and Bush is the oldest area of Christchurch and interlaced with so much of the city's history. The Bush area is already designated a heritage site. To provide further protection to this historical asset a buffer zone of surrounding streets should qualify as low density with height restrictions in current and future planning and resource consents should remain mandatory. It is vital and very necessary to respect and acknowledge the area as important to the heritage of Christchurch.	Support
Michael Dore/225.3	The Riccarton Bush Trust/ #FS2085.24	Support	Support protections for Riccarton House and Bush. Mason Plato/ #298.2		Oppose	Seek to remove Medium Density Residential Zone.	
Bron Durdin / #303.5		Seek Amendment	Change the current Medium Density Residential Zone [only in the outer residential suburbs] building height limit to restrict three storey units and allow up to two storey units.	
Bron Durdin /303.5	Kāinga Ora/ #FS2082.240	Seek Amendment	<p>Change the current Medium Density Residential Zone [only in the outer residential suburbs] building height limit to restrict three storey units and allow up to two storey units.</p> <p>I oppose the plan change to create huge default areas of Medium Density Residential Zones across Christchurch. There is currently already an over supply of 3 storey townhouse developments. It is defacing that suburban feel of our neighbourhoods.</p> <p>While I support intensification within the central and immediate surrounding areas such as Addington, Riccarton, St Albans, Sydenham, Phillipstown for example, I do not support intensification in the suburbs where it is important to protect family housing stock with green space and trees.</p>	Oppose
Julia Mallett/ #304.3		Seek Amendment	Increase planting requirements by reducing density/height limits in MDZ.	
Julia Mallett/304.3	Kāinga Ora/ #FS2082.243	Seek Amendment	<p>Increase planting requirements by reducing density/height limits in MDZ.</p> <p>Introduce a qualifying matter to reduced the MDZ around suburban schools, to reduce strain on families priced out of these areas by development, to find a middle ground consisting of vibrant inner city density together with retention of the traditional kiwi neighbourhood a short commute from the city. Increase planting requirements by reducing density/height limits in MDZ. Require development to be in keeping with the style and sensibility of the existing neighbourhood. Understanding that not all suburbs can be legitimately captured by heritage orders, but nonetheless each have an "era" they are drawn from, and new developments should compliment these.</p> <p>I oppose the new Medium Density Zone being put in place in so much of suburban Christchurch. - high and medium density zoning is appropriate in the inner suburbs (Edgware, Sydenham, Phillipstown, Riccarton, inner City, and similar) to promote a vibrant city, and around shopping areas with close proximity to public transport hubs. HDZ and MDZ absolutely have their place. - The large numbers of families moving to the Selwyn and Waimakariri Districts, and to suburbs such as Northwood and Halswell, indicate that families would rather add to their commute to secure more affordable bungalow-style homes. -MDZ/HDZ are supported by those who believe that higher density is better for the environment, however, the large amount of commuter traffic would suggest that this is not the case. Families are by and large not choosing to shift their behaviour to living in townhouses, instead opting to move to outer suburbs that are not yet supported by frequent and reliable public transport. - Families are being priced out of their local areas by developers, even under the current rules. Increase density will not ease this, in fact the opposite. - free form development is often unattractive and not in keeping with the style of the area. There are some pockets of thoughtful development, but largely they are plain boxes that do not add to the visual landscape. This is not in keeping with our beautiful city. - Although there are requirements to have planting in the proposed plan, it does not go far enough. We are continuing to pave and cover our land, which will adversely impact the city during extreme weather events, which are becoming more frequent. -Largely townhouse developments already only come with a single (or no) garage per home. We hope that behaviour is changing and people are eschewing car ownership. However, again, the volume of traffic on the roads and cars parked on the roadside would suggest this behaviour change is very far away. Increasing the density with 3 homes of three stories, but presumably only one off-road carpark each, will further degrade the landscape of our suburban neighbourhoods.</p>	Oppose

			<p>While we all agree that Christchurch may need diverse housing options, we do not need the extent of high-level of intensification which is being imposed upon us and all the cities of NZ. One plan should not fit all cities – especially following the earthquakes in our city.</p> <p>Many of us know about the multitude of concerns which 3-6 storey housing may create, such as:</p> <ul style="list-style-type: none"> • Loss of sun; Loss of privacy’ • Impacts on birdlife, trees & climate change’ • Loss of heritage homes & car parking. Further reduction of school zones • Increase in crime in smaller living spaces • Potential effects following any future Earthquakes <p>-especially while we know the Alpine Fault is yet to rupture!</p> <p>However, it is the likely impact on the older streets’ infrastructure and thereby creating more flood events which is my biggest concern & the question as to whether the infrastructure of our city may cope with the additional housing intensification? ie: will the power, sewer systems & toilets in our homes cope or make our homes undesirable /unliveable in the future?</p> <p>Personally, I am already surrounded by at least 5x 2 storey housing properties, which now have quadrupled the estimated amount of family members & cars per property. So I fully understand how it is to have it in your backyard’ - our toilets nearly already overflow, before the completion of such developments. Ironically Leitch Street is confirmed to be a flood prone street, so with the adjoining Wilderness Drain & with the growth of such developments – our infrastructure may be even more vulnerable in future events.</p> <p>If residents’ toilet cisterns can’t cope now or in the future, this may make our homes less livable. Who will be responsible for paying for new sewer systems or paying for any damage this may create in future weather events.</p> <p>Lack of sun and threat to mental health will most likely be the most significant concerns which may occur with 3 storey or higher level housing.</p> <p>CHCH should not be compared with other cities for a number of reasons. Future high-density housing may either make or break our city long term. Although further housing may be required - our residents could help by encouraging developers who are prepared to come to our meetings and design more respectful housing, while creating less impact on our environment, ie: Thanks to Brookfield, & Habitus Group!</p>	
Spreydon Resident's Association /682.1	Chapman Tripp/ #FS2063.62	Oppose	<p>[Seeks to] oppose 3-6 storey [residential] development [in existing residential areas].</p> <p>While we all agree that Christchurch may need diverse housing options, we do not need the extent of high-level of intensification which is being imposed upon us and all the cities of NZ. One plan should not fit all cities – especially following the earthquakes in our city.</p> <p>Many of us know about the multitude of concerns which 3-6 storey housing may create, such as:</p> <ul style="list-style-type: none"> • Loss of sun; Loss of privacy’ • Impacts on birdlife, trees & climate change’ • Loss of heritage homes & car parking. Further reduction of school zones • Increase in crime in smaller living spaces • Potential effects following any future Earthquakes <p>-especially while we know the Alpine Fault is yet to rupture!</p>	Oppose

Fire and Emergency/842.31	Lydia Shirley/ #FS2010.9	Not Stated	<p>Amend as follows:</p> <p>14.5.2.3 Building height and maximum number of storeys</p> <p>...</p> <p><i>Advice note:</i></p> <ol style="list-style-type: none"> 1. See the permitted height exceptions contained within the definition of height 2. Emergency service facilities, emergency service towers and communication poles are exempt 	Support

			Fire stations are typically single storied buildings of approximately 8-9m in height, and emergency service towers and communication poles can be around 12 to 15 metres in height. The emergency service towers and communication poles serve several purposes being for hose drying, communications and training purposes on station. The need for emergency service towers and communication poles required at stations is dependent on locational and operational requirements of each station. Fire and Emergency is seeking an exemption for emergency service facilities, emergency service towers and communication poles in order to appropriately provide for the health and safety of the community by enabling the efficient functioning of Fire and Emergency in establishing and operating fire stations and associated structures. This exemption could either be provided under the permitted height exemptions contained within the definition or an advice note.

Waipuna Halswell-Hornby-Riccarton Community Board/902.9	Kāinga Ora/ #FS2082.1271	Oppose	[That development of up to three homes of up to 12 metres high on a single property, without resource consent. is not] permitted [T]he Board is concerned at "the one size fits all" approach that will see most residential areas of Christchurch become a Medium Density Residential Zone as it considers that this zoning, that allows development of up to three homes of up to 12 metres high on a single property, without resource consent, is not suitable for many areas. The Board notes that the Medium Density Residential Zone does not limit development to three stories/12 metres but creates a permitted base line for housing developments. Development higher than three storeys will be considered via the resource consent process that will focus on the effects of the development above the baseline. This means that the effects of a proposed five storey building will be considered as the effects of the additional two storeys only. There was a recent example of a development in Riccarton in a medium density residential zoned area that would normally lead to 3 storey town houses of a five storey, 42 apartment building being approved by way resource consent without notification or hearing- Resource Consent RMA2016/1434 attached	Oppose
Geoff Mahan/ #1039.2		Oppose	Oppose a 3 storey height limit.	
Anna McKenzie/ #1047.2		Oppose	Opposes 12m height rule in the suburbs.

Submission Number	Further Submission No	Position	Decision Requested	FS Position
Cheryl Horrell/ #11.3		Seek Amendment	<i>[Less impervious surfaces]</i>	
Cheryl Horrell/11.3	Anne Dingwall/ #FS2037.41	Seek Amendment	<i>[Less impervious surfaces]</i> Nothing in Council's proposal will protect existing homes from increased stormwater run-off from multiple housing units being built on surrounding properties. Several singlehome sites are under development in Woolston at present and all but one (52 McKenzie Ave) are being replaced by four or five individual units. Your proposals to manage flooding by raising housing floor levels do not stand up to scrutiny; five new houses will undoubtedly contribute more stormwater pressure on existing systems than the original one home surrounded by permeable land. Development taking place in Woolston in late 2022 and early 2023 contain multiple units, up to five homes per section (six in one Smith Street development) on land originally consented for one residential dwelling. These multiple units are surrounded by impermeable surfaces which are likely to contribute to increased surface flooding which will not prevent new homes from being flooded, even on higher foundations. . What existing residents need is much better drainage, less cramped in housing and more permeable surfaces if we are not to slip under future floodwaters. Existing home owners cannot do anything about their land having slumped but it would be a grave injustice if our homes were to be flooded because greater housing density contributed to water flooding into lower lying houses.	Support
Richard Bigsby/ #38.1		Oppose	Delete Clause C of 14.5.2.4 in its entirety (precluding inclusion of eaves and roof overhangs in the calculation of building coverage).	
Rachel Davies/ #67.7		Seek Amendment	Rigid controls should be in place for access to sunlight and privacy along with how much land coverage dwellings can take up on a plot of land.

Cheryl Horrell/ #11.4		Oppose	Oppose outdoor space provisions. Provide larger area of private outdoor space for each dwelling	
Cheryl Horrell/11.4	Anne Dingwall/ #FS2037.42	Oppose	Oppose outdoor space provisions. Provide larger area of private outdoor space for each dwelling Walking around Addington in the Selwyn Street area offers an example of what Woolston is destined to become if current building practices continue. Over half of the homes there are multi storey connected units with little or no enclosed outside private space. People sit outside in the cemetery or wander the streets because they cannot enjoy the outdoors at home.	Support
Ali McGregor/ #65.3		Seek Amendment	Provide adequate outdoor space for families.	
Ali McGregor/65.3	Anne Dingwall/ #FS2037.132	Seek Amendment	Provide adequate outdoor space for families. The sections with multi-units are not suitable for children to play outside. In a society where there is already concern for the well-being of young people, reducing the opportunity for them to be outside and gaining the benefits of exercise, fresh air and socialisation is foolhardy and is the opposite of what we are trying to promote. Isolation in small units is the result.	Support
Andrew Evans/ #89.7		Seek Amendment	Amend Rule 14.5.2.5 Outdoor living space to require that ground floor [outdoor] living areas have a minimum area of 16sqm (retain current District Plan provision).	
Andrew Evans/89.7	Anne Dingwall/ #FS2037.162	Seek Amendment	Amend Rule 14.5.2.5 Outdoor living space to require that ground floor [outdoor] living areas have a minimum area of 16sqm (retain current District Plan provision).	Oppose

			<p>1 bedroom units are hard enough to stack up financially yet the most needed unit type*</p> <p>*One bedroom units are clearly needed- graphs from stats NZ information 2018- only round 5% of Christchurch units have 1 bedroom, yet about 25% of household in Christchurch only have 1 occupant!</p>	
Rohan A Collett/ #147.1		Seek Amendment	That all outdoor living spaces are required to be located on the east, north or west sides of dwellings not on the south side.	
Michael Tyuryutikov/ #334.1		Oppose	Retain existing minimal courtyard area rules for residential properties.	
Alison Dockery/ #445.3		Seek Amendment	Seeks that the standard requires significant outdoor space for each apartment/ flat or unit.	
David Fisher/ #468.3		Support	Oppose increasing building height and density... amend rule to increase outside garden space to attract more families back to these areas.	
Retirement Villages Association of New Zealand Inc/ #811.56		Seek Amendment	<p>Amend Standard 14.5.2.5 as notified with the exclusion of retirement villages, or amend to include the retirement unit specific carve out as follows:</p> <p>f) For retirement units, standard 14.5.2.5a and 14.5.2.5b apply with the following modifications:</p> <p>i. The outdoor living space may be in whole or in part grouped cumulatively in 1 or more communally accessible location(s) and/or located directly adjacent to each retirement unit; and</p> <p>ii. A retirement village may provide indoor living spaces in one or more communally accessible locations in lieu of up to 50% of the required outdoor living space.</p>	
Retirement Villages Association of New Zealand Inc/811.56	Summerset Group Holdings Limited/ #FS2097.51	Seek Amendment	<p>Amend Standard 14.5.2.5 as notified with the exclusion of retirement villages, or amend to include the retirement unit specific carve out as follows:</p> <p>f) For retirement units, standard 14.5.2.5a and 14.5.2.5b apply with the following modifications:</p> <p>i. Kathryn Collie/ #14.1		Seek Amendment	Less restrictive recession plane rules to enable the increased density intended by the Government	
Kathryn Collie/14.1	Anne Dingwall/ #FS2037.50	Seek Amendment	<p>Less restrictive recession plane rules to enable the increased density intended by the Government</p> <p>As Christchurch’s population increases, housing intensification is essential for creating a sustainable and liveable city. Research shows that intensifying the housing supply in a city can create a stronger sense of community, encourage alternative transport modes (such as walking, cycling and public transport), and promotes sustainability through efficiency of resources. Increasing the number of people living close to existing commercial and community centres is essential to prevent urban sprawl and to ensure adequate housing is available and affordable.</p> <p>While I support the intent of the Plan Change 14, being to increase the density of housing, I disagree with the proposed sunlight access qualifying matter. The recession plane rules proposed will not have a material impact as they are only slightly less restrictive than the rules</p>	Oppose

			<p>under the current District Plan. The case study assumed in the Section 32 Sunlight report states that 15m is a common site width in the city. This is not the case in city fringe suburbs such as St Albans, Sydenham and Addington, where site widths are typically narrow and therefore the additional height required to increase density cannot be achieved. The propose recession plan rule will therefore not enable the outcomes intended by the government housing intensification legislation.</p> <p>The process to date has also been very unclear and lengthy, resulting in significant cost to those wanting to develop and protracting the programme of residential building the city by years. I request that the Independent Hearings Panel make an early determination on the recession plane qualifying matter given the Council's stance has removed the intent of the MDRS having immediate legal effect and to provide certainty to those that have been blindsided by the u-turn and have plans that are compliant with the MDRS ready (or already) lodged for building consent.</p>	
Kathryn Collie/ #14.6		Seek Amendment	Prioritise and make an early determination on the recession plane qualifying matter.	
Grant McGirr/ #21.3		Oppose	That no changes to rules lessen the amount of sunlight that any property (house and land) currently receives.	
Linda Barnes/ #23.7		Seek Amendment	Amend Sunlight Access Qualifying Matter so that sunlight can go lower in the winter months.	
Mike Currie/ #31.1		Seek Amendment	[Amend Rule 14.5.2.6 - Height in relation to boundary to 33 degrees from a height of 2.3m on the southern boundary of a site] [Alternative relief to Submission Point 31.4]	
Mike Currie/ #31.3		Seek Amendment	Amend Rule 14.5.2.6 - Height in relation to boundary to 29 degrees from a height of 2.3m on the southern boundary of a site (if the height limit is 12m) [alternative relief to Submission Point 31.3]	
Joanne Knudsen/ #33.2		Seek Amendment	Retain the sunlight access qualifying matter and modify so that all floor levels have sunlight access to allow for sun exposure on all floor levels.	
Rachel Best/ #46.3		Seek Amendment	Oppose built form standards that reduce sunlight access to neighbouring homes.	
Tobias Meyer/ #55.2		Support	Support provisions as notified.	
Tobias Meyer/55.2	Christchurch International Airport Limited/ #FS2052.165	Support	Support provisions as notified. I don't mind the adjusted limit for the south border, but leave the other sides. Otherwise development is severely affected. Allow north and east/west to be according to MDRS at least. Also perimeter blocks make more sense for good development so make the allowable envelope higher/remove for front of property: even if just for less of front 12m or 40% of property.	Oppose
Theo Sarris/ #59.1		Seek Amendment	Amend rule 14.5.2.6 Height in relation to boundary for the Sunlight Access Qualifying Matter so that the height is reduced to 2.5 metres and the boundary angles to 45 degrees.	
Victoria Neighbourhood Association (VNA) / #61.8		Seek Amendment	Amend 14.5.2.6 by requiring that Sunlight Access Qualifying Matter applies as an upper limit of shading for developments.	
Victoria Neighbourhood Association (VNA) /61.8	Anne Dingwall/ #FS2037.98	Seek Amendment	<p>Amend 14.5.2.6 by requiring that Sunlight Access Qualifying Matter applies as an upper limit of shading for developments.</p> <p>We strongly support the application of a Sunlight Access Qualifying Matter to the MRZ and HRZ zones of Christchurch, for the reasons CCC have identified in the S77 evaluation within the Section 32 Evaluation Report, particularly identifying changes that are beneficial to the environment, energy efficiency, health, and affordability.</p> <p>We note the high level of over-enabling of intensification under PC14. Therefore, we see this as a win-win-win scenario which both reduces the over-enablement, still provides much more intensification than is needed to meet demand projections, and improves the quality and affordability of the outcome.</p> <p>Where identified elsewhere, we challenge the writers of PC14 to consider the shading defined by the proposal in this QM as an upper limit, seeking opportunities to enable the advantages of even more sunlight access provided the capacity for intensification still remains sufficiently within the demand. This approach will maximise the positive impacts of PC14.</p> <p>Sunlight Access Qualifying Matter</p>	Support

			<p>Generation Zero has asked that I oppose the Sunlight Access Qualifying Matter. I do not oppose this QM, and do strongly support it. The reason for supporting it is nothing to do with supporting existing property values, and everything to do with keeping housing more affordable, and helping to protect the physical and mental health of all residents, and of our environment. Sunlight is essential to these matters.</p> <p>I am disappointed that Generation Zero have not engage with residents who submitted to CCC on this matter, and are making and publishing incorrect assumptions about the motivations of those residents.</p> <p>As I have been unable to correct the standard form, I have not ticked those sections I disagree with, and make my comments here</p>	
Victoria Neighbourhood Association (VNA) /61.8	Cambridge 137 Limited/ #FS2042.11	Seek Amendment	<p>Amend 14.5.2.6 by requiring that Sunlight Access Qualifying Matter applies as an upper limit of shading for developments.</p> <p>We strongly support the application of a Sunlight Access Qualifying Matter to the MRZ and HRZ zones of Christchurch, for the reasons CCC have identified in the S77 evaluation within the Section 32 Evaluation Report, particularly identifying changes that are beneficial to the environment, energy efficiency, health, and affordability.</p> <p>We note the high level of over-enabling of intensification under PC14. Victoria Neighbourhood Association (VNA) / #61.54		Oppose	Retain recession planes as set out in operative District Plan.	
Kathleen Crisley/ #63.88		Support	Retain provisions in relation to recession planes in final plan decision.	
Rachel Davies/ #67.1		Support	Retain and increase the Sunlight Access qualifying matter.	
Rachel Davies/67.1	Anne Dingwall/ #FS2037.135	Support	<p>Retain and increase the Sunlight Access qualifying matter.</p> <p>I applaud the council in their attempt to try and temper this dramatic change and extend the enforcement timeframe by adding Qualifying Matters such as the 'Sunlight Access'. I however feel this is not enough. The people of Christchurch need to be listened to, especially those who will be directly affected by future development.</p> <p>Hoon Hay, Christchurch is my home, the place where we chose to buy and bring up our family in a home that was in a safe neighbourhood with a backyard, where our children can play, we can grow a garden and have space, peace and privacy. I feel this is typical of many residents who chose to live in the suburban areas that fringe the city center. I am now constantly shocked each time I travel down a local street to see so many properties demolished and replaced with two storey townhouses; many that are terraced, offering no space or privacy. They go nowhere to enhance the character of the neighbourhoods they now dominate. The original homes now seem squashed and overshadowed by these towering monstrosities. Gone is their light, privacy and peace; replaced by multiple dwellers, their cars, noise and pressure on existing infrastructure. It frightens me to say the least that this seems to be the future of Christchurch.</p>	Support

			Increased building heights in suburban areas will dramatically reduce sunlight foreexisting properties Multiple storey dwellings negatively impact on the privacy of existing single storeyresidences.	
Rachel Davies/ #67.8		Seek Amendment	Rigid controls should be in place for access to sunlight and privacy along with how much land coverage dwellings can take up on a plot of land.	
Paul Wing/ #70.3		Seek Amendment	Seek amendment to ensure recession planes protect existing residential properties from negative impact of new multi-storey builds.	
Paul Wing/70.3	Anne Dingwall/ #FS2037.144	Seek Amendment	Seek amendment to ensure recession planes protect existing residential properties from negative impact of new multi-storey builds. Sunlight is a free source of heating. Recession planes should protect existing residential properties from negative impact of new multi-storey builds.	Support
Rosemary Neave/ #72.6		Oppose	Remove the Sunlight Access Qualifying Matter from the proposed District Plan.	
Rosemary Neave/72.6	Anne Dingwall/ #FS2037.151	Oppose	Remove the Sunlight Access Qualifying Matter from the proposed District Plan. There are many cities in the world that have high density and are further from the equator than Christchurch. Cities such as Vienna, Copenhagen, Toronto, Geneva, and Calgary are consistently ranked some of the most livable cities in the world. This qualifying matter would reduce the maximum height and size of medium residential buildings below what is legally required and would create a less efficient usage of land and limit future housing. This qualifying matter has been developed with the expressed purpose of protecting and increasing property values rather than increasing the amount of affordable housing for people.	Oppose
Naretta Berry/ #82.4		Support	Retain all provisions in PC14 which enable sunlight access to be assessed as a qualifying matter in site development in the Medium Density Residential Zone.	
Naretta Berry/82.4	Brighton Observatory of Environment and Economics/ #FS2092.5	Support	Retain all provisions in PC14 which enable sunlight access to be assessed as a qualifying matter in site development in the Medium Density Residential Zone. I support all provisions in PC14 which enable sunlight access to be assessed as a qualifying matter in site development in the Medium Density Residential Zone.	Oppose
Andrew Evans/ #89.8		Support	Support provisions as notified.	
Mary Clay/ #100.3		Seek Amendment	Proposed recession planes have the potential to result in poor outcomes that affects access to sunlight and privacy.	
Damian Blogg/ #103.3		Seek Amendment	[Lower recession planes]	
Ann Clay/ #104.3		Seek Amendment	[Lower recession planes]	
Nikki Smetham/ #112.1		Support	[Retain Sunlight Access Qualifying Matter]	
Nikki Smetham/112.1	Anne Dingwall/ #FS2037.183	Support	[Retain Sunlight Access Qualifying Matter] In general we are in full support for the proposed Qualifying Standards to Chapter 14 Residential including sunlight recession planes.	Support
Tracey Strack/ #119.5		Seek Amendment	<ul style="list-style-type: none"> • That sunlight access be better protected by further amending the medium/high density southern boundary recession plane to 45° from 3m at the boundary: and, • That neighbours along the southern boundaries of any proposed developments that involve non-compliances with height or access to sunlight rules can be notified of the required resource consents and to make submissions. 	
Cameron Matthews/ #121.4		Oppose	Requests removal of the Sunlight Access Qualifying Matter.	
Cameron Matthews/121.4	Christchurch International Airport Limited/ #FS2052.194	Oppose	<p>Requests removal of the Sunlight Access Qualifying Matter.</p> <p>The proposed QM is designed to undermine the goals of NPS-UD and MDRS regarding housing density, availability, and affordability, it lacks site-specific identification or analysis, is likely to be ineffective at achieving its ostensible goal of achieving weather-parity between Christchurch and Auckland, is not strategic in the medium or long term, and has an unspecified but highly negative impact on housing density and capacity. The proposed Sunlight Access Qualifying Matter should therefore be removed from the plan.</p> <p>The proposal has a high impact, which is obfuscated by CCC's impact assessment only including the effect on RS zones transitioning to MRZ. They assert 3 that within that group, 96% of the floorspace that would be enabled by MDRS would be achieved with their proposed QM. However, this gives no consideration to the impact on plan-enabled or feasible housing capacity in the extensive areas of the city operatively zoned RMD which will change to MRZ, nor the areas zoned for HRZ around key activity centres. This limitation selectively excludes potentially smaller, more centrally located sites (existing RMD-zone) which are likely at higher demand than the more peripheral RS-zoned sites. Those smaller RMD sites are more negatively impacted by CCC's proposed recession planes than larger ones, as the increased setbacks and lowered recession planes intersect to cause the feasible building height limit to not necessarily reach the full 12m required by MDRS. If these much</p>	Oppose

			<p>more extensive zones (all of MRZ and HRZ) were included in the impact assessment, it would likely show a much greater reduction in the number of allowable and feasible homes. As the true impact of the proposed QM is not known to the public and is likely to be high (given the vast scale on which it's proposed to be applied), the Sunlight Access Qualifying Matter should be removed from the proposal.</p> <p>The arguments that CCC put forward in favour of the proposed QM are deficient. In broader context, the implication that national laws should be applied to Auckland, Hamilton, Tauranga, and Wellington as written, but Christchurch – the country's second largest city – with a post-hoc 'calibration' factor is absurd. The rules around NPS-UD and MDRS were clearly considered to apply nation-wide, with enabling legislation passed with supermajorities in parliament backed by all Canterbury and Christchurch MPs, and Christchurch even being mentioned explicitly in the third reading of the MDRS bill 4. The proposal – embarrassingly – treats Christchurch as though it were some forgettable, large-rural-town rather than the forward-looking, community focussed, youthful and diverse city that I think of it as, and seeks special status as such, which if implemented would – in my opinion – not be lawful, and therefore the Sunlight Access Qualifying Matter should be removed from the proposal.</p> <p>Additionally, CCC's premise that differences in outcomes between centres having implemented MDRS and NPS-UD can be calibrated-out by simply accounting for the differences in the angle of the sun's zenith on the winter solstice is simplistic and erroneous. Differences in outcomes in indoor and outdoor temperatures and irradiance between centres will be due to myriad of social, geographical, meteorological, and economic factors, not to mention site-specific factors like grade/slope, vegetation, nearby topographical features, to name a few, not just latitude. These site-specific analyses and evidence are required by the MDRS and NPS-UD rules for Qualifying Matters yet have not been assessed for this proposal. CCC's attempt to neutralise those intrinsic differences between centres – by only altering recession planes, such that they create an un-due restriction on density – will therefore be ineffective at 'managing the specific features' (as per NPS-UD), and therefore the Sunlight Access Qualifying Matter should be removed from the proposal.</p>	
Cameron Matthews/121.4	Andrew McCarthy/ #FS2081.2	Oppose	<p>Requests removal of the Sunlight Access Qualifying Matter.</p> <p>The proposed QM is designed to undermine the goals of NPS-UD and MDRS regarding housing density, availability, and affordability, it lacks site-specific identification or analysis, is likely to be ineffective at achieving its ostensible goal of achieving weather-parity between Christchurch and Auckland, is not strategic in the medium or long term, and has an unspecified but highly negative impact on housing density and capacity. 			assessed for this proposal. CCC's attempt to neutralise those intrinsic differences between centres – by only altering recession planes, such that they create an un-due restriction on density – will therefore be ineffective at 'managing the specific features' (as per NPS-UD), and therefore the Sunlight Access Qualifying Matter should be removed from the proposal.	
Cameron Matthews/ #121.20		Seek Amendment	Waive HIRTB recession plane for parts of building in front 20m of a site (optionally for the rest of the site also) which are setback by more than around 3-5m from side/rear boundaries.	
Cameron Matthews/121.20	Christchurch International Airport Limited/ #FS2052.210	Seek Amendment	<p>Waive HIRTB recession plane for parts of building in front 20m of a site (optionally for the rest of the site also) which are setback by more than around 3-5m from side/rear boundaries.</p> <p>SEE IMAGES WITHIN SUBMISSION</p> <p>This ensures 6-10m separation between upper-level units in adjacent HRZ buildings is maintained, and that floor width of upper-storeys remain feasible (at 5-9m for site widths of 15-20m). This incentivises development at the front of those sites, and to boost viability of medium density on older, narrow sites. One simple alternative ruleset which might help to achieve this, and which aligns well with the alternative HRZ built form standards above is to:</p> <ul style="list-style-type: none"> • change side/rear height-in-relation-to-boundary rules such that they are MDRS-compliant, i.e., 4m+60°, and, • waive HIRTB recession plane for parts of building in front 20m of a site (optionally for the rest of the site also) which are setback by more than around 3-5m from side/rear boundaries, and, • retain current height limits for 11+1m nominal, or 14m if LCIP applies, and, • Increase number of permitted units to 4, potentially only if LCIP applies. <p>In High Density Residential (HRZ) zones, nominally 14m height, the building envelope is extremely constrained above 12m, via a combination of recession planes, deep boundary setbacks, and restrictive height limits and building separation rules. This will severely limit the feasibility of many developments within the HRZ zone to achieve the scale nominally permitted by the zone.</p> <p>One mitigating factor is that at the front of sites, below 12m, exemptions for the recession plane, boundary setbacks, and building separation rules are made. While this is good, it is likely to create built forms which could otherwise be enabled under MRZ, if the same front-of-site recession/setback exemptions were to apply. These exemptions to recession planes and setback rules at the front of sites for MRZ were present in earlier versions of the proposed plan and should be re-incorporated.</p> <p>Regarding HRZ, the current proposal requires parts of buildings exceeding 12m height (3-4 storeys) to have 6-8m setbacks from side boundaries, be no higher than 14m (still only ~4 storeys unless low stud heights are used), be no closer than 10m from an a nearby unit, and if built at the rear of sites be confined to only 12m height and aggressive recession planes. CCC's data (Figure 25) shows average road frontage for HRZ land parcels is only ~20m, roughly translating into the site width (though likely inflated by corner sites). Older sites (pre-1970, i.e. the ones located predominantly around historically relevant town centres, like the city centre, Riccarton, Papanui, etc) are noted as being predominantly only 15m wide.</p> <p>Illustrating what the building envelope might look like under these rules, in Figure 26 the top floor is only (maximally, with low floor-separations) the 5th, and it's only maximally 6m wide. Considering that building above 3 storeys requires large fixed-cost investments into additional infrastructure (e.g. elevators, high fire resistance and/or sprinklers, fire engineering, wind report, etc), the limited saleable/rentable floor area from the combined 4th and 5th floors is likely to reduce actual built volume to only 3 storeys; i.e. only the nominal built height of MRZ sites. The building envelope on the right-hand-side shows the more egregious example, using a typical site from pre-1970's suburbs with a width of only 15m. Such a construction envelope completely rules out a 5th floor, further compromising the viability of building anything above 3-storeys in the HRZ zones.</p> <p>Importantly the site widths used for these illustrations show that even the average HRZ site is compromised for development above 3-4storeys under the proposed rules. That could mean (depending on the statistical distribution of site widths) that around half of all sites zoned HRZ have</p>	Oppose

			<p>evenless feasible development prospects at heights exceeding 3 storeys. This is problematic in that in feasibly enabling only buildings of similar scale to MRZ– it provides very little incentive/allowances for development at increased scales/intensity in the areas most suited to it, i.e. those zoned for HRZ.</p> <p>In addition to the lack of development incentives exceeding 3 storeys, a low density-differential exists between the buildable envelope –even if built to their theoretical maximum limit – of both:</p> <ul style="list-style-type: none"> • An HRZ site built up at the road frontage vs built up along the side or rear boundary • An HRZ site vs an MRZ site. <p>The laudable goal of the proposed road-frontage recession-plane waiver for the front 20m / 60% is to encourage development at the front of sites, to help create a vibrant and active streetscape, to help manage overlooking between adjacent sites (without limiting density below legal minimum standards) and to improve privacy for residents, while boosting safety via ‘many-eyes’ on the street. However, as proposed it only provides a small bonus in habitable floorspace compared to developing the side or rear of the site. Considering that any provision of on-site car-parking or manoeuvring space provided will come at a cost to habitable area for a front-built site, but not for a side or rear-built site, the proposed waiver may not be sufficient to incentivise development at the road frontage.</p> <p>In addition – while I would argue that subjective aesthetic ideals should not be included in our strategy objectives (see section: INAPPROPRIATE AND SUBJECTIVE STRATEGY OBJECTIVES) – if CCC is aiming to have “legible urban form” with “contrasting building clusters”, “appropriate scale, form”, and to manage the “clustering, scale and massing” (Chapter 3 Strategic Directions 3.3.7 Objective – Well-functioning urban environment) of our more densely populated centres, then allowing built forms of such similar scale in MRZ and HRZ seems contradictory.</p>	
Terry Blogg/ #134.4		Oppose	To not implement changes that would see higher density housing in the areas proposed.	
Robin Parr/ #157.1		Oppose	Retain existing heights & angles of Recession planes at boundaries, currently 2.3m & 36°	
James and Adriana Baddeley/ #164.4		Seek Amendment	That sunlight access be better protected by further amending the medium/high density southern boundary recession plane to 45° from 3m at the boundary	
Richard Moylan/ #169.1		Seek Amendment	Support the sunlight qualifying matter and enhancing it to provide for outdoor washing drying.	
Richard Moylan/169.1	Anne Dingwall/ #FS2037.228	Seek Amendment	<p>Support the sunlight qualifying matter and enhancing it to provide for outdoor washing drying.</p> <p>Strongly support the strategy of sunlight qualifying matter. Please add consideration for effectiveness of washing lines.</p> <p>The declaration of climate emergency should facilitate planning that enable outdoor washing drying so there needs to be sufficient sunlit space for that to occur on cloudless winter days. The MDRS risks increasing the use of inefficient indoor drying, or for those who can afford it: extra power use for clothes dryer. Generation build is no longer keeping up with the electrical growth due to decarbonisation of process heat and transport. There is elevated risk in the short term of insufficient generation during winter peaks.</p> <p>The current government is supportive of climate friendly planning so should see the benefit of this enhancement.</p>	Support
Stantec/ #184.7		Support	Retain rule as proposed.	
Riccarton Bush - Kilmarnock Residents' Association/ #188.4		Seek Amendment	[T]he Sunlight Qualifying Matter should be more conservative than proposed, to preserve sunlight to the same degree as is enjoyed under current density rules.	
Riccarton Bush - Kilmarnock Residents' Association/188.4	Tony Dale/ #FS2036.4	Seek Amendment	<p>[T]he Sunlight Qualifying Matter should be more conservative than proposed, to preserve sunlight to the same degree as is enjoyed under current density rules.</p> <p>RMDS were not formulated taking into account Christchurch conditions or the Christchurch context which makes them unfair and inequitable.</p> <p>The sunlight qualifying matter should not decrease the level of access to light that we currently enjoy, determined after proper consultation and examination during the 2015 Christchurch Replacement District Plan Review.</p> <p>We believe the impact, in terms of the level of densification this would limit, would be insignificant and would in no way jeopardise the overall aims or objectives of the NPS-UD.</p>	Support

			Notwithstanding the fact the proposed QM proposes a more conservative approach to treat Christchurch the same as Auckland to compensate for latitude difference, the shading (and therefore cooling) impacts are still different in Christchurch. RMDS take no proper account of geography, climate, temperatures or sunshine hours in Christchurch. Additionally, the social impacts of less sun, more shade, and cooler environments have not been properly assessed for Christchurch. Rules around setbacks and recession planes to preserve sunlight should be entirely designed for the Christchurch context.

Matt Edwards/ #189.4		Oppose	Remove Sunlight Access QM.	
Logan Brunner/ #191.14		Oppose	[Remove proposed QM Sunlight Access]	
Logan Brunner/191.14	Anne Dingwall/ #FS2037.266	Oppose	<p>[Remove proposed QM Sunlight Access]</p> <p>The council's claim that 96% of housing capacity is retained under the Sunlight Access QM is misleading. CCC's Impact Assessment on the Sunlight Access QM only includes the effect on RS zones transitioning to MRZ. This ignores the impact on areas zoned as RMD that are transitioning to MRZ, or areas zoned HRZ. RMD and HRZ sites are more impacted by recession planes than RS, given they tend to be smaller. The example RS site, that is used to demonstrate the supposed loss in capacity, is 750 m². More than 50% of RMD sites and 2/3 of HRZ sites are less than 700 m². This means that the impact of applying recession planes is much more severe than for RS sites. Using an RS site as an example hides a much greater loss in housing capacity. We oppose the Sunlight Access QM on this basis, given it will result in a much greater loss in housing capacity than anticipated.</p> <p>We think that the broad application of the Sunlight Access QM across the city is disappointing and counterproductive. This broad application contradicts the intention of the MDRS, which was to allow 3-storey, 3-unit development across all urban areas in New Zealand. We also believe that amenities other than sunlight should have been considered. NPS-UD Policy 6(b)(ii) states that the significant changes to built form required "... may detract from amenity values appreciated by some people but improve amenity values appreciated by other people, communities, and future generations, including by providing increased and varied housing densities and type". This perspective should have been considered by the council when implementing the Sunlight Access QM. If increased sunlight access results in decreased housing affordability, as well as decreased access to employment, services, and amenities, is it really worth it?</p>	Oppose

Addington Neighbourhood Association / #205.29		Support	Encourage intensification while considering the potential loss of amenity for existing house owners.	
Addington Neighbourhood Association /205.29	Kāinga Ora/ #FS2082.149	Support	Encourage intensification while considering the potential loss of amenity for existing house owners. Existing amenity should be protected at the same time as intensification is encouraged. Loss of sunlight and warmth from the sun on a property, through being overshadowed by a larger building being built next door, is akin to a seat being reclined by the passenger in front of you on a plane. There is a sense of loss of something you believed you were entitled to have. With a long term plan, people will know to consider the intensification potential of their neighbours' properties when they buy a property, they can vote with their feet, by buying in an area which has the right sunlight availability for them	Oppose
Martin Snelson/ #220.4		Seek Amendment	Amend the recession plane angles to maximise sunlight	
Cynthia Snelson/ #221.4		Seek Amendment	Amend the recession plane angles to maximise sunlight	
Deans Avenue Precinct Society Inc./ #222.6		Seek Amendment	Support the proposal to add a Qualifying Matter that would better allow sunlight to reach neighbouring properties, especially in the winter. This must apply to both Medium Density Residential Zone and High Density Residential Zone.	
Deans Avenue Precinct Society Inc./222.6	Anne Dingwall/ #FS2037.310	Seek Amendment	Support the proposal to add a Qualifying Matter that would better allow sunlight to reach neighbouring properties, especially in the winter. This must apply to both Medium Density Residential Zone and High Density Residential Zone. The recession plan rules provided by central government do not take account of the lower latitude and winter sun angles in Christchurch compared with other Tier 1 centres, and would not only diminish enjoyment, but also inhibit rooftop solar developments, contrary to national sustainability goals	Support
Deans Avenue Precinct Society Inc./ #222.9		Oppose	Oppose any reduction of sunlight because the recession plane rules, as proposed, allow less sunlight than the existing rules, and should therefore, not be further reduced.	
Deans Avenue Precinct Society Inc./222.9	Anne Dingwall/ #FS2037.309	Oppose	Oppose any reduction of sunlight because the recession plane rules, as proposed, allow less sunlight than the existing rules, and should therefore, not be further reduced. The QM rules better recognise the winter sun situation in Christchurch than the Government prescribed recession plane rules. At the original subdivision in the 1920s sections in our area were not 'quarter-acre' (1,000 m ²), but were typically 500-750 m ² and long and narrow (e.g. 20 x 35 m). Many are now redeveloped from a single house to 4-6 small units in a row, usually 2 storey, in the narrow section. The current District Plan rules for medium density zoning already cause loss of sunlight to neighbouring dwellings when one house in the centre of a section is replaced with a block of 2-3 storey units with minimum outdoor areas. This will be exacerbated with taller 4-6 storey buildings and reduced minimum setbacks amongst the existing housing. Privacy is already often compromised with blocks of 2 storey units on the typically small, narrow sections (range) looking into adjacent windows or outdoor areas.	Support
Paul Clark/ #233.7		Oppose	Oppose [Sunlight Access Qualifying Matter]	
Paul Clark/233.7	Anne Dingwall/ #FS2037.323	Oppose	Oppose [Sunlight Access Qualifying Matter] There are many cities in the world that have high density and are further from the equator than Christchurch. Caitriona Cameron/ #272.4		Seek Amendment	<p>The proposal should increase protection of sunlight access to maximise liveability features in new developments.</p> <ul style="list-style-type: none"> - The recession plane angles should be reduced to provide more sunshine access than in Auckland, not the same, to take account of the cold temperatures in Christchurch. - Recession planes and setbacks should be set to guarantee minimum sunshine access to adjoining properties, regardless of site width of those neighbouring properties. Recession plane angles should be reduced for those sites bordering sites narrower than the suggested standard of 15m. 	
Caitriona Cameron/272.4	Anne Dingwall/ #FS2037.388	Seek Amendment	<p>The proposal should increase protection of sunlight access to maximise liveability features in new developments.</p> <ul style="list-style-type: none"> - The recession plane angles should be reduced to provide more sunshine access than in Auckland, not the same, to take account of the cold temperatures in Christchurch. - Recession planes and setbacks should be set to guarantee minimum sunshine access to adjoining properties, regardless of site width of those neighbouring properties. Recession plane angles should be reduced for those sites bordering sites narrower than the suggested standard of 15m. <p>Impact of sunlight reduction on liveability of homes:</p> <ul style="list-style-type: none"> • Impact on existing houses <p>The proposed plans would significantly reduce sunlight access for many existing properties, with the result that many currently warm, healthy homes would no longer be so.</p> <ul style="list-style-type: none"> • Reduction in sunshine hours <p>The proposed variation to recession planes does not compensate sufficiently for reduced sunshine hours and solar strength in Christchurch.</p> <p>The proposal states: <i>"The sun's angle in Christchurch is different to its angle in Auckland, and the colder climate here means each hour of sunlight has greater benefit. The Sunlight Access Qualifying Matter aims to give Christchurch developments under the MDRS the same amount of sunlight access as Auckland developments."</i> (Housing and Business Choice, p. 20)</p> <p>However, the proposed new recession planes address only one of these concerns. The altered recession allows for a similar number of days/hours with no sun in Christchurch as in Auckland, but does not address the second point about the greater need for sunlight. A true equivalent with Auckland would require even more generous recession angles to account for this difference.</p> <ul style="list-style-type: none"> • Impact of site width <p>The proposed recession planes (and setbacks) do not provide equitable outcomes for sites that are smaller than the model assumptions.</p> <p>The proposal states: <i>"15m is a common site width in Christchurch and was a standard site used in subdivision until around 1970 ... It is the dominant site in the inner suburbs and around older centres such as Papanui, Riccarton and Spreydon. It is regarded as being important that the rules allow for 3 storey developments on these sites and if they do, it can be assumed that development will be possible elsewhere on the generally wider sites. Whilst there are some narrow sites around, these are a minority. Ensuring 15m wide sites can be developed will ensure that most sites in the city are suitable for 3 storey units."</i> (Technical Report – Residential Recession Planes in Christchurch, p.10)</p>	Support

			<p>Also, the models for the Sunlight Access (Technical Report – Residential Recession Planes in Christchurch) assume the site on the southern boundary of a new development has a 4m setback from its north boundary.</p> <p>The reality is that there are sites narrower than 15m, often with a setback from the north boundary of less than 4m. (There are many such sites in Rattray St.) The proposed recession planes will mean new developments on their northern boundaries will have a greater impact than the norm. Recession planes and setbacks need to provide an equitable outcome for sites regardless of dimensions.</p>	
Ian Chesterman/ #273.7		Oppose	[S]eek[s] that the council drop [the Sunlight Access] qualifying matter.

Historic Places Canterbury/ #835.17		Support	The submitter supports sunlight access being a qualifying matter in the medium density zone.	
Historic Places Canterbury/835.17	Anne Dingwall/ #FS2037.604	Support	The submitter supports sunlight access being a qualifying matter in the medium density zone. The submitter supports making sunlight access a qualifying matter so that recession planes can be adjusted to allow Christchurch developments under the MDRS to have the same amount of sunlight access as Auckland developments. Furthermore, we would argue that a similar amount of sunlight access to Auckland represents a bare minimum of what is acceptable because, with the lower temperatures experienced in Christchurch over winter, maximising sun access is a desirable objective not only to mitigate the need for greater energy use associated with heating but also to enhance health and well-being.	Support

Martin Snelson/ #220.7		Seek Amendment	Increase setbacks	
Cynthia Snelson/ #221.7		Seek Amendment	Increase setbacks	
Deans Avenue Precinct Society Inc./ #222.11		Oppose	Oppose any further reduction in setbacks	
Deans Avenue Precinct Society Inc./222.11	Anne Dingwall/ #FS2037.311	Oppose	<p>Oppose any further reduction in setbacks</p> <p>The current District Plan rules for medium density zoning already cause loss of sunlight to neighbouring dwellings when one house in the centre of a section is replaced with a block of 2-3 storey units with minimum outdoor areas. This will be exacerbated with taller 4-6 storey buildings and reduced minimum setbacks amongst the existing housing.</p> <p>Privacy is already often compromised with blocks of 2 storey units on the typically small, narrow sections range) looking into adjacent windows or outdoor areas</p>	Support
Caitriona Cameron/ #272.5		Seek Amendment	<p>The proposal should increase protection of sunlight access to maximise liveability features in new developments.</p> <ul style="list-style-type: none"> - The recession plane angles should be reduced to provide more sunshine access than in Auckland, not the same, to take account of the colder temperatures in Christchurch. - Recession planes and setbacks should be set to guarantee minimum sunshine access to adjoining properties, regardless of site width of those neighbouring properties. Recession plane angles should be reduced for those sites bordering sites narrower than the suggested standard of 15m. 	
Exsto Architecture/ #293.2		Seek Amendment	That the strike out of the NIL text be removed in table clause iv of provision 14.5.2.7.	
Kate Gregg/ #381.18		Seek Amendment	That Character Areas have a range of other special limits on built form, dependent on the values of that particular Character Area, including:	

			<ul style="list-style-type: none"> - the width of building frontages - landscaping - setbacks (larger than typical) - building coverage - outdoor living space requirements - minimum glazing facing the street - fencing - garaging and car ports - building separation <p>Generally the built form requirements are stricter than the underlying zoning would otherwise allow. If these rules are not met, resource consent is needed (restricted discretionary activity status).</p>	
Colin Dunn/ #383.1		Seek Amendment	[That] 2 and 3 level buildings [are required] to be more than 1 meter from the boundary	
Sonia Bell/ #431.3		Seek Amendment	1m in from side and rear boundary is too small.	
Beverley Nelson/ #469.4		Seek Amendment	Amend rule to increase 1m setback from boundary to increase sunlight access and privacy.	
Diane Gray/ #504.7		Seek Amendment	Seek amendment to the proposed residential setbacks to keep the existing setbacks as they are.	
James Carr/ #519.24		Seek Amendment	A better solution than retaining the current height limit and recession plane rules in heritage areas might be to adopt the MDRS rules in these areas, but apply much stricter limits on site coverage, especially hard site coverage, as well as front (and maybe side) setbacks to work with the existing streetscape.	
David McLauchlan/ #653.1		Seek Amendment	Have a building setback of 11.5m from the road centre line.	
Anne Ott/ #673.10		Seek Amendment	Seek amendment to require assessment of privacy issues and outlook, particularly with respect to acceptable window sizes overlooking neighbouring living areas, as part of the assessment process for all developments.	
David Ott/ #674.1		Seek Amendment	Seek amendment to require assessment of privacy issues and outlook, particularly with respect to acceptable window sizes overlooking neighbouring living areas, as part of the assessment process for all developments.	
Tony Dale/ #679.4		Support	I support changes to building heights, recession planes and set-backs to preserve access to sunlight in medium density zones. However, the Qualifying Matter should be more conservative to preserve sunlight to the same degree as is enjoyed under our current density rules.	
Wayne Bond/ #684.5		Seek Amendment	[That] the wording of [a.iii] be amended by replacing "300mm" with "600mm". Alternately the following could be added: "Where the eaves are between 300mm and 600mm wide fifty percent (50%) of the total eave area will be included in the building coverage calculation. Where eaves and roof overhangs exceed 600mm the 100% of those eaves or roof overhangs will be included in the building coverage calculation."	
Wayne Bond/684.5	Kāinga Ora/ #FS2082.344	Seek Amendment	[That] the wording of [a.iii] be amended by replacing "300mm" with "600mm". Alternately the following could be added: "Where the eaves are between 300mm and 600mm wide fifty percent (50%) of the total eave area will be included in the building coverage calculation. Where eaves and roof overhangs exceed 600mm the 100% of those eaves or roof overhangs will be included in the building coverage calculation." A standard building has historically had eaves of approximately 600mm in width. This lends to the generally accepted aesthetics of a building. Obviously, a covered deck needs the roof area to be included in the site coverage calculation.	Oppose
Canterbury / Westland Branch of Architectural Designers NZ/ #685.39		Seek Amendment	Add a further subclause to restrict garage doors to those that do not extend past the property boundary.	
Canterbury / Westland Branch of Architectural Designers NZ/685.39	Anne Dingwall/ #FS2037.1143	Seek Amendment	Add a further subclause to restrict garage doors to those that do not extend past the property boundary. When this rule is applied to a garage with a door facing the street, there is potential for some garagedoors to impact on the passage of pedestrians on the footpath. Should a garage door be 1.5m off the boundary and a tilting garage door is installed, this door may impede pedestrians.	Support

Canterbury / Westland Branch of Architectural Designers NZ/685.39	Kāinga Ora/ #FS2082.383	Seek Amendment	Add a further subclause to restrict garage doors to those that do not extend past the property boundary. When this rule is applied to a garage with a door facing the street, there is potential for some garagedoors to impact on the passage of pedestrians on the footpath. Ian McChesney/ #701.8		Seek Amendment	[S]etbacks should be set to guarantee minimum sunshine access to adjoining properties, regardless of site width of those neighbouring properties.	
Ian McChesney/701.8	Anne Dingwall/ #FS2037.560	Seek Amendment	[S]etbacks should be set to guarantee minimum sunshine access to adjoining properties, regardless of site width of those neighbouring properties. The proposed recession planes (and setbacks) do not provide equitable outcomes for sites that are smaller than the model assumptions. The proposal assumes 15m as a common site width, with the models for the sunlight access assuming the building on the southern boundary of a new development has a 4m setback from its north boundary (Technical Report – Residential Recession Planes in Christchurch, p.10). This report largely discounts narrower sites by stating "these are a minority". But the reality is that sites narrower than 15m are not uncommon in the proposed HDRZ in Riccarton, where setbacks of the existing residences from the north boundary can be less than 4m. Thus the proposed recession planes will impact even more on these properties. Recession planes and setbacks need to provide liveable and equitable outcomes for sites regardless of dimensions.	Support

Kāinga Ora – Homes and Communities /834.188	LMM Investments 2012 Limited/ #FS2049.107	Seek Amendment	<p>14.5.2.7 – Building setbacks</p> <p>1. Retain clause (a)(i) and (ii) as notified.</p> <p>2. Amend clause(a)(iii) as follows:</p> <p>Only road boundary: Eaves, and roofoverhangs, and porches to a maximum of 300mm 600mm in width measured from the wall of a building and guttering up to 200mm in width.</p> <p>3. Amend clause (a)(iv) as follows:All other accessory buildings or garages,including garages [sic] that internally access a residential unit.</p> <p>Support clauses (a)(i) and (ii) as implements MDRS as per Schedule 3A. Support clause (iii) enabling eaves and gutters to project into the road boundary setback. Extend the eave exemption to 600mm to align with standard building practice, along with enabling deeper porches which have a strong functional benefit. Such projections have a minimal impact on streetscape amenity and can have benefits through providing greater articulation in the street-facing facade. Clause (iv) – support reduction in setbacks for accessory buildings, subject to the limitations to height and length in the rule. A grammatical amendment would be helpful to clarify that accessory buildings do not need to have internal access to the dwelling</p>	Support		

Fire and Emergency/ #842.32		Oppose	Amend as follows: <i>Advice note:</i> <i>Building setback requirements are further controlled by the Building Code. This includes the provision for firefighter access to buildings and egress from buildings. Plan users should refer to the applicable controls within the Building Code to ensure compliance can be achieved at the building consent stage. Issuance of a resource consent does not imply that waivers of Building Code requirements will be considered/granted.</i>	
Fire and Emergency/842.32	Orion New Zealand Limited/ #FS2056.29	Oppose	Amend as follows: <i>Advice note:</i> <i>Building setback requirements are further controlled by the Building Code. This includes the provision for firefighter access to buildings and egress from buildings. Plan users should refer to the applicable controls within the Building Code to ensure compliance can be achieved at the building consent stage. Issuance of a resource consent does not imply that waivers of Building Code requirements will be considered/granted.</i> As set out in section 1.3.4 of this submission, Fire and Emergency have concerns around the increased risk of fire spreading as a result of reduced boundary setbacks. Reduced setbacks can inhibit Fire and Emergency personnel from getting to the fire source or other emergency. The difficulty of access may also increase the time for fire to burn, thereby increasing the heat radiation in a confined area. Fire and Emergency acknowledge that firefighting access requirements and building setback controls are managed through the New Zealand Building Code (NZBC) however consider it important that these controls are brought to the attention of plan users (i.e. developers) early on in the resource consent process so that they can incorporate the NZBC requirements early on in their building design. Fire and Emergency therefore request that, as a minimum, an advice note is included with built form standard 14.5.2.7 directing plan users to the requirements of the NZBC.	Support
Alan and Robyn Ogle/ #876.27		Seek Amendment	Seek inclusion of provisions that consider the safety effects of increased shade and frost upon the cycleways and footpaths within the zone.	
Otautahi Community Housing Trust/ #877.29		Seek Amendment	[Regarding 14.5.2.7] Retain clause (a)(i) and (ii) as notified. Amend clause (a)(iii) as follows: Only road boundary: Eaves, and roof overhangs, and porches to a maximum of 300mm 600mm in width measured from the wall of a building and guttering up to 200mm in width. Amend clause (a)(iv) as follows: All other accessory buildings or garages, including garages that internally access a residential unit.

			The heading of the rule is ambiguous; it appears to be a rule about street fencing but the rule is for fencing on all boundaries.	

Residential > Rules - Medium Density Residential Zone > Built form standards > Windows to street

Submission Number	Further Submission No	Position	Decision Requested	FS Position
Tobias Meyer/ #55.4		Support	Retain Rule 14.5.2.10 - Windows to street	
Tobias Meyer/55.4	Christchurch International Airport Limited/ #FS2052.167	Support	Retain Rule 14.5.2.10 - Windows to street Current glazing requirement for street fronts is good. Enclosed streets make better spaces where people want to be. Wider streets feel nicer with taller buildings.	Oppose
Andrew Evans/ #89.11		Seek Amendment	Amend 14.5.2.10 b. to remove all mention of a single gable exclusion and replace to exclude all roof spaces.	
Andrew Evans/ #89.26		Seek Amendment	Amend 14.5.2.10 a. to be 15% of street facing facade to be in glazing (proposed is 20%). or alternatively amend 14.5.2.10e to have concession to being 15% (proposed is 17.5%)	
Andrew Evans/89.26	Kāinga Ora/ #FS2082.47	Seek Amendment	Amend 14.5.2.10 a. to be 15% of street facing facade to be in glazing (proposed is 20%). or alternatively amend 14.5.2.10e to have concession to being 15% (proposed is 17.5%) 14.5.2.10a :20% is a big percentage if the building faces south- that's a lot of heat loss, loss of privacy: I would suggest reducing to 15% and retaining the exclusion for roof space Should item 1) not be acceptable then revise 14.5.2.10e to reduce the concession from 17.5% down to 15%	Support
Bob Burnett/ #186.1		Oppose	Oppose requirement for 20% glazed area to street frontage in particular on southern facing housing.	
Geordie Shaw/ #235.1		Seek Amendment	[That the standard allows more flexibility in achieving the intent of the policies]	
Kate Gregg/ #381.20		Seek Amendment	That Character Areas have a range of other special limits on built form, dependent on the values of that particular Character Area, including: <ul style="list-style-type: none"> - the width of building frontages - landscaping - setbacks (larger than typical) - building coverage - outdoor living space requirements - minimum glazing facing the street - fencing - garaging and car ports - building separation <p>Generally the built form requirements are stricter than the underlying zoning would otherwise allow. If these rules are not met, resource consent is needed (restricted discretionary activity status).</p>	

James Carr/ #519.13		Seek Amendment	Seeks a visual connection rule be added to the zone.	
James Carr/519.13	Anne Dingwall/ #FS2037.521	Seek Amendment	Seeks a visual connection rule be added to the zone. 20% glazing on the street front of a building is rather more than you might think, and on a south or west facing wall (especially in a well-insulated dwelling) is likely to be too much, making compliance with E2 of the NZBC or Passive House standards difficult or impossible. 10% might be a better minimum, but a better (if more vague) rule might be a requirement for a visual connection to the street, including not less than say two human-scaled windows (that at least look like someone might look out of them) per fifty square metres of wall, and a degree of articulation or texture scaled to be appreciated by people passing by on foot. Of course, it should be noted that smaller windows can have a lot more presence if they have some detail within or surrounding and drawing attention to them.	Support
Anne Ott/ #673.12		Seek Amendment	Seek amendment to require assessment of privacy issues and outlook, particularly with respect to acceptable window sizes overlooking neighbouring living areas, as part of the assessment process for all developments.	
Canterbury / Westland Branch of Architectural Designers NZ/ #685.46		Seek Amendment	Amend subclause (c) from 12m to 6m	
Canterbury / Westland Branch of Architectural Designers NZ/685.46	Anne Dingwall/ #FS2037.1150	Seek Amendment	Amend subclause (c) from 12m to 6m While moving the requirement to only the first 12m of a site probably excludes buildings towardsthe rear of a site, it still encompasses many potential alteration and addition projects where the 20%glazing rule becomes significantly onerous. Moreover, a 20% glazing rule applied, for example,11.5m off the boundary does not achieve the desired engagement with the street that the rule isintended to provide.	Support
Canterbury / Westland Branch of Architectural Designers NZ/685.46	Kāinga Ora/ #FS2082.390	Seek Amendment	Amend subclause (c) from 12m to 6m While moving the requirement to only the first 12m of a site probably excludes buildings towardsthe rear of a site, it still encompasses many potential alteration and addition projects where the 20%glazing rule becomes significantly onerous. Kāinga Ora – Homes and Communities / #834.193		Seek Amendment	<p>14.5.2.12 – Ground floorhabitable room</p> <p>Amend the rule as follows:</p> <p>a. Any building that includes aresidential unit shall:</p> <p>i. Where the residential unit fronts aroad or public open space, unlessbuilt over a separate ground floorresidential unit, have a habitableroom located at ground floor levelwith a minimum internaldimension of 3 metres; and</p> <p>ii. Any residential unit shall have atleast 50% of any ground floor areaas habitable rooms.</p> <p>a. Where a residential unit fronts aroad or public open space, it shallhave a habitable room with aminimum internal dimension of 3metres located at the ground floorlevel facing the frontage. This ruledoes not apply to upper-level unitsthat are built over a separateground floor residential unit; and</p> <p>b. Where the permitted height limit isover 11m (refer to Rule 14.5.2.3), a minimum of 50% of the ground floor area across the site shall beoccupied by habitable spaces and/orindoor communal living space. Thisarea may include pedestrian access tolifts, stairs, and foyers.</p> <p>c. This rule does not apply to residentialunits in a retirement village.</p>	
Kāinga Ora – Homes and Communities /834.193	LMM Investments 2012 Limited/ #FS2049.112	Seek Amendment	<p>14.5.2.12 – Ground floorhabitable room</p> <p>Amend the rule as follows:</p> <p>a. Any building that includes aresidential unit shall:</p>	Support

		<p>i. Where the residential unit fronts a road or public open space, unless built over a separate ground floor residential unit, have a habitable room located at ground floor level with a minimum internal dimension of 3 metres; and</p> <p>ii. Any residential unit shall have at least 50% of any ground floor area as habitable rooms.</p> <p>a. Where a residential unit fronts a road or public open space, it shall have a habitable room with a minimum internal dimension of 3 metres located at the ground floor level facing the frontage. This rule does not apply to upper-level units that are built over a separate ground floor residential unit; and</p> <p>b. Where the permitted height limit is over 11m (refer to Rule 14.5.2.3), a minimum of 50% of the ground floor area across the site shall be occupied by habitable spaces and/or indoor communal living space. This area may include pedestrian access to lifts, stairs, and foyers.</p> <p>c. This rule does not apply to residential units in a retirement village.</p> <p>The Operative Plan includes a rule controlling ground floor habitable rooms which is well established and appears to be working well. There are two key design outcomes sought, namely 1) the ground floor on the road frontage is habitable space rather than garaging in order to deliver positive streetscape outcomes; and 2) that at least 50% of the ground floor across the site is habitable space, to avoid the ground floor of complexes being overly dominated by garaging and undercroft parking areas. The proposed rule is sought to be amended to better articulate these two outcomes and to avoid developments arranged as horizontally stacked low-rise apartments being unnecessarily penalised through a requirement for every unit to individually have ground floor space. As all MRZ now has a height limit of 11m or more, clause (b) requires amendment, noting that the outcomes of 50% habitable remains as a valid outcome for the small areas of MRZ that have a height of less than 11m through QMs.</p>

Fred Coughlan/ #798.11		Seek Amendment	Washing line space should not be a dedicated area if a fold down system is proposed.	
Fred Coughlan/798.11	Francine Bills/ #FS2028.1	Seek Amendment	Washing line space should not be a dedicated area if a fold down system is proposed. This will allow integrating washing lines with outdoor living area to maximise efficient use of space for compact housing typologies.	Oppose
Fred Coughlan/798.11	Stantec/ #FS2032.41	Seek Amendment	Washing line space should not be a dedicated area if a fold down system is proposed. This will allow integrating washing lines with outdoor living area to maximise efficient use of space for compact housing typologies.	Support
Fred Coughlan/798.11	Stantec/ #FS2032.45	Seek Amendment	Washing line space should not be a dedicated area if a fold down system is proposed. This will allow integrating washing lines with outdoor living area to maximise efficient use of space for compact housing typologies.	Support
Fred Coughlan/798.11	Kāinga Ora/ #FS2082.582	Seek Amendment	Washing line space should not be a dedicated area if a fold down system is proposed. This will allow integrating washing lines with outdoor living area to maximise efficient use of space for compact housing typologies.	Support
Fred Coughlan/ #798.12		Seek Amendment	Clarify Storage requirement	
Fred Coughlan/798.12	Kāinga Ora/ #FS2082.583	Seek Amendment	Clarify Storage requirement The storage requirement drafting is confusing (e.g. it could be interpreted as needing 6m ³ of internal storage + 6m ³ covered and secured storage = 12m ² for a 1-bed unit). All units will effectively need sheds or lock ups, which may not be desirable for middle terrace units. It is accepted that PC14 requires bike parking on-site, but this can be achieved in common spaces where necessary. If outdoor storage is required, then outdoor living should be more enabling to discount the shed area from the calculation.	Support
Fred Coughlan/ #798.13		Seek Amendment	Amend waste management space requirement to be more flexible for communal bin areas and waste management plans.	
Fred Coughlan/798.13	Kāinga Ora/ #FS2082.584	Seek Amendment	Amend waste management space requirement to be more flexible for communal bin areas and waste management plans. Having communal bin areas which are a sum of the individual bin requirements is inefficient and does not provide flexibility for communal bin areas. There should be an exception for a waste management plan that reflects the estimated waste demand for a residential development that may also provide for greater frequency of collection and therefore less bin space (and the resulting land use efficiency).	Support
Retirement Villages Association of New Zealand Inc/ #811.63		Seek Amendment	Either delete Built Form Standard 14.5.2.13. or amend Standard 14.5.2.13 as follows to provide for retirement units: 14.5.2.13 Service, storage and waste management spaces [Standard as notified] This standard does not apply to retirement villages or their associated units within.	
Retirement Villages Association of New Zealand Inc/811.63	Summerset Group Holdings Limited/ #FS2097.58	Seek Amendment	Either delete Built Form Standard 14.5.2.13. or amend Standard 14.5.2.13 as follows to provide for retirement units: 14.5.2.13 Service, storage and waste management spaces	Support

			[Standard as notified] This standard does not apply to retirement villages or their associated units within. The RVA oppose 14.5.2.13, which is inconsistent with the Enabling Housing Act. The MDRS does not address service, storage and waste management spaces. Further, this standard does not account for the functional and operational needs of retirement villages and therefore, the RVA seeks for retirement villages to be excluded.	
Carter Group Limited/ #814.158		Oppose	Oppose 14.5.2.13. Seek that this be deleted.	
Carter Group Limited/814.158	Stantec/ #FS2032.42	Oppose	Oppose 14.5.2.13. Seek that this be deleted. Seek Amendment
Kāinga Ora – Homes and Communities / #834.194		Seek Amendment	14.5.2.13 - storage 1. Retain clause (a). 2. Delete clause (b). 3. Alternatively storage could be addressed as an assessment matter for developments of 4 or more units.	
Kāinga Ora – Homes and Communities /834.194	Stantec/ #FS2032.43	Seek Amendment	14.5.2.13 - storage 1. Retain clause (a). 2. Delete clause (b). 3. Alternatively storage could be addressed as an assessment matter for developments of 4 or more units. The requirement for outdoor storage for bins and washing lines is an Operative Plan rule that appears to be working well. Clause (a) relating to outdoor storage is supported, although may be an unnecessary level of regulation if this matter is adequately covered by urban design assessment matters. Clause (b) is a new rule in PC14. It requires a minimum amount of internal storage to be provided. Whilst internal storage spaces are useful, this rule is considered to be an unnecessary level of regulation. It is noted that clause (a) only applies to 4 or more units, while clause (b) applies to all units. i.e. it is unclear what the rationale is behind the different number of units that trigger the clauses.	Oppose
Kāinga Ora – Homes and Communities /834.194	LMM Investments 2012 Limited/ #FS2049.113	Seek Amendment	14.5.2.13 - storage 1. Retain clause (a). 2. Delete clause (b). 3. Alternatively storage could be addressed as an assessment matter for developments of 4 or more units. The requirement for outdoor storage for bins and washing lines is an Operative Plan rule that appears to be working well. Clause (a) relating to outdoor storage is supported, although may be an unnecessary level of regulation if this matter is adequately covered by urban design assessment matters. Kate Gregg / #381.21		Seek Amendment	<p>That Character Areas have a range of other special limits on built form, dependent on the values of that particular Character Area, including:</p> <ul style="list-style-type: none"> - the width of building frontages - landscaping - setbacks (larger than typical) - building coverage - outdoor living space requirements - minimum glazing facing the street - fencing - garaging and car ports - building separation <p>Generally the built form requirements are stricter than the underlying zoning would otherwise allow. If these rules are not met, resource consent is needed (restricted discretionary activity status).</p>	
Fred Coughlan / #798.18		Seek Amendment	Amend to control garaging on the street facing boundary only as that is the primary view.	
Fred Coughlan / 798.18	Kāinga Ora / #FS2082.589	Seek Amendment	Amend to control garaging on the street facing boundary only as that is the primary view. This efficacy of this standard is questionable as 3 residential units may all face the street with garaging (provided glazing and transportation requirements are met). That presents a compelling permitted baseline. Limiting garaging to the rear façade also does not allow for side elevation garaging, which is common, efficient, usually screened from the street by front dwellings. This should be amended to control garaging on the street facing boundary only as that is the primary view.	Support
Retirement Villages Association of New Zealand Inc / #811.64		Seek Amendment	[S]eek[s] to amend Standard 14.5.2.15 to exclude retirement units.	
Retirement Villages Association of New Zealand Inc / 811.64	Summerset Group Holdings Limited / #FS2097.59	Seek Amendment	[S]eek[s] to amend Standard 14.5.2.15 to exclude retirement units. While the RVA does not take a view on garage and carport building locations for typical residential units, retirement village	Support

			units are designed differently to residential units and should therefore be excluded from this standard. The provision is also substantially more stringent than for permitted developments, which have no controls on garaging and carport building locations and as such is disproportionate

Kāinga Ora – Homes and Communities /834.197	LMM Investments 2012 Limited/ #FS2049.116	Oppose	14.5.2.16 – Building reflectivity; and RD29 Delete rule. New rule that applies to the Residential Hills Precinct – Christchurch as had residential hill suburbs for over 100 years and these areas have not given rise to excessive glare issues from dwellings. Whilst rules controlling reflectivity can be appropriate in rural ONLs where the key outcome is to minimise the visibility of structures, such an outcome is not appropriate in residential suburbs where housing is an inherent part of the landscape. Requiring low light reflectance values means that buildings have to be finished in dark colours which can exacerbate urban heat island effects and require increased use of air conditioning to reduce unit heating in summer.	Support
Ian Cumberpatch Architects Ltd/ #2076.29		Seek Amendment	Amend subclause (a) from 30% to 45% LRV.

Kāinga Ora – Homes and Communities / #834.97		Oppose	Delete the Key Transport Corridors – CitySpine Qualifying Matter and all associated provisions.	
Kāinga Ora – Homes and Communities /834.97	Catholic Diocese of Christchurch/ #FS2044.66	Oppose	Delete the Key Transport Corridors – CitySpine Qualifying Matter and all associated provisions. Kāinga Ora oppose the 'CitySpine' being a qualifying matter and considers this to be inconsistent with the requirements of Section 77L. The associated rules require buildings and outdoor living spaces to be set back from spine road corridors in both residential and commercial zones. In commercial zones there is a direct conflict in urban design outcomes (and rules) where the Key Pedestrian Frontage rules require buildings to be built up to the road boundary in order to deliver good urban design outcomes and facilitates a continuous street edge (often with veranda cover for pedestrians). It is understood that the intention of the rule is to enable road widening in the future to accommodate public rapid transit. If Council's intention is to acquire land in the future to facilitate public works then it should use the designation powers available to it. Given the highly developed nature of these existing corridors with lengthy sections of commercial property built to the road boundary, it is unclear how any corridor-long road widening will occur without major land acquisition and demolition.	Support
Kāinga Ora – Homes and Communities /834.97	Carter Group Limited/ #FS2045.70	Oppose	Delete the Key Transport Corridors – CitySpine Qualifying Matter and all associated provisions. Kāinga Ora – Homes and Communities / #834.198		Oppose	14.5.2.17 – Location of outdoor mechanical ventilation; And RD30 Delete the rule.	
Kāinga Ora – Homes and Communities /834.198	LMM Investments 2012 Limited/ #FS2049.117	Oppose	14.5.2.17 – Location of outdoor mechanical ventilation; And RD30 Delete the rule. New rule that requires a 3m setback if at ground level between a residential unit and the road or a shared accessway. Presumably it is visual effects that are the concern. The rule constitutes a level of design detail that is unnecessary to regulate. If mounted at ground level then even a short 1.2m high fence is sufficient to visually screen in a similar manner to the proposed rule on bin storage. As drafted the rule applies to mechanical units on the ground, whereas they would be permitted if wall-mounted despite having a worse visual outcome. It also applies to mechanical units located adjacent to internal boundaries where the property next door (over the fence) has an accessway.	Support
Ian Cumberpatch Architects Ltd/ #2076.30		Seek Amendment	Amend subclause (a) to require outdoor units visible from the street to be screened.	
Ian Cumberpatch Architects Ltd/2076.30	Kainga Ora - Homes and Communities/ #FS2099.42	Seek Amendment	Amend subclause (a) to require outdoor units visible from the street to be screened. While this rule pushes the location of external units back from the street, they are still visible.	Oppose

Submission Number	Further Submission No	Position	Decision Requested	FS Position
Diane Gray/ #504.5		Seek Amendment	Seek amendment to the proposed residential setbacks to keep the existing setbacks as they are.	
Waka Kotahi (NZ Transport Agency) / #805.7		Oppose	Delete the City Spine Transport Corridor Qualifying Matter.	
Waka Kotahi (NZ Transport Agency) /805.7	Anne Dingwall/ #FS2037.1468	Oppose	Delete the City Spine Transport Corridor Qualifying Matter. Waka Kotahi opposes the use of the City Spine Transport Corridor Qualifying Matter to protect the corridors of Riccarton and Papanui Roads for uncertain future uses of the corridor. Many sections of these roading corridors are areas identified as high density zoning to allow for the greatest level of intensification and if developed as such may provide for improved active and public transport services. Waka Kotahi does not agree with there being barriers or restrictions to enabling landowners from developing their site to its maximum capacity where there is uncertainty on the future use of these corridors. As proposed, if a landowner wishes to build within the 4m setback (where the road reserve is less than 24m wide) then a resource consent is required with consideration of the matters of discretion. These matters of discretion require consideration of potential future use of the transport corridor, which is not primarily related to protecting amenity values. It is recommended that Council delete the qualifying matter in its entirety.	Oppose

Martin Jones/ #15.1		Seek Amendment	Introduce either Residential Heritage Area or Residential Character Area over Cashmere View Street. Resource consent should be required for any residential development.	
Martin Jones/15.1	Anne Dingwall/ #FS2037.51	Seek Amendment	Introduce either Residential Heritage Area or Residential Character Area over Cashmere View Street. Resource consent should be required for any residential development. I support my street becoming a heritage value residential character zone. Also I would like resource consent be a requirement before any development can take place.	Support

Martin Jones/15.1	Anne Dingwall/ #FS2037.52	Seek Amendment	Introduce either Residential Heritage Area or Residential Character Area over Cashmere View Street. Resource consent should be required for any residential development. I support my street becoming a heritage value residential character zone. Also I would like resource consent be a requirement before any development can take place.	Support
Rex Drummond/ #18.1		Seek Amendment	Resource consent should be required for any development within a Residential Character Area.	
Rex Drummond/18.1	Anne Dingwall/ #FS2037.53	Seek Amendment	Resource consent should be required for any development within a Residential Character Area. Faiview Street (Cashmere) should be within a Residential Character Area, with resource consent required for any development.	Support
Christine Parkes/ #25.1		Seek Amendment	That the area of Cashmere View St, Fairview St and nearby Ashgrove Tce be made a suburban character area. That resource consent be required before ANY development can proceed.	
Sharina Van Landuyt/ #41.1		Support	Support[s] the proposal to include Ryan Street within a Residential Character Area.	
Sharina Van Landuyt/41.1	Anne Dingwall/ #FS2037.64	Support	Support[s] the proposal to include Ryan Street within a Residential Character Area. We have a beautiful street with nearly every house being a character bungalow and feel it is incredibly special to Christchurch.	Support
Sharina Van Landuyt/ #41.2		Oppose	Oppose[s] Ryan Street being designated as a medium density residential zone.	
Sharina Van Landuyt/41.2	Anne Dingwall/ #FS2037.65	Oppose	Oppose[s] Ryan Street being designated as a medium density residential zone. We have a beautiful street filled with character bungalows and want to keep it that way.	Support
Andrew Laurie/ #92.3		Seek Amendment	The area near and including Ashgrove Tce, Fairview St and Cashmere View St should be a Heritage Value Residential Character zone, and a resource consent should be required before any development can proceed.	
Andrew Laurie/92.3	Anne Dingwall/ #FS2037.167	Seek Amendment	The area near and including Ashgrove Tce, Fairview St and Cashmere View St should be a Heritage Value Residential Character zone, and a resource consent should be required before any development can proceed. On Plan Change 13/14: The area near and including Ashgrove Tce, Fairview St and Cashmere View St should be designated a Heritage Value Residential Character zone, because the character and style of houses in this area are of value and enhance the aesthetic of the neighbourhood, which would be compromised by the type of buildings permissible under the MRZ rules.	Support
Ian Tinkler/ #117.1		Support	It is important that Christchurch be developed in a sustainable way.	
Ian Tinkler/117.1	Anne Dingwall/ #FS2037.197	Support	It is important that Christchurch be developed in a sustainable way. It does appear that the population of greater Christchurch will continue to increase for the foreseeable future. The area covered by the plan is large. While the population will continue, there will not be a time when the residential property will be converted to having the full entitlement multistorey units as permitted in the plan. If that were the case, the population of Christchurch would be far larger than expected. It is far better that land currently used for housing provides more places to live, rather than increasing Christchurch into productive food-producing areas within the city and neighbouring district councils.	Support
Cameron Matthews/ #121.7		Oppose	Request removal of the Cashmere [Character Areas]: (Hackthorn Road), Beckenham Loop, Roker and Penrith [streets].	
Cameron Matthews/121.7	Christchurch International Airport Limited/ #FS2052.197	Oppose	Request removal of the Cashmere [Character Areas]: (Hackthorn Road), Beckenham Loop, Roker and Penrith [streets]. or Cashmere CA (Hackthorn Road): By not allowing increased density here, where public transport service provision is good (see FIGURE 17 in section: LOW PUBLIC TRANSPORT ACCESSIBILITY AREA for more detail [below]):	Oppose

Figure 17 Low Public Transport Accessibility areas (purple hatching) highlighted in red, vs. identical PT provision in blue area. Special/Residential Character Area Qualifying Matter (SCA QM) also proposed within blue zone, preventing densification here too.

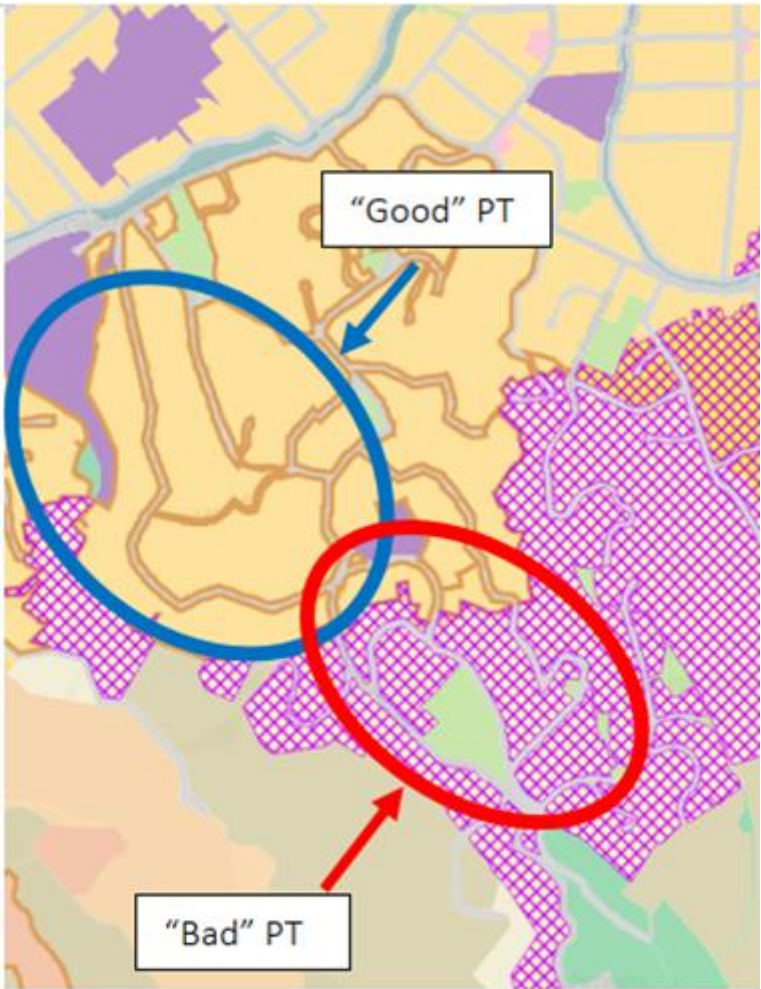

we would be encouraging growth at potentially low densities elsewhere, with worse local business and employment, and worse public and active transport access, and other negative externalities. That impact runs counter to NPS-UD, specifically: Objective 8(a); Policy 1(3); Policy 1(c). As evident, none of the characteristics identified are adversely affected by residential density, excluding “Large, two-storey dwellings on typical sites”. Nothing about being allowed to build to 11m height implies you must remove a front garden, or the basalt retaining wall at the street, or not build with timber cladding, or dormers, or any other specific features that were identified as defining the character of the area. Indeed, many identified characteristics, even if they were considered somehow consistent across the spatial extent of the proposed QM, are not managed any differently via application of the proposed QM. To imply, therefore, that a small change in permitted built form (3 units, 3 storeys) is, of itself, some adverse effect – thus requiring restriction via a QM – solely because it is different to the previously permitted built form (1 unit, 2 storeys) is, in my view, not consistent with NPS-UD.

Regarding Beckenham Loop:

There is nothing special about the housing in this area that’s not also found in nearby Somerfield, or any of the rest of the city built circa 1930. These suburbs all have a mix of older and newer houses in a normal inner-suburban setting. The “character” is not “special”. It’s certainly not special enough to warrant the forced retention of low-density housing in an area proximal to the city centre, both the Orbiter and the #1 bus (both high-frequency core routes), and decent cycleway provision along Tennyson through to the city via Strickland/Antigua Street cycleway.

Regarding Roker/Penrith:

The SCA covering Roker and Penrith Streets is at least fairly limited in terms of spatial extent but identifies nothing “special” about the “character” of area that would be negatively affected by increased housing density. These streets are both aesthetically nice, but the aspect that makes them this way is not the ageing and incohesive mix of older and newer low-density houses hidden behind trees and parked cars. What gives these areas particularly valuable character is, only, the regular lining of mature street trees. Increased housing density does not reduce this local amenity, it shares it. The SCA proposed meanwhile, does nothing to protect these trees, it only enforces retention of low-density housing behind them.

			<p>Roker is also part of the Quarryman’s trail, one of the most-used cycleways in the city, which also serves riders travelling to or from nearby Penrith. Sitting between Sydenham South and Barrington local/town centres and being proximal to the city centre via cycling or other modes, it’s an area perfectly suited for increased density.</p>	
<p>Cameron Matthews/121.7</p>	<p>Kāinga Ora/ #FS2082.53</p>	<p>Oppose</p>	<p>Request removal of the Cashmere [Character Areas]: (Hackthorn Road), Beckenham Loop, Roker and Penrith [streets].</p> <p>or Cashmere CA (Hackthorn Road): By not allowing increased density here, where public transport service provision is good (see FIGURE 17 in section: LOW PUBLIC TRANSPORT ACCESSIBILITY AREA for more detail [below]):</p>  <p><i>Figure 17 Low Public Transport Accessibility areas (purple hatching) highlighted in red, vs. identical PT provision in blue area. Special/Residential Character Area Qualifying Matter (SCA QM) also proposed within blue zone, preventing densification here too.</i></p> <p>we would be encouraging growth at potentially low densities elsewhere, with worse local business and employment, and worse public and active transport access, and other negative externalities. That impact runs counter to NPS-UD, specifically: Objective 8(a); Policy 1(3); Policy 1(c). As evident, none of the characteristics identified are adversely affected by residential density, excluding “Large, two-storey dwellings on typical sites”. Nothing about being allowed to build to 11m height implies you must remove a front garden, or the basalt retaining wall at the street, or not build with timber cladding, or dormers, or any other specific features that were identified as defining the character of the area. Indeed, many identified characteristics, even if they were considered somehow consistent across the spatial extent of the proposed QM, are not managed any differently via application of the proposed QM. Murray Walsh/ #123.1		Seek Amendment	<p>Introduce a resource consent requirement as a restricted discretionary activity to help us better protect Character Areas. The following rules are proposed:</p> <p>Proposed Rules (Medium Density Residential Zone)</p> <table border="1"> <thead> <tr> <th>Activity Status</th> <th>Activity within a Character Area Overlay</th> <th>Activity if not in a Character Area Overlay</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> <td></td> </tr> </tbody> </table>	Activity Status	Activity within a Character Area Overlay	Activity if not in a Character Area Overlay				
Activity Status	Activity within a Character Area Overlay	Activity if not in a Character Area Overlay								

			Permitted	Within any Character Area Overlay, the interior conversion of an existing residential unit into two residential units.	No equivalent rule – no density limit		
			Controlled	<p>In a Character Area Overlay,</p> <p>a. The erection of new residential unit to the rear of an existing residential unit on the same site, where it is:</p> <p>i. less than 5 metres in height; and</p> <p>ii. meets the built form standards applicable to the Character Area Overlay within which it is located.</p> <p>b. Any application arising from this rule shall not be limited or publicly notified.</p>			
			Restricted Discretionary	Residential units in the Character	No density limit.		

				Area Overlay that do not meet Rule 14.5.3.2.7 – Number of residential units per site – maximum of 2 residential units per site.	
			Restricted Discretionary	<p>Within a Character Area Overlay:</p> <p>a. The demolition or removal of a building greater than 30m² on the site, relocation of a building onto the site, erection of new buildings and alterations or additions to existing buildings, accessory buildings, fences and walls associated with that development.</p> <p>b. This rule does not apply:</p> <p>i. where 14.5.3.1.2 C1 applies.</p>	

			<p>ii. to fences that meet the applicable built form standard 14.5.3.2.12 for that Character Area;</p> <p>iii. to accessory buildings that are less than 30m² and located to the rear of the main residential unit on the site and are less than 5 metres in height; iv. to fences that are located on a side or rear boundary of the site, except where that boundary is adjacent to a public space.</p> <p>c. Activities that do not meet Built Form standard 14.5.3.2.6.</p> <p>d. Any application arising from this rule shall not be limited or publicly notified.</p>	
			Building height	In most places,

			controls (dependent on the area, but the current Character Areas have 7m and 5.5 height limits proposed)	11 metres	
			<p>Character Areas have a range of other special limits on built form, dependent on the values of that particular Character Area, including:</p> <ul style="list-style-type: none"> - the width of building frontages - landscaping - setbacks (larger than typical) - building coverage - outdoor living space requirement s - minimum glazing facing the street - fencing - garaging and car ports 		

			<p>- building separation</p> <p>Generally the built form requirements are stricter than the underlying zoning would otherwise allow.</p> <p>If these rules are not met, resource consent is needed (restricted discretionary activity status).</p>							
Property Council New Zealand/ #242.20		Seek Amendment	In broad terms, we are comfortable with the proposed intention of introducing resource consent requirements as a restricted discretionary activity to help protect Character Areas. However, given the scale of the proposal and introduction of 11 new residential heritage areas, we wish to highlight the importance of ensuring that Christchurch has sufficient development capacity. This can be achieved through enabling and encouraging greater height and density within high density zone precincts, town centres and metropolitan centres.							
Ann-Mary & Andrew Benton/ #698.4		Seek Amendment	<p>In recognition of the status of a Qualifying Matter, ...propose introducing a resource consent requirement as a restricted discretionary activity...Subdivision will also be more restrictive, depending on the zone and area...</p> <p>Rules for the Character Areas will differ depending on the character values of each area, as well as the District Plan zone in which the character area is located. The character values that are already being used to assess any development designs submitted...are proposed to remain the same.</p> <p>Proposed Rules (Medium Density Residential Zone)</p> <table border="1"> <thead> <tr> <th>Activity Status</th> <th>Activity within a Character Area Overlay</th> <th>Activity if not in a Character Area Overlay</th> </tr> </thead> <tbody> <tr> <td>Permitted</td> <td>Within any Character Area Overlay, the interior conversion of an existing residential unit into two</td> <td>No equivalent rule – no density limit</td> </tr> </tbody> </table>	Activity Status	Activity within a Character Area Overlay	Activity if not in a Character Area Overlay	Permitted	Within any Character Area Overlay, the interior conversion of an existing residential unit into two	No equivalent rule – no density limit

			measurements on original character bungalows (at least in our area) whose general street scene these rules seek to protect. For example, the proposed building setback from the street (8 m), minimum building width facing the street (10 m), and minimum building floor area (150 m2) are sometimes larger than equivalent measurements on original character bungalows (at least in our area) whose general street scene these rules seek to protect. This inconsistency could easily be solved by allowing some variation from the above limits where the proposed development matches its setting (e.g. has setback the same as neighbouring original houses in the area even if <8 m, and so on). Allowing some flexibility to match the site could be effective at protecting street scene with less restriction on the design of new housing.

Further, they blur the line between the protection of historic heritage values as set out under s6(f) of the RMA, and amenity values as set out under section 7 of the RMA. This is especially the case where both character and heritage area overlays apply to the same geographic area. Kāinga Ora questions the planning method and assessment undertaken to determine the proposed provisions. Kāinga Ora considers that any such provisions and values identified should be ‘managed’ rather than ‘protected’ in the District Plan. Kāinga Ora seeks the provisions as proposed are deleted and that further analysis is undertaken to determine the exact values of the resources that the Council seeks to manage in the District Plan.</p>	Support
Kāinga Ora – Homes and Communities /834.41	Carter Group Limited/ #FS2045.34	Seek Amendment	<p>14.5.3.2.3 Building height - Character Area Overlays</p> <p>1. Delete all new or extended character areas as qualifying matters and undertake further analysis to determine the exact values of the resources that the Council seeks to manage in the District Plan.</p> <p>2. For existing character areas retain the controlled activity status for new buildings that exists in the Operative Plan - Rule 14.5.3.1.2 C1. 14.5.3.2.3 Building height – Character Area Overlays, and 14.5.3.2.5 – 14.5.3.2.14 Built form rules – Character Area Overlays.</p> <p>3. In the event that the Character Area qualifying matter remains, explicit provision is sought for the ability to develop Papakāinga/Kāinga Nohoanga, noting that local Rūnanga have purchased the former Lyttelton West School Site.</p> <p>Kāinga Ora support, in principle, the management of character as a qualifying matter. However, Kāinga Ora does not consider appropriate justification has been provided for the proposed new or extended ‘character areas’ set out in PC13 and PC14 to demonstrate that they contain specific characteristics that make the level of development provided by the MDRS or policy 3 inappropriate in the area. Further, they blur the line between the protection of historic heritage values as set out under s6(f) of the RMA, and amenity values as set out under section 7 of the RMA. This is especially the case where both character and heritage area overlays apply to the same geographic area. Kāinga Ora questions the planning method and assessment undertaken to determine the proposed provisions. Kāinga Ora considers that any such provisions and values identified should be ‘managed’ rather than ‘protected’ in the District Plan. Kāinga Ora seeks the provisions as proposed are deleted and that further analysis is undertaken to determine the exact values of the resources that the Council seeks to manage in the District Plan.</p>	Support

Melissa Macfarlane/ #1003.9		Seek Amendment	Amend Rule 14.5.3.2.3(b)(v)(b) to enable 2 storey buildings.

Andrew Evans/ #89.5		Oppose	Oppose the proposed provision 14.5.2.2c-e Landscaped area and tree canopy cover.	
Andrew Evans/89.5	Anne Dingwall/ #FS2037.161	Oppose	<p>Oppose the proposed provision 14.5.2.2c-e Landscaped area and tree canopy cover. This rule has all the hall marks of a council fee grab chasing the latest trendy moral panic of tree loss, it will provide a negative incentive to develop & intensify, it will also add a large amount of red tape trying to calculate what this cost will be.</p> <p>From Stats New Zealand only 1%* of the total land area in New Zealand is urbanised so this is not a national problem, if it is a problem it is a very localized problem as people have the ability in Christchurch to be around trees in a short period of time- the Port Hills, Hagley Park, Otakaro Avon River Corridor, local parks & reserves, street trees and obviously outside Christchurch in the other 99% non-urbanised areas.</p> <p>Negative incentive: I can see it adding easily \$2000-4000 per project, but it might be more (1-2 large mature trees trees) to pretty much any multi-unit development, that's a guess, I have not seen any council analysis on a standard current development to see what it would add. Every cost makes it harder to develop, it all adds up. I assure you a developer does take an extra \$2-4k cost for no return very seriously</p> <p>Red tape: how is it calculated: I tried to follow the trail & its not easy- I ended up at a excel spreadsheet with very large minimum berm and planting widths for most trees & a very unsubtle table of Size and soil guide which gives projected canopy size- are we going to have to hire an arborist or landscape architect for every project? This is not making (see https://ccc.govt.nz/environment/trees-and-vegetation/tree-and-urban-forest-plan/tree-planting-guide)&</p> <p>*https://www.stats.govt.nz/news/new-report-shows-impact-of-demands-on-land-in-new-zealand "While urban land cover continues to make up one percent of total land area in New Zealand, we can see that urban and residential expansion is outwards onto productive land, which creates tension between the use of land for housing and land for agriculture."</p>	Oppose
Megan Power/ #769.6		Seek Amendment	<p>Amend to remove bold, strike through text</p> <p>ii. Within the Character Area Overlay for all activities:</p> <p>B. A landscaping strip with a minimum width of 2.1 metres shall be planted along the rearboundary, and shall include trees that will grow to a minimum height of 6–8 metres.</p>

Emily Arthur /1036.3	Kāinga Ora/ #FS2082.830	Seek Amendment	<p>Allow up to 70% site coverage on a site by site basis rather [than] having a blanket rule of 40%.</p> <p>I live at 128 Chester Street East. My house has been designated as 'contributing' to the character of the street. My property has significant structural issues and it is not cost effective for me to fix it.</p> <p>I am opposed to the rule that states that houses must only take up 40% of the land area when rebuilt.. This is not a rule to protect heritage value as many old houses in the street cover more than this. Also - if you cannot see into the back yard why does it matter if it takes up more than 40% ? I think this call needs to be made on a case by case basis. Having Chester Street East designated a heritage street has drastically affected the financial value of my investment. Allowing me to rebuild to a decent site coverage while still maintaining the heritage value would go some way towards lessening this financial impact.</p>	Oppose

Victoria Neighbourhood Association (VNA) / #61.13		Seek Amendment	Any new residential development within existing HRZ and HRZ Precincts be held at 14m height limit and with current recession plains (status quo); any further height enablement be considered but only with a notified resource consent and neighbourhood input. By doing this any new development is considered on the unique merits of the site and impact on the neighbouring property and neighbourhood, width of the street, width of section, consideration of urban design, infrastructure, and the impact on the existing community's social, economic and environmental and cultural wellbeing.	
Victoria Neighbourhood Association (VNA) /61.13	Clare Dale/ #FS2029.8	Seek Amendment	<p>Any new residential development within existing HRZ and HRZ Precincts be held at 14m height limit and with current recession plains (status quo); any further height enablement be considered but only with a notified resource consent and neighbourhood input. By doing this any new development is considered on the unique merits of the site and impact on the neighbouring property and neighbourhood, width of the street, width of section, consideration of urban design, infrastructure, and the impact on the existing community's social, economic and environmental and cultural wellbeing.</p> <p>The current central city residential area in Christchurch consists of old streets and old sites, (originally for small workers cottages), many residential sites in within the 4 Avenues are therefore very small (often less than 300 sq m). It is inappropriate to enable 4-6 storey high buildings in areas without ruining the economic, social and cultural aspects of the existing community including loss of sunlight, privacy, noise pollution, inability to efficiently use passive heating, inability to grow own fruit and vegetables parking congestion, loss of value in their property and negative impacts on mental wellbeing to name some of the obvious costs. These are all costs that will be borne by both the existing and future residential communities living in current central city residential zones. It seems not equal consideration to all peoples' social and cultural needs are being treated with equal consideration in PC14, as it favours the needs of a selected future resident in a new building that may never come, and whose who now and in future occupy existing homes and whose needs could be quite different to what is being enabled.</p> <ul style="list-style-type: none"> • There is plenty of opportunity to enable new HRZ housing within the CHC central city without only focusing on going higher and intensifying even more in the existing residential areas. For example: the VNA neighbourhood currently has a density of 150 households per hectare and with an average section size of 400-300m sq. There exists at least 7 hectares of land on the south side of the city that has zero households per hectare and which is zoned for mixed use. This land could be enabled for HRZ if the CCC were to think more strategically about how to actively encourage more housing the in central city AND meet the needs of the demand without over enabling, thereby also meeting 	Oppose

			<p>the needs of the existing community AND have an excellent outcome in urban planning. The development of the South Frame in the CCRP has not moved forward in any way to make the South side of the city an attractive place to live, work and play all within 500m of the CBD.</p> <ul style="list-style-type: none"> • There could easily be over 2,000 households enabled within this CCRP central city area if development for residential were to be actively encouraged by rezoning, or offering incentives, and actively discourage further density development in existing central city residential already densely developed. By doing this CCC would be proactively and meaningfully participating in the role of urban planning and signalling that the south side is where they want development. Without Council actively managing this opportunity for residential development as they did for the East frame, developers will continue to do small infill developments based on yield alone, which will not deliver the right outcomes for the city and its residents in relation to urban planning. Refer to Figures 2 & 3 which clearly show that the CHC central city is very clearly unbalanced with all the residential on one side (north) and all the services on the opposite side (south). You can't shift the amenity, but you can develop houses, which is what the Gov't is asking for. 	
Victoria Neighbourhood Association (VNA) /61.13	Anne Dingwall/ #FS2037.101	Seek Amendment	<p>Any new residential development within existing HRZ and HRZ Precincts be held at 14m height limit and with current recession plains (status quo); any further height enablement be considered but only with a notified resource consent and neighbourhood input. 			<p>Oppose High Density Residential Zoning on sites that are bounded by the following streets on Planning Map 31</p> <ul style="list-style-type: none"> - North: Matai St East, - West: Deans Ave - South: old Blenheim Road (now cycle and pedestrian access) - East: Railway line <p>Except for sites located along/facing Riccarton Road</p> <p>We oppose the Deans Avenue Precinct Society area becoming HRZ residential at this time, except for the areas noted.</p> <p>We consider that we do not meet the criteria in 14.2.7 Objective – High Density Residential Zone, to enable HRZ commensurate with demand, community facilities etc and 14.2.7.2 Policy (high density location to enable HRZ within walking catchment of city centre, town centre (Riccarton)).</p> <p>The focus for HRZ development in Christchurch must be on the central city for the next 5-10 years. Without a significant residential population in the central area, Christchurch will be a less vibrant, lively and attractive place bringing in tourists and those from the wider Christchurch and Canterbury areas. We need to fully capture the post-earthquake opportunity to make the central city a great place to live, especially for young people.</p> <p>Encouraging high density immediately adjacent to the centre in areas such as ours has the potential to reduce much needed residential development in the CBD. This gives the opportunity to do more work to ensure that new 4-6 storey blocks randomly placed in an area that is already densely developed with 1-2 storey units do not unreasonably affect the existing community.</p> <p>DAPS is largely outside the “walking catchment” of either Riccarton or CBD as defined by CCC (1.2 km from CBD or 600m from Riccarton town centre zone). Maps (Appendix 1) show that walkability / accessibility criteria are not met and the area is not closely connected to Riccarton, in part because of the barrier of the railway line and because many of the key amenities and service (supermarket, Wharenui primary school) are at the western end. Amenities within the City (library, swimming pool (under construction), supermarket) are perhaps better located, but also outside the designated walkability catchment.</p> <p>Urban form should support a diverse and connected neighbourhood where people want to live, not just pass through. Long term residents at various life stages are vital to maintaining a community spirit and taking responsibility for encouraging a friendly, caring and safe environment. Our community has many rental properties and many short term residents, but it is mostly the long term residents whose efforts help create a more resilient, connected and self-reliant community. If the area has an unattractive built environment it is unlikely to retain long term residents with a consequent reduction in social resilience.</p> <p>The Christchurch Mosque attacks in 2019 impacted local residents around the Al Noor mosque, as well as the Mosque community. The potential for higher buildings adjacent to the Mosque raises safety concerns for those who attend the mosque, and the local neighbourhood.</p>

Without a significant residential population in the central area, Christchurch will be a less vibrant, lively and attractive place bringing in tourists and those from the wider Christchurch and Canterbury areas. We need to fully capture the post-earthquake opportunity to make the central city a great place to live, especially for young people.</p> <p>Encouraging high density immediately adjacent to the centre in areas such as ours has the potential to reduce much needed residential development in the CBD. This gives the opportunity to do more work to ensure that new 4-6 storey blocks randomly placed in an area that is already densely developed with 1-2 storey units do not unreasonably affect the existing community.</p> <p>DAPS is largely outside the “walking catchment” of either Riccarton or CBD as defined by CCC (1.2 km from CBD or 600m from Riccarton town centre zone). Maps (Appendix 1) show that walkability / accessibility criteria are not met and the area is not closely connected to Riccarton, in part because of the barrier of the railway line and because many of the key amenities and service (supermarket, Wharenui primary school) are at the western end. Amenities within the City (library, swimming pool (under construction), supermarket) are perhaps better located, but also outside the designated walkability catchment.</p> <p>Urban form should support a diverse and connected neighbourhood where people want to live, not just pass through. Long term residents at various life stages are vital to maintaining a community spirit and taking responsibility for encouraging a friendly, caring and safe environment. Our community has many rental properties and many short term residents, but it is mostly the long term residents whose efforts help create a more resilient, connected and self-reliant community. If the area has an unattractive built environment it is unlikely to retain long term residents with a consequent reduction in social resilience.</p> <p>The Christchurch Mosque attacks in 2019 impacted local residents around the Al Noor mosque, as well as the Mosque community. The potential for higher buildings adjacent to the Mosque raises safety concerns for those who attend the mosque, and the local neighbourhood.</p>	
Deans Avenue Precinct Society Inc./ #222.5		Support	<p>Support these areas being High Density Residential Zoning on planning maps 31 and 38:</p> <ul style="list-style-type: none"> • the “Old Saleyards” block from south side of Mayfair to Lester • The Residential Guest Accommodation block (Chateau on the Park etc) • Properties with a boundary on Riccarton Road 	
Property Council New Zealand/ #242.2		Support	<p>Property Council supports the proposed 1.2km walkable catchment from the City Centre and the high-density zone precinct surrounding the residential and commercial zones within the city (see Figure 1).</p>	
Property Council New Zealand/242.2	Cambridge 137 Limited/ #FS2042.30	Support	<p>Property Council supports the proposed 1.2km walkable catchment from the City Centre and the high-density zone precinct surrounding the residential and commercial zones within the city (see Figure 1). We believe that the proposed intensification is appropriate for Christchurch and gives effect to the intent of the NPS-UD in enabling new housing development. We are supportive of the approach to increase density, particularly when density occurs in proximity to the city centre and town centres, while moving to lower density elsewhere.</p>	Support
Property Council New Zealand/ #242.17		Seek Amendment	<p>Property Council strongly supports density near key transport nodes, especially those that connect larger commercial centres.</p> <p>However, we are concerned that Christchurch City Council is establishing public transport as a qualifying matter in order to reject future MDRS or proposed high-density areas. It is important that there be a co-ordinated approach between the delivery of future transport and housing projects.</p>	
Property Council New Zealand/242.17	Kāinga Ora/ #FS2082.198	Seek Amendment	<p>Property Council strongly supports density near key transport nodes, especially those that connect larger commercial centres.</p>	Support

			<p>However, we are concerned that Christchurch City Council is establishing public transport as a qualifying matter in order to reject future MDRS or proposed high-density areas. It is important that there be a co-ordinated approach between the delivery of future transport and housing projects.</p> <p>The Council is proposing to limit the extent of where the MDRS would be enabled to near the highest-frequency bus routes and routes that connect larger commercial centres. This Qualifying Matter focuses intensification within and around commercial centres. This is to promote the use of public transport and reduce dependency on the use of private vehicles. The Qualifying Matter would not restrict any current Residential Medium-Density Areas or proposed High-Density Areas.</p>	
Harley Peddie/ #263.12		Seek Amendment	Density is what this city needs, not ever increasing property values.	
Damon Ross/ #283.2		Support	[Retain HRZ provisions as notified]	
Damon Ross/283.2	Kāinga Ora/ #FS2082.231	Support	[Retain HRZ provisions as notified] I support the changes made specifically in relation to the High Residential Zone in the Papanui area. This area has needed densification for a long time, and has all the hallmarks of an up and coming urban area. To let this area thrive and prosper greater densification is needed. The proposed HRZ near the shops will wonderfully complement the area and provide support for the demand of new entrants in the area.	Support
Waipapa Papanui-Innes-Central Community Board/ #288.3		Seek Amendment	The Board recognisesthat onsite parking is not a provision for residential development,however the Board wants to have compulsory provision introduced forloading bays and accessible parking.	
Waipapa Papanui-Innes-Central Community Board/288.3	Anne Dingwall/ #FS2037.404	Seek Amendment	The Board recognisesthat onsite parking is not a provision for residential development,however the Board wants to have compulsory provision introduced forloading bays and accessible parking. Loading bays and accessible car parks are requested for high density housing development.	Support

Joy Reynolds/ #487.2		Oppose	[S]top highrise and infill housing	
Sydney John Kennedy/ #497.3		Seek Amendment	[Additional requirement:] Papanui zone building heights that exceed 4 storeys should have a specified minimum distance from school buildings, hospital buildings, or rest home buildings of 10m	
Sydney John Kennedy/497.3	Kāinga Ora/ #FS2082.322	Seek Amendment	[Additional requirement:] Papanui zone building heights that exceed 4 storeys should have a specified minimum distance from school buildings, hospital buildings, or rest home buildings of 10m to ensure adequate sunlight provision during winter months.	Oppose
Hone Johnson/ #498.4		Oppose	Oppose all higher density zoning changes	
Gideon Hodge/ #525.13		Seek Amendment	[Retain provisions that enable] high density housing near the city and commercial centres.	
Donna Barber/ #534.4		Support	[S]upport high-density housing near the city and commercial centres.	
Deidre Rance/ #561.5		Seek Amendment	[No high density zone in the Strowan area]	
Claudia M Staudt/ #584.2		Oppose	Oppose High Density zoning of property at 21 Helmores Lane, and surrounding area bounded by, Holmwood Road, Rossall Street, Hagley Park and Fendalton Road (Planning Map 31 and CC) Seeks this to be rezoned Medium Density, and/or to also be regarded as a new QM Residential Character Area (as per pervious SAM 8)	
Nick Brown/ #585.5		Seek Amendment	[That the area of Strowan between] Heaton Street/Innes Road and Blighs Road [be zoned MRZ instead of HRZ]	
Fay Brorens/ #644.4		Seek Amendment	The submitter supports higher density with no specific residential zone identified.	
David McLauchlan/ #653.9		Seek Amendment	Set a minimum net site area standard for developments that allows for permanent and larger green space areas.	
Catherine & Peter Morrison/ #664.1		Oppose	Zone area as SAM8 type of zoning in order to retain its character. The closest outcome looks like the Residential Character overlay.	
Mary-Louise Hoskins/ #670.6		Seek Amendment	[Regarding the minimum two-storey requirement for dwellings] lifts should be required	
Mary-Louise Hoskins/670.6	Cambridge 137 Limited/ #FS2042.54	Seek Amendment	[Regarding the minimum two-storey requirement for dwellings] lifts should be required Min of 2 storeys for any dwelling in a high-density zone. This will disadvantage residents, particularly elderly who will need to have a bedroom on the ground floor and will not want/need a second level. IF this MUST be implemented, then a lift should also be mandated.	Support
Larissa Lilley/ #671.1		Oppose	Retain existing low density zoning in Hornby and Her-Hei.	
Dot Fahey/ #683.2		Oppose	Oppose high density zoning in area around St Peters Church and Ballantyne Avenue Cycle route.	
Helen Wilson/ #702.2		Oppose	Decline the proposal to rezone sites to allow 2 or 3 storey townhouses.	
Lauren Gibson/ #708.1		Oppose	[Opposes intensification plan change and in particular for 19a Russell Street].	
Wigram Lodge (2001) Limited/ #716.2		Support	[Seeks that] the NPS-UD is properly and fully given effect to through the provisions and zoning of PC14 through the intensification of development.	
Brookfield Limited/ #723.2		Support	Support High Density development in line with the NPS-UD	
Brookfield Limited/723.2	Kāinga Ora/ #FS2082.476	Support	Support High Density development in line with the NPS-UD the NPS-UD is properly and fully given effect to through the provisions and zoning of PC14 through the intensification of development through enabling plan provisions and an increase in development capacity for residential and business use across the district.	Support
Hannah Wilson Black/ #736.1		Oppose	Oppose High Density [without more stringent recession plane controls]	
Matthew Gibbons/ #743.7		Seek Amendment	Removal of recession planes and setbacks is good... Setbacks are not desirable. Hence 14.6.2.2.b should be removed. So should 14.6.2.2.c. iv A and B.	

Ryman Healthcare Limited/ #749.6		Seek Amendment	The provisions applicable to the HRZ are amended to better enable retirement villages	
Ryman Healthcare Limited/749.6	Kāinga Ora/ #FS2082.499	Seek Amendment	The provisions applicable to the HRZ are amended to better enable retirement villages. This outcome is more aligned with the intent of the Enabling Housing Act and the National Policy Statement on Urban Development 2020, by appropriately providing for a residential activity that is planned to provide housing for Christchurch City's rapidly growing ageing population.	Oppose
Mary O'Connor/ #778.9		Seek Amendment	There could be an option residents could choose to reduce intensification in return for narrowing their street width to allow street trees to be planted. This could only be achieved by less intensification.	
Josie Schroder/ #780.17		Support	Retain the rules in 14.6 as notified.	
Josie Schroder/780.17	Anne Dingwall/ #FS2037.755	Support	Retain the rules in 14.6 as notified. The proposed provisions are appropriate and necessary to achieve a well-functioning urban environment, with activity status and thresholds for assessment appropriate to the activities outlined, particularly where they impact upon public space environments. The balance provided between the certainty of standards and qualitative assessment is appropriate to achieving a well-functioning urban environment including high quality urban design, creating safer, more walkable environments, and promoting climate change initiatives including the provision of tree canopy and landscaping. The move to promote a perimeter block form is notable in achieving a balance between support of the public space environment, functionality and amenity for residents, and contributing to the city's open space.	Support
Roman Shmakov/ #783.7		Support	[S]eek[s] that the Christchurch City Council retains the high-density residential zone policy outlined in sub-chapter 14.6 to enable 6 to 10 storeys for residential buildings near commercial centres.	
Benjamin Love/ #799.5		Support	[That provisions enabling intensification are retained]	
Benjamin Love/799.5	Kāinga Ora/ #FS2082.596	Support	[That provisions enabling intensification are retained] Intensification is often linked to increased housing affordability, as it can quickly and cost effectively increase supply to the market, thus zoning reform is needed to allow for it. It is more affordable to build multi-unit dwellings/apartments than single-detached houses, as they require less land, materials, and labour to build per unit, as well as have lower operating costs. Many choose to live in intensified areas for the improved lifestyle. People like the proximity of stores, services, schools, parks, public transport, and other facilities/amenities within walking distance. Denser areas can also provide a better sense of community, as well as a more active lifestyle. Increased affordability and access to amenities can increase the attractiveness of neighbourhoods and cities. This includes attracting new residents/immigrants from other costs can also increase disposable income and expenditure in other sectors of the local economy.	Support
Regulus Property Investments Limited/ #810.7		Support	[Retain provisions that] support the intensification of urban form to provide for additional development capacity, particularly near the city and commercial centres

MGZ Investments Limited/ #827.2		Support	Approve plan change in line with NPS-UD	
Christopher Evan/ #845.4		Oppose	[Seeks that] Christchurch City Council accepts the new Government rules and laws.	
Orion New Zealand Limited (Orion)/ #854.4		Seek Amendment	New Rule to be inserted into following zones: • High Density Residential zone Insert a new rule for provision of electricity equipment and infrastructure as follows: Activity PX The establishment of a new, or expansion of an existing sensitive activity.	

			<p>Activity specific standards a. Either a land area of at least 5.5m2 is provided at the boundary closest to the road reserve for electricity equipment and infrastructure, or confirmation is provided from Orion New Zealand Limited that it is not required.</p> <p>14.5.1.4 Discretionary activities</p> <p>Activity DX a. Any activity that does not meet the activity specific standard under PX. b. Any application arising from this rule shall not be publicly notified and shall be limited notified only to Orion New Zealand Limited (absent its written approval).</p>	
Orion New Zealand Limited (Orion)/854.4	Clare Dale/ #FS2029.9	Seek Amendment	<p>New Rule to be inserted into following zones:</p> <ul style="list-style-type: none"> • High Density Residential zone <p>Insert a new rule for provision of electricity equipment and infrastructure as follows:</p> <p>Activity</p> <p>PX The establishment of a new, or expansion of an existing sensitive activity.</p> <p>Activity specific standards a. Either a land area of at least 5.5m2 is provided at the boundary closest to the road reserve for electricity equipment and infrastructure, or confirmation is provided from Orion New Zealand Limited that it is not required.</p> <p>14.5.1.4 Discretionary activities</p> <p>Activity DX a. Any activity that does not meet the activity specific standard under PX. b. Any application arising from this rule shall not be publicly notified and shall be limited notified only to Orion New Zealand Limited (absent its written approval).</p> <p>Orion seeks a new rule be inserted to the listed zones to include an electricity servicing standard. Orion’s experience is that in some cases developers do not approach Orion to discuss servicing matters until after the plans for a development are fixed, and often a resource consent has been granted. Consequently, developers often fail to set aside or include sufficient space on site for the necessary infrastructure. Similarly, Orion encounters resistance from corridor managers and Council when seeking to locate new/upgraded infrastructure within the berm or a local reserve. These existing issues are likely to be exacerbated by PC14.</p> <p>The land area required for on-site electricity servicing is highly site specific however Orion has proposed a 4m2 land area. This standard is proposed to ensure that there is engagement with developers at the initial planning stages of land use intensification.</p>	Oppose
Robina Dobbie/ #867.3		Oppose	Oppose HDZ around commercial centers	
Susanne Antill/ #870.2		Oppose	Oppose replacing existing residential zones in the city with two new ones - a medium density zone and a high density zone.	
Susanne Antill/870.2	Southern Cross Healthcare Limited/ #FS2041.4	Oppose	Oppose replacing existing residential zones in the city with two new ones - a medium density zone and a high density zone. What rationale? Are you planning for massive overseas population immigration into Christchurch for a 15 minute smart city when the birth rate of Christchurch residents is low, particularly after the mandated experimental, untested jabs on young New Zealanders which has probably sterilized many of them	Oppose
Alan and Robyn Ogle/ #876.13		Seek Amendment	[Seeks that] Jane Deans Close should retain its current zoning of Residential Suburban Density Transition [RSDT] which provides for low to medium density residential housing.	
Alan and Robyn Ogle/876.13	Robert Broughton/ #FS2083.22	Seek Amendment	[Seeks that] Jane Deans Close should retain its current zoning of Residential Suburban Density Transition [RSDT] which provides for low to medium density residential housing. We submit Jane Deans Close should retain its current zoning of Residential Suburban Density Transition [RSDT] which provides for low to medium density residential housing.	Support

Alan and Robyn Ogle/ #876.16		Seek Amendment	Seek amendment to the walking distances to Riccarton centre boundaries (which we understand the legislation states defines the extent of high density 6-storey residential zones) be reconsidered based, not on distance, but on time taken to walk to key amenities in the centre zone.	
Alan and Robyn Ogle/876.16	Robert Broughton/ #FS2083.25	Seek Amendment	Seek amendment to the walking distances to Riccarton centre boundaries (which we understand the legislation states defines the extent of high density 6-storey residential zones) be reconsidered based, not on distance, but on time taken to walk to key amenities in the centre zone. We submit the walking distances to Riccarton centre boundaries (which we understand the legislation states defines the extent of high density 6-storey residential zones) be reconsidered based, not on distance, but on time taken to walk to key amenities in the centre zone.	Support
Susanne and Janice Antill/ #893.2		Oppose	Oppose replacing existing residential zones in the city with two new ones – a medium density zone and a high density zone.	
Danne Mora Limited/ #903.10		Seek Amendment	Amend the High Density Residential Zone boundary to stop at Manarola Road with all land to the south owned by Spreydon Lodge Limited to be zoned FUZ, including Lot 3000 DP 575180, Lot 121 DP 514750 and Lot 120 DP 514570.	
Jeanne Cooper/ #1031.2		Seek Amendment	Provide a buffer zone between character areas and RMD intensive housing [High Density Residential Zone].	
Jeanne Cooper/1031.2	Kāinga Ora/ #FS2082.829	Seek Amendment	Provide a buffer zone between character areas and RMD intensive housing [High Density Residential Zone]. My property is in and on the border of an existing character area. It is also close to Merivale shopping and Papanui bus route. I am concerned that building height changes mean that a high building can border my northern property boundary and block sunlight from my house. My street is already undergoing intensive housing changes with 26 dwellings replacing 2. All trees are going or gone and soft surface is replaced by hard. No parking provision for 18 of the 26 new proposed or underway building. So the existing character area is bordered by intensive housing. Surely there should be a buffer between character and intensive areas with according building regulations. I am also concerned that 24 more properties with no soft surface to absorb rain water will adversely affect the drainage system which to my 40 residency has not been upgraded apart from adding new drainage pipes to the extra housing. Similarly power supply has simply been adjusted to eliminate several poles and add wiring to the existing poles left. I don't think this is clever city planning and can see future problems.	Oppose
Christchurch Casinos Limited / #2077.1		Support	[Supports] the intensification of urban form to provide for additional development capacity, particularly near the city and commercial centres, and supports any provisions or changes to the District Plan that will achieve this outcome;	
Christchurch Casinos Limited /2077.1	Kainga Ora - Homes and Communities/ #FS2099.72	Support	[Supports] the intensification of urban form to provide for additional development capacity, particularly near the city and commercial centres, and supports any provisions or changes to the District Plan that will achieve this outcome; The submitter has an interest in the plan change as a whole and therefore this submission relates to all provisions and zonings of the plan change. The submitter has a specific interest in all provisions and zoning that relate to the site [73 Salisbury Street, 373 Durham Street North, and 51 Peterborough Street]. The submitter is a major Central City business, providing employment for over 260 people, and hosting over 1,400 guests on an average day. The submitter's business is an attraction that adds to the vibrancy and viability of the Central City, as many businesses are supported by the Casino. directly and indirectly, such as accommodation providers, local employment, local businesses, the hospitality and event sector, and so on. The land in question has been subject to a number of master planning exercises by the submitter since the Christchurch earthquakes of 2010/11. The mixture of commercial business and residential zoning has made this exercise challenging to the point that redevelopment has not been advanced with the land currently being used for car parking. Having a large Central City development block with two 'firm' commercial and residential zones within it has not been conducive to allowing the mix and distribution of residential and commercial activity across the site that is needed. This current zoning is directive of two development outcomes across the development block: one being residential and the other being commercial. The submitter has intentions to undertake a comprehensive redevelopment of the entire site, which would ideally comprise a mix of commercial and residential activities. The site is located on a prominent Central City corner site with frontage to a Central City local distributor road and a main distributor road. The character of the area is transitory between more commercial land uses to the south and residential areas to the north of Salisbury Street. Sites to the immediate south of the site are zoned City Centre Zone with sites to the south-east zoned Central City Mixed Use. An appropriate outcome for the submitter's property would be to provide for a combination of housing and business uses and enabling greater building heights and densities. In this regard, Policy 3 of the NPS-UD is of direct relevance, whereby at sub clause (a) it directs that the district plan is to enable building heights and density of urban form to realise as much development capacity as possible, to maximise benefits of intensification in city centre zones. "Development Capacity" is a defined term in the NPS-UD and means the capacity of land to be developed for housing or for business use, based on the zoning, objectives, policies, rules, and overlays that apply in the relevant proposed and operative RMA planning documents; and the provision of adequate development infrastructure to support the development of land for housing or business use. Rezoning that part of the site that is proposed under PC14 to be High Density Residential, along with commensurate changes to the District Plan to provide for this submission and give effect to the NPS-UD, will: provide for an appropriate mixed-use development on the site, including commercial activity in an appropriate location, being a corner site adjacent to existing CCZ and opposite CCMU zoned land; provide greater scope for a development on the site to suitably emphasize the street corner; maintains support for the primacy of commercial centres, supporting the economic growth of the District, and therefore the economic well-being of communities; not have any discernible effects on the amenity of adjoining residential zones, or undermine the residential coherence of residential neighbourhoods; maintain a sufficient supply of housing in the district; contribute to the social and economic well-being of communities and meet the reasonably foreseeable needs of future generations; represent the most appropriate means of exercising the Council's functions, having regard to the efficiency and effectiveness of the provisions	Support

			relative to other means; give effect to the NPS-UD (notably Policy 3) and Canterbury Regional Policy Statement; and promote the sustainable management of natural and physical resources, will be consistent with Part 2 of the Resource Management Act 1991 and ultimately achieve its purpose.

Andrew Tulloch/ #13.3		Seek Amendment	[That] all residents of a street [are notified] regarding any new house development that is outside the norm.	
Caitriona Cameron/ #272.18		Seek Amendment	The proposal should provide protections for existing property rights. This could be achieved by: - increasing minimum plot sizes for plots with 3+ storey residential buildings to minimize the number of affected neighbours - requiring developers to compensate neighbours who will be adversely affected by new developments that significantly reduce sunlight	
Barry Newman / #295.6		Support	I would like the existing process of council and neighbour consent remain.	
Larissa Lilley/ #671.2		Support	Support high density in city centre	
Hamish Ritchie/ #687.3		Seek Amendment	Does not support the zoning proposed under [Plan Change] 14 for 75 & 77 Rattray Street to be High Density Residential	
Kāinga Ora – Homes and Communities / #834.216		Seek Amendment	Add a new restricted discretionary and fully discretionary rule as follows: Retail, office, and commercial service activity. Activity status: Restricted Discretionary Where: i. The retail, office, or commercial service activity is limited to the ground floor tenancy of an apartment building; ii. The gross floor area of the activity/activities does not exceed 200m ² ; and iii. The hours of operation are between: i. 7.00am and 9.00pm Monday to Friday; and ii. 8.00am and 7.00pm Saturday, Sunday, and public holidays. The Council's discretion shall be limited to the following matters: a. The design, appearance and siting of the activity; b. Noise and illumination; c. Signage. 2. Activity status: Discretionary Where compliance is not achieved with the matters specified in HRZR(a)(i), (ii) and/or (iii).	
Kāinga Ora – Homes and Communities /834.216	Geoffrey Banks/ #FS2018.3	Seek Amendment	Add a new restricted discretionary and fully discretionary rule as follows: Retail, office, and commercial service activity. Activity status: Restricted Discretionary Where: i. The retail, office, or commercial service activity is limited to the ground floor tenancy of an apartment building; ii. The gross floor area of the activity/activities does not exceed 200m ² ; and iii. The hours of operation are between: i. 7.00am and 9.00pm Monday to Friday; and ii. 8.00am and 7.00pm Saturday, Sunday, and public holidays. The Council's discretion shall be limited to the following matters: a. The design, appearance and siting of the activity; b. Noise and illumination; c. Signage. 2. Activity status: Discretionary Where compliance is not achieved with the matters specified in HRZR(a)(i), (ii) and/or (iii). It is common for apartment buildings to contain a small-scale commercial activity on the ground floor, often adjacent to the entrance foyer and as a means of buffering residential activity from what can be busy frontage roads. The provision of such services can likewise have significant convenience benefits for residents and is consistent with a good quality, high density neighbourhood. The ability to provide shared workspaces in apartment buildings is consistent with emerging remote working trends where people still seek companionship during the day whilst working remotely from their employer. Provided the scale of non-residential facilities is limited there is minimal potential for such to undermine the role and function of nearby commercial centres which typically cover several hectares.	Oppose

Victoria Neighbourhood Association (VNA) / #61.25		Support	Retain Permitted, Controlled, Discretionary, and Non-Complying Activities in Rule 14.6.1.	
Victoria Neighbourhood Association (VNA) /61.25	Anne Dingwall/ #FS2037.110	Support	Retain Permitted, Controlled, Discretionary, and Non-Complying Activities in Rule 14.6.1. The council is required by law to allow residential buildings of at least 6 storeys within a 1.2km radius of commercial centres such as malls and the city centre. The council plan to enable this, while also allowing up to 10 storeys for residential buildings closer to the city centre. This would enable a wider range of dense housing development options. It would also allow more people to live close to services and amenities.	Support

Vivien Binney/ #81.1		Seek Amendment	Amend proposed provisions for areas set for intensification outside the inner city's Four Avenues by limiting them to three units per site.	
Vivien Binney/81.1	Kāinga Ora/ #FS2082.43	Seek Amendment	<p>Amend proposed provisions for areas set for intensification outside the inner city's Four Avenues by limiting them to three units per site.</p> <p>The scale of planned dwelling intensification is far too large.</p> <p>Your plan can result in all Christchurch's leafy suburbs losing the very environment we enjoy Christchurch for. Our current population is approximately 390,000. With the changes proposed, this population could easily be doubled in the same area.</p> <p>Traffic congestion, impossible parking requirements will result as at least one vehicle per dwelling will swamp the streets.</p> <p>Loss of gardens, trees and berms - result is an unpleasant environment not fit for children and with significantly increased rain run off and flooding risk to add to our climate change problems.</p> <p>Slum dwellings. The submitter has personally seen and also discussed with builders the rapidly and poorly built units crammed onto sections for maximal profit. No underground parking and usually no garage. There appears little incentive for developers to do otherwise.</p> <p>Make the areas set for intensified dwellings outside the inner city Four Avenues limited to three stories and three units per section. For the remaining suburban areas, limit the number of units per section to two, not three and two stories only.</p> <p>Developing your infrastructure for this will be easier .</p> <p>In another 50-60 years time you will be planning to move the city further inland as the sea level rise becomes all too obvious.</p>	Oppose

Cameron Matthews/ #121.23		Support	Increase number of permitted units in the High Density Residential Zone to at least 6.	
Cameron Matthews/121.23	Christchurch International Airport Limited/ #FS2052.213	Support	<p>Increase number of permitted units in the High Density Residential Zone to at least 6.</p> <p>SEE IMAGES WITHIN SUBMISSION</p> <p>This ensures 6-10m separation between upper-level units in adjacent HRZ buildings is maintained, and that floor width of upper-storeys remain feasible (at 5-9m for site widths of 15-20m). This incentivises development at the front of those sites, and to boost viability of medium density on older, narrow sites. One simple alternative ruleset which might help to achieve this, and which aligns well with the alternative HRZ built form standards above is to:</p> <ul style="list-style-type: none"> • change side/rear height-in-relation-to-boundary rules such that they are MDRS-compliant, i.e., 4m+60°, and, • waive HIRTB recession plane for parts of building in front 20m of a site (optionally for the rest of the site also) which are setback by more than around 3-5m from side/rear boundaries, and, • retain current height limits for 11+1m nominal, or 14m if LCIP applies, and, • Increase number of permitted units to 4, potentially only if LCIP applies. <p>In High Density Residential (HRZ) zones, nominally 14m height, the building envelope is extremely constrained above 12m, via a combination of recession planes, deep boundary setbacks, and restrictive height limits and building separation rules. This will severely limit the feasibility of many developments within the HRZ zone to achieve the scale nominally permitted by the zone.</p> <p>One mitigating factor is that at the front of sites, below 12m, exemptions for the recession plane, boundary setbacks, and building separation rules are made. While this is good, it is likely to create built forms which could otherwise be enabled under MRZ, if the same front-of-site recession/setback exemptions were to apply. These exemptions to recession planes and setback rules at the front of sites for MRZ were present in earlier versions of the proposed plan and should be re-incorporated.</p> <p>Regarding HRZ, the current proposal requires parts of buildings exceeding 12m height (3-4 storeys) to have 6-8m setbacks from side boundaries, be no higher than 14m (still only ~4 storeys unless low stud heights are used), be no closer than 10m from an a nearby unit, and if built at the rear of sites be confined to only 12m height and aggressive recession planes. CCC's data (Figure 25) shows average road frontage for HRZ land parcels is only ~20m, roughly translating into the site width (though likely inflated by corner sites). Older sites (pre-1970, i.e. the ones located predominantly around historically relevant town centres, like the city centre, Riccarton, Papanui, etc) are noted as being predominantly only 15m wide.</p> <p>Illustrating what the building envelope might look like under these rules, in Figure 26 the top floor is only (maximally, with low floor-separations) the 5th, and it's only maximally 6m wide. Considering that building above 3 storeys requires large fixed-cost investments into additional infrastructure (e.g. elevators, high fire resistance and/or sprinklers, fire engineering, wind report, etc), the limited saleable/rentable floor area from the combined 4th and 5th floors is likely to reduce actual built volume to only 3 storeys; i.e. only the nominal built height of MRZ sites. The building envelope on the right-hand-side shows the more egregious example, using a typical site from pre-1970's suburbs with a width of only 15m. Such a construction envelope completely rules out a 5th floor, further compromising the viability of building anything above 3-storeys in the HRZ zones.</p> <p>Importantly the site widths used for these illustrations show that even the average HRZ site is compromised for development above 3-4 storeys under the proposed rules. That could mean (depending on the statistical distribution of site widths) that around half of all sites zoned HRZ have even less feasible development prospects at heights exceeding 3 storeys. This is problematic in that in feasibly enabling only buildings of similar scale to MRZ – it provides very little incentive/allowances for development at increased scales/intensity in the areas most suited to it, i.e. those zoned for HRZ.</p> <p>In addition to the lack of development incentives exceeding 3 storeys, a low density-differential exists between the buildable envelope – even if built to their theoretical maximum limit – of both:</p> <ul style="list-style-type: none"> • · An HRZ site built up at the road frontage vs built up along the side or rear boundary • · An HRZ site vs an MRZ site. <p>The laudable goal of the proposed road-frontage recession-plane waiver for the front 20m / 60% is to encourage development at the front of sites, to help create a vibrant and active streetscape, to help manage overlooking between adjacent sites (without limiting density below legal</p>	Oppose

			<p>minimum standards) and to improve privacy for residents, while boosting safety via ‘many-eyes’ on the street. However, as proposed it only provides a small bonus in habitable floorspace compared to developing the side or rear of the site. Considering that any provision of on-site car-parking or manoeuvring space provided will come at a cost to habitable area for a front-built site, but not for a side or rear-built site, the proposed waiver may not be sufficient to incentivise development at the road frontage.</p> <p>In addition – while I would argue that subjective aesthetic ideals should not be included in our strategy objectives (see section: INAPPROPRIATE AND SUBJECTIVE STRATEGY OBJECTIVES) – if CCC is aiming to have “legible urban form” with “contrasting building clusters”, “appropriate scale, form”, and to manage the “clustering, scale and massing” (Chapter 3 Strategic Directions 3.3.7 Objective –Well-functioning urban environment) of our more densely populated centres, then allowing built forms of such similar scale in MRZ and HRZ seems contradictory.</p>	
Cameron Matthews/121.23	Kāinga Ora/ #FS2082.58	Support	<p>Increase number of permitted units in the High Density Residential Zone to at least 6.</p> <p>SEE IMAGES WITHIN SUBMISSION</p> <p>This ensures 6-10m separation between upper-level units in adjacent HRZ buildings is maintained, and that floor width of upper-storeys remain feasible (at 5-9m for site widths of 15-20m). The council plan to enable this, while also allowing up to 10 storeys for residential buildings closer to the city centre. This would enable a wider range of dense housing development options. It would also allow more people to live close to services and amenities.	Oppose

Victoria Neighbourhood Association (VNA) / #61.52		Seek Amendment	That any further height enablement can be considered but only with a notified resource consent and neighbourhood input.	
Victoria Neighbourhood Association (VNA) /61.52	Clare Dale/ #FS2029.13	Seek Amendment	<p>That any further height enablement can be considered but only with a notified resource consent and neighbourhood input.</p> <p>By doing this any new development is considered on the unique merits of the site and impact on the neighbouring property and neighbourhood, width of the street, width of section, consideration of urban design, infrastructure, and the impact on the existing community's social, economic and environmental and cultural wellbeing.</p> <p>The current central city residential area in Christchurch consists of old streets and old sites(originally for small workers cottages), many residential sites in within the 4 Avenues are therefore very small (often less than 300 sq m). It is inappropriate to enable 4-6 storey high buildings in areas without ruining the economic, social and cultural aspects of the existing community including loss of sunlight, privacy, noise pollution, inability to efficiently use passive heating, inability to grow own fruit and vegetables parking congestion, loss of value in their property and negative impacts on mental wellbeing to name some of the obvious costs.</p> <p>These are all costs that will be borne by both the existing and future residential communities living in current central city residential zones. It seems not equal consideration to all peoples' social and cultural needs are being treated with equal consideration in PC14, as it favours the needs of a selected future resident in a new building that may never come, and whose who now and in future occupy existing homes and whose needs could be quite different to what is being enabled.</p> <ul style="list-style-type: none"> • There is plenty of opportunity to enable new HRZ housing within the CHC central city without only focusing on going higher and intensifying even more in the existing residential areas. <p>For example: the VNA neighbourhood currently has a density of 150 households per hectare and with an average section size of 400-300m sq. There exists at least 7 hectares of land on the south side of the city that has zero households per hectare and which is zoned for mixed use. This land could be enabled for HRZ if the CCC were to think more</p>	Oppose

			<p>strategically about how to actively encourage more housing the in central city AND meet the needs of the demand without over enabling, thereby also meeting the needs of the existing community AND have an excellent outcome in urban planning. The development of the South Frame in the CCRP has not moved forward in any way to make the South side of the city an attractive place to live, work and play all within 500m of the CBD.</p> <ul style="list-style-type: none"> • There could easily be over 2,000 households enabled within this CCRP central city area if development for residential were to be actively encouraged by rezoning, or offering incentives, and actively discourage further density development in existing central city residential already densely developed. By doing this CCC would be proactively and meaningfully participating in the role of urban planning and signalling that the south side is where they want development. Without Council actively managing this opportunity for residential development as they did for the East frame, Developers will continue to do small infill developments based on yield alone, which will not deliver the right outcomes for the city and its residents in relation to urban planning. Refer to Figures 2 & 3 which clearly show that the CHC central city is very clearly unbalanced with all the residential on one side (north) and all the services on the opposite side (south). You can't shift the amenity, but you can develop houses, which is what the Gov't is asking for.

Thomas Calder/ #62.5		Support	Support for limited notification not being precluded for non-compliances relating to height or height in relation to boundary	

Rosemary Neave/ #72.3		Support	Retain the proposed provisions that enable 6 to 10 storeys for residential buildings near commercial centres.	
Vivien Binney/ #81.2		Seek Amendment	Amend proposed provisions for areas set for intensification outside the inner city's Four Avenues by limiting them to three units per site.	
Vivien Binney/81.2	Kāinga Ora/ #FS2082.44	Seek Amendment	<p>Amend proposed provisions for areas set for intensification outside the inner city's Four Avenues by limiting them to three units per site.</p> <p>The scale of planned dwelling intensification is far too large.</p> <p>Your plan can result in all Christchurch's leafy suburbs losing the very environment we enjoy Christchurch for. Our current population is approximately 390,000. With the changes proposed, this population could easily be doubled in the same area.</p> <p>Traffic congestion, impossible parking requirements will result as at least one vehicle per dwelling will swamp the streets.</p> <p>Loss of gardens, trees and berms - result is an unpleasant environment not fit for children and with significantly increased rain run off and flooding risk to add to our climate change problems.</p> <p>Slum dwellings. The submitter has personally seen and also discussed with builders the rapidly and poorly built units crammed onto sections for maximal profit. No underground parking and usually no garage. There appears little incentive for developers to do otherwise.</p> <p>Make the areas set for intensified dwellings outside the inner city Four Avenues limited to three stories and three units per section. For the remaining suburban areas, limit the number of units per section to two, not three and two stories only.</p> <p>Developing your infrastructure for this will be easier .</p> <p>In another 50-60 years time you will be planning to move the city further inland as the sea level rise becomes all too obvious.</p>	Oppose
Melissa and Scott Alman/ #86.5		Support	Support that limited notification is not precluded for non-compliances that relate to height and height in relation to boundary	
Andrew Evans/ #89.13		Oppose	Seek the removal of 14.6.1.3 RD2 requiring Residential Design Principles to be a matter of discretion.	
Aaron Jaggar/ #141.4		Seek Amendment	Allow consented developments, but not the Government's proposed medium density housing without consent.	
Sue Sunderland/ #142.2		Oppose	[Remove provisions that enable] 4-10 storey[s]	
James and Adriana Baddeley/ #164.7		Support	Retain ability to notify neighbours along the southern boundary, of consent applications that relate to non-compliances with the building height or height in relation to boundary built form standards	
Catherine & Peter Baddeley/ #165.5		Support	[Retain ability to notify neighbours along the southern boundary, of consent applications that relate to non-compliances with the building height or height in relation to boundary built form standards]	
Logan Brunner/ #191.8		Support	[Retain provisions that enable 4-6 storeys]	
Robert J Manthei/ #200.7		Oppose	[Do not allow any buildings to exceed 14m in the HRZ within the four avenues - RD7 & RD8]	
Robert J Manthei/200.7	Kāinga Ora/ #FS2082.114	Oppose	[Do not allow any buildings to exceed 14m in the HRZ within the four avenues - RD7 & RD8] The height restriction and recession planes should remain as they are for HDZs in the inner city. Very little would be gained and serious problems created by adopting the restrictions outlined in PC14. It is reasonable to assume that the same degree of densification is occurring in the inner-city residential areas. Therefore, there is no need to increase residential density capacity in these small HDZs. They are already densely populated and most new developments are for multi-unit complexes. The CCC will have data on this trend. Many HDZ sections are small (ours is 397m square) and even considering a heightenement of 14m—let alone up to 32m—on such a small parcel of land would be ridiculous. Building to heights higher than the currently allowed 14m would accentuate the problems of shading, loss of privacy, parking and servicing difficulties that already occur in this zone	Oppose

Building to heights higher than the currently allowed 14m would accentuate the problems of shading, loss of privacy, parking and servicing difficulties that already occur in this zone	Oppose
Deans Avenue Precinct Society Inc./ #222.12		Oppose	Oppose limited notification of breaches of the High Density Built form standards relating to recession plane (height in relation to boundary) and boundary setbacks. Breaches of these rules shall be limited notified to adjacent landowners. Amend RD9 and RD 10 to require limited notification.	
Deans Avenue Precinct Society Inc./222.12	Chapman Tripp/ #FS2063.36	Oppose	Oppose limited notification of breaches of the High Density Built form standards relating to recession plane (height in relation to boundary) and boundary setbacks. Breaches of these rules shall be limited notified to adjacent landowners. Amend RD9 and RD 10 to require limited notification. Adjacent landowners should be consulted for all applications where setbacks or recession planes do not meet the rules. (HRZ: RD 9 recession plane; RD 10 setbacks; 14.15.4; 14.15.3a) If the rules are not met, adjacent landowners are likely to be more adversely affected, and therefore should be entitled to have an input into the decision-making process.	Seek Amendment
Deans Avenue Precinct Society Inc./222.12	Chapman Tripp/ #FS2064.35	Oppose	Oppose limited notification of breaches of the High Density Built form standards relating to recession plane (height in relation to boundary) and boundary setbacks. Breaches of these rules shall be limited notified to adjacent landowners. Amend RD9 and RD 10 to require limited notification. Adjacent landowners should be consulted for all applications where setbacks or recession planes do not meet the rules. (HRZ: RD 9 recession plane; RD 10 setbacks; 14.15.4; 14.15.3a) If the rules are not met, adjacent landowners are likely to be more adversely affected, and therefore should be entitled to have an input into the decision-making process.	Seek Amendment
Paul Clark/ #233.12		Support	[Retain provisions that] enable 6 to 10 storeys for residential buildings near commercial centres.	
Susan Barrett/ #236.1		Seek Amendment	That all High Density Residential Zone developments over 2 storeys require individual building and environmental consent that is notified to the community and other affected parties	
Marjorie Manthei/ #237.6		Seek Amendment	[1. Retain provision that enables 20m height. 2. Remove provisions that enable any building height that exceeds 20m from Salisbury Street to Bealey Avenue.]	
Marjorie Manthei/ #237.35		Support	[Retain RD2]	
Marjorie Manthei/ #237.40		Seek Amendment	[RD7 & RD8 - identify recession plane] [RD8 - reduce height to 20m]	
Marjorie Manthei/237.40	Anne Dingwall/ #FS2037.333	Seek Amendment	[RD7 & RD8 - identify recession plane] [RD8 - reduce height to 20m] I oppose: 1. RD 14.6.1.3 RD7 and RD8 because the current recession plane is not identified.	Support

			2. RD8 also on the grounds that 20m should be the maximum height, at least from Salisbury Street to Bealey Avenue	
Andrea Floyd/ #239.5		Support	[Retain limited notification] - neighbours should be consulted when multi story units are going in next to them.	
Emma Besley/ #254.3		Seek Amendment	Support enabling 6 to 10 storeys for residential buildings near commercial centers.	
Maia Gerard/ #261.12		Support	That the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Alfred Lang/ #262.10		Support	That the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Harley Peddie/ #263.10		Support	That the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Aaron Tily/ #264.12		Support	That the council enable 6 to 10 storeys for residential buildings near commercial centres.

Winton Land Limited/ #556.8		Support	Retain 14.6.1.3 RD5 as notified	
Winton Land Limited/ #556.9		Seek Amendment	<p>Amend 14.6.1.3 RD7 as follows:</p> <p>a. Any building between 14-20 metres in height above ground level, when the following standards are met:</p> <p>i. A ground level communal outdoor living space shall be provided at a ratio of 50m²per 10 residential units. The number of units shall be rounded to the nearest 10, in accordance with the Swedish rounding system. This ratio shall be calculated on the number of residential units on the 4th floor of the building and any subsequent floors above, with the maximum required area being 20% of the site area. Any communal outdoor living space shall have a minimum dimension of no less than 8 metres.</p> <p>b.a Any building exceeding six stories 203 metres in height up to 32 metres in height above ground level(except within the High Density Residential Precinct, Large Local Centre Intensification Precinct, or Town Centre Intensification Precinct), where the following standards are met:</p> <p>i. The standards in RD7.a. i.;</p> <p>ii. The building is set back at least 6 metres from all internal boundaries; and</p> <p>iii. The building is set back at least 3 metres from any road boundary</p> <p>b. Any application arising from this rule, shall not be publicly or limited notified</p>	
Winton Land Limited/ 556.9	Carter Group Limited/ #FS2045.172	Seek Amendment	<p>Amend 14.6.1.3 RD7 as follows:</p> <p>a. Any building between 14-20 metres in height above ground level, when the following standards are met:</p> <p>i. A ground level communal outdoor living space shall be provided at a ratio of 50m²per 10 residential units. The number of units shall be rounded to the nearest 10, in accordance with the Swedish rounding system. This ratio shall be calculated on the number of residential units on the 4th floor of the building and any subsequent floors above, with the maximum required area being 20% of the site area. Any communal outdoor living space shall have a minimum dimension of no less than 8 metres.</p> <p>b.a Any building exceeding six stories 203 metres in height up to 32 metres in height above ground level(except within the High Density Residential Precinct, Large Local Centre Intensification Precinct, or Town Centre Intensification Precinct), where the following standards are met:</p> <p>i. The standards in RD7.a. i.;</p> <p>ii. The building is set back at least 6 metres from all internal boundaries; and</p> <p>iii. The building is set back at least 3 metres from any road boundary</p> <p>b. Any application arising from this rule, shall not be publicly or limited notified</p> <p>Winton seek the inclusion of rules that 'enable' (ie: permit or allow) building height in the HDR Zone that is consistent with and clearly implement the full extent of the directives in Policy 3 of the NPS-UD and seek that the rule specifically references six stories and up to 23m in the HRZ Zone where within 1.2km of the City Centre Zone.</p>	Support

			<p>Winton does not consider restricted discretionary ('RD') activity status for six storey buildings is enabling. Enable means to permit or allow and RD status would allow an application to be declined. The rule compromises the the extent to which planning provisions enable development and does not reduce regulatory constraints and increase housing supply as required through the Amendment Act and the NPS-UD.</p> <p>Advice from Winton's architect is that 23m is required for a six storey building in order to ensure a high-quality internal living environment.</p> <p>Winton seek a non-notification clause to ensure the rule is enabling.</p> <p>[Please refer to attachment for full submission]</p>	
Winton Land Limited/ #556.10		Seek Amendment	<p>Amend 14.6.1.3 RD8 as follows:</p> <p>a. Any building over 32 metres in height above ground level.</p> <p>b. Any building over 20 metres in height above ground level within the High Density Residential Precinct, Large Local Centre Intensification Precinct, or Town Centre Intensification Precinct.</p>	
Winton Land Limited/ #556.11		Seek Amendment	<p>amend 14.6.1.3 RD17 as follows:</p> <p>a. New buildings, structures or additions greater than 203 metres in height from ground level that do not result in wind conditions that exceed the following cumulative standards (Gust Equivalent Mean) more than 5% annually at ground level, within 100 metres of the site based on modelling:</p> <p>i. 4m/s at the any boundary of any site, if that boundary adjoins public open spaces, private outdoor living spaces, and footpath; or</p> <p>ii. 6m/s within any carriageway or car parking areas provided within or outside the site.</p> <p>b. New buildings, structures or additions greater than 203 metres in height that do not result in wind speeds exceeding 15 MUZ wind speeds more than 0.3% annually at ground level.</p> <p>c. The requirement of a. and b. shall be demonstrated by a suitably qualified professional.</p>

Ben Thorpe/658.5	Anne Dingwall/ #FS2037.1190	Support	[S]upport[s] high-density housing near the city and commercial centres...seek[s] that the council enable 6 to 10 storeys for residential buildings near commerical centres I support high-density housing near the city and commercial centres. We need to allow more people to live near services and amenities to reduce car dependency. This would allow more people to take active and public transport to commute, shop and play. I seek that the council enable 6 to 10 storeys for residential buildings near commerical centres. The council is required by law to allow residential buildings of at least 6 storeys within a 1.2km radius of commercial centres such as malls and the city centre. The council plan to enable this, while also allowing up to 10 storeys for residential buildings closer to the city centre. This would enable a wider range of dense housing development options. It would also allow more people to live close to services and amenities.	Support

			<p>6. The positive effects of the construction, development and use of the retirement village. For clarity, no other rules or matters of discretion relating to the effects of density apply to buildings for a retirement village. a. Any new building, or alteration or addition to an existing building for a retirement village that meet the following built form standards: i.... ii.... iii. Rule 14.6.2.34-setbacks iv.... ... The RVA supports Rule 14.6.1.3 (RD4) as it enables the construction of retirement village buildings as a restricted discretionary activity. The RVA also support the Council carrying through the decision made to not impose internal amenity controls on retirement villages, as part of the Christchurch Replacement District Plan to this Plan Change. The RVA acknowledges that Council have already provided retirement villages with their own set of focused matters of discretion (14.15.10). However, the RVA consider that these should be updated to further provide for and acknowledge the differences that retirement villages have from other residential activities, as well as to better reflect the NPSUD and Enabling Housing Act. Further, the RVA notes that there is one minor error in the drafting of the applicable built form standards which they seek correction of.</p>	
Retirement Villages Association of New Zealand Inc/ #811.67		Not Stated	[S]eeks to remove reference to Rule 14.15.10, and include an updated set of matters of discretion to be included in the Plan for the construction of or alteration/addition to a retirement village in the High Density Zone: HRZ – MATX Retirement Villages 1.  For clarity, no other rules or matters of discretion relating to the effects of density apply to buildings for a retirement village and adjacent streets or public open spaces
 3. The effects arising from the quality of the interface between the retirement village and adjacent streets or public open spaces;
 4. The extent to which articulation, modulation and materiality addresses adverse visual dominance effects associated with building length;
 5. The matters in 14.2.1.6, 14.2.3.1, 14.2.3.2, 14.2.3.3, 14.2.3.4, 14.2.3.5, 14.2.3.6, 14.2.3.7, 14.2.5.1, 14.2.5.2, 14.2.5.3, 14.2.5.4, 14.2.6.1, 14.2.7.1, 14.2.7.6, 14.2.8.3 and the proposed new policies as inserted. 6. The positive effects of the construction, development and use of the retirement village.
 For clarity, no other rules or matters of discretion relating to the effects of density apply to buildings for a retirement village.

....

a. Any new building, or alteration or addition to an existing building for a retirement village that meet the following built form standards:

i....

ii....

iii. Rule 14.6.2.43 setbacks

iv....

b.....

c. Any application arising from Rule 14.6.2.13 shall not be publicly notified) and shall be limited notified only to Fire and Emergency New Zealand (absent its written approval

The RVA supports Rule 14.6.1.3 (RD5) because it enables the construction of retirement village buildings as a restricted discretionary activity even if the relevant built form standards have not been met. As noted above, the RVA consider that these matters should be updated with a single set of matters of discretion applying to both construction and alteration/additional to retirement villages.
 Limited notification of Fire Emergency New Zealand should not be required. Building

			fire safety is not managed under the Resource Management Act 1991 and Fire Emergency New Zealand has powers including under the Fire and Emergency New Zealand Act 2017 to manage these issues.

14.6.1.3 Restricted discretionary activities	RD10 a. Buildings that do not meet Rule 14.6.2.3 – Setbacks. b. Any application arising from Rule 14.6.2.3.a.i shall not be limited or publicly notified. c. Any application arising from this rule, for up to three residential units per site shall not be publicly notified.						

			<p><u>d. Any application arising from (iv) shall not be publicly notified and shall be limited notified only to KiwiRail (absent its written approval).</u></p> <p>The Council's discretion shall be limited to the following matters:</p> <p>a. Impacts on neighbouring property – Rule 14.15.3.a</p> <p><u>b. Whether the reduced setback from the rail corridor will enable buildings to be maintained without requiring access above, over, or on the rail corridor while providing for the safe and efficient operation of the rail network.</u></p>	
			Seeks amendment to increase the rail corridor setback from 4 to 5m.	
Finn Jackson/ #832.12		Seek Amendment	[Seeks] that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Kāinga Ora – Homes and Communities / #834.120		Oppose	14.6.1.3 RD13. Delete Section 6.10A and all associated provisions	
Kāinga Ora – Homes and Communities / 834.120	Catholic Diocese of Christchurch/ #FS2044.85	Oppose	<p>14.6.1.3 RD13.</p> <p>Delete Section 6.10A and all associated provisions</p> <p>Kāinga Ora welcomes the Council's recognition of trees as a key element in successful urban environments. Kāinga Ora strongly support the Council increasing its prioritisation of the need to renew streetscapes, especially in areas where intensification has and will continue to occur. Such renewals should include kerb and channel replacement, undergrounding of overhead wires, and street tree planting. Kāinga Ora has substantial concerns with the 20% tree canopy cover target and considers it fundamentally unachievable in medium and high density environments on private land. Kāinga Ora considers the requirements to achieve 20% tree canopy cover is inconsistent with the spatial outcome requirements set out in the NPS-UD, and the Medium Density Residential Standard (MDRS) provisions of the Housing Supply Act. Kāinga Ora considers that the proposed financial contribution calculator is complicated and flawed, a simpler formula would be to require 1 tree to be planted per 100m² of site area, as an easier compliance threshold than a trigger of 10% of future canopy cover. It also has concerns with the reliance on Financial Contributions. Given that Council already owns extensive areas of park and open space land (including several thousand hectares of land on the Port Hills and Red Zone), in addition to extensive road reserve and local park areas, and given that Council takes Development Contributions for new parkland as part of any new development, the need for the land component to form part of the financial contributions appears to be particularly hard to justify. The need to provide rapid canopy cover potentially creates a perverse incentive to plant faster growing exotic species rather than natives. The proposed Financial Contribution could therefore result in a decline in biodiversity by driving developers to plant exotics over natives, with attendant adverse biodiversity outcomes, which is contrary of the desire in the Urban Forest Plan to seek diversity in tree species</p>	Support

Kāinga Ora – Homes and Communities / #834.202		Seek Amendment	RD2 - Delete clauses (a)(ii) and (iii). Retain clauses (a)(i) and (b). Delete RD6	
Kāinga Ora – Homes and Communities /834.202	LMM Investments 2012 Limited/ #FS2049.121	Seek Amendment	<p>RD2 - Delete clauses (a)(ii) and (iii). Retain clauses (a)(i) and (b).</p> <p>Delete RD6</p> <p>RD2 is the Operative Plan rule that requires an urban design assessment for more than 3 units. Clause (a)(i) of the rule implements MDRS as per Schedule 3A. Clause (a)(ii) and (iii) are unnecessary as the assessment of projects that do not comply with garage location and ground floor habitable space are addressed through proposed rule RD20. Given that the purpose of this rule is to enable an urban design assessment, rather than consideration of any built form rule breaches, the retention of the clause (b) 'not limited or publicly notified' clause is supported.</p> <p>Proposed RD6 simply duplicates the assessment required under RD2(a)(i) and therefore is unnecessary and is sought to be deleted.</p>	Support
Kāinga Ora – Homes and Communities / #834.212		Seek Amendment	Delete RD7 and RD8. Replace with one RD rule, Buildings that do not meet Rule 14.6.2.1 Building Height. Retain matter of discretion reference to 'Impacts on neighbouring property – Rule 14.15.3a'.	
Kāinga Ora – Homes and Communities /834.212	LMM Investments 2012 Limited/ #FS2049.131	Seek Amendment	<p>Delete RD7 and RD8. Replace with one RD rule, Buildings that do not meet Rule 14.6.2.1 Building Height. Retain matter of discretion reference to 'Impacts on neighbouring property – Rule 14.15.3a'.</p> <p>The approach to managing height is unnecessarily over-complicated and seeks to introduce additional built form rules relating to outdoor living space and internal boundary setbacks as an activity standard. Kāinga Ora seek that the Plan be simplified so that the [H]RZ has a single height limit rule as per the MDRS (subject to QMs).</p>	Support
Kāinga Ora – Homes and Communities / #834.213		Oppose	Delete RD13	
Kāinga Ora – Homes and Communities /834.213	LMM Investments 2012 Limited/ #FS2049.132	Oppose	Delete RD13 In accordance with [the request to delete] the tree canopy financial contribution rule, the landscaping and tree canopy rule is sought to be deleted and replaced with the MDRS standard.	Support
Kāinga Ora – Homes and Communities / #834.214		Oppose	<p>Delete RD17.</p> <p>As an alternative relief in the event that a regulatory approach to wind modelling is retained, redraft the rule to provide for a permitted pathway (for wind effects) where compliance with the specified performance standards is met. Kāinga Ora seek that the provisions relating to wind effects are relocated to within the General Rules.</p>	
Kāinga Ora – Homes and Communities /834.214	LMM Investments 2012 Limited/ #FS2049.133	Oppose	<p>Delete RD17.</p> <p>As an alternative relief in the event that a regulatory approach to wind modelling is retained, redraft the rule to provide for a permitted pathway (for wind effects) where compliance with the specified performance standards is met. Kāinga Ora seek that the provisions relating to wind effects are relocated to within the General Rules.</p> <p>While Kāinga Ora does not oppose the potential need for wind assessments on tall buildings (above 6 storey), the concern lays around appropriateness of Matters of Discretion, the proposed height limits triggering an assessment and technical expertise available to carry out these assessments or determine if assessments (or anticipated effects) are appropriate.</p> <p>The rule should provide a permitted pathway. Buildings may separately breach height rules but that is a separate matter (just as they will also invariably require consent under RD2 for more than 3 units).</p>	Support

Victoria Neighbourhood Association (VNA) / #61.27		Support	Retain Permitted, Controlled, Discretionary, and Non-Complying Activities in Rule 14.6.1.	
Victoria Neighbourhood Association (VNA) /61.27	Kāinga Ora/ #FS2082.29	Support	Retain Permitted, Controlled, Discretionary, and Non-Complying Activities in Rule 14.6.1. The council is required by law to allow residential buildings of at least 6 storeys within a 1.2km radius of commercial centres such as malls and the city centre. The council plan to enable this, while also allowing up to 10 storeys for residential buildings closer to the city centre. This would enable a wider range of dense housing development options. It would also allow more people to live close to services and amenities.	Oppose
Fred Coughlan/ #798.5		Seek Amendment	Residential development is either a permitted or restricted discretionary activity. Not Discretionary.	
Fred Coughlan/798.5	Kāinga Ora/ #FS2082.576	Seek Amendment	Residential development is either a permitted or restricted discretionary activity. Not Discretionary. Permitted Activities (e.g. High Density Rule P1 for residential activities) leap to a Discretionary Activity where permitted standards not met (this includes the PC14 standards that are less enabling and non-MDRS residential standards mentioned earlier). Restricted Discretionary Activity Rule RD2 (4 or more units) also staircases. It is submitted that there is no opportunity for residential discretionary activities, since it is precluded by Schedule 3A, clause 4 of the RMA – a relevant residential zone must provide for as a restricted discretionary activity the construction and use of 1 or more residential units on a site if they do not comply with the building density standards in the district plan (once incorporated as required by section 77G).	Support
Kāinga Ora – Homes and Communities / #834.215		Seek Amendment	Retain Rule D1 for education,spiritual, heath, pre-school activitieslocated inside the Four Avenues. Adopt the MRZ provisions/ activitystatus for such activities located inthe HRZ outside the Four Avenues.	
Kāinga Ora – Homes and Communities /834.215	LMM Investments 2012 Limited/ #FS2049.134	Seek Amendment	Retain Rule D1 for education,spiritual, heath, pre-school activitieslocated inside the Four Avenues. Adopt the MRZ provisions/ activitystatus for such activities located inthe HRZ outside the Four Avenues. The HRZ now extends muchfurther than the City Centre,however the restrictive ‘4 Aves’rules have been carried over sothey now apply throughout theHRZ.The HRZ includes areas inclose proximity to the largercommercial centres where theprovision of a range ofcommunity facilities is veryappropriate and has long beenanticipated and provided for inthe District Plan. Easyaccessibility to such services and facilities is likewise a keyelement in delivering well-functioning urban environmentsand good quality high densityresidential neighbourhoods.Whilst retention of the existingrestrictive approach to suchfacilities inside the FourAvenues may be appropriate,the existing framework in theResidential Medium DensityZone is considered to be moreappropriate for the HRZ areasoutside of the Four Avenues	Support

Victoria Neighbourhood Association (VNA) / #61.5		Support	Retain Advice Note 1 in 14.6.2.	
Victoria Neighbourhood Association (VNA) /61.5	Clare Dale/ #FS2029.17	Support	<p>Retain Advice Note 1 in 14.6.2.</p> <p>Support expressed for:</p> <p>Advice notice 1 regarding the provision and availability of wastewater, storm water, and water supply infrastructure. We agree that proper provision needs to be determined before any new developments proceed and consider it helpful that this is spelled out in this plan change, as has been done.</p> <p>Building height section 14.6.2.1. We support the specified height limit of 14m in subclause (a).</p> <p>No change requested for:</p> <p>14.6.2.4, 14.6.2.5, 14.6.2.6.</p>	Oppose
Victoria Neighbourhood Association (VNA) / #61.47		Seek Amendment	Amend 14.6.2 by requiring that size of section, aspect, street width, recession plains need to be considered in HRZ.	
Victoria Neighbourhood Association (VNA) /61.47	Anne Dingwall/ #FS2037.120	Seek Amendment	<p>Amend 14.6.2 by requiring that size of section, aspect, street width, recession plains need to be considered in HRZ.</p> <p>Size of section, aspect, street width, recession plains need to be considered in HRZ such as the streets covered by the VNA to ensure good urban planning and the economic, social, and environment benefits of further densification.</p> <p>We strongly support the application of a Sunlight Access Qualifying Matter to the MRZ and HRZ zones of Christchurch, for the reasons CCC have identified in the S77 evaluation within the Section 32 Evaluation Report, particularly identifying changes that are beneficial to the environment, energy efficiency, health, and affordability.</p> <p>We note the high level of over-enabling of intensification under PC14. Therefore, we see this as a win-win-win scenario which both reduces the over-enablement, still provides much more intensification than is needed to meet demand projections, and improves the quality and affordability of the outcome.</p> <p>Where identified elsewhere, we challenge the writers of PC14 to consider the shading defined by the proposal in this QM as an upper limit, seeking opportunities to enable the advantages of even more sunlight access provided the capacity for intensification still remains sufficiently within the demand. This approach will maximise the positive impacts of PC14.</p> <p>Regarding exemptions:</p> <p>Section 32 Appendix 34 Sunlight Qualifying Matter also states that the average road frontage in HRZ is 19.8m, whilst this may be true as an average it doesn't reflect the actual reality of many central city sites. In the VNA area, many sections are less than 10m wide. The access to direct sunlight to heat homes and encourage efficient, sustainable energy sources will be significantly compromised if a one size fits all approach is taken to enabled build heights in central city areas like the VNA which has a high volume of narrow sections that run north to south. Size of section, aspect, street width, recession plains need to be considered in HRZ such as the streets covered by the VNA to ensure good urban planning and the economic, social, and environment benefits of further densification. Adding across the board higher density by enabling 4 storeys in already high density without considering each site on its own merits makes no sense.</p>	Support

Te Mana Ora/Community and Public Health/ #145.7		Seek Amendment	Te Mana Ora recommends that Christchurch City Council considers how housing developments can be designed in a way that encourages social interaction. For example, shared spaces, such as green spaces, paths and bike sheds, can facilitate social interaction in housing developments.	
Tony Pennell/ #308.2		Seek Amendment	[New built form standard to require] provision for future solar panel installation unless orientation north is impossible.	
Tony Pennell/308.2	Kāinga Ora/ #FS2082.248	Seek Amendment	[New built form standard to require] provision for future solar panel installation unless orientation north is impossible. I would suggest this as part of the future sustainability mission for our smart city development. Many of us wish to have solar power on the roof. A 12 mtr building with a terrace or green roof is ideal. A 12 mtr structure will probably preclude solar panels unless designed in.	Oppose
Graham Townsend/ #314.6		Seek Amendment	[Newbuilt form standards to require roofing colours with low reflectivity and]roof-runoff rainwater storage.	
Graham Townsend/314.6	Kāinga Ora/ #FS2082.267	Seek Amendment	<p>[Newbuilt form standards to require roofing colours with low reflectivity and]roof-runoff rainwater storage.</p> <p>The current fashion for black or dark grey roofing will exacerbate the urban heat-island effect. In view of climbing global temperatures, it is therefore a form of collective self-harm. I do not know whether it falls within the Council's power to influence this fashion, but we should be using surfaces with a much higher albedo to reflect as much incoming solar radiation back into space as we can.</p> <p>Given the likelyramping up of la Nina/El Nino cyclicity and hence the likelihood of more severe droughts, new suburban housing should includemandatory roof-runoff rainwater storage.</p>	Oppose
Ann Vanschevensteen/ #514.11		Seek Amendment	<p>The CCC should legislate to make at least 50% of newly-built homes accessible / suitable for people with disabilities, or people who cannot use stairs.</p> <p>Furthermore, all new builds should have solar or wind power generators, grey water toilets and proper soundproofing. That would be properly building for the future.</p>	
Ann Vanschevensteen/514.11	Anne Dingwall/ #FS2037.517	Seek Amendment	<p>The CCC should legislate to make at least 50% of newly-built homes accessible / suitable for people with disabilities, or people who cannot use stairs.</p> <p>Furthermore, all new builds should have solar or wind power generators, grey water toilets and proper soundproofing. That would be properly building for the future.</p>	Support

			<p>Most of the newly built high density housing built so far is not suitable for people living with disabilities/elderly. These are being built mainly by the private sector.</p> <p>The council is required by law to allow residential buildings of at least 6 storeys within a 1.2km radius of commercial centres such as malls and the city centre. The council plan to enable this, while also allowing up to 10 storeys for residential buildings closer to the city centre. This would enable a wider range of dense housing development options. It would also allow more people to live close to services and amenities.</p> <p>The CCC should legislate to make at least 50% of newly-built homes accessible / suitable for people with disabilities, or people who cannot use stairs. Kāinga Ora – Homes and Communities / #834.217		Seek Amendment	<p>Delete Note 14.6.2.a. "The following built form standards shall be met by all permitted activities and restricted discretionary activities RD2, unless otherwise stated."</p> <p>As an alternative relief, if the note is to be retained, then relocate it to the 'how to use the rules' section 14.3 as follows: In addition to being subject to the activity standards, all buildings are also subject to the built form standards.</p>	
Kāinga Ora – Homes and Communities / #834.217	LMM Investments 2012 Limited / #FS2049.136	Seek Amendment	<p>Delete Note 14.6.2.a. "The following built form standards shall be met by all permitted activities and restricted discretionary activities RD2, unless otherwise stated."</p> <p>As an alternative relief, if the note is to be retained, then relocate it to the 'how to use the rules' section 14.3 as follows: In addition to being subject to the activity standards, all buildings are also subject to the built form standards.</p> <p>The built form rules start with a new note that the standards apply "to all permitted activities and restricted discretionary RD2" i.e. 3+ units. This note is ambiguous as it implies that the built form standards do not apply to any non-residential activities or activities that breach other RD, D or NC rules.</p> <p>It is questionable whether the note is necessary, but if it is to be retained it would be better placed in the 'how to use the rules' section. Kāinga Ora seek that it simply state that in addition to being subject to the activity standards, all buildings are also subject to the built form rules.</p>	Support
Anne Dingwall / #908.6		Seek Amendment	[Seeks that council take] a water sensitive design (sponge city) approach for catchment-wide flood risk management.	
Anne Dingwall / #908.6	Anne Dingwall / #FS2037.675	Seek Amendment	<p>[Seeks that council take] a water sensitive design (sponge city) approach for catchment-wide flood risk management.</p> <p>CCT notes that Auckland has been given a one year reprieve by the Minister for the Environment, David Parker, to allow it to undertake natural hazard and flooding investigations work and formulate a planning response. Taking cognizance of a water sensitive design (sponge city) approach for catchment-wide flood risk management, is not only sensible but necessary. The concept applies to other Tier 1 cities including Christchurch.</p> <p>The sponge concept should not just be confined to public open space. It should also apply to private property. Discharge of water from increasingly occurring climate-related intense rain events, has still to be satisfactorily addressed by most councils in NZ. Reduced building setbacks from boundaries and minimum size requirements for outdoor living spaces have the adverse effect of reducing natural porous soakage areas and flow-paths, protected and relied on by the Council as a natural method of managing stormwater.</p> <p>Minister Parker is also recommending the Auckland council consider the findings of the Parliamentary Commissioner for the Environment report 'Are we building harder, hotter cities?' He has made it clear Auckland would need to intensify with plenty of green spaces. "I concur with the concerns raised about the amount and quality of reserve and open spaces being provided in both existing urban areas and greenfield developments."</p> <p>https://www.newsroom.co.nz/auckland-wins-12-month-housing-density-reprieve</p> <p>The Local Government Magazine (3 February 2023) has posed the following question: Is there a risk in the future that the NPS-UD will result in increased urban flooding and massive insurance claims, followed by litigation by affected property owners who were once protected by local bylaws? Infrastructure – the elephant in the urban intensification room 3 February 2023</p> <p>https://localgovernmentmag.co.nz/auckland-floods-2023/</p>	Support

			<p>The insurance issue is not trivial. With the bulk of claims assessments now completed, Tower estimates that the average claims cost for this event (2023 Auckland and Upper North Island Weather Event) will be around double that of other recent large weather events. This is due to deeper flood waters in high density areas causing substantially more damage, contamination, and landslides. (emphasis added)</p> <p>https://www.nzx.com/announcements/410997 Tower Updates Guidance, Provides Update on Large Events 8 May 2023</p> <p>Tim Grafton, Chief Executive of NZ Insurance Council, has said...while there is always an element of risk from the weather, the losses are often more than just financial for communities. "These extreme weather events bring devastation to local economies, social disruption, and environmental damage. So there are very good reasons why we need to take a long view and ask ourselves 'what are we doing to reduce those risks?'"</p> <p>https://www.insurancebusinessmag.com/nz/news/catastrophe/insurance-expert-urges-nz-insurers-to-take-floods-as-seriously-as-earthquakes-436926.aspx</p> <p>In Christchurch, NIWA hydrodynamic scientist Dr Emily Lane is leading a team digitally mapping flood risk, the first attempt to do it across the country rather than local body by local body. "You need to know where are the places that flooding hazard and risk are really bad, and what's it going to look like under climate change, and we don't have that initial picture at the moment, to be able to make the right decisions," she says. Once completed, the map can be updated and adapted to changes in weather. It could still be a couple of years away. Strategic decisions will be challenging even with the best information. Where and how do we build in a climate-changed world? And if some areas are off limit, who pays compensation?</p> <p>https://www.stuff.co.nz/business/300809902/rebuilding-from-gabrielle-cheapest-is-not-always-best--do-the-goddamn-thing-properly</p>	
Davie Lovell-Smith Ltd / #914.24		Seek Amendment	Remove the advice note and create a new qualifying matter on areas which has infrastructure capacity constraints	
Davie Lovell-Smith Ltd /914.24	Catholic Diocese of Christchurch/ #FS2044.152	Seek Amendment	Remove the advice note and create a new qualifying matter on areas which has infrastructure capacity constraints We consider that the advice note stipulating that there may be no infrastructure capacity is ultra vires and should be removed as an advice note. We suggest that areas which have capacity constraints become qualifying matters.	Oppose

Submission Number	Further Submission No	Position	Decision Requested	FS Position
Greg Olive/ #2.12		Oppose	Qualifying Matter Residential Industrial Interface is removed from 419 Halswell Junction Road	
Colleen Borrie/ #10.2		Oppose	Delete height rule 14.6.2.1 allowing buildings up to six storeys in height.	
Andrea Heath/ #16.4		Oppose	Remove the ability to construct buildings of up to 14m without resource consent.	
Grant McGirr/ #21.4		Oppose	That no changes to rules lessen the amount of sunlight that any property (house and land) currently receives.	
Linda Barnes/ #23.4		Seek Amendment	Decrease the heights allowed for new builds.	
Rosemary Fraser/ #26.2		Seek Amendment	Opposes having buildings 90m tall. Make sure that wind and winter conditions are taken into consideration when considering building height controls.	
Rosemary Fraser/26.2	Cambridge 137 Limited/ #FS2042.2	Seek Amendment	Opposes having buildings 90m tall. Make sure that wind and winter conditions are taken into consideration when considering building height controls. Wind tunnels occur between taller buildings as happens on Colombo Street between the library and Te Pai. As Christchurch experiences strong winds and is flat, it could create dangerous situations if there are tall buildings on both side of street. Even with appropriate foundations they would still sway terrifying people on the higher floors. Also, the taller the building the more difficult it would be to escape if there was a fire. Also, with increased shading, there is likely to be for ice on paths for longer in winter.	Oppose
Alastair Grigg/ #28.1		Seek Amendment	[Reduce the proposed 14m height limit] - Retain the current 11m height limit as per the current Residential Medium Density Zone	
Doug Latham/ #30.11		Seek Amendment	Amend Rule 14.6.2.1.b 'Building height' to change height limit to minimum 2 storeys.	
Andrew McNaught/ #34.1		Oppose	Oppose Rule 14.6.2.1 - Building Height	
Andrew McNaught/ #34.3		Support	Withdraw provision 14.6.2.1 - Building Height	
Andrew McNaught/34.3	Brighton Observatory of Environment and Economics/ #FS2092.1	Support	Withdraw provision 14.6.2.1 - Building Height	Support

Kelvin Lynn/ #45.2		Seek Amendment	Amend Rule 14.6.2.1 to reduce the maximum building height in the High Density Residential Zone.	
Tobias Meyer/ #55.6		Support	Support provisions as notified.	
Tobias Meyer/55.6	Christchurch International Airport Limited/ #FS2052.169	Support	<p>Support provisions as notified.</p> <p>Support the development of 4-8 floors in areas with good walkability. Support incentivising development within 5km of the central city. Intensification around other centres should be increased.</p> <p>I think it is vitally important to incentivise development in the 5km closest to the city centre. This is the best place for people to live and the easiest place to live without a car. The current boundaries around city and local centres are quite small and could easily be extended a few blocks. Living near stanmore road I have easy access to the city.</p> <p>I call on you to increase the boundaries of HRZ and areas around local centres and either improve Mrz standards everywhere for more density or give extra incentive to MRZ in favourable places: Maybe even just within 3km of centre (at least within orbitor circle) and 500m of high frequency public transit routes. This is the area best suited to extra density. While our bus routes may change the current frequent routes will almost definitely be the same and be getting better. Even living 5km out from the centre has easy access to the city and other local centres.</p> <p>Possible incentives for MRZ in the inner 5km ring from the middle of the city: smaller setbacks in front half of property with a larger allowable built envelope, or allowing small businesses in the zone, or lower council contributions, or even with enough setback can go above height limits on large sites if the housing is accessible Reiterate this is the place we want the most development.</p>	Oppose
Victoria Neighbourhood Association (VNA) / #61.50		Support	Amend 14.6.2.1 by limiting the building height of new developments to 14m.	
Victoria Neighbourhood Association (VNA) /61.50	Chapman Tripp/ #FS2063.9	Support	<p>Amend 14.6.2.1 by limiting the building height of new developments to 14m.</p> <p>The current central city residential area in Christchurch consists of old streets and old sites(originally for small workers cottages), many residential sites in within the 4 Avenues are therefore very small (often less than 300 sq m). It is inappropriate to enable 4-6 storey high buildings in areas without ruining the economic, social and cultural aspects of the existing community including loss of sunlight, privacy, noise pollution, inability to efficiently use passive heating, inability to grow own fruit and vegetables parking congestion, loss of value in their property and negative impacts on mental wellbeing to name some of the obvious costs.</p> <p>These are all costs that will be borne by both the existing and future residential communities living in current central city residential zones. It seems not equal consideration to all peoples' social and cultural needs are being treated with equal consideration in PC14, as it favours the needs of a selected future resident in a new building that may never come, and whose who now and in future occupy existing homes and whose needs could be quite different to what is being enabled.</p> <ul style="list-style-type: none"> • There is plenty of opportunity to enable new HRZ housing within the CHC central city without only focusing on going higher and intensifying even more in the existing residential areas. <p>For example: the VNA neighbourhood currently has a density of 150 households per hectare and with an average section size of 400-300m sq. There exists at least 7 hectares of land on the south side of the city that has zero households per hectare and which is zoned for mixed use. This land could be enabled for HRZ if the CCC were to think more strategically about how to actively encourage more housing the in central city AND meet the needs of the demand without over enabling, thereby also meeting</p>	Oppose

			<p>the needs of the existing community AND have an excellent outcome in urban planning. The development of the South Frame in the CCRP has not moved forward in any way to make the South side of the city an attractive place to live, work and play all within 500m of the CBD.</p> <ul style="list-style-type: none"> • There could easily be over 2,000 households enabled within this CCRP central city area if development for residential were to be actively encouraged by rezoning, or offering incentives, and actively discourage further density development in existing central city residential already densely developed. By doing this CCC would be proactively and meaningfully participating in the role of urban planning and signalling that the south side is where they want development. Without Council actively managing this opportunity for residential development as they did for the East frame, Developers will continue to do small infill developments based on yield alone, which will not deliver the right outcomes for the city and its residents in relation to urban planning. Refer to Figures 2 & 3 which clearly show that the CHC central city is very clearly unbalanced with all the residential on one side (north) and all the services on the opposite side (south). You can't shift the amenity, but you can develop houses, which is what the Gov't is asking for. 	
Victoria Neighbourhood Association (VNA) /61.50	Chapman Tripp/ #FS2064.9	Support	<p>Amend 14.6.2.1 by limiting the building height of new developments to 14m.</p> <p>The current central city residential area in Christchurch consists of old streets and old sites(originally for small workers cottages), many residential sites in within the 4 Avenues are therefore very small (often less than 300 sq m). Rachel Davies/ #67.10		Seek Amendment	Rigid controls should be in place for access to sunlight and privacy along with how much land coverage dwellings can take up on a plot of land	
Laurie Shearer/ #71.1		Oppose	Oppose higher building height limit in the High Density Residential Zone in Merivale.	
Laurie Shearer/71.1	Anne Dingwall/ #FS2037.147	Oppose	<p>Oppose higher building height limit in the High Density Residential Zone in Merivale.</p> <p>The proposed area catchment of six stories high across the city is way too far reaching.</p> <p>We live in Merivale and this would radically alter the feel and aesthetics of this community detrimentally. We purchased our property in June 2022. This is a 1926 year old bungalow. The street has many other old bungalows as do other streets that are situated in close proximity to the Merivale shopping precinct.</p> <p>Allowance for developers to build six story high buildings on our street or in the area would completely destroy the aesthetic of this community which is currently a positive for the city. As well as the aesthetic, the actual physical reality would be a significant reduction in light and sun in many properties. Psychologically, this would definitely have a negative impact on peoples mental wellbeing.</p>	Support

Linda Blake/ #78.2		Seek Amendment	Supports Sunlight Access Qualifying Matters but opposes requiring a minimum height of 2 storeys in the High Density Residential Zone (proposed 14.15.41), as seasonal affective disorder (SAD) of reduced sun is a recognized medical condition and no sun for several months is not healthy.	
Linda Blake/78.2	Kāinga Ora/ #FS2082.42	Seek Amendment	<p>Supports Sunlight Access Qualifying Matters but opposes requiring a minimum height of 2 storeys in the High Density Residential Zone (proposed 14.15.41), as seasonal affective disorder (SAD) of reduced sun is a recognized medical condition and no sun for several months is not healthy.</p> <p>Qualifying Matters - Sunlight Access</p> <p>3. [R]efer[s] to the Sunlight Access Qualifying Matter 14.6.2.2 where the nationally recommended recession planes would mean 3 months of no sun in winter In Auckland, but 5 months in Christchurch.</p> <p>4. You have recognized the different geographic locations and sun angles, and the colder temperatures in the south, and have sought ways to reduce that to 3 months in Christchurch. Your proposals go some way towards ameliorating that, with 14.15.30 minimum building setbacks and 14.15.31 daylight recession planes.</p> <p>5. However, requiring a minimum height of 2 storeys in the High Density Residential Zone (proposed 14.15.41) and a minimum of 30-50% of habitable ground floor rooms 14.6.2.9 condemns those living in ground floors adjacent to multistorey buildings to no sun for 3 months. I oppose both these two proposed changes, as seasonal affective disorder (SAD) of reduced sun is a recognized medical condition and no sun for several months is not healthy.</p>	Oppose
Vivien Binney/ #81.3		Seek Amendment	Amend proposed provisions for areas set for intensification outside the inner city's Four Avenues by limiting them to three stories.	
Russell Fish/ #116.6		Oppose	Review the 'Industrial Interface' Qualifying Matter, with a view to remove the designation where it is not already an historically established principle.	
Diane Hide/ #137.1		Support	Maintain 14 metre height restriction.	
Sue Sunderland/ #142.4		Oppose	[Remove provisions that enable] 4-10 storey[s]	
Rohan A Collett/ #147.4		Seek Amendment	Minimum heights in the High Density Residential area is increased from two-stories to 3-4 stories	
Simon Smith/ #160.2		Oppose	Objection to the 20m building height of HRZ.	
Paul McNoe/ #171.2		Seek Amendment	[Reduce permitted buiding height] That the permitted height limits within the existing District Plan (prior to PC14) are retained to the maximum extent possible	
David Lang/ #177.1		Seek Amendment	Keep maximum heights in the Central City as they are - oppose the increase in the maximum height of residential buildings in the central city.	
Logan Brunner/ #191.7		Support	[Retain provisions that enable 4-6 storeys]	
Steve Petty/ #203.2		Oppose	Opposes building heights of 3 storeys that impact privacy, noise, housing, animals, people, green spaces and parking.	
Martin Snelson/ #220.9		Seek Amendment	[Remove b.] the requirement for minimum two storey housing.	
Cynthia Snelson/ #221.9		Seek Amendment	[Remove b.] the requirement for minimum two storey housing.	
Atlas Quarter Residents Group (22 owners) / #224.3		Oppose	That the permitted height limits within the existing District Plan (prior to PC14) are retained to the maximum extent possible.	
Atlas Quarter Residents Group (22 owners) /224.3	Kāinga Ora/ #FS2082.167	Oppose	<p>That the permitted height limits within the existing District Plan (prior to PC14) are retained to the maximum extent possible.</p> <p>Who we are:</p> <p>This submission is made on behalf of the following persons, all of whom own units in the Atlas Quarter, 36 Welles Street, Christchurch Central:</p> <p>Richard Ball, Athena Ellis, Phil and Lynette Stenning, Max Lucas, Paul and Jeni Neilson, Jenny Jia and Zhongyang Yuan, Piers and Emma Bayley, Rachel and Tim Scanlan, Eileen and Vernon Payne, Bruce Fraser, Eléonore Dumaine, Peter and Faye Greenwood, Alan Steel, Gillian Smeith, Chelsea Kennedy, Deborah Bowker, Kate and Mike Peers, Peter Morris, Mathilde Vachon, Barbra Pullar, Martin Rumbold and Kirsty Stewart.</p> <p>Key points:</p>	Oppose

We support well designed intensive residential and commercial development, integrated with sustainable transport options. We have already “put our money where our mouths are” by purchasing units in the Atlas Quarter, a large and successful inner-city development of 110 residential and three commercial units.

We oppose the greatly increased height limits proposed by Plan Change 14. They are unnecessary and inappropriate for Christchurch.

We support the inclusion of qualifying matters to enhance design quality and urban amenity across the City.

Relief sought:

1. That the permitted height limits within the existing District Plan (prior to PC14) are retained to the maximum extent possible.
2. Where Government legislation and regulations require increases to height limits, that these are kept to the minimum extent possible for compliance with the regulations.
3. The need for greater intensification is supported but this does not require or justify the proposed increases in height limits as permitted activities.
4. The inclusion of the qualifying criteria is supported, independent of height limits, as a means of promoting good design and ensuring new buildings do not adversely impact existing buildings designed and constructed within the current District Plan requirements.

Reasons:

Following the Christchurch earthquakes, a comprehensive design process was undertaken for the City, particularly for the central city. Deliberate and well-informed decisions were made create a liveable city, with intensified development in the central city and around suburban centres, but with lower central city height limits than previously existed. This has created a compact central city with increased densities compared to before the earthquakes, but without the height of some of the buildings that Christchurch had pre-earthquake . The consolidation has resulted in many vacant sites becoming available which are gradually being filled.

This model was developed by looking at best practice around the world, combined with local input from residents and experts, to create an attractive and vibrant City. It set ambitious goals for increasing densities for residential living, especially in the central city and around suburban centres. It was fully integrated with future transport options and climate resilience objectives.

It has widespread local support and was developed with considerable input and investment from Government (via CERA) and Christchurch City Council. It integrated land use and transport, seeking higher densities and more sustainable transport, as reflected in the Land Use Recovery Plan, Christchurch Central Recovery Plan and the Central City Transport Plan. It was embedded into the District Plan through an Independent Hearing Panel of experts hand-picked by the Government.

The greatly increased height limits proposed Plan Change 14 undermines the objectives and principles that underpin the vision of the 2015 Christchurch Central Recovery Plan:

“To become one of the best small cities in the world, Christchurch needs a city centre that is:

- *an inspiring place to live*
- *an attractive place to invest*
- *the best urban environment in New Zealand.”*

The decision to limit heights was a deliberate choice in achieving this vision. The proposed changes will undermine existing investments, entered into in good faith based on the Recovery Plans, while also reducing the central city’s design coherence and creating a less attractive City.

The many empty sites and carparks that still exist post-earthquake provide adequate future capacity for the foreseeable future, including the “competitive margin” required by Government regulations. The only apparent reason for increasing the height limits appears to be compliance with new Government regulations. If the height limits are to be increased, this change should be done to the minimum extent needed to comply with these ill-considered Government requirements. There is no other justification for the proposed rules.

The proposed rules allow new development to be concentrated in a small number of very tall buildings, with the negative impacts such as greater shading and wind tunnels, accompanied by a continuation of many empty and ugly lots in the central city. As the vacant sites are largely filled with cheap carparking, this further undermines the stated transport sustainability and climate resilience objectives.

The scale of the buildings permitted under PC14 is not consistent with the extensive post-earthquake developments that have already occurred. The post-quake developments have created a very attractive City which will be undermined by these proposals. Existing intensive residential developments, such as the Atlas Quarter, could be overshadowed by new buildings of nearly twice the height on the east and west, blocking sunlight. Others may be blocked to the north.

			<p>In short, the proposal for increased heights across the City are ill-considered solutions for problems that exist in Auckland, Wellington, and possibly other centres, but are not applicable to Christchurch. The geography and existing development of these other centres constrains new development. Post-earthquake Christchurch is quite different from these other centres: it is not constrained for growth opportunities, as demonstrated by the far slower growth in property prices over recent years. Even before the earthquakes, Christchurch had far more stable (less volatile) prices than Auckland and Wellington – a trend that has persisted since at least the 1970's. In Christchurch there is housing choice, particularly with substantial increases in the number of higher density residential apartments.</p> <p>Maximising the benefits of intensification needs to consider the dis-benefits. The proposed Plan identifies loss of tree cover as a disbenefit but does appear to put sufficient emphasis on other matters. Why does it propose financial contributions for loss of tree cover but not for loss of sunlight to others, wind tunnel effects or loss of amenity? In the Christchurch context, the widespread demolition of much of the central city, including most of the taller buildings, and consolidation of activities into more compact precincts, has created a much more attractive City with a visual appearance and aesthetic appropriate for the size of the City, reflected in the Central City Recovery Plan issued by CERA after extensive public and expert engagement. Both residents and visitors are commenting on the attractiveness of this new look. Re-introducing unnecessarily large buildings undermines this new and attractive look. Even with setbacks and other requirements, it has the potential to detract from the amenity and value of the very substantial public and private investment made for the City's re-build and recovery.</p>	
Michael Dore/ #225.7		Oppose	Opposes any residential development above 12 meters beyond the inner city.	
Michael Dore/225.7	Anne Dingwall/ #FS2037.318	Oppose	<p>Opposes any residential development above 12 meters beyond the inner city.</p> <p>Areas for development above 12 meters should not be intermingled in existing residential areas. They should be restricted to the inner city area or in blocks together where there is much unused land and where that development was originally planned following the Christchurch earthquakes. Tall buildings inter laced with traditional residential housing will always create disharmony distrust and break up communities who have often lived on one site for many years.anded approach is like hitting a tack with a sledgehammer.</p> <p>One size does not fit all. How can you compare Auckland or Wellington with Christchurch when the topography is so different. Allowing new buildings of the proposed heights will create shaded areas for existing houses which will affect people's mental health and wellbeing.</p> <p>I strongly object to the intensification of residential land. The Governments heavy handed approach is already creating disharmony which will only get worse. One size does not fit all. How can you compare Auckland or Wellington with Christchurch when the topography is so different. Allowing new buildings of the proposed heights will create shaded areas for existing houses which will affect people's mental health and wellbeing. It should not be too difficult to find sufficient pockets of land including in the central City itself to allow greater intensification to satisfy additional demands for housing and protect existing communities.</p>	Support
Jennifer Smith/ #229.3		Seek Amendment	[Reduce proposed height limit]	
Andrew Ott/ #230.2		Seek Amendment	Reduce permitted housing height to two storeys.	
Susan Barrett/ #236.2		Seek Amendment	That all High Density Residential Zone developments over 2 storeys require individual building and environmental consent that is notified to the community and other affected parties	
Marjorie Manthei/ #237.5		Support	[Retain]14m Permitted [height] in the High Density Residential Zone from Salisbury Street to Bealey Avenue	
Marjorie Manthei/ #237.41		Seek Amendment	[Remove] (b), restricting residential units to no less than 7m	
Marjorie Manthei/237.41	Anne Dingwall/ #FS2037.334	Seek Amendment	[Remove] (b), restricting residential units to no less than 7m I oppose not allowing one-storey units in HDRZ, on the grounds that it compromises Objective 14.2.1. The 2021 'Life in Christchurch' survey focussed on housing in the Central City. Over halfthe respondents said there "should be a good supply of single-story [stand-alone] homes", "designedto take advantage of the sun" (CCC Updated Housing Capacity Assessment, Section 1.5, AttachmentA). Over half of the respondents to the 2022 follow-up survey would not consider living in theCentral City because "housing does not meet their needs" (Section 4.6). The most important factors for those who might consider shifting to the Central City were privacy, sunlight, natural light andoutdoor living space, another reason to ensure adequate recession planes.	Support
Andrea Floyd/ #239.3		Seek Amendment	[Lower the proposed height limit] in the suburbs -2 stories is enough or maybe 3 in certain cases when they don't interfere with the surrounding houses.	
Property Council New Zealand/ #242.4		Seek Amendment	<p>The Property Council note that six storeys are approximately 20 metres in height, and would require a wind test threshold under the current District Plan.</p> <p>Increasing the wind test threshold to 22 metres would remove the risk of adverse outcomes (i.e. discouraging development or donuts of no development within the 1.2km walkable catchment areas), allow for better design outcomes (such as reducing the risk of having a city of flat or smaller angled roofs which anecdotally can cause water tightness issues) and would also simplify the development process for both the Council and applicants.</p>	

Property Council New Zealand/242.4	Cambridge 137 Limited/ #FS2042.32	Seek Amendment	<p>The Property Council note that six storeys are approximately 20 metres in height, and would require a wind test threshold under the current District Plan.</p> <p>Increasing the wind test threshold to 22 metres would remove the risk of adverse outcomes (i.e. discouraging development or donuts of no development within the 1.2km walkable catchment areas), allow for better design outcomes (such as reducing the risk of having a city of flat or smaller angled roofs which anecdotally can cause water tightness issues) and would also simplify the development process for both the Council and applicants.</p> <p>The Council's District Plan wind test threshold of 20m runs the risk of halting all development in Christchurch (excluding the medium density residential zones). For example, all future development, (within high density zone precinct, town centre) that may emerge into a metropolitan centre zone, town centre zone, and local centre (significant zone) will require a wind test threshold. Wind tests can add significant costs and possible delays to a project's timeframe.</p> <p>We are therefore concerned that the wind test threshold, as it stands, could result in adverse outcomes such as: creating pockets of no development (that may result in unintended outcomes such as; 'donuts' or circles of undeveloped areas), delaying development and/or being a roadblock to future development in Christchurch.</p> <p>Feasibility is also an incredibly important part of the puzzle, particularly for residential developments. Consequently, planning regulations that add costs to developments (such as the wind test threshold) could likely result in new developments being built under the wind test threshold, or being built significantly higher.</p> <p>Feasibility and the wind test threshold could result in unintended uniform design consequences for the entire city. For example, if 6 storeys were the most feasible residential developments, we could run the risk of the city ending up with only 6 storey developments. We encourage the Council to work closely with residential developers to understand feasibility aspects of development and encourage incentives for a wide range of development density and design to result in a varied skyline across Christchurch.</p>	Support
Property Council New Zealand/ #242.22		Seek Amendment	[Ensure] Christchurch has sufficient development capacity. This can be achieved through enabling and encouraging greater height and density within high density zone precincts, town centres and metropolitan centres.	
Property Council New Zealand/242.22	Kāinga Ora/ #FS2082.200	Seek Amendment	<p>[Ensure] Christchurch has sufficient development capacity. This can be achieved through enabling and encouraging greater height and density within high density zone precincts, town centres and metropolitan centres.</p> <p>The Council proposes introducing a resource consent requirement as a restricted discretionary activity to help protect Character Areas. The previous draft plan saw the addition of 65 heritage buildings, so we are glad to see this has dropped to 44 buildings post notification.</p> <p>We believe that it is important to effectively balance the preservation of special character with unlocking additional development capacity for Christchurch. It is crucial that Christchurch preserves heritage where appropriate, but also enable development to meet future housing needs.</p> <p>However, given the scale of the proposal and introduction of 11 new residential heritage areas, we wish to highlight the importance of ensuring that Christchurch has sufficient development capacity. This can be achieved through enabling and encouraging greater height and density within high density zone precincts, town centres and metropolitan centres.</p>	Support
Emma Besley/ #254.10		Support	Support enabling 6 to 10 storeys for residential buildings near commercial centers.	
Steve Burns/ #276.1		Seek Amendment	Seek maximum height of 5 stories in Christchurch	
David Brown/ #280.1		Oppose	Limit building heights to 14m as per the proposed medium density residential zone.	
Barry Newman / #295.3		Oppose	I would like the existing process of council and neighbour consent remain.	
Kate Z/ #297.6		Seek Amendment	That resource consent to be required for buildings greater than two stories and all subdivisions.	
Sarah Flynn/ #310.3		Oppose	[That] increased height limits [are not] allowed in residential areas without the need to apply for resource consent.	
Jo Jeffery/ #316.2		Seek Amendment	[Lower maximum building heights in Merivale - relates to request for Residential Character Area]	
Mark Figgitt/ #320.1		Oppose	Ensure that all high density is consented and checked for compliance across the Board.	

John Stackhouse/ #330.1		Seek Amendment	The submitter requests that where a high-density zone (HDZ) meets medium density zone (MDZ, the boundary) medium density requirements in terms of heights and recession planes should be applied.	
Lorraine Wilmshurst/ #335.4		Oppose	Opposes the building heights in the Medium or High Density Residential zones.	
Anna Melling/ #337.3		Seek Amendment	That maximum heights be lowered to account for lower sun height further south.	
Kate Revell/ #338.3		Seek Amendment	Restrict building heights to a maximum of 22 metres.	
Chris Neame/ #339.4		Seek Amendment	Restrict maximum height for development to 22 metres	
Luke Baker-Garters/ #344.10		Oppose	Removal of all central city maximum building height overlays.	
Annette Prior/ #348.2		Oppose	[Regarding high density residential standards] [Seeks to] oppose the height of new residential buildings.	
Stephen Deed/ #349.3		Support	Seek to retain a height limit of two-storey near Lacebark Lane close to local industrial and commercial zones.	
Kathryn Higham/ #359.2		Oppose	[Retain permitted building height of two stories outside the central city]	
Julia Tokumaru/ #372.16		Support	Support high-density housing near the city and commercial centres. Seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Marina Steinke/ #378.1		Seek Amendment	Retain the existing height limits for the central city.	
Peter Earl/ #399.4		Oppose	Oppose the Industrial Interface Qualifying Matter Area height standard.	
William Menzel/ #408.1		Oppose	[Oppose] the [proposed height rules]. [Seeks an unspecified] limit to height.	
Teresa Parker/ #410.3		Oppose	[O]pposes allowing three storey buildings to be built in residential areas that will block sun for such significant parts of the year.	
Caroline May/ #413.5		Oppose	Increased density / building height be located in the inner city and outer suburbs, not existing suburbs.	
Jenene Parker/ #414.2		Seek Amendment	[Reduce maximum] height limits for residential homes	
Zoe McLaren/ #418.2		Support	[S]upport[s] the changes to increase height limits.	
Zoe McLaren/418.2	Kāinga Ora/ #FS2082.301	Support	[S]upport[s] the changes to increase height limits.	Support
Peter Troon/ #422.1		Seek Amendment	[Reduce] the height and density of inner city dwellings.	
Michelle Warburton / #427.3		Seek Amendment	Amend standard to only allow two storeys	
Vincent Laughton/ #434.2		Oppose	Oppose height standard for anything over two storeys.	
Alex Lowings/ #447.5		Support	No increase in the maximum building height in residential zones.	
Mark Paston/ #449.2		Oppose	Oppose height change in residential areas, retain existing height standard.	
Lee Houghton/ #450.1		Oppose	[Do not allow] 6 story housing [in Hornby]	
Michelle Alexandre/ #456.2		Oppose	Oppose all 2nd story up redevelopments	
Golden Section Property/ #460.4		Oppose	Retain the existing height limits for Residential zones	
Jillian Schofield/ #467.5		Oppose	[O]ppose[s] the change in height restrictions that have been proposed and the number of buildings per section in Hornby and surrounding areas [such as] Hei Hei.	
Kem Wah Tan/ #471.5		Seek Amendment	Allow only a maximum of 2 stories buildings and less density per suburb.	
Nicole Cawood/ #473.2		Oppose	[Do not increase height limits in residential areas]	
Di Noble/ #477.4		Not Stated	Oppose changes to building height in the Residential Zones.	

Cindy Gibb/ #481.1		Seek Amendment	Limit the height of any building in Christchurch to a maximum of 4 stories.	
Brian Reynolds/ #486.5		Oppose	Retain existing height limits in residential zones.	
Chris Rennie/ #496.2		Oppose	Provision: Chapter 14 - Residential Decision Sought: Reject proposal to allow building of four or six level dwellings	
Diane Gray/ #504.3		Seek Amendment	Seek amendment to the proposed increased height of residential buildings in suburbs close to the city ie 3 story height	
Paul Young/ #507.9		Support	Support high-density housing near the city and commercial centres. Seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Sam Mills/ #550.5		Support	[S]eek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Henry Seed/ #551.14		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
David Moore/ #552.13		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Josh Flores/ #553.13		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Fraser Beckwith/ #554.13		Seek Amendment	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Winton Land Limited/ #556.12		Seek Amendment	Amend 14.6.2.1 as follows: 14.6.2.1 Building height a. Buildings must not exceed 14.23 metres in height above ground level. The maximum height of any buildings shall be as shown on the Central City Maximum Building Height planning map, except that the Central City Maximum Building Height planning map does not apply to the following land where a maximum building height of 20 metres shall apply to buildings for a retirement village: i. Lot 1 DP 77997 CT CB46D/74; ii. Town Section 118 DP 3780; and iii. Town Section 119 DP 3780. b. Residential units shall not be less than 7 metres in height above ground level. c. Buildings for a residential activity within the Industrial Interface Qualifying Matter Area must not exceed 7 metres in height above ground level or two storey, whichever is the lesser.	
Peter Beswick/ #557.9		Seek Amendment	Support high-density housing near the city and commercial centres. Seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Jan-Yves Ruzicka/ #558.10		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Mitchell Tobin/ #559.13		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres. and play.	
Reece Pomeroy/ #560.13		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Rob McNeur/ #562.13		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Peter Cross/ #563.12		Support	Support high-density housing near the city and commercial centres and seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Rachel Hu/ #564.6		Seek Amendment	[Standardise the MRZ and HRZ zones] e.g., choose for developers to have a clear guideline for 3-storeys or 6-storeys. Or at least make it more standard per suburb than every street block.	
James Harwood/ #571.27		Support	Seeks to retain high density housing near the city and commercial centres.	
Hao Ning Tan/ #594.10		Support	Seek that the Council enables 6 to 10 storeys for residential buildings near commercial centres.	
Logan Sanko/ #595.8		Support	[S]eek that the council enable 6 to 10 storeys for residential buildings near commercial centres	
Hayley Woods/ #596.8		Seek Amendment	[S]eek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Karl Moffatt-Vallance/ #597.8		Support	[S]eek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Caleb Sixtus/ #598.8		Seek Amendment	[S]eek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	

Maggie Lawson/ #600.7		Support	[Retain HRZ provisions that] enable 6 to 10 storeys for residential buildings near commercial centres.	
Jack Hobern/ #601.8		Seek Amendment	[S]eek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Devanh Patel/ #602.4		Seek Amendment	[S]uggest council to push 35 stories instead of 10 in city centre.	
Evan Ross/ #603.8		Support	[S]eek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Daniel Morris/ #604.8		Seek Amendment	[S]eek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Alanna Reid/ #606.8		Support	[S]eek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Daniel Scott/ #624.12		Support	[Supports] high-density housing near the city and commercial centres. Seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Pamela-Jayne Cooper/ #625.10		Seek Amendment	[That b. is deleted]	
Pamela-Jayne Cooper/625.10	Anne Dingwall/ #FS2037.1210	Seek Amendment	[That b. is deleted] That will make it difficult for anyone to build a one-storey dwelling, even on a small section in the HDRZ.	Support
Matt Pont/ #631.3		Support	Support high-density housing near the city and commercial centres. Seek that the council enable 6 to 10 storeys for residential buildings near commercial centres.	
Rod Corbett/ #636.2		Oppose	The submitter requests that the current zoning for the block bounded by Riccarton Rd, Harakeke St, Kilmarnock St and the railway line be retained as it is currently: Suburban Residential Transitional Zone.	
Rod Corbett/636.2	Christchurch International Airport Limited/ #FS2052.269	Oppose	The submitter requests that the current zoning for the block bounded by Riccarton Rd, Harakeke St, Kilmarnock St and the railway line be retained as it is currently: Suburban Residential Transitional Zone. The submitter opposes the proposed plan change for the block bounded by Riccarton Rd, Harakeke St, Kilmarnock St and the railway line to be designated HRZ (High-density residential zone) in place of its current Suburban Residential Transitional Zone. The submitter is a resident of Jane Deans Close and advises the street a safe enjoyable cul-de-sac for many families who would be adversely affected by any six-storey development nearby. Six storeys may be appropriate within Christchurch CBD, but Jane Deans Close is not CBD and any change of designation is entirely inappropriate for this neighbourhood.	Support
Rod Corbett/636.2	Christchurch International Airport Limited/ #FS2052.313	Oppose	The submitter requests that the current zoning for the block bounded by Riccarton Rd, Harakeke St, Kilmarnock St and the railway line be retained as it is currently: Suburban Residential Transitional Zone. The submitter opposes the proposed plan change for the block bounded by Riccarton Rd, Harakeke St, Kilmarnock St and the railway line to be designated HRZ (High-density residential zone) in place of its current Suburban Residential Transitional Zone. The submitter is a resident of Jane Deans Close and advises the street a safe enjoyable cul-de-sac for many families who would be adversely affected by any six-storey development nearby. Six storeys may be appropriate within Christchurch CBD, but Jane Deans Close is not CBD and any change of designation is entirely inappropriate for this neighbourhood.	Support
James Ballantine/ #637.2		Seek Amendment	Seeks that building height in the High Density Zone allows for 6 to 10 storeys for residential buildings near commercial centres.	
James Ballantine/ #637.6		Support	Support High Density Zone near city and commercial centres.	
Central Riccarton Residents' Association Inc/ #638.9		Seek Amendment	[Delete b. minimum height for residential units]	
Central Riccarton Residents' Association Inc/638.9	Kāinga Ora/ #FS2082.336	Seek Amendment	[Delete b. minimum height for residential units] We are opposed to this provision. Why should current single level dwellings be compulsorily dwarfed by multi-storey buildings with adverse effects on those single level dwellings? There is absolutely no justification.	Oppose
Wendy Fergusson/ #654.6		Seek Amendment	Reduce all the building height allowances a bit	
Francesca Teague-Wytenburg/ #656.12		Seek Amendment	Enable 6 to 10 storeys for residential buildings near commercial centres.	
Catherine & Peter Morrison/ #664.2		Oppose	Rezone to Residential Special Character	

Cooper Mallett/ #666.2		Seek Amendment	Make all the tall buildings in the middle of the city											
Canterbury / Westland Branch of Architectural Designers NZ/ #685.56		Seek Amendment	<p>Amend subclause (a) to, "Buildings must not exceed the height above ground level in the tablebelow:</p> <table border="1" data-bbox="789 247 2540 730"> <tr> <td><i>Bordering the City Centre Zone</i></td> <td><i>22m</i></td> </tr> <tr> <td><i>Bordering a Town Centre</i></td> <td><i>16m</i></td> </tr> <tr> <td><i>Neighbouring a Town Centre at Riccarton, Hornby or Papanui</i></td> <td><i>18m</i></td> </tr> <tr> <td><i>Bordering a Local Centre</i></td> <td><i>12m</i></td> </tr> <tr> <td><i>Bordering a Neighbourhood Centre</i></td> <td><i>12m</i></td> </tr> </table> <p>.”</p>	<i>Bordering the City Centre Zone</i>	<i>22m</i>	<i>Bordering a Town Centre</i>	<i>16m</i>	<i>Neighbouring a Town Centre at Riccarton, Hornby or Papanui</i>	<i>18m</i>	<i>Bordering a Local Centre</i>	<i>12m</i>	<i>Bordering a Neighbourhood Centre</i>	<i>12m</i>

Canterbury / Westland Branch of Architectural Designers NZ/ #685.57		Seek Amendment	Amend subclause (b) to, “Residential units shall not be less than the maximum height permitted in the MRZ”											
Canterbury / Westland Branch of Architectural Designers NZ/685.57	Anne Dingwall/ #FS2037.1161	Seek Amendment	Amend subclause (b) to, “Residential units shall not be less than the maximum height permitted in the MRZ” The purpose of the HRZ is to further intensify development around commercial centres. The desire is to achieve a gradual intensification as we approach the commercial area. This rule is worded to permit a ‘ring’ of lesser intensification around a commercial centre.	Support										
Canterbury / Westland Branch of Architectural Designers NZ/685.57	Kāinga Ora/ #FS2082.402	Seek Amendment	Amend subclause (b) to, “Residential units shall not be less than the maximum height permitted in the MRZ” The purpose of the HRZ is to further intensify development around commercial centres. The desire is to achieve a gradual intensification as we approach the commercial area. This rule is worded to permit a ‘ring’ of lesser intensification around a commercial centre.	Oppose										
Terence Sissons/ #696.5		Seek Amendment	Require independent geo-tech advice as a precondition to any development over 10 metres.											
Robyn Pollock/ #712.1		Seek Amendment	Reduce permitted building height in Hornby											
Robyn Pollock/ #712.2		Seek Amendment	Six storey buildings should be concentrated in a discrete area rather than scatter them amongst older established suburbs											
Mitchell Coll/ #720.26		Seek Amendment	<p>Amend subclause (a) to, “Buildings must not exceed the height above ground level in the table below:</p> <p><i>Bordering the City Centre Zone: 22m</i></p> <p><i>Bordering a Town Centre: 16m</i></p> <p><i>Neighbouring a Town Centre at Riccarton, Hornby or Papanui: 18m</i></p> <p><i>Bordering a Local Centre: 12m</i></p> <p><i>Bordering a Neighbourhood Centre: 12m</i></p>											

			<i>These heights are indicative and require further research to ensure their suitability.</i>	
Mitchell Coll/ #720.27		Seek Amendment	1. Amend subclause (b) to, "Residential units shall not be less than the maximum height permitted in the MRZ."	
Alan Murphy/ #724.9		Support		
Ryman Healthcare Limited/ #749.4		Seek Amendment	[T]hat the built form standard inserted by PC14 should carry over the [20 metre] height limit approved for the Park Terracesite [78 Park Terrace] through the Replacement Plan process. [For example]: a) Buildings must not exceed 14 metres in height above ground level. The maximum height of any building does not apply to the following land where a maximum building height of 20 metres shall apply to buildings for a retirement village: i. Lot 1 DP 77997 CT CB46D/74; ii. Town Section 118 DP 3780; and iii. Town Section 119 DP 3780.	
Tosh Prodanov/ #758.1		Seek Amendment	[Delete 14.6.2.1.b. Minimum building height]	
Tosh Prodanov/758.1	Patricia Harte/ #FS2069.8	Seek Amendment	[Delete 14.6.2.1.b. Minimum building height] There is no need to impose a minimum building height requirement in the High Density Residential Zone. While it is desirable to allow increased density, forcing it on property owners when doing so is at odds with the property owners objectives for their land is counterproductive and wasteful, because it prevents a productive land use that would otherwise go ahead. The bureaucrats who impose limits on the freedom of land owners to utilise their own land for its best use at any given time have no idea of the real world considerations property owners may be dealing with within the complexity of coordinating the development of their sites. As an example my family owns three adjoining sites in the inner city. Two are currently vacant and a third has an old building which is at end of life. The site ultimately suits a medium rise or high rise development, but given its scale (ballpark \$30 to \$50 million development) this is not feasible in the current economic environment, and may not be so for up to a decade or more. In the intervening period I would like to move transportable, high density accommodation or workers units onto the site in order to create economic benefit by providing accommodation to workers or those wanting affordable accommodation. For example it would make an ideal site for workers on the new Te Kaha stadium as it is only 3 minutes drive or 10 minutes walk away from the site. This site specific use and benefit to both the broader economy and myself is hindered by a minimum building height requirement that prevents me from providing single level units and/or being able to start with single level units before progressing to two level units as part of a progressed development as initial income provides the funding to allow for a second level. Alternatively if I was to move transportable homes to the site to provide housing and generate income, given most transportable homes are single story, '14.15.41 Minimum building height in the High Density Residential Zone' prevents this and creates an unnecessary barrier to utilising the site until a larger scale development becomes economically feasible.	Support
Robert Braithwaite/ #772.1		Seek Amendment	Amend the minimum height rules for the subject area to allow for single level dwellings for older residents. Specific properties affected by this change: - 104 Bristol Street St Albans - 108 Bristol Street St Albans	
Lisa Winchester/ #777.2		Seek Amendment	Resource consent is still required and dwellings in suburbs should be limited to 2 storeys high. Losing valuable sunlight is a major concern.	

Fiona Bennetts/ #793.4		Support	[Retain height limit]	
Fiona Bennetts/793.4	Anne Dingwall/ #FS2037.735	Support	[Retain height limit] I agree that we need to build up not out.	Support
Howard Pegram/ #807.6		Seek Amendment	Amend maximum building height to 7m.	
Retirement Villages Association of New Zealand Inc/ #811.69		Support	Retain Standard 14.6.2.10 as notified.	
Retirement Villages Association of New Zealand Inc/811.69	Summerset Group Holdings Limited/ #FS2097.63	Support	Retain Standard 14.6.2.10 as notified. The RVA supports Standard 14.6.2.1 as it aligns with the intent of the NPS-UD and the Enabling Housing Act.	Support
Carter Group Limited/ #814.172		Seek Amendment	Amend Rule 14.6.2.1, so as to provide for a 23m maximum building height.	
Carter Group Limited/814.172	Clare Dale/ #FS2029.14	Seek Amendment	Amend Rule 14.6.2.1, so as to provide for a 23m maximum building height. Whilst provision for increased building height is supported, a 14m building height is inadequate for a high density residential zone within the central city, where Policy 3(c) of the NPS-UD directs that development of up to six stories is to be 'enabled'. In order to 'enable' development of up to six stories a height limit of 23m as a permitted activity is required for this zone.	Support
Carter Group Limited/814.172	Kāinga Ora/ #FS2082.1002	Seek Amendment	Amend Rule 14.6.2.1, so as to provide for a 23m maximum building height. Whilst provision for increased building height is supported, a 14m building height is inadequate for a high density residential zone within the central city, where Policy 3(c) of the NPS-UD directs that development of up to six stories is to be 'enabled'. In order to 'enable' development of up to six stories a height limit of 23m as a permitted activity is required for this zone.	Seek Amendment
The Catholic Diocese of Christchurch / #823.138		Seek Amendment	Amend, so as to provide for a 23m maximum building height.	
The Catholic Diocese of Christchurch /823.138	Clare Dale/ #FS2029.15	Seek Amendment	Amend, so as to provide for a 23m maximum building height. Whilst provision for increased building height is supported, a 14m building height is inadequate for a high density residential zone within the central city, where Policy 3 (c) of the NPS-UD directs that development of up to six stories is to be 'enabled'.	Support
The Catholic Diocese of Christchurch /823.138	Anne Dingwall/ #FS2037.1370	Seek Amendment	Amend, so as to provide for a 23m maximum building height. Whilst provision for increased building height is supported, a 14m building height is inadequate for a high density residential zone within the central city, where Policy 3 (c) of the NPS-UD directs that development of up to six stories is to be 'enabled'.	Oppose
The Catholic Diocese of Christchurch /823.138	Carter Group Limited/ #FS2045.311	Seek Amendment	Amend, so as to provide for a 23m maximum building height. Whilst provision for increased building height is supported, a 14m building height is inadequate for a high density residential zone within the central city, where Policy 3 (c) of the NPS-UD directs that development of up to six stories is to be 'enabled'.	Support
The Catholic Diocese of Christchurch /823.138	Kāinga Ora/ #FS2082.1154	Seek Amendment	Amend, so as to provide for a 23m maximum building height. Whilst provision for increased building height is supported, a 14m building height is inadequate for a high density residential zone within the central city, where Policy 3 (c) of the NPS-UD directs that development of up to six stories is to be 'enabled'.	Seek Amendment
Kāinga Ora – Homes and Communities / #834.218		Seek Amendment	Amend clause (a) of the rule as follows:a. Buildings must not exceed 14 22metres in height above ground level;b. Buildings located in the HeightVariation Control overlay must not exceed 36 metres in height aboveground level;	
Kāinga Ora – Homes and Communities /834.218	Clare Dale/ #FS2029.16	Seek Amendment	Amend clause (a) of the rule as follows:a. Buildings must not exceed 14 22metres in height above ground level;b. Buildings located in the HeightVariation Control overlay must not exceed 36 metres in height aboveground level; The HRZ is sought to have two height limit areas – a 22m limit for the majority of the area taking in what are currently the MRZ Local intensification precinct, and the Large Local Centre Intensification Precinct. The extent of the HRZ is proportionate to the size of the centre so large centres support a greater walkable catchment. But the height enabled in the HRZ remains the same at 22m. A 36m 'Height Variation Control' is sought to apply 0-400m from the edge of the Metropolitan Centre Zone (as sought within this submission)(Riccarton, Hornby and Papanui centres).	Support

Kāinga Ora – Homes and Communities /834.218	Anne Dingwall/ #FS2037.29	Seek Amendment	<p>Amend clause (a) of the rule as follows:a. Buildings must not exceed 14 22metres in height above ground level;b. Historic Places Canterbury/ #835.15		Seek Amendment	<p>The submitter suggests that creating a Qualifying Interface Area similar to that proposed for Riccarton Bush may be a more flexible means of providing a buffer for the heritage areas of Hagley Park, Cranmer Square and Latimer Square than adjusting the height limits around them. The submitter believes that it is important that some mechanism be put in place to protect their heritage values, their open space landscape values and the views outwards from within those spaces.</p>	
Historic Places Canterbury/835.15	Anne Dingwall/ #FS2037.602	Seek Amendment	<p>The submitter suggests that creating a Qualifying Interface Area similar to that proposed for Riccarton Bush may be a more flexible means of providing a buffer for the heritage areas of Hagley Park, Cranmer Square and Latimer Square than adjusting the height limits around them. The submitter believes that it is important that some mechanism be put in place to protect their heritage values, their open space landscape values and the views outwards from within those spaces.</p> <p>The submitter acknowledges that it is sensible and appropriate to concentrate the highest density in the central city. However, they have concerns about the heights in the central city zone and high density. The submitter believes there is a need for a more graduated height around the boundaries in respect of Hagley Park, Cranmer Square and Latimer Square.</p> <ul style="list-style-type: none"> - The proposed heights would allow 90 metres to the west of Latimer Square and 32 metres around Cranmer Square and to the east of Latimer Square. - The proposed heights would allow 32 metres along Park Terrace adjoining Hagley Park. 	Support
